RWQCB Region:	SANTA ANA RWQCB (REGION 8)
Site History:	From the 1950 s until Raytheon discontinued operations in 2000, the 14-acre site was used for the development, manufacture, and assembly of electronic components. These operations included the use of solvents that contained volatile organic compounds (VOCs), primarily tetrachloroethylene (PCE) and trichloroethylene (TCE). Comprehensive environmental investigations and interim cleanup actions have been

RAYTHEON COMPANY (Continued) **1000240988**

conducted at the site. VOCs have been detected in soil, soil gas, and groundwater.). The source of VOCs was from the historic storage and use of solvents in an area of the site located east of a former building that was located at 530 Superior Avenue. This building has been demolished and has been replaced with an open-air parking garage. The VOCs have not impacted drinking water supplies because the City of Newport Beach does not use the groundwater underlying the site as a source of drinking water. The City s drinking water is obtained from groundwater production wells located several miles inland from the site and from imported water supplies. Site-specific risk assessments conducted for Raytheon assert that the concentrations of VOCs detected in the soil vapor do not pose a significant potential risk to human health or the environment. SOIL An off-site soil vapor investigation was conducted in the residential area east of Newport Blvd. in 2003. A comprehensive soil vapor investigation was conducted in 2004 by installing soil vapor monitoring probes on-site and at various locations in residential/commercial area south of Dana Road and west of Newport Blvd. Samples from shallow soil vapor probes were collected and analyzed from May 2004 through January 2009. VOCs were found in soil vapor (the air and gases found underground between soil particles) at on-site and off-site locations. After each soil vapor sampling event, Raytheon had risk assessments performed to determine the potential risks to human health associated with VOCs in the soil. The initial results of the soil gas assessments indicated that some VOC concentrations in the soil gas exceeded the California Human Health Screening Levels (CHHSLs). The CHHSLs are concentrations of hazardous materials in groundwater, soil, or soil gas that the California Environmental Protection Agency considers to be below thresholds of concern for risks to human health. The presence of a chemical at concentrations in excess of a CHHSL does not indicate that adverse impacts to human health are occurring or will occur, but suggests further evaluation of potential health concerns is warranted. Raytheon conducted a further evaluation that utilized site specific conditions instead of the generic default assumptions used in the CHSSLs. When these site-specific conditions were factored into the evaluation of potential health risks, the estimated cancer risk from the potential exposure from vapor intrusion in the on-site and nearby off-site buildings ranged from between the 10-6 (one-in-a-million) and 10-5 (ten-in-a-million) to below the 10-6 residential cancer risk management level. To ensure continued protection of human health, Raytheon installed and operated a soil vapor extraction (SVE) cleanup system and has conducted additional soil vapor monitoring. The SVE system worked by extracting (using vacuum pressure) impacted vapor from the subsurface, transporting the vapor via underground piping to an on-site treatment system, and then removing the VOCs from the vapor. The SVE system included extraction wells along the southern site boundary to prevent the potential migration of vapors away from the site. Additionally, extraction wells were located on-site in areas where elevated concentrations of VOCs were detected in soil vapor. The SVE system operated from October 2005 to September 2007. A site-specific risk assessment was performed after the SVE system was shut-down. The risk assessment concluded that the concentration of VOCs in the soil vapor in the off-site residential areas did not exceed the residential risk management levels and the soil vapor in the on-site areas did not exceed the commercial risk management levels. Additional post-remediation soil vapor sampling is scheduled

RAYTHEON COMPANY (Continued) **1000240988**

to occur in 2009 to confirm the continued protection of human health and the environment. Soil vapor intrusion and indoor air monitoring studies were conducted in the existing on-site buildings as part of the redevelopment of the site into medical offices. The intended medical use of the facility required the application of the more stringent residential/sensitive use risk management levels. The Newport Healthcare Center has implemented indoor air monitoring and installed a sub-slab vapor recovery/venting system on building 510 to minimize the potential for soil vapor intrusion into the planned medical office buildings and to maintain potential risk associated with vapor intrusion below the 10-6 residential/sensitive use risk level. GROUNDWATER A comprehensive groundwater assessment was conducted on- and off-site. Groundwater beneath and around the site is highly brackish and saline, and contains naturally occurring petroleum and methane. This groundwater is not suitable for consumption, and is not used for drinking water. Raytheon has installed 91 groundwater monitoring wells to monitor groundwater conditions in the site vicinity. Groundwater beneath the site flows in a south-southeasterly direction, roughly following Newport Boulevard toward Newport Bay. Elevated concentrations of PCE and TCE from the site have been detected in groundwater beneath the site, and extending several hundred feet downgradient (south-southeast) of the site. Environmental assessments have revealed that PCE and TCE detected in this area are naturally degrading into breakdown compounds. Elevated concentrations of vinyl chloride, a breakdown compound of PCE and TCE, have been detected approximately 1000 feet downgradient from the site. Very low concentrations of 1,2-dichloroethleye, another breakdown product of PCE and TCE, have been detected in the downgradient groundwater monitoring well on the south side of Pacific Coast Hwy. These low concentrations are below regulatory guidelines for human health and aquatic life, which indicates that a significant impact to Newport Bay is unlikely. In addition, low concentrations of benzene in the groundwater monitoring well indicate the underlying groundwater has been impacted by releases from nearby underground fuel tanks not associated with the former Raytheon site. On the east side of Newport Blvd, the results of the groundwater monitoring indicate that there are other potential sources of VOCs to the groundwater not associated with the former Raytheon site. Final Remedial Actions for Groundwater Enhanced in-situ (in-place) bioremediation has been selected as the groundwater cleanup method for the site. In-situ bioremediation has successfully been performed at the site during pilot testing and as part of limited interim groundwater cleanup activities. The interim groundwater cleanup was performed to initiate VOC destruction while the long-term final cleanup measures are being developed. In-situ bioremediation involves the injection of a mixture of dilute food-grade vegetable oil and lactate into groundwater. The vegetable oil/lactate mixture serves as a nutrient source for naturally occurring bacteria that destroy the chlorinated VOCs. The breakdown process generates a series of intermediate daughter breakdown products, including vinyl chloride, and ultimately, harmless end products. The goal of in-situ bioremediation is to feed the microbes to accelerate the rate of natural VOC degradation that is already occurring in groundwater at the site. To further enhance the VOC cleanup process, non-pathogenic, naturally-occuring bacteria are also added with the vegetable oil. These naturally-occurring bacteria have been used at several other sites in California for groundwater

RAYTHEON COMPANY (Continued) **1000240988**

cleanup purposes. The bacterial population wanes once the vegetable oil is completely used up as a food sources. The groundwater cleanup includes the injection of water mixed with food-grade vegetable oil, sodium lactate and natural, non-pathogenic bacteria (this mixture is often referred to as amended water) into on-site groundwater and into off-site groundwater along Hospital Road, east of Newport Boulevard. UPCOMING/ONGOING ACTIVITIES Raytheon currently is performing regularly scheduled soil vapor and groundwater monitoring at the site. Raytheon intends to continue on-site enhanced bioremediation groundwater injections.

RWQCB Region:	SANTA ANA RWQCB (REGION 8)
Site History:	From the 1950 s until Raytheon discontinued operations in 2000, the 14-acre site was used for the development, manufacture, and assembly of electronic components. These operations included the use of solvents that contained volatile organic compounds (VOCs), primarily tetrachloroethylene (PCE) and trichloroethylene (TCE). Comprehensive environmental investigations and interim cleanup actions have been conducted at the site. VOCs have been detected in soil, soil gas, and groundwater. The source of VOCs was from the historic storage and use of solvents in an area of the site located east of a former building that was located at 530 Superior Avenue (Figure 1). This building has been demolished and has been replaced with an open-air parking garage. The VOCs have not impacted drinking water supplies because the City of Newport Beach does not use the groundwater underlying the site as a source of drinking water. The City s drinking water is obtained from groundwater production wells located several miles inland from the site and from imported water supplies. Site-specific risk assessments conducted for Raytheon conclude that the concentrations of VOCs detected in the soil vapor do not pose a significant potential risk to human health or the environment. Raytheon and the Water Board have agreed to perform additional

HUGHES AIRCRAFT COMPANY (Continued) **U003433369**

remedial actions to ensure continued protection of human health and the environment. An off-site soil vapor investigation was conducted in the residential area east of Newport Blvd. in 2003. A comprehensive soil vapor investigation was conducted in 2004 by installing soil vapor monitoring probes on-site and at various locations in residential/commercial area south of Dana Road and west of Newport Blvd. Samples from shallow soil vapor probes were collected and analyzed from May 2004 through January 2009. VOCs were found in soil vapor (the air and gases found underground between soil particles)at on-site and off-site locations. After each soil vapor sampling event, Raytheon had risk assessments performed to determine the potential risks to human health associated with VOCs in the soil. The initial results of the soil gas assessments indicated that some VOC concentrations in the soil gas exceeded the California Human Health Screening Levels (CHHSLs). The CHHSLs are concentrations of hazardous materials in groundwater, soil, or soil gas that the California Environmental Protection Agency considers to be below thresholds of concern for risks to human health. The presence of a chemical at concentrations in excess of a CHHSL does not indicate that adverse impacts to human health are occurring or will occur, but suggests further evaluation of potential health concerns is warranted. Raytheon conducted a further evaluation that utilized site specific conditions instead of the generic default assumptions used in the CHSSLs. When these site specific conditions were factored into the evaluation of potential health risks, the estimated cancer risk from the potential exposure from vapor intrusion in the onsite and nearby off-site buildings ranged from between the 10-6 (one-in-a-million) and 10-5 (ten-in-a-million) to below the 10-6 residential cancer risk management level. To ensure continued protection of human health, Raytheon installed and operated a soil vapor extraction (SVE) cleanup system and has conducted additional soil vapor monitoring. The SVE system worked by extracting (using vacuum) impacted vapor from the subsurface, transporting the vapor via underground piping to an on-site treatment system, and then removing the VOCs from the vapor. The SVE system included extraction wells along the southern site boundary to prevent the potential migration of vapors away from the site. Additionally, extraction wells were located on-site in areas where elevated concentrations of VOCs were detected in soil vapor.The SVE system operated from October 2005 to September 2007. A site-specific risk assessment was performed after the SVE system was shut-down. The risk assessment concluded that the concentration of VOCs in the soil vapor in the off-site residential areas did not exceed the residential risk management levels and the soil vapor in the on-site areas did not exceed the commercial risk management levels. Additional post-remediation soil vapor sampling is scheduled to occur in 2009 to confirm the continued protection of human health and the environment. Soil vapor intrusion and indoor air monitoring studies were conducted in the existing on-site buildings as part of the redevelopment of the site into medical offices. The intended medical use of the facility required the application of the more stringent residential/sensitive use risk management levels. The Newport Healthcare Center has implemented indoor air monitoring and installed a sub-slab vapor recovery/venting system on building 510 to minimize the potential for soil vapor intrusion into the planned medical office buildings and to maintain potential risk associated with vapor intrusion below the 10-6 residential/sensitive use risk level. A comprehensive groundwater

HUGHES AIRCRAFT COMPANY (Continued) **U003433369**

assessment was conducted on- and off-site. Groundwater beneath and around the site is highly brackish and saline, and contains naturally occurring petroleum and methane. This groundwater is not suitable for consumption, and is not used for drinking water. Raytheon has installed 91 groundwater monitoring wells to monitor groundwater conditions in the site vicinity. Groundwater beneath the site flows in a southsoutheasterly direction, roughly following Newport Boulevard toward Newport Bay. Elevated concentrations of PCE and TCE from the site have been detected in groundwater beneath the site, and extending several hundred feet downgradient (south-southeast) of the site. Environmental assessments have revealed that PCE and TCE detected in this area are naturally degrading into breakdown compounds. Elevated concentrations of vinyl chloride, a breakdown compound of PCE and TCE, have been detected approximately 1000 feet downgradient from the site. Very low concentrations of 1,2-dichloroethleye, another breakdown product of PCE and TCE, have been detected in the downgradient groundwater monitoring well on the south side of Pacific Coast Hwy. These low concentrations are below regulatory guidelines for human health and aquatic life, which indicates that a significant impact to Newport Bay is unlikely. In addition, low concentrations of benzene in the groundwater monitoring well indicate the underlying groundwater has been impacted by releases from nearby underground fuel tanks not associated with the former Raytheon site. On the east side of Newport Blvd, the results of the groundwater monitoring indicate that there are other potential sources of VOCs to the groundwater not associated with the former Raytheon site. Final Remedial Actions for Groundwater Enhanced in-situ (in-place) bioremediation has been selected as the groundwater cleanup method for the site. In-situ bioremediation has successfully been performed at the site during pilot testing and as part of limited interim groundwater cleanup activities. The interim groundwater cleanup was performed to initiate VOC destruction while the long-term final cleanup measures are being developed. In-situ bioremediation involves the injection of a mixture of dilute food-grade vegetable oil and lactate serves as a nutrient source for naturally occurring bacteria that destroy the chlorinated VOCs. The breakdown process generates a series of intermediate daughter breakdown products, including vinyl chloride, and ultimately, harmless end products. The goal of in-situ bioremediation is to feed the microbes to accelerate the rate of natural VOC degradation that is already occurring in groundwater at the site. To further enhance the VOC cleanup process, non-pathogenic, naturally-occurring bacteria are also added with the vegetable oil. These naturally-occurring bacteria have been used at several other sites in California for groundwater cleanup purposes. The bacterial population wanes once the vegetable oil is completely used up as a food sources. The groundwater cleanup will include injection of water mixed with food-grade vegetable oil, sodium lactate and natural, non-pathogenic bacteria (this mixture is often referred to as amended water) into on-site groundwater and into off-site groundwater along Hospital Road, east of Newport Boulevard. This activity will also require construction of injection wells and use of temporary tanks for storage and mixing of the amended water, along with hoses, pumps, meters, and equipment to deliver the amended water to the groundwater.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
AIR EMISSIONS CLASSIFICATION UNKNOWN
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
OSHA ESTABLISHMENT
RISK AND TECHNOLOGY REVIEW
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date:	05-19-2020
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if the waste generated is a hazardous waste.
Violation Notes:	Returned to compliance on 10/01/2020. OBSERVATION: Owner/Operator failed to determine if the waste generated from the new metal processing/deburring machine is a hazardous waste. This process was introduced in October 2019. CORRECTIVE ACTION: Submit documentation to the CUPA within 60 days indicating you have determined that the waste in question is hazardous or not and how this determination was made. i.e. Generator knowledge, lab analysis, etc. If determined to be hazardous waste then you must manage it as such. Specify how it is being managed in response documentation.

Violation Description:	Failure to obtain a permit or grant of interim status to accumulate hazardous waste longer than 90 days.
Violation Notes:	Returned to compliance on 05/19/2015. Several containers of hazardous waste were observed in the Hazardous Waste Storage Area that had been stored onsite longer than the ninety day storage time period. Facilities who generate more than 1000 kg of hazardous waste per month may store waste on site up to 90 days. CORRECTIVE ACTION: Immediately contact a licensed hazardous waste transporter to dispose of this waste under manifest and submit a copy of the manifest to the CUPA.

Violation Description:	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g.,

HIXSON METAL FINISHING CO (Continued) **1000384999**

coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f

Violation Notes: Returned to compliance on 12/31/2015. Note that this facility was cited for this violation at the last routine inspection conducted 5/5/14.

Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: Returned to compliance on 05/19/2015. Appropriate training topics for appropriate staff and a training log meeting the requirements listed above were not observed this date. For example, in the Masking Area, staff occasionally used MEK and acetone solvents to clean and prepare metal pieces. It was not clear to staff if cotton swabs used to apply

HIXSON METAL FINISHING CO (Continued) **1000384999**

	those solvents were required to be managed as hazardous waste and appropriate containers were not readily available. Training should be provided to give staff clear instructions regarding the proper segregation of hazardous waste and municipal trash.

Citation:	22 CCR 45 67450.3(c)(9)(F) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(9)(F)
Violation Description:	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to

HIXSON METAL FINISHING CO (Continued) **1000384999**

placing the tank system in service. The written assessment shall state that, the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed to meet the regulation. The tank assessment shall be valid for five (5) years.

Violation Notes: Returned to compliance on 10/03/2022. The Lamella Clarifier was recently replaced and must be certified by a professional engineer. Please have a tank assessment completed for the Lamella Clarifier by a professional engineer and submit the documentation to this Agency when completed.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 05/19/2015. The following containers were observed missing some or all of the required markings. Note that this is a repeat violation. - Vacuum Cadmium Plating - Container of cadmium scrapings - Havilland Treatment Unit - Aluminum etch tank - Precious Metals Plating - Nickel filters container - Spray Booth (2) - Rag container - Paint Storage Area - "Supersac" container was mislabeled as "Satellite Accumulation." See attached Fact Sheet re: satellite accumulation requirements All hazardous waste containers shall be marked with the following information: 1) the words Hazardous Waste ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-16-2000
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: SWPPP needed to be better developed to the site.- General Housekeeping is needed. - Facility had high readings from the 98-99 report.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-30-2012
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: warm and sunny. SWPPP dated 1/12/2012; not certified but signed immediately. Site is power washed once 6-9 months; reduced from 2 times/year. Asphalt paving has been replaced with concrete paving partly to improve housekeeping. No samples taken this season. Area between buildings 1 and 2 is neat and orderly except for back alley of building 2. Between buildings 2 and 3 is wastewater treatment area; has legacy staining on concrete in front of roll-up door to anodized line. Roof of building 2: green stains in front of exhausts still present, oil leak in chiller area is fixed. Between buildings 3 and 4: evidence of old spills found in front and back of secondary containment pallets; two pallets found with holes in bottoms; pallets contain varying levels of liquid - one found nearly full in spite of reported daily inspections; broken downspout threatens to drain into a pallet; reported similar problem from roof gutter. Found open trash bin; closed immediately. Pipes, parts, empty poly tank, and drums of potentially-contaminated soil found in outside alley of building 4; instructed Contact to sample runoff here due to industrial activity.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-10-2010
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Facility is part of group monitoring. Sample is a composite from several discharge points serving different drainage areas. Told

HIXSON METAL FINISHING CO (Continued) **1000384999**

Contact that this was ineffective because it doesn't provide sufficient resolution to determine if BMPs are effective in each of the drainage areas. Area beneath and surrounding the roof-mounted chiller motors is stained with oil; observed bottles of make-up oil nearby indicative of a chronic problem. Although motors are protected by a fixed roof, drainage allows runoff to flow over the oil stains resulting in staining leading from the area. Observed a greenish stain on the roof from an exhaust vent. Stores chemicals in 55-gallon drums on containment pallets; has plans to install a fixed roof over this storage area. Planned roof is not reflected in SWPPP. Has a wastewater treatment area where the floor drain is part of a capture-use system for storm water. Has two open 55-gallon metal drums stored outside with small quantities of water inside; drums are heavily rusted, polluting the water inside. Stores various rusting metal parts outside shop area. Some implemented and planned BMPs are not reflected in the SWPPP; SWPPP needs to be better refined to reflect all BMPs.

Violation Program: INDSTW
Violation Source: SMARTS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-16-2000
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: SWPPP needed to be better developed to the site.- General Housekeeping is needed. - Facility had high readings from the 98-99 report.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-30-2012
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: warm and sunny. SWPPP dated 1/12/2012; not certified but signed immediately. Site is power washed once 6-9 months; reduced from 2 times/year. Asphalt paving has been replaced with concrete paving partly to improve housekeeping. No samples taken this season. Area between buildings 1 and 2 is neat and orderly except for back alley of building 2. Between buildings 2 and 3 is wastewater treatment area; has legacy staining on concrete in front of roll-up door to anodized line. Roof of building 2: green stains in front of exhausts still present, oil leak in chiller area is fixed. Between buildings 3 and 4: evidence of old spills found in front and back of secondary containment pallets; two pallets found with holes in bottoms; pallets contain varying levels of liquid - one found nearly full in spite of reported daily inspections; broken downspout threatens to drain into a pallet; reported similar problem from roof gutter. Found open trash bin; closed immediately. Pipes, parts, empty poly tank, and drums of potentially-contaminated soil found in outside alley of building 4; instructed Contact to sample runoff here due to industrial activity.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-10-2010
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Facility is part of group monitoring. Sample is a composite from several discharge points serving different drainage areas. Told Contact that this was ineffective because it doesn't provide sufficient resolution to determine if BMPs are effective in each of the drainage areas. Area beneath and surrounding the roof-mounted

HIXSON METAL FINISHING CO (Continued) **1000384999**

chiller motors is stained with oil; observed bottles of make-up oil nearby indicative of a chronic problem. Although motors are protected by a fixed roof, drainage allows runoff to flow over the oil stains resulting in staining leading from the area. Observed a greenish stain on the roof from an exhaust vent. Stores chemicals in 55-gallon drums on containment pallets; has plans to install a fixed roof over this storage area. Planned roof is not reflected in SWPPP. Has a wastewater treatment area where the floor drain is part of a capture-use system for storm water. Has two open 55-gallon metal drums stored outside with small quantities of water inside; drums are heavily rusted, polluting the water inside. Stores various rusting metal parts outside shop area. Some implemented and planned BMPs are not reflected in the SWPPP; SWPPP needs to be better refined to reflect all BMPs.

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still

AMETEK AEROSPACE INC (Continued) **1000417275**

Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that

AMETEK AEROSPACE INC (Continued) **1000417275**

these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/26/2023

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/26/2023

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/26/2023

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/26/2023

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Elevation:	96 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12015903 NEWPORT BEACH, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

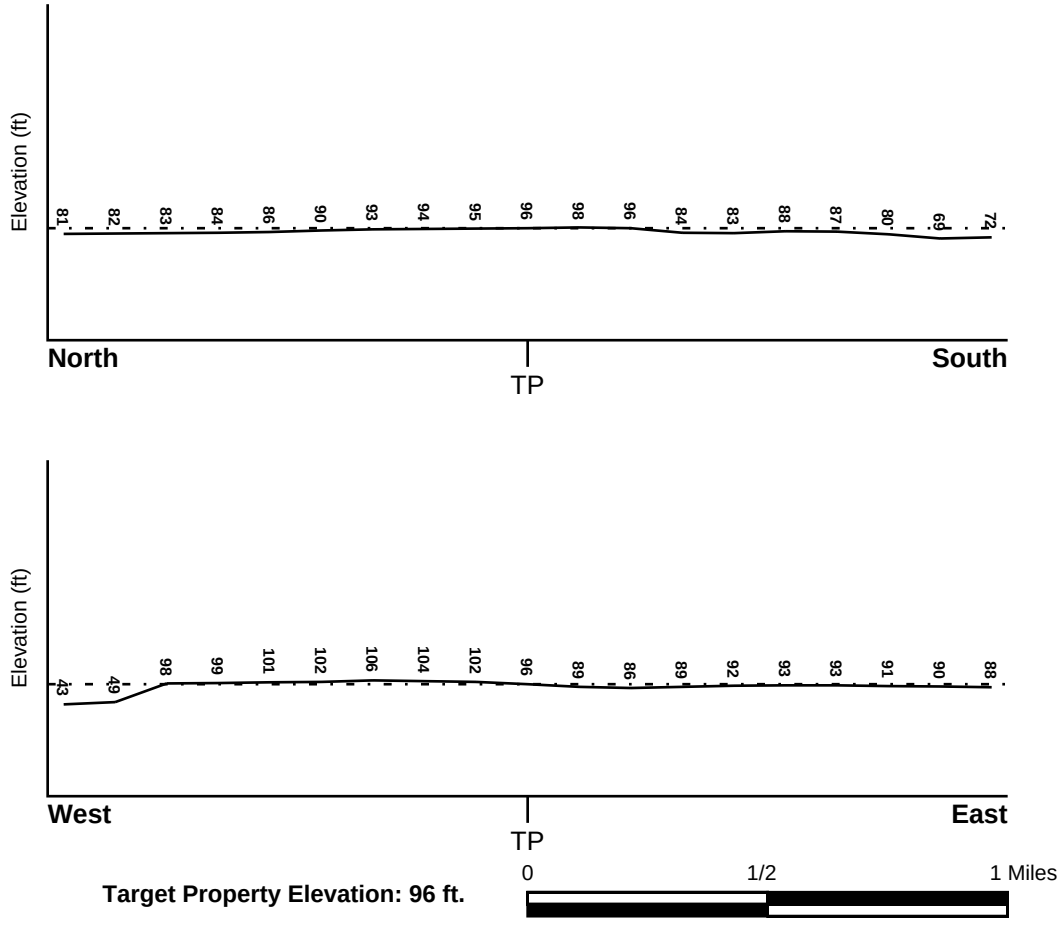
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06059C0054E	FEMA Q3 Flood data

Additional Panels in search area:	FEMA Source Type
06059C0266J	FEMA FIRM Flood data

06059C0046E	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
COSTA MESA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SSW
Site Name:	HUGHES AIRCRAFT CO
Site EPA ID Number:	CAD057468944
Groundwater Flow Direction:	GENERALLY SE IN THE ALLUVIAL ZONE AT AN APPROXIMATE RATE OF 250 TO 1,000 FEET PER YEAR AND GENERALLY SE IN THE MONTEREY FORMATION AT AN APPROXIMATE RATE OF 2 TO 25 FEET PER YEAR.
Measured Depth to Water:	33 to 45 feet in the alluvial zone and 48 to 57 feet in the Monterey formation.
Hydraulic Connection:	The shallow alluvial zone is considered a perched aquifer that overlies the silty clay Monterey formation.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: MYFORD

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1
2	11 inches	18 inches	sandy clay	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Barr & Clark were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

Certified Sanborn® Map Report

06/23/23

Site Name:

Parking Lot
695 West 19th Street
Costa Mesa, CA 92627
EDR Inquiry # 7373536.3

Client Name:

Barr & Clark
12684 Hoover Street
Garden Grove, CA 92841
Contact: Michael Atallah

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Barr & Clark were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Project NA

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 7B25-424B-B4E7

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Barr & Clark (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Eval Notes:	Onsite to conduct a routine hazardous waste inspection. Met with Rose Aguilar. Inspected hazardous waste broken products and returns in storage bins and drums. Drums and bins were provided with a lid, stored in a secure manner and appear to be in good condition. A Hazardous Waste label was noted on all drums and bins with the required identification. Municipal dumpster area does not appear to contain any hazardous waste. Hazardous Waste Emergency Response plan was available for review. Manifests and bills of lading for all hazardous waste streams were reviewed today. Ensure all hazardous waste manifests/disposal documents are maintained on site for at least three years from the date of transport and are available for review during normal business hours. Please continue to ensure all universal wastes (fluorescent lamps, batteries, paint, electronics, etc.) are managed appropriately. Continue to maintain disposal records for these hazardous wastes. THIRIFTY OIL CO SS #139 (ARCO), 799 W 19TH ST, COSTA MESA, CA 92627 (Continued)

Eval Notes:	On site for a routine UST inspection, monitoring system certification, and spill bucket testing. Inspection was conducted with Areli Gonzalez, manager. The facility has 3 double-walled tanks (diesel, 87, and 91) with pressurized piping. The UST system is monitored by a VR TLS-350 system. The monitor is operational for audible and visual alarms. Flapper valves are used for overfill protection. Alarm history was reviewed. The annular sensor (VR 420) for the 91 tank failed upon testing. This sensor was replaced during the inspection and passed after replacement. The rest of the sensors in the tank annulars (VR 420) and piping sumps (VR 208) were tested and passed. Line leak detectors were tested and operational. UDC sensors (VR 208) were tested and passed. Spill bucket testing was completed after inspector departure. Testing was conducted by Steven Gallardo of Fastech. Technician certifications (ICC/VR) were verified. Please submit the test reports to this agency within [Truncated]

THIRIFTY OIL CO SS #139 (ARCO), 799 W 19TH ST, COSTA MESA, CA 92627 (Continued)

Eval Notes:	On site for routine UST inspection, monitoring system certification, and spill bucket testing. Met this date with Alfredo Zamora, Station Manager. The facility has three (3) double-walled tanks (87, 91, and diesel) monitored by a Veeder Root TLS-350 system. The monitor is operational for audible and visual alarms. The Veeder Root panel display reads "all functions normal." Fill sumps, turbine sumps, and UDCs have VR 208 sensors. Tank annulars have VR 420 sensors. Product piping is double-walled and pressurized and has Veeder Root PLLD (8484) on the 87 and 91 tanks and VMI LD-2000 on the diesel tank. Sensors were observed at the lowest point. Sensor out and fail-safe were verified and passed. All sensors tested and verified to be operational. Positive shutdown and fail-safe programming were verified. Overfill prevention is provided by flapper valves in the fill tube of each tank. Spill buckets were tested hydrostatically and passed. Testing was conducted by [Truncated]

Eval Notes:	On site for routine UST inspection, monitoring system certification, and spill bucket testing. The facility has three double-walled tanks (87, 91, D) monitored by a Veeder Root TLS-350R system. The site has double-walled pressurized piping with electronic (87, 91) and mechanical (D) line leak detectors. Positive shutdown and fail safe programming were verified. Flapper valves are used for overfill prevention. Testing was conducted by Steven Loera of Fastech. Tester certifications (VR, ICC, VMI) were verified. Please submit the test reports to this Agency within 30 days. Secondary containment testing was last conducted on 6/21/19. Overfill Prevention Inspection was last conducted on 2/3/21. Both must be tested every 36 months.

WINALL OIL CO #11, 790 W 19TH ST, COSTA MESA, CA 92627-3574 (Continued)

Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Returned to compliance on 02/17/2021. OBSERVATION: Overfill Prevention Equipment Inspection Form dated 10/22/20 indicate the following components failed: Diesel, 87#1, 87#2, 91, and 89 tank shut-off valves (flapper) - All activate at greater than 95% capacity. CORRECTIVE ACTION: Correct all overfill prevention equipment so as to shut-off flow to the tank when the tank is filled to no more than 95% capacity. Provide test results to this agency within 30 days.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	10-30-2019
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct a routine monitoring certification inspection. Met with Jose Rodriguez, service technician with California Maintenance & Environmental. The following certifications were verified: ICC, VR, VMI. Also met with Jonathan Rivera, manager at the site. The facility has five double-walled USTs: 12K Diesel, 12K 87 #1, 12K 87 #2, 12K 91, and 12K 89. Overfill prevention is provided by a flapper valve in the drop tube of each tank. The UST system is monitored using a Gilbarco EMC panel. The tanks are monitored as follows: Dry Annulars: VR-420 STP Sumps/Fill Sumps/TLM Sumps: VR-208 Mechanical line leak detectors: FE PETRO STP-MLD All sensors were tested hydrostatically and passed. Fail safe and sensor-out were demonstrated operational. Spill buckets were tested hydrostatically for 1 hour and passed. The following documents were reviewed: -Permit -Monitoring Plan, Response Plan -DO Monthly Reports, DO Training -Last Monitoring Cert Date: [Truncated]

Eval Notes:	On site for routine UST inspection, monitoring system certification, spill bucket testing, and overfill. The facility has five (5) 12,000 gallon Joor double-walled tanks monitored by a Veeder Root TLS-350 system. The monitor is operation for audible and visual alarms. Panel display reads "All functions normal." Turbine sumps, fill sumps, and UDC's have 208 senors. Tank annulars have 420 sensors. Product piping is double-walled and pressurized and all have Petro STP-MLD line leak detectors. Sensor out and fail-safe were verified and passed. All sensors tested and verified to be operational. Flapper valves are used for overfill prevention. A ball float was noted during the inspection below each of the flappers and were removed. The CERS information will need to be updated within 30 days. The line leak detector and spill buckets were not witnesses by this Agency. Testing was conducted by Jose Rodriguez of California Maintenance & Environmental. Tester [Truncated]

Eval Notes:	On site for a routine UST inspection, monitoring system certification, and spill bucket testing. Inspection was conducted with Oliver Pineda, manager. The facility has 5 double-walled tanks (diesel, two 87s, 89, and 91) with pressurized piping. The UST system is monitored by a VR TLS-350 system. The monitor is operational for audible and visual alarms. Flapper valves are used for overfill protection. Alarm history was reviewed. The sensors in the tank annulars (VR 420) and piping sumps (VR 208) were tested and passed when submerged in fluid. Line leak detectors were tested and operational. UDC float chain was tested and passed. Spill bucket testing was completed after inspector departure. Testing was conducted by Jose Rodriguez of California Maintenance & Environmental. Technician certifications (ICC/VMI/VR) were verified. Please submit the test reports to this agency within 30 days. The following documents were available for review: monitoring plan, leak response [Truncated]

The facility has five 12,000 gallon double-walled tanks (87, 87, 89, 91, D) monitored by a Gilbarco EMC system. The site has double-walled pressurized piping with electronic/mechanical line leak detectors. Positive shutdown and fail safe programming were verified. Flapper valves are used for overfill prevention. Testing was conducted by Jose Rodriguez with California Maintenance and Environmental. Tester certifications (VR, ICC, VMI) were verified. Please submit the test reports to this Agency within 30 days. Secondary containment testing was last conducted on 8/14/20. Overfill inspection was last conducted on 2/11/21.

Eval Notes:	On site for annual underground storage tank inspection - to inspect tank sumps, dispenser containment (UDC) sumps, sensor placement, and review required documentation during the monitoring system certification, leak detector and spill bucket testing. Testing is being performed prior to the annual test due date of January 2018 due to completion of construction (SR0130288) to replace UDCs and remove Healy tank. New Bravo fiberglass single-wall UDCs were replaced for all 9 dispensers, the Healy tank was removed and Veeder Root Carbon Canister installed, installation of vent transition box, replacement of FE Petro 1.5 HP turbines for all 5 USTs with FE Petro 2.0 HP turbines, and replacing the VMI LD2000 MLLDs with FE Petro STP MLLDs. Agreed this date would begin the new annual testing cycle. Met with Miguel Gomez and Dave Tungate, both with contractor Petro Builders. Testing of monitoring equipment was performed by Patrick McMurphy with California Maintenance & [Truncated]

Appendix F – Qualifications

BARR & CLARK
Independent Environmental Testing
Asbestos • Lead • Mold • Phase I

MICHAEL ATALLAH
Senior Project Manager

Mr. Atallah has hands on experience in the real estate due diligence fields and has maintained excellence in his knowledge of construction, environmental and real estate properties in general.

Qualifications:
Over 17 years experience in preparing Physical Needs Assessments, Green Physical Needs Assessments, Phase I Environmental Site Assessments, Asbestos Consulting, Lead-Based Paint Consulting, Radon Consulting, ADA/Section 504 Consulting, Project Management, Construction Progress Monitoring and Probable Maximum Loss Assessments.

Professional Experience:

Barr & Clark, Inc. **2000 - Current**

- Providing Physical Needs Assessments, Green Physical Needs Assessments, Phase I Environmental Site Assessments, Asbestos Consulting, Lead-Based Paint Consulting, Radon Consulting, ADA/Section 504 Consulting, Project Management, Construction Progress Monitoring and Probable Maximum Loss Assessments.
- Coordinate field services and perform site assessments in accordance with, but not limited to, ASTM, HUD, USDA, TCAC, Fannie Mae, Freddie Mac, CALHFA and client guidelines.
- Quality control, including reviewing and editing of outgoing reports and draft contracts.
- Business Development to establish and maintain cooperative working relationships with clients.

Education & Licenses:

- California State University in Fullerton – Bachelor of Arts Degree in Business Administration with Concentrations in Real Estate and Finance
- LEED Accredited Professional
- Registered Environmental Property Assessor No. REPA 266318
- Certified Professional Radon Measurement Provider by the National Environmental Health Association No. NRPP ID#105517RT
- Certificate of Completion of EPA accredited AHERA Asbestos Abatement Contractors/Supervisors 40-hour course.

U.S. Fish and Wildlife Service

Environmental Conservation Online System

Information for Planning and Consultation Database Search

IPaC **U.S. Fish & Wildlife Service**

IPaC resource list

This report is an automatically generated list of species and other resources such as critical habitat (collectively referred to as *trust resources*) under the U.S. Fish and Wildlife Service's (USFWS) jurisdiction that are known or expected to be on or near the project area referenced below. The list may also include trust resources that occur outside of the project area, but that could potentially be directly or indirectly affected by activities in the project area. However, determining the likelihood and extent of effects a project may have on trust resources typically requires gathering additional site-specific (e.g., vegetation/species surveys) and project-specific (e.g., magnitude and timing of proposed activities) information.

Below is a summary of the project information you provided and contact information for the USFWS office(s) with jurisdiction in the defined project area. Please read the introduction to each section that follows (Endangered Species, Migratory Birds, USFWS Facilities, and NWI Wetlands) for additional information applicable to the trust resources addressed in that section.

NOT FOR CONSULTATION

Location

Orange County, California

Local office

Carlsbad Fish And Wildlife Office

(760) 431-9440
(760) 431-5901

2177 Salk Avenue - Suite 250
Carlsbad, CA 92008-7385

NOT FOR CONSULTATION

Endangered species

This resource list is for informational purposes only and does not constitute an analysis of project level impacts.

The primary information used to generate this list is the known or expected range of each species. Additional areas of influence (AOI) for species are also considered. An AOI includes areas outside of the species range if the species could be indirectly affected by activities in that area (e.g., placing a dam upstream of a fish population even if that fish does not occur at the dam site, may indirectly impact the species by reducing or eliminating water flow downstream). Because species can move, and site conditions can change, the species on this list are not guaranteed to be found on or near the project area. To fully determine any potential effects to species, additional site-specific and project-specific information is often required.

Section 7 of the Endangered Species Act **requires** Federal agencies to "request of the Secretary information whether any species which is listed or proposed to be listed may be present in the area of such proposed action" for any project that is conducted, permitted, funded, or licensed by any Federal agency. A letter from the local office and a species list which fulfills this requirement can **only** be obtained by requesting an official species list from either the Regulatory Review section in IPaC (see directions below) or from the local field office directly.

For project evaluations that require USFWS concurrence/review, please return to the IPaC website and request an official species list by doing the following:

1. Draw the project location and click CONTINUE.
2. Click DEFINE PROJECT.
3. Log in (if directed to do so).
4. Provide a name and description for your project.
5. Click REQUEST SPECIES LIST.

Listed species[1] and their critical habitats are managed by the Ecological Services Program of the U.S. Fish and Wildlife Service (USFWS) and the fisheries division of the National Oceanic and Atmospheric Administration (NOAA Fisheries[2]).

Species and critical habitats under the sole responsibility of NOAA Fisheries are **not** shown on this list. Please contact NOAA Fisheries for species under their jurisdiction.

---

1. Species listed under the Endangered Species Act are threatened or endangered; IPaC also shows species that are candidates, or proposed, for listing. See the listing status page for more information. IPaC only shows species that are regulated by USFWS (see FAQ).

NOT FOR CONSULTATION

2. NOAA Fisheries, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

The following species are potentially affected by activities in this location:

Mammals

NAME	STATUS
Pacific Pocket Mouse Perognathus longimembris pacificus Wherever found No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/8080	Endangered

Birds

NAME	STATUS
California Least Tern Sternula antillarum browni Wherever found No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/8104	Endangered
Coastal California Gnatcatcher Polioptila californica californica Wherever found There is **final** critical habitat for this species. Your location does not overlap the critical habitat. https://ecos.fws.gov/ecp/species/8178	Threatened
Least Bell's Vireo Vireo bellii pusillus Wherever found There is **final** critical habitat for this species. Your location does not overlap the critical habitat. https://ecos.fws.gov/ecp/species/5945	Endangered
Light-footed Ridgway''s Rail Rallus obsoletus levipes Wherever found No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/6035	Endangered
Western Snowy Plover Charadrius nivosus nivosus There is **final** critical habitat for this species. Your location does not overlap the critical habitat. https://ecos.fws.gov/ecp/species/8035	Threatened

NOT FOR CONSULTATION

Reptiles

NAME	STATUS
Southwestern Pond Turtle Actinemys pallida Wherever found No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/4768	Proposed Threatened

Amphibians

NAME	STATUS
Western Spadefoot Spea hammondii Wherever found No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/5425	Proposed Threatened

Insects

NAME	STATUS
Monarch Butterfly Danaus plexippus Wherever found No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/9743	Candidate

Crustaceans

NAME	STATUS
San Diego Fairy Shrimp Branchinecta sandiegonensis Wherever found There is **final** critical habitat for this species. Your location does not overlap the critical habitat. https://ecos.fws.gov/ecp/species/6945	Endangered

Flowering Plants

NAME	STATUS
Nevin's Barberry Berberis nevinii Wherever found There is **final** critical habitat for this species. Your location does not overlap the critical habitat. https://ecos.fws.gov/ecp/species/8025	Endangered

NOT FOR CONSULTATION

Salt Marsh Bird's-beak Cordylanthus maritimus ssp. maritimus — Endangered
Wherever found
No critical habitat has been designated for this species.
https://ecos.fws.gov/ecp/species/6447

San Diego Button-celery Eryngium aristulatum var. parishii — Endangered
Wherever found
No critical habitat has been designated for this species.
https://ecos.fws.gov/ecp/species/5937

Ventura Marsh Milk-vetch Astragalus pycnostachyus var. lanosissimus — Endangered
Wherever found
There is **final** critical habitat for this species. Your location does not overlap the critical habitat.
https://ecos.fws.gov/ecp/species/1160

Critical habitats

Potential effects to critical habitat(s) in this location must be analyzed along with the endangered species themselves.

There are no critical habitats at this location.

You are still required to determine if your project(s) may have effects on all above listed species.

NOT FOR CONSULTATION

Bald & Golden Eagles

Bald and golden eagles are protected under the Bald and Golden Eagle Protection Act[1] and the Migratory Bird Treaty Act[2].

Any person or organization who plans or conducts activities that may result in impacts to bald or golden eagles, or their habitats[3], should follow appropriate regulations and consider implementing appropriate conservation measures, as described in the links below. Specifically, please review the "Supplemental Information on Migratory Birds and Eagles".

Additional information can be found using the following links:

- Eagle Management https://www.fws.gov/program/eagle-management
- Measures for avoiding and minimizing impacts to birds https://www.fws.gov/library/collections/avoiding-and-minimizing-incidental-take-migratory-birds
- Nationwide conservation measures for birds https://www.fws.gov/sites/default/files/documents/nationwide-standard-conservation-measures.pdf
- Supplemental Information for Migratory Birds and Eagles in IPaC https://www.fws.gov/media/supplemental-information-migratory-birds-and-bald-and-golden-eagles-may-occur-project-action

There are likely bald eagles present in your project area. For additional information on bald eagles, refer to Bald Eagle Nesting and Sensitivity to Human Activity

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, see the PROBABILITY OF PRESENCE SUMMARY below to see when these birds are most likely to be present and breeding in your project area.

NAME	BREEDING SEASON
Bald Eagle Haliaeetus leucocephalus This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1626	Breeds Jan 1 to Aug 31
Golden Eagle Aquila chrysaetos This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1680	Breeds Jan 1 to Aug 31

NOT FOR CONSULTATION

Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read "Supplemental Information on Migratory Birds and Eagles", specifically the FAQ section titled "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

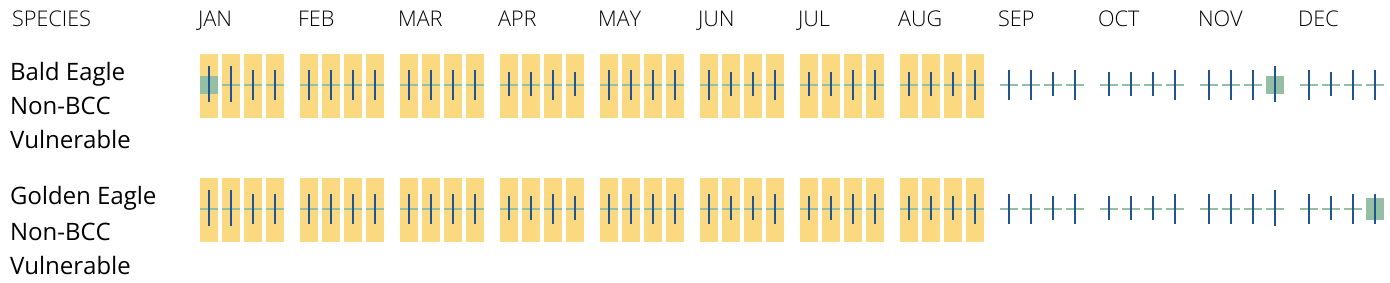
How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is 0.25/0.25 = 1; at week 20 it is 0.05/0.25 = 0.2.
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

Breeding Season (▪)
Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

Survey Effort (|)
Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.



To see a bar's survey effort range, simply hover your mouse cursor over the bar.

No Data (–)
A week is marked as having no data if there were no survey events for that week.

Survey Timeframe
Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

NOT FOR CONSULTATION

▪ probability of presence ▪ breeding season | survey effort – no data

What does IPaC use to generate the potential presence of bald and golden eagles in my specified location?

The potential for eagle presence is derived from data provided by the Avian Knowledge Network (AKN). The AKN data is based on a growing collection of survey, banding, and citizen science datasets and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle (Eagle Act requirements may apply). To see a list of all birds potentially present in your project area, please visit the Rapid Avian Information Locator (RAIL) Tool.

What does IPaC use to generate the probability of presence graphs of bald and golden eagles in my specified location?

The Migratory Bird Resource List is comprised of USFWS Birds of Conservation Concern (BCC) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the Avian Knowledge Network (AKN). The AKN data is based on a growing collection of survey, banding, and citizen science datasets and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle (Eagle Act requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the Rapid Avian Information Locator (RAIL) Tool.

What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to obtain a permit to avoid violating the Eagle Act should such impacts occur. Please contact your local Fish and Wildlife Service Field Office if you have questions.

NOT FOR CONSULTATION

Migratory birds

Certain birds are protected under the Migratory Bird Treaty Act[1] and the Bald and Golden Eagle Protection Act[2].

Any person or organization who plans or conducts activities that may result in impacts to migratory birds, eagles, and their habitats[3] should follow appropriate regulations and consider implementing appropriate conservation measures, as described in the links below. Specifically, please review the "Supplemental Information on Migratory Birds and Eagles".

1. The Migratory Birds Treaty Act of 1918.
2. The Bald and Golden Eagle Protection Act of 1940.

Additional information can be found using the following links:

- Eagle Management https://www.fws.gov/program/eagle-management
- Measures for avoiding and minimizing impacts to birds https://www.fws.gov/library/collections/avoiding-and-minimizing-incidental-take-migratory-birds
- Nationwide conservation measures for birds https://www.fws.gov/sites/default/files/documents/nationwide-standard-conservation-measures.pdf
- Supplemental Information for Migratory Birds and Eagles in IPaC https://www.fws.gov/media/supplemental-information-migratory-birds-and-bald-and-golden-eagles-may-occur-project-action

The birds listed below are birds of particular concern either because they occur on the USFWS Birds of Conservation Concern (BCC) list or warrant special attention in your project location. To learn more about the levels of concern for birds on your list and how this list is generated, see the FAQ below. This is not a list of every bird you may find in this location, nor a guarantee that every bird on this list will be found in your project area. To see exact locations of where birders and the general public have sighted birds in and around your project area, visit the E-bird data mapping tool (Tip: enter your location, desired date range and a species on your list). For projects that occur off the Atlantic Coast, additional maps and models detailing the relative occurrence and abundance of bird species on your list are available. Links to additional information about Atlantic Coast birds, and other important information about your migratory bird list, including how to properly interpret and use your migratory bird report, can be found below.

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, see the PROBABILITY OF PRESENCE SUMMARY below to see when these birds are most likely to be present and breeding in your project area.

NAME	BREEDING SEASON
Allen's Hummingbird Selasphorus sasin This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9637	Breeds Feb 1 to Jul 15

NOT FOR CONSULTATION

Bald Eagle Haliaeetus leucocephalus — Breeds Jan 1 to Aug 31
This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities.
https://ecos.fws.gov/ecp/species/1626

Belding's Savannah Sparrow Passerculus sandwichensis beldingi — Breeds Apr 1 to Aug 15
This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA
https://ecos.fws.gov/ecp/species/8

Black Oystercatcher Haematopus bachmani — Breeds Apr 15 to Oct 31
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.
https://ecos.fws.gov/ecp/species/9591

Black Skimmer Rynchops niger — Breeds May 20 to Sep 15
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.
https://ecos.fws.gov/ecp/species/5234

Black Tern Chlidonias niger surinamenisis — Breeds May 15 to Aug 20
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.
https://ecos.fws.gov/ecp/species/3093

Black Turnstone Arenaria melanocephala — Breeds elsewhere
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Brandt's Cormorant Urile penicillatus — Breeds Apr 15 to Sep 15
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Bullock's Oriole Icterus bullockii — Breeds Mar 21 to Jul 25
This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA

Tell me more about conservation measures I can implement to avoid or minimize impacts to migratory birds.

Nationwide Conservation Measures describes measures that can help avoid and minimize impacts to all birds at any location year round. Implementation of these measures is particularly important when birds are most likely to occur in the project area. When birds may be breeding in the area, identifying the locations of any active nests and avoiding their destruction is a very helpful impact minimization measure. To see when birds are most likely to occur and be breeding in your project area, view the Probability of Presence Summary. Additional measures or permits may be advisable depending on the type of activity you are conducting and the type of infrastructure or bird species present on your project site.

What does IPaC use to generate the list of migratory birds that potentially occur in my specified location?

The Migratory Bird Resource List is comprised of USFWS Birds of Conservation Concern (BCC) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the Avian Knowledge Network (AKN). The AKN data is based on a growing collection of survey, banding, and citizen science datasets and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle (Eagle Act requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the Rapid Avian Information Locator (RAIL) Tool.

What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?

The probability of presence graphs associated with your migratory bird list are based on data provided by the Avian Knowledge Network (AKN). This data is derived from a growing collection of survey, banding, and citizen science datasets.

NOT FOR CONSULTATION

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go the Probability of Presence Summary and then click on the "Tell me about these graphs" link.

How do I know if a bird is breeding, wintering or migrating in my area?

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating or year-round), you may query your location using the RAIL Tool and look at the range maps provided for birds in your area at the bottom of the profiles provided for each bird in your results. If a bird on your migratory bird species list has a breeding season associated with it, if that bird does occur in your project area, there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

What are the levels of concern for migratory birds?

Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are Birds of Conservation Concern (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the Eagle Act requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to try to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially eagles and BCC species of rangewide concern. For more information on conservation measures you can implement to help avoid and minimize migratory bird impacts and requirements for eagles, please see the FAQs for these topics.

Details about birds that are potentially affected by offshore projects

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the Northeast Ocean Data Portal. The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf project webpage.

Bird tracking data can also provide additional details about occurrence and habitat use throughout the year, including migration. Models relying on survey data may not include this information. For additional information on marine bird tracking data, see the Diving Bird Study and the nanotag studies or contact Caleb Spiegel or Pam Loring.

What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to obtain a permit to avoid violating the Eagle Act should such impacts occur.

NOT FOR CONSULTATION

Proper Interpretation and Use of Your Migratory Bird Report

The migratory bird list generated is not a list of all birds in your project area, only a subset of birds of priority concern. To learn more about how your list is generated, and see options for identifying what other birds may be in your project area, please see the FAQ "What does IPaC use to generate the migratory birds potentially occurring in my specified location". Please be aware this report provides the "probability of presence" of birds within the 10 km grid cell(s) that overlap your project; not your exact project footprint. On the graphs provided, please also look carefully at the survey effort (indicated by the black vertical bar) and for the existence of the "no data" indicator (a red horizontal bar). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort bar or no data bar means a lack of data and, therefore, a lack of certainty about presence of the species. This list is not perfect; it is simply a starting point for identifying what birds of concern have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list helps you know what to look for to confirm presence, and helps guide you in knowing when to implement conservation measures to avoid or minimize potential impacts from your project activities, should presence be confirmed. To learn more about conservation measures, visit the FAQ "Tell me about conservation measures I can implement to avoid or minimize impacts to migratory birds" at the bottom of your migratory bird trust resources page.

NOT FOR CONSULTATION

Facilities

National Wildlife Refuge lands

Any activity proposed on lands managed by the National Wildlife Refuge system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

There are no refuge lands at this location.

Fish hatcheries

There are no fish hatcheries at this location.

Wetlands in the National Wetlands Inventory (NWI)

Impacts to NWI wetlands and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local U.S. Army Corps of Engineers District.

This location did not intersect any wetlands mapped by NWI.

NOTE: This initial screening does **not** replace an on-site delineation to determine whether wetlands occur. Additional information on the NWI data is provided below.

NOT FOR CONSULTATION

Data limitations

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

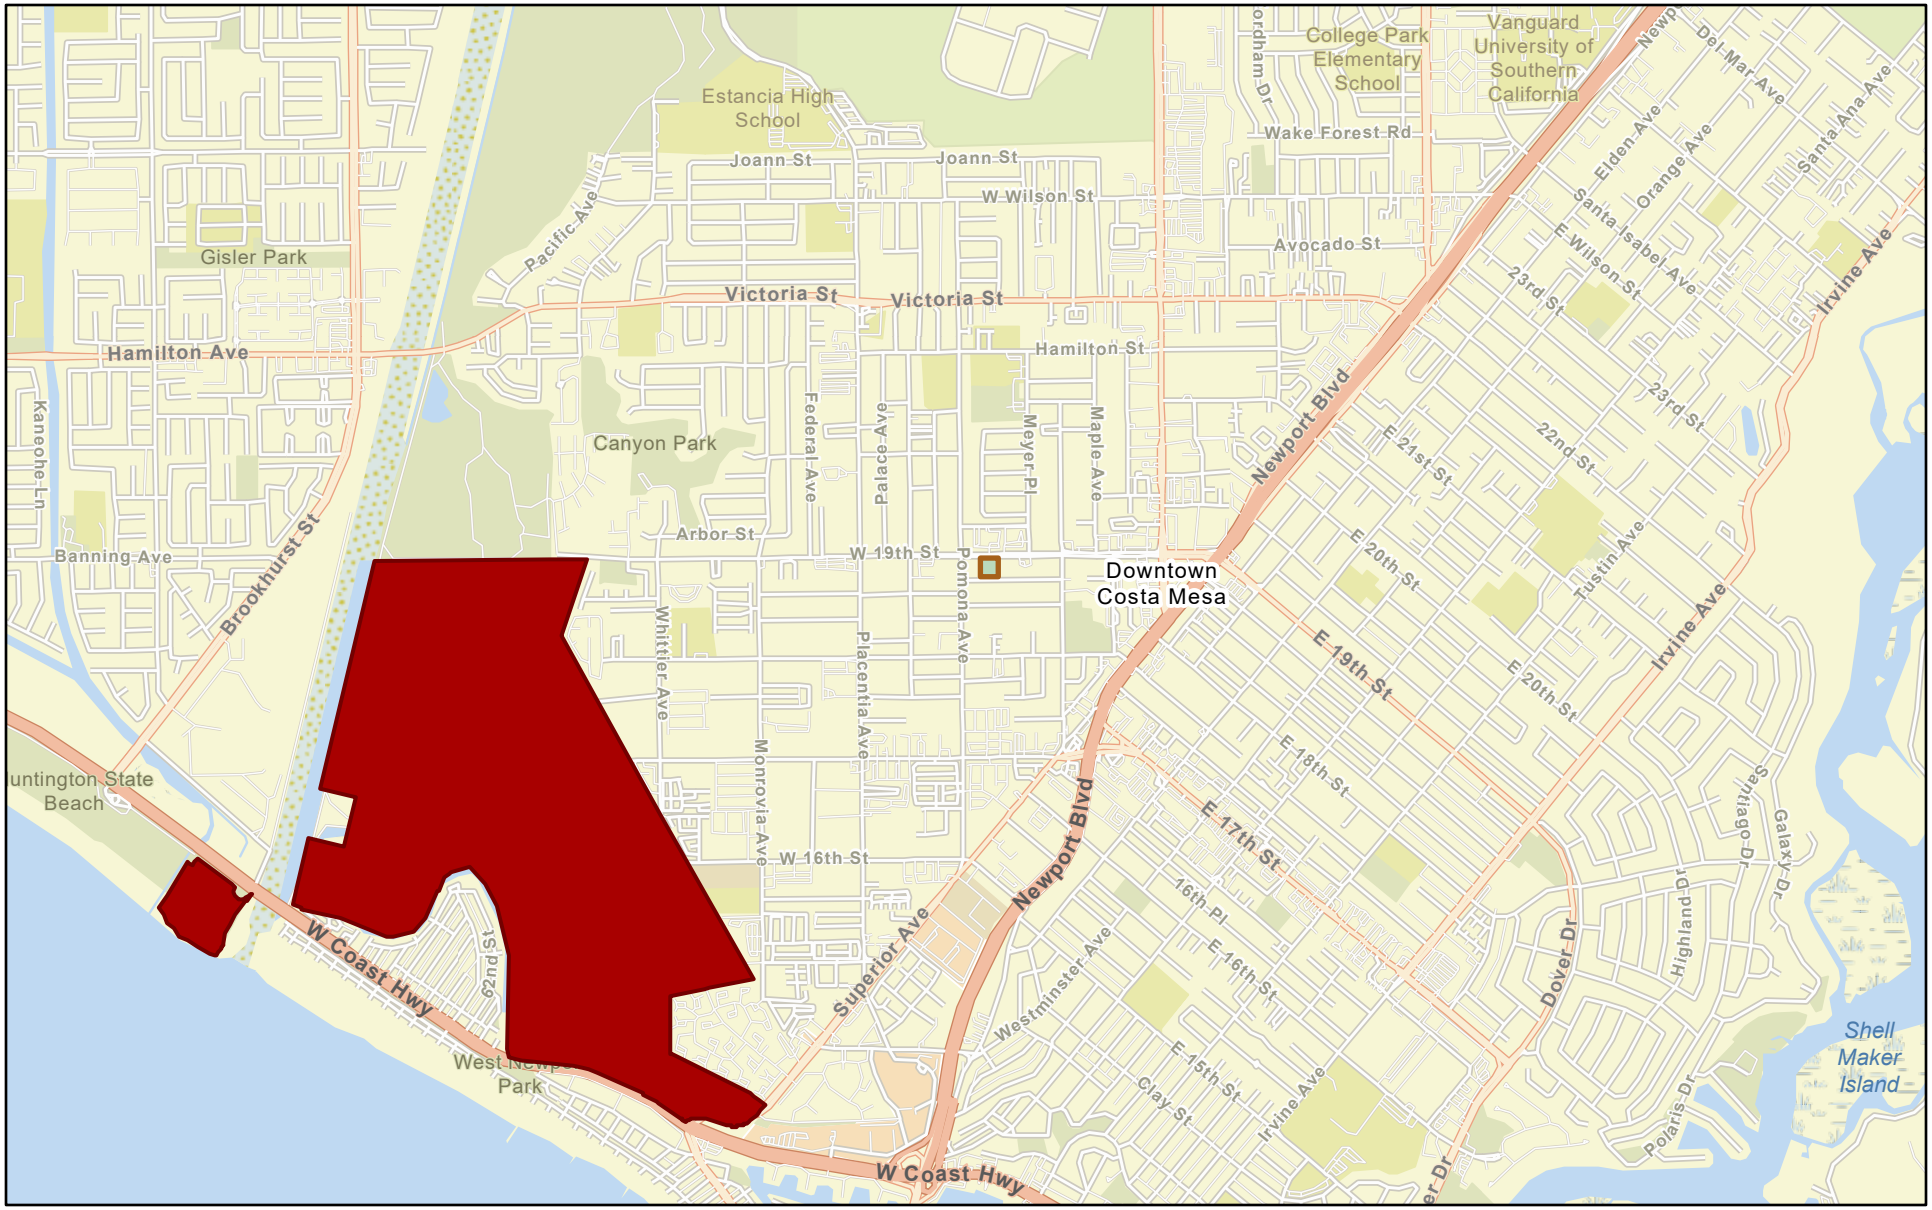
Wetlands or other mapped features may have changed since the date of the imagery or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

Data exclusions

Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tuberficid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

Data precautions

Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies.



Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

Santa Ana, CA 92705

Subject: Cultural Resources Constraints Analysis for the Costa Mesa Senior Apartments Project, City of Costa Mesa, Orange County, California

Dear Suzanne Harder:

This letter summarizes the known cultural resources constraints for the Costa Mesa Senior Apartments Project (Project), located in the City of Costa Mesa, Orange County, California. Efforts include a review of information housed at the South Central Coastal Information Center (SCCIC) for the Project area of potential effects (Project APE) and surrounding one-mile radius, a review of historical aerial imagery and topographic maps, and a review of the geomorphological context of the Project APE. The below discussion includes a complete summary of these efforts, as well as the constraints relating to the presence of cultural resources and recommended next steps for the Project to meet best practice standards.

Project Location and Description

The Project is within Section 21 of Township 1 North and Range 19 West of the *Newport Beach, California* U.S Geological Survey (USGS) 7.5-minute Series Quadrangle Map (Appendix A: Figure 1, Project Location). The Project is proposed on the eastern half (1.5 acres) of APN 424-211-01, located at the southeastern corner of the intersection of West 19th Street and Pomona Avenue, in the City of Costa Mesa, California. The Costa Mesa Senior Center (Senior Center) occupies the western half (1.3 acres) of the Project parcel, while the Project site currently consists of an underutilized 145-stall parking lot and associated landscaping for the Senior Center. The Project is bounded by South Plumer Street to the south, the Senior Center to the west, West 19th Street to the north, and Mouse Graphics Print Shop to the east.

The Project involves the construction of a new four-story, single-building affordable housing community with 70 apartment units. Project design would incorporate Spanish Revival architecture and a courtyard-style layout. Apartments would include 68 one-bedroom units and 2 two-bedroom units, with one of the two-bedroom units reserved for an onsite manager. The other two-bedroom unit would accommodate a small-family configuration or senior with a full-time caregiver. Of the 69 affordable housing units, 34 one-bedroom units would be reserved for seniors experiencing homelessness and with incomes at or below 30% of the area median income (AMI). The remaining 35 one-bedroom units and 1 two-bedroom unit would be reserved for seniors earning at or below 60% AMI. Four units would be Americans with Disabilities Act accessible, and two units would be available for residents living with sensory impairments.

The Project APE consists of the area of direct physical effect for the Project, which is currently a parking lot, consisting of a total area of 1.5 acres as delineated in Appendix A: Figure 2, Project APE. Ground disturbance within the Project APE would involve tree removals, trenching for utilities, foundation work, and grading.

Regulatory Framework

The National Register of Historic Places

The National Register of Historic Places (NRHP) is the United States' official list of districts, sites, buildings, structures, and objects worthy of preservation. Overseen by the National Park Service (NPS), under the U.S. Department of the Interior, the NRHP was authorized under the NHPA, as amended. Its listings encompass all National Historic Landmarks, as well as historic areas administered by NPS.

NRHP guidelines for the evaluation of historic significance were developed to be flexible and to recognize the accomplishments of all who have made significant contributions to the nation's history and heritage. Its criteria are designed to guide state and local governments, federal agencies, and others in evaluating potential entries in the NRHP. For a property to be listed in or determined eligible for listing, it must be demonstrated to possess integrity and to meet at least one of the following criteria:

The quality of significance in American history, architecture, archaeology, engineering, and culture is present in districts, sites, buildings, structures, and objects that possess integrity of location, design, setting, materials, workmanship, feeling, and association, and:

A. That are associated with events that have made a significant contribution to the broad patterns of our history; or
B. That are associated with the lives of persons significant in our past; or
C. That embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
D. That have yielded, or may be likely to yield, information important in prehistory or history.

Integrity is defined in NRHP guidance, *How to Apply the National Register Criteria,* as "the ability of a property to convey its significance. To be listed in the NRHP, a property must not only be shown to be significant under the NRHP criteria, but it also must have integrity" (NPS 1990). NRHP guidance further asserts that certain property types are not considered eligible for listing in the NRHP, except under certain circumstances (NPS 1990):

> Ordinarily cemeteries, birthplaces, graves of historical figures, properties owned by religious institutions or used for religious purposes, structures that have been moved from their original locations, reconstructed historic buildings, properties primarily commemorative in nature, and properties that have achieved significance within the past 50 years shall not be considered eligible for the National Register. However, such properties *will qualify* if they are integral parts of districts that do meet the criteria or if they fall within the following categories:
>
> a. A religious property deriving primary significance from architectural or artistic distinction or historical importance; or

b. A building or structure removed from its original location, but which is primarily significant for architectural value, or which is the surviving structure most importantly associated with a historic person or event; or
c. A birthplace or grave of a historical figure of outstanding importance if there is no appropriate site or building associated with his or her productive life; or
d. A cemetery that derives its primary importance from graves of persons of transcendent importance, from age, from distinctive design features, or from association with historic events; or
e. A reconstructed building when accurately executed in a suitable environment and presented in a dignified manner as part of a restoration master plan, and when no other building or structure with the same association has survived; or
f. A property primarily commemorative in intent if design, age, tradition, or symbolic value has invested it with its own exceptional significance; or
g. A property achieving significance within the past 50 years if it is of exceptional importance.

A historic property is defined as "any prehistoric or historic district, site, building, structure, or object included in, or eligible for inclusion in, the NRHP maintained by the Secretary of the Interior. This term includes artifacts, records, and remains that are related to and located within such properties. The term includes properties of traditional religious and cultural importance to an Indian tribe or Native Hawaiian organization and that meet the NRHP criteria" (36 CFR Sections 800.16(i)(1)).

Effects on historic properties under Section 106 of the NHPA are defined in the assessment of adverse effects in 36 CFR Sections 800.5(a)(1):

> An adverse effect is found when an undertaking may alter, directly or indirectly, any of the characteristics of a historic property that qualify the property for inclusion in the National Register in a manner that would diminish the integrity of the property's location, design, setting, materials, workmanship, feeling, or association. Consideration shall be given to all qualifying characteristics of a historic property, including those that may have been identified subsequent to the original evaluation of the property's eligibility for the National Register. Adverse effects may include reasonably foreseeable effects caused by the undertaking that may occur later in time, be farther removed in distance or be cumulative.

Adverse effects on historic properties are clearly defined and include, but are not limited to (36 CFR 800.5 (a)(2)):

i. Physical destruction of or damage to all or part of the property;
ii. Alteration of a property, including restoration, rehabilitation, repair, maintenance, stabilization, hazardous material remediation and provision of handicapped access, that is not consistent with the Secretary's Standards for the Treatment of Historic Properties (36 CFR Part 68) and applicable guidelines;
iii. Removal of the property from its historic location;
iv. Change of the character of the property's use or of physical features within the property's setting that contributes to its historic significance;
v. Introduction of visual, atmospheric or audible elements that diminish the integrity of the property's significant historic features;

vi. Neglect of a property which causes its deterioration, except where such neglect and deterioration are recognized qualities of a property of religious and cultural significance to an Indian tribe or Native Hawaiian organization; and
vii. Transfer, lease, or sale of property out of Federal ownership or control without adequate and legally enforceable restrictions or conditions to ensure long-term preservation of the property's historic significance.

To comply with Section 106, the criteria of adverse effect are applied to historic properties, if any exist in the APE, pursuant to 36 CFR Sections 800.5(a)(1). If no historic properties are identified in the APE, a finding of "no historic properties affected" will be made for the proposed project. If there are historic properties in the APE, application of the criteria of adverse effect will result in project-related findings of either "no adverse effect" or of "adverse effect," as described above. A finding of no adverse effect may be appropriate when the undertaking's effects do not meet the thresholds in criteria of adverse effect 36 CFR Sections 800.5(a)(1), in certain cases when the undertaking is modified to avoid or lessen effects, or if conditions were imposed to ensure review of rehabilitation plans for conformance with the *Secretary of the Interior's Standards for the Treatment of Historic Properties* (codified in 36 CFR Part 68).

If adverse effects findings were expected to result from the proposed project, mitigation would be required, as feasible, and resolution of those adverse effects by consultation may occur to avoid, minimize, or mitigate adverse effects on historic properties pursuant to 36 CFR Part 800.6(a).

Records Search Results

Dudek archaeologist Brenda Rogers conducted a records search of the California Historical Resources Information System (CHRIS) on December 16, 2024, at the SCCIC located on the campus of the California State University, Fullerton in Fullerton, California. The records search encompassed the Project APE and a one-mile search radius. The purpose of the records search is to identify any previously recorded cultural resources that are in or adjacent to the Project APE and to identify previous studies in the Project vicinity. In addition to a review of previously prepared site records and reports, the records search also included a review of historical maps of the Project APE, ethnographies, the NRHP, the California Register of Historical Resources (CRHR), the California Historic Property Data File, and the lists of California State Historical Landmarks, California Points of Historical Interest, and Archaeological Determinations of Eligibility. See Appendix B for the complete SCCIC records search results and associated documentation.

Previously Conducted Cultural Resources Studies

The SCCIC records search indicates that 31 previous cultural resources technical studies have been conducted within one mile of the Project APE between 1975 and 2014. Of the 31 previous studies, two intersect with the Project APE (OR-00299 and OR-03013). Table 1, below, summarizes all previous technical studies conducted within one mile of the Project APE, followed by brief summaries of the overlapping studies.

OR-00299

Archaeological Associates conducted a historic resources survey of open parcels of land within the corporate boundaries of the City of Costa Mesa in the summer of 1978. The study was aimed at gathering data pertaining to archaeology, cultural history, and paleontology to facilitate the creation of a “Historic Resources” element of the

City of Costa Mesa's General Plan. Archaeological Associates did not author the City's General Plan but just gathered the data and synthesized it into the report. The study included a reconnaissance survey of open spaces plotted on the official Land Use Map of the City, background research, and an inventory of all historic-era properties and potential historic districts within City boundaries. Approximately 20 percent of the proposed Project APE was subject to investigation as part of this inventory. The study does not discuss the Senior Center (P-30-177525) which was constructed as early as 1963 and is adjacent to the Project APE (Archaeological Associates 1978).

OR-03013

Archaeological Resource Management Corporation (ARMC) conducted an Archaeological Resources Assessment for the 19th Street Avenue Reconstruction Project in May 2002. At the request of the City of Costa Mesa, ARMC conducted a Phase I archaeological resources assessment that consisted of a records search, a pedestrian survey, and Native American outreach. The Project area consisted of the roadbed and adjacent properties along 19th Street from Anaheim Avenue to Placentia Avenue in Costa Mesa, California. According to the record search, this investigation covered the entirety of the Project APE. The findings of this study were that no significant archaeological resources or Sacred Lands were present in or adjacent to the Project APE. Therefore, no impacts to significant cultural resources were predicted and no mitigation was recommended (Archaeological Resources Management Corporation 2002).

Previously Recorded Cultural Resources

The SCCIC records search indicates that nine previously recorded cultural resources are located within one mile of the Project APE, one of which was previously mapped intersecting the Project APE (P-30-177525). Upon further analysis, this resource is directly adjacent to the Project and does not intersect the Project APE. P-30-177525, the Senior Center, is a historic-era built environment resource that was evaluated in 2014 and recommended not eligible for the NRHP. This property is described in further detail below Table 2. Of the other eight resources within the one-mile radius, three are prehistoric sites, and five are historic-era built environment resources associated with the historical development of Costa Mesa over the 20th Century.

Of the five historic-era built environment resources, one has been recommended eligible for listing on the NRHP, and the other four have been determined or recommended ineligible. To date, the prehistoric sites have not been evaluated for listing on the NRHP. All previously recorded cultural resources identified within one mile of the Project APE are listed in Table 2, below. See Appendix B for the complete SCCIC records search results, documentation, and California Department of Parks and Recreation 523 Site Forms (DPR site forms).

Table 2. Previously Recorded Cultural Resources within One Mile of Project APE

Primary Number	Trinomial	Resource Name (if applicable)	Age	Resource Type	Eligibility for NRHP	Recording Event
Adjacent to the Project APE

P-30-177735	-	Alano Club of Costa Mesa	Historic	Building	Recommended not eligible	

P-30-177525

The property P-30-177525 refers to the Costa Mesa Senior Center located at 695 West 19th Street, Costa Mesa, California. This property was evaluated in 2014 and recommended not eligible for the NRHP due to a lack of significant associations and architectural merit (Crawford 2014). The evaluation was prepared for the T-Mobile West, LLC Candidate LA02111A (SC111 Senior Center), 695 West 19th Street, Costa Mesa, Orange County, California Project. It does not appear this recommendation was reviewed by the State Historic Preservation Officer for concurrence. The documentation lists the building's date of construction as circa 1967.

To ascertain whether the building required an updated evaluation as a part of this study, Dudek architectural historians reviewed the 2014 DPR site form for the property, aerial photographs, and historic newspapers. Research indicated that there was a building on the site as early as 1963, but that it was demolished and subsequently replaced in 1992 by the currently extant Senior Center building (Exhibit 1). The construction and opening of the new Senior Center are also discussed in a *Los Angeles Times* newspaper article from 1992 (Natali 1992: 464). This desktop research refutes the circa 1967 built date stated in the 2014 evaluation. Because the property is not of historic-age (45 years or older) and does not retain exceptional significance as required for properties less than 50 years old, it does not require updated recordation and evaluation as part of this study.

Exhibit 1. 1963 aerial photograph (left) showing the previously extant building at 695 West 19th Street and 1992 aerial photograph (right) showing the presently-extant building.

Historical Aerial Imagery and Topographic Map Review

In addition to the SCCIC records search, Dudek conducted an online review of historical aerial photographs (historic aerials) and historical topographic maps (historic topos) to better understand the development of the Project APE and surrounding areas over time. Historic aerials of the Project APE are available from 1938 to 2022, and historic topos of the Project APE are available from 1896 to 2022 (NETR 2024).

The first available historic aerial from 1938 depicts the Project APE and surrounding vicinity as undeveloped with no structures present. The roads currently known as West 19th Street, Pomona Avenue, and Plumer Street are present north, west, and south of the Project APE, respectively. There is residential development present to the northeast of the Project APE, however, the immediate surrounding properties are vacant with only dirt access roads. The aerial from 1953 depicts the development of residential properties to the north, east and south of the Project APE. By 1963, the area south of the Project APE has been developed into residential tract housing. Areas west and east of the Project APE have been developed into retail properties with associated paved parking lots, while north of the Project APE is a vacant lot with a single structure located on the corner of Pomona Avenue and West 19th Street. At this time, a portion of the Project APE has also been developed into a paved parking lot, while the eastern portion is still undeveloped. The historic aerial from 1972 depicts the vacant lot to the north of the Project APE has been developed into an apartment building. As for the other cardinal directions, there are no observable changes. Between 1987 and 1992, the entirety of the Project APE has been graded and it appears the original Senior Center, adjacent to the APE, has been demolished and is in the process of being rebuilt in a new configuration. In the historic aerial from 1993, construction on the new Senior Center is complete and the entirety of the Project APE has been converted into a paved parking lot. Between 1994 and 1997, there were no observable changes to the APE or surrounding area. The historic aerial from 1998 depicts the structures to the east of the Project APE being rebuilt and expanded. Between 1999 and 2022, there are no observable changes to the Project APE or surrounding area.

The first topographic map from 1896 depicts the Project APE as undeveloped. The nearest road is 0.24-miles and nearest structure 0.36-miles away from the Project APE. By 1901, a new road was constructed approximately 400-feet south of the Project APE. By 1935, the area around the Project APE is being developed with numerous roads and structures. The nearest residential house is 480-feet from the Project APE. The 1943 topographic map depicts that structures are being constructed to the northeast and southwest of the Project APE. The 1968 map shows the construction of a church to the east, a trailer park to the northeast and more structures to the northwest of the Project APE. It also shows the construction of the Senior Center adjacent to the Project APE. The 1981 map depicts the development of apartments to the north of the Project APE. Between 1982 and 2022 there are no observable changes to the Project APE or surrounding area.

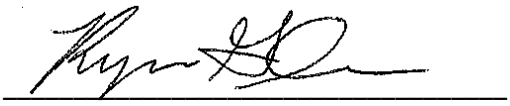
Overall, this review of historic aerial imagery and historic topo maps indicates the Project APE has been subject to past disturbances associated with the grading and construction of a parking lot since at least 1963. Currently, the Project APE is still in use as a parking lot adjacent to the Costa Mesa Senior Center.

Review of Geomorphological Context

According to the U.S. Department of Agriculture Natural Resources Conservation Services (USDA 2024), the Project APE consists of a Myford sandy loam soil type, with slopes ranging from 2% to 9%. This soil type is characterized as deep, moderately well drained soils formed on terraces and is found in areas with elevations less than 1,500 feet above mean sea level (amsl) (USDA 2024).

A review of the USGS mineral resources (USGS 2024) online spatial data for geology indicates that the Project APE is underlain by Late Quaternary alluvium and marine deposits from the Pleistocene epoch. Late Pleistocene-era alluvial formations do have the potential to support the presence of buried archaeological resources. These soils are associated with the period of prehistoric human use, as well as represent ongoing processes of development that have the potential to preserve cultural material in context, depending on area-specific topographical setting.

Recommendations



Based on background research, the Project APE has experienced disturbances since at least 1963, which are attributed to the construction and maintenance of a paved parking lot. No archaeological resources have been identified within the vicinity of the Project APE through the SCCIC records search. The previously recorded built environment resource, P-30-177525, was originally mapped as overlapping with the Project APE but has subsequently been determined to be adjacent. Also, the structure built circa 1963 was demolished and replaced in 1992. The extant structure is not historic in age (45 years or older) and does not retain exceptional significance as required for properties less than 50 years old, so it does not require updated recordation and evaluation as part of this study. Results of the records search also indicate that the Project APE has been subject to previous archaeological investigations (OR-00299 and OR-03013) that included records searches and pedestrian surveys prior to development and did not identify any archaeological resources within the Project APE. Analysis of historic aerials, topos, and the geomorphic context indicate there is a low potential for encountering intact subsurface archaeological deposits during Project implementation. No cultural resources will be impacted, and a finding of No Historic Properties Affected is recommended for the project.

The following recommendations are provided to meet National Environmental Policy Act (NEPA) and NHPA compliance and best practice standards, should the Project move forward at this location:

In the event that archaeological resources (sites, features, and artifacts) are exposed during construction activities involving ground disturbance for the proposed Project, all construction work occurring within 50 feet of the find shall immediately stop until a qualified archaeologist, meeting the Secretary of the Interior's Professional Qualification Standards, can evaluate the significance of the find and determine whether additional study is warranted. This avoidance buffer may be adjusted following inspection of this area by that qualified specialist. Prehistoric archaeological deposits may be indicated by the presence of discolored or dark soil, fire-affected material, concentrations of fragmented or whole shell, burned or complete bone, non-local lithic materials, or characteristics observed to be atypical of the surrounding area. Common prehistoric artifacts may include modified or battered lithic materials; lithic or bone tools that appeared to have been used for chopping, drilling, or grinding; projectile points; fired clay ceramics or non-functional items; and other items. Historic-age deposits are often indicated by the presence of glass bottles and shards, ceramic material, building or domestic refuse, ferrous metal, or old features such as concrete foundations or privies. Depending upon the significance of the find under the NHPA. the archaeologist may simply record the find and allow work to continue. Feasible options for avoidance must also be considered. If the discovery proves significant under the NHPA, additional work, such as preparation of an archaeological treatment plan, testing, or data recovery may be warranted.

Should you have any questions relating to this report and its findings please contact Ryan James Glenn at (626) 204-9840 or rglenn@dudek.com.

Re: Costa Mesa Senior Apartments Project, Orange County

To Whom It May Concern:

A record search of the Native American Heritage Commission (NAHC) Sacred Lands File (SLF) was completed for the information you have submitted for the above referenced project. The results were negative. However, the absence of specific site information in the SLF does not indicate the absence of cultural resources in any project area. Other sources of cultural resources should also be contacted for information regarding known and recorded sites.

Attached is a list of Native American tribes who may also have knowledge of cultural resources in the project area. This list should provide a starting place in locating areas of potential adverse impact within the proposed project area. I suggest you contact all of those indicated; if they cannot supply information, they might recommend others with specific knowledge. By contacting all those listed, your organization will be better able to respond to claims of failure to consult with the appropriate tribe. If a response has not been received within two weeks of notification, the Commission requests that you follow-up with a telephone call or email to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from tribes, please notify me. With your assistance, we can assure that our lists contain current information.

If you have any questions or need additional information, please contact me at Mathew.lin@nahc.ca.gov.

Sincerely,

Mathew Lin

Mathew Lin, MPP
Cultural Resources Analyst

Dear Charles Alvarez:

Costa Mesa Senior Apartments Project Section 106 Consultation Notification Letter

Project: New Construction of Costa Mesa Senior Apartments Location: 695 W. 19th St., Costa Mesa, CA

Orange County (County) is considering funding the project listed above with federal funds from the U.S. Department of Housing and Urban Development (HUD). Under HUD regulation 24 CFR 58.4, the County has assumed HUD's environmental review responsibilities for the project, including tribal consultation related to historic properties. Historic properties include archaeological sites, burial grounds, sacred landscapes or features, ceremonial areas, traditional cultural places and landscapes, plant and animal communities, and buildings and structures with significant tribal association.

The County is conducting a review of this project to comply with Section 106 of the National Historic Preservation Act and its implementing regulations 36 CFR Part 800. We would like to invite you to be a consulting party in this review to help identify historic properties in the project area of potential effects (APE) that may have religious and cultural significance to your tribe, and if such properties exist, to help assess how the project might affect them. If the project might have an adverse effect, we would like to discuss possible ways to avoid, minimize, or mitigate potential adverse effects.

The California Native American Heritage Commission was contacted on April 22, 2025, and a response, received on May 6, 2025, indicated that the project APE is negative for Native American cultural resources.

OC Housing & Community Development

1501 E. ST. ANDREW PLACE, 1ST FLOOR
SANTA ANA, CA 92705
PHONE: 714.480.2991
FAX: 714.480.2978

A records search was conducted on December 16, 2024, at the South Central Coastal Information Center of the California Historic Resources Information System at California State University, Fullerton for the project APE and a surrounding 1-mile buffer. The results of the records search indicated that the project site has been surveyed for archaeological resources, that two technical studies intersected the APE, and that 29 additional studies had been conducted outside the APE but within the 1-mile buffer. One previously recorded built environment resource was documented within the APE, and eight additional cultural resources did not intersect the APE but were within the 1-mile buffer. The resource documented within the APE is the Costa Mesa Senior Center, built circa 1967, but was demolished and subsequently replaced in 1992 by the currently extant Senior Center building. The previous property was evaluated in 2014 and recommended not eligible for the National Register of Historic Properties due to a lack of significant associations and architectural merit. It does not appear this recommendation was reviewed by the State Historic Preservation Officer for concurrence.

To meet project timeframes, if you would like to be a consulting party on this project, please let us know of your interest within 30 days. If you have any initial concerns with impacts of the project on religious or cultural properties, please note them in your response.

Enclosed are maps that show the project location and APE. The project is proposed on the eastern half (1.5 acres) of Assessor's Parcel Number 424-211-01, located at the southeastern corner of the intersection of West 19th Street and Pomona Avenue, in the City of Costa Mesa, California. The Costa Mesa Senior Center (Senior Center) occupies the western half (1.3 acres) of the project parcel, while the project site currently consists of an underutilized 145-stall parking lot and associated landscaping for the Senior Center. The project site is bounded by South Plumer Street to the south, the Senior Center to the west, West 19th Street to the north, and Mouse Graphics Print Shop to the east.

The project involves the construction of a new 4-story, single-building affordable housing community with 70 apartment units. Project design would incorporate Spanish Revival architecture and a courtyard-style layout. Apartments would include 68 one-bedroom units and 2 two-bedroom units, with one of the two-bedroom units reserved for an on-site manager. The other two-bedroom unit would accommodate a small-family configuration or senior with a full-time caregiver. Of the 69 affordable housing units, 34 one-bedroom units would be reserved for seniors experiencing homelessness and with incomes at or below 30% of the area median income (AMI). The remaining 35 one-bedroom units and 1 two-bedroom unit would be reserved for seniors earning at or below 60% AMI. Four units would be Americans with Disabilities Act accessible, and two units would be available for residents living with sensory impairments.

More information on the Section 106 review process is available at http://www.onecpd.info/environmental-review/historic-preservation/.

HUD's process for tribal consultation under Section 106 is described in a Notice available at https://www.onecpd.info/resource/2448/notice-cpd-12-006-tribal-consultation-under-24-cfr-part-58.

If you do not wish to consult on this project, please inform us. If you do wish to consult, please include the name and contact information for the tribe's principal representative in the consultation in your reply. Thank you very much. We value your assistance and look forward to consulting further if there are historic properties of religious and cultural significance to your tribe that may be affected by this project.

Respectfully yours,

Suzanne Harder — 5/12/25

Dear Bobby Ray Esparza:

Costa Mesa Senior Apartments Project Section 106 Consultation Notification Letter

Project: New Construction of Costa Mesa Senior Apartments Location: 695 W. 19th St., Costa Mesa, CA

Orange County (County) is considering funding the project listed above with federal funds from the U.S. Department of Housing and Urban Development (HUD). Under HUD regulation 24 CFR 58.4, the County has assumed HUD's environmental review responsibilities for the project, including tribal consultation related to historic properties. Historic properties include archaeological sites, burial grounds, sacred landscapes or features, ceremonial areas, traditional cultural places and landscapes, plant and animal communities, and buildings and structures with significant tribal association.

The County is conducting a review of this project to comply with Section 106 of the National Historic Preservation Act and its implementing regulations 36 CFR Part 800. We would like to invite you to be a consulting party in this review to help identify historic properties in the project area of potential effects (APE) that may have religious and cultural significance to your tribe, and if such properties exist, to help assess how the project might affect them. If the project might have an adverse effect, we would like to discuss possible ways to avoid, minimize, or mitigate potential adverse effects.

The California Native American Heritage Commission was contacted on April 22, 2025, and a response, received on May 6, 2025, indicated that the project APE is negative for Native American cultural resources.

OC Housing & Community Development

1501 E. ST. ANDREW PLACE, 1ST FLOOR
SANTA ANA, CA 92705
PHONE: 714.480.2991
FAX: 714.480.2978

A records search was conducted on December 16, 2024, at the South Central Coastal Information Center of the California Historic Resources Information System at California State University, Fullerton for the project APE and a surrounding 1-mile buffer. The results of the records search indicated that the project site has been surveyed for archaeological resources, that two technical studies intersected the APE, and that 29 additional studies had been conducted outside the APE but within the 1-mile buffer. One previously recorded built environment resource was documented within the APE, and eight additional cultural resources did not intersect the APE but were within the 1-mile buffer. The resource documented within the APE is the Costa Mesa Senior Center, built circa 1967, but was demolished and subsequently replaced in 1992 by the currently extant Senior Center building. The previous property was evaluated in 2014 and recommended not eligible for the National Register of Historic Properties due to a lack of significant associations and architectural merit. It does not appear this recommendation was reviewed by the State Historic Preservation Officer for concurrence.

To meet project timeframes, if you would like to be a consulting party on this project, please let us know of your interest within 30 days. If you have any initial concerns with impacts of the project on religious or cultural properties, please note them in your response.

Enclosed are maps that show the project location and APE. The project is proposed on the eastern half (1.5 acres) of Assessor's Parcel Number 424-211-01, located at the southeastern corner of the intersection of West 19th Street and Pomona Avenue, in the City of Costa Mesa, California. The Costa Mesa Senior Center (Senior Center) occupies the western half (1.3 acres) of the project parcel, while the project site currently consists of an underutilized 145-stall parking lot and associated landscaping for the Senior Center. The project site is bounded by South Plumer Street to the south, the Senior Center to the west, West 19th Street to the north, and Mouse Graphics Print Shop to the east.

The project involves the construction of a new 4-story, single-building affordable housing community with 70 apartment units. Project design would incorporate Spanish Revival architecture and a courtyard-style layout. Apartments would include 68 one-bedroom units and 2 two-bedroom units, with one of the two-bedroom units reserved for an on-site manager. The other two-bedroom unit would accommodate a small-family configuration or senior with a full-time caregiver. Of the 69 affordable housing units, 34 one-bedroom units would be reserved for seniors experiencing homelessness and with incomes at or below 30% of the area median income (AMI). The remaining 35 one-bedroom units and 1 two-bedroom unit would be reserved for seniors earning at or below 60% AMI. Four units would be Americans with Disabilities Act accessible, and two units would be available for residents living with sensory impairments.

More information on the Section 106 review process is available at http://www.onecpd.info/environmental-review/historic-preservation/.

HUD's process for tribal consultation under Section 106 is described in a Notice available at https://www.onecpd.info/resource/2448/notice-cpd-12-006-tribal-consultation-under-24-cfr-part-58.

If you do not wish to consult on this project, please inform us. If you do wish to consult, please include the name and contact information for the tribe's principal representative in the consultation in your reply. Thank you very much. We value your assistance and look forward to consulting further if there are historic properties of religious and cultural significance to your tribe that may be affected by this project.

Respectfully yours,

Suzanne Harder

The Costa Mesa Senior Center (Senior Center) occupies the western half (1.3 acres) of the project parcel, while the project site currently consists of an underutilized 145-stall parking lot and associated landscaping for the Senior Center. The project site is bounded by South Plumer Street to the south, the Senior Center to the west, West 19th Street to the north, and Mouse Graphics Print Shop to the east.

The project involves the construction of a new 4-story, single-building affordable housing community with 70 apartment units. Project design would incorporate Spanish Revival architecture and a courtyard-style layout. Apartments would include 68 one-bedroom units and 2 two-bedroom units, with one of the two-bedroom units reserved for an on-site manager. The other two-bedroom unit would accommodate a small-family configuration or senior with a full-time caregiver. Of the 69 affordable housing units, 34 one-bedroom units would be reserved for seniors experiencing homelessness and with incomes at or below 30% of the area median income (AMI). The remaining 35 one-bedroom units and 1 two-bedroom unit would be reserved for seniors earning at or below 60% AMI. Four units would be Americans with Disabilities Act accessible, and two units would be available for residents living with sensory impairments.

More information on the Section 106 review process is available at http://www.onecpd.info/environmental-review/historic-preservation/.

HUD's process for tribal consultation under Section 106 is described in a Notice available at https://www.onecpd.info/resource/2448/notice-cpd-12-006-tribal-consultation-under-24-cfr-part-58.

If you do not wish to consult on this project, please inform us. If you do wish to consult, please include the name and contact information for the tribe's principal representative in the consultation in your reply. Thank you very much. We value your assistance and look forward to consulting further if there are historic properties of religious and cultural significance to your tribe that may be affected by this project.

Respectfully yours,

Suzanne Harder

Dear Vanessa Minott:

Costa Mesa Senior Apartments Project Section 106 Consultation Notification Letter

Project: New Construction of Costa Mesa Senior Apartments Location: 695 W. 19th St., Costa Mesa, CA

Orange County (County) is considering funding the project listed above with federal funds from the U.S. Department of Housing and Urban Development (HUD). Under HUD regulation 24 CFR 58.4, the County has assumed HUD's environmental review responsibilities for the project, including tribal consultation related to historic properties. Historic properties include archaeological sites, burial grounds, sacred landscapes or features, ceremonial areas, traditional cultural places and landscapes, plant and animal communities, and buildings and structures with significant tribal association.

The County is conducting a review of this project to comply with Section 106 of the National Historic Preservation Act and its implementing regulations 36 CFR Part 800. We would like to invite you to be a consulting party in this review to help identify historic properties in the project area of potential effects (APE) that may have religious and cultural significance to your tribe, and if such properties exist, to help assess how the project might affect them. If the project might have an adverse effect, we would like to discuss possible ways to avoid, minimize, or mitigate potential adverse effects.

The California Native American Heritage Commission was contacted on April 22, 2025, and a response, received on May 6, 2025, indicated that the project APE is negative for Native American cultural resources.

OC Housing & Community Development

1501 E. ST. ANDREW PLACE, 1ST FLOOR
SANTA ANA, CA 92705
PHONE: 714.480.2991
FAX: 714.480.2978

A records search was conducted on December 16, 2024, at the South Central Coastal Information Center of the California Historic Resources Information System at California State University, Fullerton for the project APE and a surrounding 1-mile buffer. The results of the records search indicated that the project site has been surveyed for archaeological resources, that two technical studies intersected the APE, and that 29 additional studies had been conducted outside the APE but within the 1-mile buffer. One previously recorded built environment resource was documented within the APE, and eight additional cultural resources did not intersect the APE but were within the 1-mile buffer. The resource documented within the APE is the Costa Mesa Senior Center, built circa 1967, but was demolished and subsequently replaced in 1992 by the currently extant Senior Center building. The previous property was evaluated in 2014 and recommended not eligible for the National Register of Historic Properties due to a lack of significant associations and architectural merit. It does not appear this recommendation was reviewed by the State Historic Preservation Officer for concurrence.

To meet project timeframes, if you would like to be a consulting party on this project, please let us know of your interest within 30 days. If you have any initial concerns with impacts of the project on religious or cultural properties, please note them in your response.

Enclosed are maps that show the project location and APE. The project is proposed on the eastern half (1.5 acres) of Assessor's Parcel Number 424-211-01, located at the southeastern corner of the intersection of West 19th Street and Pomona Avenue, in the City of Costa Mesa, California. The Costa Mesa Senior Center (Senior Center) occupies the western half (1.3 acres) of the project parcel, while the project site currently consists of an underutilized 145-stall parking lot and associated landscaping for the Senior Center. The project site is bounded by South Plumer Street to the south, the Senior Center to the west, West 19th Street to the north, and Mouse Graphics Print Shop to the east.

The project involves the construction of a new 4-story, single-building affordable housing community with 70 apartment units. Project design would incorporate Spanish Revival architecture and a courtyard-style layout. Apartments would include 68 one-bedroom units and 2 two-bedroom units, with one of the two-bedroom units reserved for an on-site manager. The other two-bedroom unit would accommodate a small-family configuration or senior with a full-time caregiver. Of the 69 affordable housing units, 34 one-bedroom units would be reserved for seniors experiencing homelessness and with incomes at or below 30% of the area median income (AMI). The remaining 35 one-bedroom units and 1 two-bedroom unit would be reserved for seniors earning at or below 60% AMI. Four units would be Americans with Disabilities Act accessible, and two units would be available for residents living with sensory impairments.

Dear Andrew Salas:

Costa Mesa Senior Apartments Project Section 106 Consultation Notification Letter

Project: New Construction of Costa Mesa Senior Apartments Location: 695 W. 19th St., Costa Mesa, CA

Orange County (County) is considering funding the project listed above with federal funds from the U.S. Department of Housing and Urban Development (HUD). Under HUD regulation 24 CFR 58.4, the County has assumed HUD's environmental review responsibilities for the project, including tribal consultation related to historic properties. Historic properties include archaeological sites, burial grounds, sacred landscapes or features, ceremonial areas, traditional cultural places and landscapes, plant and animal communities, and buildings and structures with significant tribal association.

The County is conducting a review of this project to comply with Section 106 of the National Historic Preservation Act and its implementing regulations 36 CFR Part 800. We would like to invite you to be a consulting party in this review to help identify historic properties in the project area of potential effects (APE) that may have religious and cultural significance to your tribe, and if such properties exist, to help assess how the project might affect them. If the project might have an adverse effect, we would like to discuss possible ways to avoid, minimize, or mitigate potential adverse effects.

The California Native American Heritage Commission was contacted on April 22, 2025, and a response, received on May 6, 2025, indicated that the project APE is negative for Native American cultural resources.

OC Housing & Community Development

1501 E. ST. ANDREW PLACE, 1ST FLOOR
SANTA ANA, CA 92705
PHONE: 714.480.2991
FAX: 714.480.2978

A records search was conducted on December 16, 2024, at the South Central Coastal Information Center of the California Historic Resources Information System at California State University, Fullerton for the project APE and a surrounding 1-mile buffer. The results of the records search indicated that the project site has been surveyed for archaeological resources, that two technical studies intersected the APE, and that 29 additional studies had been conducted outside the APE but within the 1-mile buffer. One previously recorded built environment resource was documented within the APE, and eight additional cultural resources did not intersect the APE but were within the 1-mile buffer. The resource documented within the APE is the Costa Mesa Senior Center, built circa 1967, but was demolished and subsequently replaced in 1992 by the currently extant Senior Center building. The previous property was evaluated in 2014 and recommended not eligible for the National Register of Historic Properties due to a lack of significant associations and architectural merit. It does not appear this recommendation was reviewed by the State Historic Preservation Officer for concurrence.

To meet project timeframes, if you would like to be a consulting party on this project, please let us know of your interest within 30 days. If you have any initial concerns with impacts of the project on religious or cultural properties, please note them in your response.

Enclosed are maps that show the project location and APE. The project is proposed on the eastern half (1.5 acres) of Assessor's Parcel Number 424-211-01, located at the southeastern corner of the intersection of West 19th Street and Pomona Avenue, in the City of Costa Mesa, California. The Costa Mesa Senior Center (Senior Center) occupies the western half (1.3 acres) of the project parcel, while the project site currently consists of an underutilized 145-stall parking lot and associated landscaping for the Senior Center. The project site is bounded by South Plumer Street to the south, the Senior Center to the west, West 19th Street to the north, and Mouse Graphics Print Shop to the east.

The project involves the construction of a new 4-story, single-building affordable housing community with 70 apartment units. Project design would incorporate Spanish Revival architecture and a courtyard-style layout. Apartments would include 68 one-bedroom units and 2 two-bedroom units, with one of the two-bedroom units reserved for an on-site manager. The other two-bedroom unit would accommodate a small-family configuration or senior with a full-time caregiver. Of the 69 affordable housing units, 34 one-bedroom units would be reserved for seniors experiencing homelessness and with incomes at or below 30% of the area median income (AMI). The remaining 35 one-bedroom units and 1 two-bedroom unit would be reserved for seniors earning at or below 60% AMI. Four units would be Americans with Disabilities Act accessible, and two units would be available for residents living with sensory impairments.

More information on the Section 106 review process is available at http://www.onecpd.info/environmental-review/historic-preservation/.

HUD's process for tribal consultation under Section 106 is described in a Notice available at https://www.onecpd.info/resource/2448/notice-cpd-12-006-tribal-consultation-under-24-cfr-part-58.

If you do not wish to consult on this project, please inform us. If you do wish to consult, please include the name and contact information for the tribe's principal representative in the consultation in your reply. Thank you very much. We value your assistance and look forward to consulting further if there are historic properties of religious and cultural significance to your tribe that may be affected by this project.

Respectfully yours,

Suzanne Harder

Dear Erica Schenk:

Costa Mesa Senior Apartments Project Section 106 Consultation Notification Letter

Project: New Construction of Costa Mesa Senior Apartments Location: 695 W. 19th St., Costa Mesa, CA

Orange County (County) is considering funding the project listed above with federal funds from the U.S. Department of Housing and Urban Development (HUD). Under HUD regulation 24 CFR 58.4, the County has assumed HUD's environmental review responsibilities for the project, including tribal consultation related to historic properties. Historic properties include archaeological sites, burial grounds, sacred landscapes or features, ceremonial areas, traditional cultural places and landscapes, plant and animal communities, and buildings and structures with significant tribal association.

The County is conducting a review of this project to comply with Section 106 of the National Historic Preservation Act and its implementing regulations 36 CFR Part 800. We would like to invite you to be a consulting party in this review to help identify historic properties in the project area of potential effects (APE) that may have religious and cultural significance to your tribe, and if such properties exist, to help assess how the project might affect them. If the project might have an adverse effect, we would like to discuss possible ways to avoid, minimize, or mitigate potential adverse effects.

The California Native American Heritage Commission was contacted on April 22, 2025, and a response, received on May 6, 2025, indicated that the project APE is negative for Native American cultural resources.

A records search was conducted on December 16, 2024, at the South Central Coastal Information Center of the California Historic Resources Information System at California State University, Fullerton for the project APE and a surrounding 1-mile buffer. The results of the records search indicated that the project site has been surveyed for archaeological resources, that two technical studies intersected the APE, and that 29 additional studies had been conducted outside the APE but within the 1-mile buffer. One previously recorded built environment resource was documented within the APE, and eight additional cultural resources did not intersect the APE but were within the 1-mile buffer. The resource documented within the APE is the Costa Mesa Senior Center, built circa 1967, but was demolished and subsequently replaced in 1992 by the currently extant Senior Center building. The previous property was evaluated in 2014 and recommended not eligible for the National Register of Historic Properties due to a lack of significant associations and architectural merit. It does not appear this recommendation was reviewed by the State Historic Preservation Officer for concurrence.

To meet project timeframes, if you would like to be a consulting party on this project, please let us know of your interest within 30 days. If you have any initial concerns with impacts of the project on religious or cultural properties, please note them in your response.

Enclosed are maps that show the project location and APE. The project is proposed on the eastern half (1.5 acres) of Assessor's Parcel Number 424-211-01, located at the southeastern corner of the intersection of West 19th Street and Pomona Avenue, in the City of Costa Mesa, California. The Costa Mesa Senior Center (Senior Center) occupies the western half (1.3 acres) of the project parcel, while the project site currently consists of an underutilized 145-stall parking lot and associated landscaping for the Senior Center. The project site is bounded by South Plumer Street to the south, the Senior Center to the west, West 19th Street to the north, and Mouse Graphics Print Shop to the east.

The project involves the construction of a new 4-story, single-building affordable housing community with 70 apartment units. Project design would incorporate Spanish Revival architecture and a courtyard-style layout. Apartments would include 68 one-bedroom units and 2 two-bedroom units, with one of the two-bedroom units reserved for an on-site manager. The other two-bedroom unit would accommodate a small-family configuration or senior with a full-time caregiver. Of the 69 affordable housing units, 34 one-bedroom units would be reserved for seniors experiencing homelessness and with incomes at or below 30% of the area median income (AMI). The remaining 35 one-bedroom units and 1 two-bedroom unit would be reserved for seniors earning at or below 60% AMI. Four units would be Americans with Disabilities Act accessible, and two units would be available for residents living with sensory impairments.

More information on the Section 106 review process is available at http://www.onecpd.info/environmental-review/historic-preservation/.

HUD's process for tribal consultation under Section 106 is described in a Notice available at https://www.onecpd.info/resource/2448/notice-cpd-12-006-tribal-consultation-under-24-cfr-part-58.

If you do not wish to consult on this project, please inform us. If you do wish to consult, please include the name and contact information for the tribe's principal representative in the consultation in your reply. Thank you very much. We value your assistance and look forward to consulting further if there are historic properties of religious and cultural significance to your tribe that may be affected by this project.

Respectfully yours,

Suzanne Harder

Subject: Formal Request for Government-to-Government Consultation – Costa Mesa Senior Apartments

Dear Suzanne Harder,

On behalf of the Gabrieleno Band Of Mission Indians Kizh Nation, I am formally requesting government-to-government consultation with the County of Orange pursuant to Section 106 of the National Historic Preservation Act (NHPA), 36 CFR Part 800. Our tribe has ancestral and cultural ties to the area affected by the proposed Costa Mesa Apartments, and we seek to engage in meaningful consultation to ensure the proper identification, protection, and preservation of Tribal Cultural Resources (TCRs), sacred sites, and traditional cultural properties (TCPs) within our traditional territory.

As required under Section 106, federal agencies must consult with tribes when a federally funded, licensed, or permitted project has the potential to affect historic properties of religious or cultural significance to tribes. We request the opportunity to consult regarding:

1. A full project description, including anticipated ground-disturbing activities.

2. Copies of cultural resource assessments, environmental studies, and prior archaeological reports conducted in the project area.

3. A meeting to initiate formal consultation within the required timeframe to discuss potential impacts and mitigation measures.

Please confirm receipt of this request and provide available dates to initiate consultation. For scheduling or further discussion, I can be reached at [Your Email] or [Your Phone Number]. We appreciate your cooperation and look forward to engaging in this important consultation process.

GABRIELEÑO BAND OF MISSION INDIANS - KIZH NATION
Historically known as The San Gabriel Band of Mission Indians recognized by the State of California as the aboriginal tribe of the Los Angeles basin

June 17, 2025

Suzanne Harder
Community Development Compliance and Environment Coordinator
City of Santa Ana
1501 E St Andrew Place, Santa Ana, Ca 92705
Suzanne.harder@occr.ocgov.com

Dear Suzanne Harder,

The City of Costa Mesa sits within the core ancestral territory of the Gabrieleno Band of Mission Indians – Kizh Nation. Our people, the original stewards of this region, maintained well-established village communities and cultural networks throughout the Los Angeles Basin, the Santa Ana River corridor, and northern Orange County for thousands of years prior to European contact.

Historically documented Kizh villages within or adjacent to the present-day boundaries of Costa Mesa include Moyongna, Pasbenga, and Hurungna. These communities were strategically located along elevated knolls and bluffs above the Santa Ana River and coastal marshlands, providing access to both fresh and saltwater resources.

Village of Moyongna and San Joaquin Hills Settlements

Moyongna is referenced in early ethnographic and historical sources, including in association with permanent settlements in the San Joaquin Hills. Although anthropologist A.L. Kroeber once linked "Moyo" to Saucal (San Joaquin Ranch), our ongoing research and tribal knowledge affirm that Moyongna was a recognized Kizh village—not simply a geographical term.

Pasbenga, located along the Santa Ana River near what became the City of Santa Ana, appears on multiple early records, including Alexander Taylor's 1846 tribal map. It was situated at a critical juncture of freshwater access and served as a significant Kizh settlement site along the river corridor.

Archaeological Evidence and Site Documentation

Archaeological investigations conducted as early as the 1930s and again in the 1960s—such as at the Griset Site (ORA-135) and Banning Estate Site—confirm long-term Indigenous occupation and activity in the area. Cultural materials from these sites extend well into the Mission Period, and ceramic assemblages suggest continuous habitation during the early colonial era.

Andrew Salas, Chairman | Nadine Salas, Vice-Chairman | Dr. Christina Swindall Martinez, Secretary
Mike Jesus Lemos, Treasurer I | Samantha Lemos, Treasurer II | Richard Gradias, Chairman of the council of Elders

The broader coastal zone between Long Beach, Huntington Beach, and Costa Mesa is rich in archaeological resources. These include shell middens, stone tools, burial features, and seasonal encampments—often found on elevated terrain above the Santa Ana River floodplain. Sites such as ORA-58, ORA-183 (Newland Site), and ORA-119A/ORA-111 confirm sustained Indigenous activity across the region.

Mission Era Expansion into Kizh Lands

During the Spanish colonial era of the late 1700s, Costa Mesa became part of the extended lands used by Mission San Gabriel Arcángel (est. 1771) and Mission San Juan Capistrano (est. 1776). Though no mission was built within Costa Mesa, its lands were exploited for cattle grazing and agriculture. The Diego Sepúlveda Adobe (1817–1823), located within modern-day Estancia Park, functioned as a mission outpost on traditional Kizh land.

AB 52 Consultation and Mitigation Measures

Given the substantial evidence of longstanding Kizh presence and the high cultural sensitivity of Costa Mesa, Chairman Andrew Salas formally requests that the City of Costa Mesa implement the Gabrieleno Band of Mission Indians – Kizh Nation's specific mitigation measures in accordance with AB 52 consultation requirements. These measures have been carefully developed to uphold the integrity of our sacred sites and ensure the protection of any tribal cultural resources that may be identified during ground-disturbing activities.

Our mitigation measures are uniquely tailored to reflect the historical, cultural, and spiritual relationship our Tribe has with these lands. They include the presence of qualified Kizh monitors during excavation, the protection of any discovered features or artifacts, and immediate tribal notification upon findings of concern. We respectfully request confirmation of receipt of this letter and a timely response outlining the City's commitment to implement these measures. We look forward to engaging in meaningful consultation and collaborating with the City of Costa Mesa to ensure the responsible stewardship of these culturally significant areas.

Best regards,

Hereditary Chief Andrew Salas
Gabrieleño Band of Mission Indians–Kizh Nation

California State Recognized Aboriginal Tribe of the Los Angeles Basin
(Historically known as the Gabrieleño Tribal Council - San Gabriel Band of Mission Indians)

GABRIELENO BAND OF MISSION INDIANS – KIZH NATION - PROPOSED TCR MITIGATION MEASURES

Subject : Costa Mesa Senior Apartment

TCR-1: Retain a Native American Monitor Prior to Commencement of Ground-Disturbing Activities

A. The project applicant/lead agency shall retain a Native American Monitor from or approved by the Gabrieleño Band of Mission Indians – Kizh Nation. The monitor shall be retained prior to the commencement of any "ground-disturbing activity" for the subject project at all project locations (i.e., both on-site and any off-site locations that are included in the project description/definition and/or required in connection with the project, such as public improvement work). "Ground-disturbing activity" shall include, but is not limited to, demolition, pavement removal, potholing, auguring, grubbing, tree removal, boring, grading, excavation, drilling, and trenching.
B. A copy of the executed monitoring agreement shall be submitted to the lead agency prior to the earlier of the commencement of any ground-disturbing activity, or the issuance of any permit necessary to commence a ground-disturbing activity.
C. The monitor will complete daily monitoring logs that will provide descriptions of the relevant ground-disturbing activities, the type of construction activities performed, locations of ground-disturbing activities, soil types, cultural-related materials, and any other facts, conditions, materials, or discoveries of significance to the Tribe. Monitor logs will identify and describe any discovered TCRs, including but not limited to, Native American cultural and historical artifacts, remains, places of significance, etc., (collectively, tribal cultural resources, or "TCR"), as well as any discovered Native American (ancestral) human remains and burial goods. Copies of monitor logs will be provided to the project applicant/lead agency upon written request to the Tribe.
D. On-site tribal monitoring shall conclude upon the latter of the following (1) written confirmation to the Kizh from a designated point of contact for the project applicant/lead agency that all ground-disturbing activities and phases that may involve ground-disturbing activities on the project site or in connection with the project are complete; or (2) a determination and written notification by the Kizh to the project applicant/lead agency that no future, planned construction activity and/or development/construction phase at the project site possesses the potential to impact Kizh TCRs.

TCR-2: Unanticipated Discovery of Tribal Cultural Resource Objects (Non-Funerary/Non-Ceremonial)

A. Upon discovery of any TCRs, all construction activities in the immediate vicinity of the discovery shall cease (i.e., not less than the surrounding 50 feet) and shall not resume until the discovered TCR has been fully assessed by the Kizh monitor and/or Kizh archaeologist. The Kizh will recover and retain all discovered TCRs in the form and/or manner the Tribe deems appropriate, in the Tribe's sole discretion, and for any purpose the Tribe deems appropriate, including for educational, cultural and/or historic purposes.

TCR-3: Unanticipated Discovery of Human Remains and Associated Funerary or Ceremonial Objects

A. Native American human remains are defined in PRC 5097.98 (d)(1) as an inhumation or cremation, and in any state of decomposition or skeletal completeness. Funerary objects, called associated grave goods in Public Resources Code Section 5097.98, are also to be treated according to this statute.
B. If Native American human remains and/or grave goods are discovered or recognized on the project site, then Public Resource Code 5097.9 as well as Health and Safety Code Section 7050.5 shall be followed.
C. Human remains and grave/burial goods shall be treated alike per California Public Resources Code section 5097.98(d)(1) and (2).
D. Preservation in place (i.e., avoidance) is the preferred manner of treatment for discovered human remains and/or burial goods.
E. Any discovery of human remains/burial goods shall be kept confidential to prevent further disturbance.

PLEASE NOTE THE FOLLOWING:

Any/all revisions to the Kizh's proposed TCR mitigations set forth above must be requested in writing, and not more than ten (30) calendar days from the date that we consulted on the subject Project so that we can conclude consultation. Requested revisions shall be delivered to the Kizh via email at admin@gabrielenoindians.org, and in a Word document, redline format. Please include as the email subject: "REQUEST FOR MITIGATION REVISIONS," and identify the project name and location/address. If revisions are not requested within 10 calendar days of consultation, the Kizh's proposed mitigations are presumed accepted as proposed (i.e., as set forth above). The laws preserving the confidentiality of Native

The laws preserving the confidentiality of Native
American documents and records prohibits the inclusion of any information about the location of Native American artifacts, sites, sacred lands, or any other information that is exempt from public disclosure pursuant to the Public Records Act. (Cal. Code Regs. § 15120(d) Rocklin (2011) 197 Cal.App.4th 200, at p. 220. Please be advised that these protective mitigation measures are property of the KIZH Nation Tribal government and no other entity or Tribal government nor should they be utilized for any other Tribal

government or entity and are protected under the AB52 confidentiality act

Thank you for your anticipated cooperation.

Good afternoon Suzanne
Thank you for reaching out.
This APE is of concern as it is within the footprint of sacred tribal areas. Tribal monitoring needs to be included and we would like to be a part of that process of monitoring.

Please let us know your next steps,
Christina Conley

Good Afternoon,

I am responding on behalf of the Juaneno Band of Mission Indians, Acjachemen Nation-Belardes to your letter pursuant to AB52 regarding the proposed project located at 695 W. 19th St., Costa Mesa, CA. This project is located within our territory, and a sensitive area to our tribe. We wish to consult on this project as it moves forward.

Due to the sensitivity of the area, our preliminary recommendation is that mitigation measures including native monitoring by representatives of our Tribe, and an inadvertent discovery plan are put in place to minimize the potential impacts on buried cultural resources. Please see attached recommended mitigation language.

Thank you and we look forward to hearing from you.

Mitigation Measure Draft

TCR-1: Retention of a Native American Monitor Prior to Commencement of Ground-Disturbing Activities.

a) The Project applicant shall retain a Native American Monitor from or approved by the Juaneno Band of Mission Indians, Acjachemen Nation- Belardes. The monitor shall be retained prior to the commencement of any ground-disturbing activity for the subject project at all project locations (i.e., both on-site and any off-site locations that are included in the project description/definition and/or required in connection with the project, such as public improvement work). “Ground-disturbing activity” shall include, but is not limited to, demolition, pavement removal, potholing, auguring, grubbing, tree removal, boring, grading, excavation, drilling, and trenching.
b) A copy of the executed monitoring agreement shall be submitted to the (City) prior to the commencement of any ground-disturbing activity, or the issuance of any permit necessary to commence ground disturbing activity.

c) The monitor will complete daily monitoring logs that will provide descriptions of the relevant ground-disturbing activities, the type of construction activities performed, locations of ground-disturbing activities, soil types, cultural-related materials, and any other facts, conditions, materials, or discoveries of significance to the Tribe. Monitor logs will identify and describe any discovered tribal cultural resources (TCRs), including but not limited to, Native American cultural and historical artifacts, remains, places of significance, etc., as well as any discovered Native American (ancestral) human remains and burial goods. Copies of monitor logs will be provided to the Project applicant upon written request to the Tribe.

d) On-site tribal monitoring shall conclude upon the latter of the following (1) written confirmation to the Tribe or Tribal monitoring agency from a designated point of contact for the Project applicant that all ground-disturbing activities and phases that may involve the Project are complete; or (2) a determination and written notification by the Tribe or Tribal monitoring agency to the Director of Community Development, or designee that no future, planned construction activity and/or development/construction phase at the Project site possesses the potential to
impact TCRs.

TCR-2: Unanticipated Discovery of Tribal Cultural Resource Objects (Non-Funerary/Non-Ceremonial)

a) Upon discovery of any tribal cultural resources (TCRs), all construction activities in the immediate vicinity of the discovery shall cease (i.e., not less than the surrounding 50 feet) and shall not resume until the discovered TCR has been fully assessed by the Native American Monitor. The Tribe or Tribal monitoring agency will recover and retain

all discovered TCRs in the form and/or manner the Tribe deems appropriate, in the Tribe's sole discretion, and for any purpose the Tribe deems appropriate, including for educational, cultural and/or historic purposes.

TCR-3: Unanticipated Discovery of Human Remains and Associated Funerary or Ceremonial Objects.

a) Native American human remains are defined in PRC 5097.98 (d)(1) as an inhumation or cremation, and in any state of decomposition or skeletal completeness. Funerary objects, called associated grave goods in Public Resources Code Section 5097.98, are also to be treated according to this statute.

b) If Native American human remains and/or grave goods are discovered or recognized on the project site, then Public Resource Code 5097.9 as well as Health and Safety Code Section 7050.5 shall be followed.

c) Human remains and grave/burial goods shall be treated alike per California Public Resources Code section 5097.98(d)(1) and (2).

d) Preservation in place (i.e., avoidance) is the preferred manner of treatment for discovered human remains and/or burial goods.

e) Any discovery of human remains/burial goods shall be kept confidential to prevent further disturbance.

Dear Brandy Salas,

Mitigation Measures for Costa Mesa Senior Project

Thank you for your thoughtful input and the valuable information you provided during our Section 106 Consultation for the Costa Mesa Senior Project in Costa Mesa, California.

As part of the County of Orange's due diligence, a record search of the Native American Heritage Commission (NAHC) Sacred Lands File (SLF) was conducted, which yielded negative results. The NAHC also provided a list of Native American tribes to be contacted regarding the project. Following this guidance, the County sent letters and emails inviting all tribes listed to request consultation.

As a result of this outreach, three tribes expressed interest and requested consultation. County staff engaged in telephone and email correspondence with each tribe, collaboratively developing mitigation measures based on their recommendations. The attached mitigation measures reflect a careful review of all tribal input and represent a balanced and equitable approach. The County considers the Section 106 process for this project concluded.

Moving forward, the developer's consultant will reach out to you directly to coordinate scheduling for monitoring activities during any ground-disturbing work. We appreciate your continued involvement and look forward to supporting a respectful and inclusive approach throughout the duration of the project.

Thank you again for your collaboration.

Sincerely,

Suzanne Harder, Administrative Analyst

a) Native American human remains are defined in Public Resources Code Section 5097.98 (d)(1) as an inhumation or cremation, and in any state of decomposition or skeletal completeness. Funerary objects, called associated grave goods in Public Resources Code Section 5097.98, are also to be treated according to this statute.

b) If Native American human remains and/or grave goods are discovered or recognized on the project site, then Public Resource Code 5097.9 as well as Health and Safety Code Section 7050.5 shall be followed.

c) Human remains and grave/burial goods shall be treated alike per California Public Resources Code Section 5097.98(d)(1) and (2).

d) Preservation in place (i.e., avoidance) is the preferred manner of treatment for discovered human remains and/or burial goods.

e) Any discovery of human remains/burial goods shall be kept confidential to prevent further disturbance.

Irvine, CA 92603

Dear Joyce Stansfield Perry,

Mitigation Measures for Costa Mesa Senior Project

Thank you for your thoughtful input and the valuable information you provided during our Section 106 Consultation for the Costa Mesa Senior Project in Costa Mesa, California.

As part of the County of Orange's due diligence, a record search of the Native American Heritage Commission (NAHC) Sacred Lands File (SLF) was conducted, which yielded negative results. The NAHC also provided a list of Native American tribes to be contacted regarding the project. Following this guidance, the County sent letters and emails inviting all tribes listed to request consultation.

As a result of this outreach, three tribes expressed interest and requested consultation. County staff engaged in telephone and email correspondence with each tribe, collaboratively developing mitigation measures based on their recommendations. The attached mitigation measures reflect a careful review of all tribal input and represent a balanced and equitable approach. The County considers the Section 106 process for this project concluded.

Moving forward, the developer's consultant will reach out to you directly to coordinate scheduling for monitoring activities during any ground-disturbing work. We appreciate your continued involvement and look forward to supporting a respectful and inclusive approach throughout the duration of the project.

Thank you again for your collaboration.

Sincerely,

Suzanne Harder

Suzanne Harder, Administrative Analyst

PHONE: 714.480.6534
FAX: 714.480.2978

MM-TCR-1: Retain a Native American Monitor Prior to Commencement of Ground-Disturbing Activities.

a) The project applicant shall retain a Native American Monitor from or approved by the Consulting Tribes. The monitor shall be retained prior to the commencement of any ground-disturbing activity for the subject project at all project locations (i.e., both on-site and any off-site locations that are included in the project description/definition and/or required in connection with the project, such as public improvement work). "Ground-disturbing activity" shall include, but is not limited to, demolition, pavement removal, potholing, auguring, grubbing, tree removal, boring, grading, excavation, drilling, and trenching.

b) A copy of the executed monitoring agreement shall be submitted to the County prior to the commencement of any ground-disturbing activity, or the issuance of any permit necessary to commence a ground-disturbing activity.

c) The monitor will complete daily monitoring logs that will provide descriptions of the relevant ground-disturbing activities, the type of construction activities performed, locations of ground-disturbing activities, soil types, cultural-related materials, and any other facts, conditions, materials, or discoveries of significance to the Consulting Tribes. Monitor logs will identify and describe any discovered tribal cultural resources(TCRs), including but not limited to, Native American cultural and historical artifacts, remains, places of significance, etc., as well as any discovered Native American (ancestral) human remains and burial goods. Copies of monitor logs will be provided to the project applicant/County upon written request to the Consulting Tribes.

d) On-site tribal monitoring shall conclude upon the latter of the following: (1) written confirmation to the Consulting Tribes from a designated point of contact for the project applicant that all ground-disturbing activities and phases that may involve ground-disturbing activities on the project site or in connection with the project are complete; or (2) a determination and written notification by the Consulting Tribes to the project applicant that no future, planned construction activity and/or development/construction phase at the project site possesses the potential to impact TCRs.

MM-TCR-2: Unanticipated Discovery of Tribal Cultural Resource Objects (Non-Funerary/Non-Ceremonial).
Upon discovery of any tribal cultural resources (TCRs), all construction activities in the immediate vicinity of the discovery shall cease (i.e., not less than the surrounding 50 feet) and shall not resume until the discovered TCR has been fully assessed by the Native American Monitor. The Consulting Tribes will recover and retain all discovered TCRs in the form and/or manner the Consulting Tribes deem appropriate and for any purpose the Consulting Tribes deem appropriate, including for educational, cultural and/or historic purposes.

MM-TCR-3: Unanticipated Discovery of Human Remains and Associated Funerary or Ceremonial Objects.

a) Native American human remains are defined in Public Resources Code Section 5097.98 (d)(1) as an inhumation or cremation, and in any state of decomposition or skeletal completeness. Funerary objects, called associated grave goods in Public Resources Code Section 5097.98, are also to be treated according to this statute.

b) If Native American human remains and/or grave goods are discovered or recognized on the project site, then Public Resource Code 5097.9 as well as Health and Safety Code Section 7050.5 shall be followed.

c) Human remains and grave/burial goods shall be treated alike per California Public Resources Code Section 5097.98(d)(1) and (2).

d) Preservation in place (i.e., avoidance) is the preferred manner of treatment for discovered human remains and/or burial goods.

e) Any discovery of human remains/burial goods shall be kept confidential to prevent further disturbance.

Re: Request for Concurrence for the Costa Mesa Senior Apartments Project, Costa Mesa, Orange County, California

Dear Ms. Polanco:

In accordance with Section 106 of the National Historic Preservation Act (NHPA) of 1966 as amended (16 U.S.C 470f), and as required by the U.S. Department of Housing and Urban Development (HUD), we are requesting your review and comments on the determination of no effect that Project implementation would have on historic properties within the Project Area of Potential Effects (APE) for the Costa Mesa Senior Apartments Project (Project).

Costa Mesa Senior Apartments Project
695 West 19th Street (Assessor's Parcel Number [APN] 424-211-01)
Costa Mesa, CA 92627

Undertaking: The Project is located on the eastern half (1.5-acres) of a parcel (APN 424-211-01) at 695 West 19th Street in the City of Costa Mesa, Orange County, California. The Project falls within Section 21 of Township 1N and Range 19W of the *Newport Beach, California* U.S Geological Survey 7.5-minute Series Quadrangle Map. The Project would entail the construction of a new four-story, single-building affordable housing community with 70 apartment units. Project design would incorporate Spanish Revival architecture and a courtyard-style layout. Apartments would include 68 one-bedroom units and 2 two-bedroom units, with one of the two-bedroom units reserved for an onsite manager. The other two-bedroom unit would accommodate a small-family configuration or senior with a full-time caregiver. Of the 69 affordable housing units, 34 one-bedroom units would be reserved for seniors experiencing homelessness and with incomes at or below 30% of the area median income (AMI).

The remaining 35 one-bedroom units and 1 two-bedroom unit would be reserved for seniors earning at or below 60% AMI. Four units would be Americans with Disabilities Act accessible, and two units would be available for residents living with sensory impairments.

OC Housing & Community Development

1501 E. ST. ANDREW PLACE, 1ST FLOOR
SANTA ANA, CA 92705
PHONE: 714.480.2991
FAX: 714.480.2978

Area of Potential effects: The horizontal limits of the APE are consistent with the Project boundary which is 1.5-acres and encompasses the eastern half of APN 424-211-01. Ground disturbance would encompass the entire 1.5-acre APE. The vertical above ground extent of the APE is anticipated to be four stories, which is the height of the single-building affordable housing community proposed for construction on the Project site. The vertical underground extent of the APE, as represented by the maximum depth of excavation, is currently unknown but ground disturbance is anticipated to include tree removals, trenching for utilities, foundation work, and grading.

Historic Property Identification Effort: DUDEK conducted a records search at the California Historic Resources Information System (CHRIS) South Central Coastal Information Center (SCCIC) on December 16, 2024. The records search indicates that nine previously recorded cultural resources are located within one mile of the Project APE, none of which intersect the APE. One built environment resource, the Costa Mesa Senior Center (P-30-177525), is located adjacent to the APE. P-30-177525 was evaluated in 2014, recommended not eligible for the NRHP, and was demolished and subsequently replaced in 1992 by the currently extant Senior Center building. Of the remaining eight resources, three are prehistoric sites, and five are historic era built environment resources. Results of the records search also indicate that the Project APE has been subject to previous archaeological investigations (OR-00299 and OR-03013) that included records searches and pedestrian surveys that did not identify any archaeological resources within the Project APE. Analysis of historic aerials, and topographic maps, indicate the APE has been subject to past disturbances associated with the construction and maintenance of the asphalt-paved parking lot and associated landscaping since at least 1963.

Based on background research indicating past disturbances, and in consideration of the lack of prehistoric and historic-era archaeological resources within the APE, DUDEK concludes that there is a low potential for encountering intact subsurface archaeological deposits within the APE during Project implementation.

Description of Findings: We did not identify any cultural resources, including historic properties, within the Project APE.

Determination of Effect: We have determined that the undertaking would have no effect on historic properties (i.e., no historic properties affected). Our investigation did not identify any historic properties or other cultural resources within the Project APE.

Your review and comments on our determination of no historic properties affected is requested. Please provide us with your response on or before 30 days of receipt of this letter.

To assist in your review, included in this submission is the cultural resources constraints analysis (with confidential records search results) prepared by DUDEK for Project (Attachment 1), as well as a Project Location Map (Attachment 2), and a Project APE Map (Attachment 3). Should you need further information, please contact me via email at suzanne.harder@occr.ocgov.com.

Sincerely,

Suzanne Harder February 3, 2025

Attachment 1 - Cultural Resources Constraints Analysis for the Costa Mesa Senior Apartments Project, City of Costa Mesa, Orange County, California (Link sent via Dropbox)
Attachment 2 - Project Location Map
Attachment 3 - Project APE Map

Description of Undertaking:
Address: 695 West 19th Street
Costa Mesa, CA 92627
Census Tract: [80590636.05]
APN: 424-211-01

Agency Official Determination:
Based on our review, it is our determination that no historic properties or archaeological resources will be affected by this Project. We base these findings on:

- SCCIC records search indicating that no previously recorded built environment resources are within the Project APE
- Background research and aerial imagery indicating past disturbances within the Project APE
- The lack of previously recorded archaeological resources within or adjacent to the Project APE

Project Description:
The proposed Project would entail the construction of a new four-story, single-building affordable housing community with 70 apartment units. Project design would incorporate Spanish Revival architecture and a courtyard-style layout. Apartments would include 68 one-bedroom units and 2 two-bedroom units, with one of the two-bedroom units reserved for an onsite manager. The other two-bedroom unit would accommodate a small-family configuration or senior with a full-time caregiver. Of the 69 affordable housing units, 34 one-bedroom units would be reserved for seniors experiencing homelessness and with incomes at or below 30% of the area median income (AMI). The remaining 35 one-bedroom units and 1 two-bedroom unit would be reserved for seniors earning at or below 60% AMI. Four units would be Americans with Disabilities Act accessible, and two units would be available for residents living with sensory impairments.

Site Information:

- **Zoning Designation:** [C1]
- **General Plan Land Use Designation:** [General Commercial]
- **Existing Use:** [Parking Lot]
- **Prior Use(s)/Development(s):** [Parking Lot]

Existing Conditions and Trends: The Project APE is an asphalt-paved parking lot and associated landscaping located at the southeastern corner of the intersection of West 19th Street and Pomona Avenue in the City of Costa Mesa, California. Adjacent land uses consist of a mixed residential and commercial.

Santa Ana, CA 92705

Re: Request for Section 106 Review of HUD project: New Construction of Costa Mesa Senior Apartments at 695 West 19th Street, Costa Mesa, CA.

Dear Ms. Harder:

The California State Historic Preservation Officer (SHPO) received the consultation submittal for the above referenced undertaking for our review and comment pursuant to Section 106 of the National Historic Preservation Act and its implementing regulations found at 36 CFR Part 800. The regulations and advisory materials are located at www.achp.gov.

Undertaking
The proposed undertaking is to construct a new four-story affordable housing building with amenities.

Area of Potential Effects (APE)
Orange County has delineated the APE area as the 1.5-acre project site, APN 424-211-01. The vertical aspect of the APE was not specifically defined but the County noted there will be trenching for utilities and ground disturbance for foundation work. The vertical aspect of the APE is approximately up to 12 feet below ground surface.

- Pursuant to 36 CFR § 800.4(a)(1), I have no comments on Orange County's APE.

Identification of Historic Properties
The County's efforts to identify historic properties included a records search at SCCIC on December 16, 2024, and a previously completed pedestrian archaeological survey. The County did not note any Tribal consultation in their letter. The records search indicated that no sites have been previously recorded within the project's APE, and a previous pedestrian archaeological survey did not reveal any archaeological properties.

Tribal Consultation

- Please provide the results of a Sacred Lands File Search on the APE obtained from the Native American Heritage Commission (NAHC); provide evidence of notification and invitation to consult sent to any Tribes identified by the NAHC on the Tribal Contact List, pursuant to 36 CFR § 800.3(f); and provide substantive details of any comments, concerns, or requests to consult received from Tribes 30 days from notification.

Finding of Effect

Orange County has proposed a finding of No Historic Properties Affected for this undertaking. The SHPO cannot comment on a finding of effect at this time, pending receipt of the information requested above.

We appreciate Orange County's efforts to comply with Section 106 of the National Historic Preservation Act and look forward to continuing this consultation. If you have questions please contact Susan Negrete, State Historian II, with the Local Government & Environmental Compliance Unit at susan.negrete@parks.ca.gov.

Sincerely,

Julianne Polanco
State Historic Preservation Officer

Docusign Envelope ID: 38D207C1-05D9-4782-94AF-935BB39BE9F2

represented by the maximum depth of excavation, is currently unknown but ground disturbance is anticipated to include tree removals, trenching for utilities, foundation work, and grading.

Historic Property Identification Effort: Dudek conducted a records search at the California Historic Resources Information System (CHRIS) South Central Coastal Information Center (SCCIC) on December 16, 2024. The records search indicates that nine previously recorded cultural resources are located within one mile of the Project APE, none of which intersect the APE. One built environment resource, the Costa Mesa Senior Center (P-30-177525), is located adjacent to the APE. P-30-177525 was evaluated in 2014, recommended not eligible for the NRHP, and was demolished and subsequently replaced in 1992 by the currently extant Senior Center building. Of the remaining eight resources, three are prehistoric sites, and five are historic-era built environment resources. Results of the records search also indicate that the Project APE has been subject to previous archaeological investigations (OR-00299 and OR-03013) that included records searches and pedestrian surveys that did not identify any archaeological resources within the Project APE. Analysis of historic aerials, and topographic maps, indicate the APE has been subject to past disturbances associated with the construction and maintenance of the asphalt-paved parking lot and associated landscaping since at least 1963.

Based on background research indicating past disturbances, and in consideration of the lack of prehistoric and historic-era archaeological resources within the APE, Dudek concluded that there is a low potential for encountering intact subsurface archaeological deposits within the APE during Project implementation.

Description of Findings: We did not identify any cultural resources, including historic properties, within the Project APE.

Tribal Consultation: Dudek sent a request to the Native American Heritage Commission (NAHC) for a search of the Sacred Lands File (SLF) encompassing the Project APE and a one-mile radius on April 22, 2025. On May 6, 2025, the NAHC responded via email, indicating that the SLF search yielded negative results. In addition, the NAHC provided a list of 22 Native American tribes and individuals/organizations with traditional geographic affiliations who may possess knowledge concerning Tribal properties in the vicinity of the Project APE. In accordance with 36 CFR § 800.3(f), the County initiated Section 106 Consultation by issuing formal notification letters via certified mail to all entities included on the Tribal Contact List on May 12, 2025. Email notifications were also sent to ensure comprehensive outreach and that all parties received the invitation to participate in the consultation process. Responses to the Section 106 Consultation Notifications were received from Gabrieleño Band of Mission Indians - Kizh Nation on May 21, 2025; Gabrielino Tongva Indians of California on June 10, 2025; and Juaneño Band of Mission Indians, Acjachemen Nation-Belardes on June 20, 2025. Kizh Nation requested Native American monitoring and proposed three mitigation measures (TCR-1, TCR-2, and TCR-3). The Gabrielino Tongva Indians Tribe indicated that the Project APE lies within their Tribal territory and likewise requested participation in the monitoring process. The Juaneño Band of Mission Indians also requested Native American monitoring and submitted three mitigation measures (TCR-1, TCR-2, and TCR-3), which closely aligned with those proposed

Docusign Envelope ID: 38D207C1-05D9-4782-94AF-935BB39BE9F2

by Kizh Nation. In response to consultation, the County developed three mitigation measures that collectively reflect the input and concerns of all three Tribes expressing interest in the Project APE. No Tribal properties were identified within the APE during the consultation process.

Determination of Effect: We have determined that the undertaking would have no effect on historic properties (i.e., no historic properties affected). Our investigation did not identify any historic properties or other cultural resources within the Project APE.

Your review and comments on our determination of no historic properties affected is requested. Please provide us with your response on or before 30 days of receipt of this letter.

To assist in your review, included in this packet is the cultural resources constraints analysis (with confidential records search results) prepared by Dudek for the Project (Attachment 1), as well as a Project Location Map (Attachment 2), a Project APE Map (Attachment 3), and record of Tribal consultation (Attachment 4). Should you need further information, please contact me via email at craig.fee@occr.ocgov.com.

Re: Costa Mesa Senior Apartments Project at 695 West 19th Street, Costa Mesa, CA

Dear Mr. Fee:

The California State Historic Preservation Office (SHPO) received the consultation submittal for the above-referenced undertaking for our review and comment, pursuant to Section 106 of the National Historic Preservation Act and its implementing regulations found at 36 CFR Part 800. The regulations and advisory materials are located at www.achp.gov.

Undertaking
The proposed undertaking entails the construction of a new four-story, single-building affordable housing community with 70 apartment units. Project design would incorporate Spanish Revival architecture and a courtyard-style layout. Apartments would include 68 one-bedroom units and 2 two-bedroom units, with one of the two-bedroom units reserved for an onsite manager. The other two-bedroom units would accommodate a small-family configuration or senior with a full-time caregiver. Of the 69 affordable housing units, 34 one-bedroom units would be reserved for seniors experiencing homelessness and with incomes at or below 30% of the area median income (AMI). The remaining 35 one-bedroom units and 1 two-bedroom unit would be reserved for seniors earning at or below 60% AMI. Four units would be Americans with Disabilities Act accessible, and two units would be available for residents living with sensory impairments.

Area of Potential Effects (APE)
The County of Orange has delineated the APE as the 1.5-acre, eastern half of APN 424-211-01 at 695 West 19th Street, Cost Mesa, CA.

- Pursuant to 36 CFR § 800.4(a)(1), I have no comments on the County of Orange's APE.

Identification of Historic Properties
The County of Tehama's efforts to identify historic properties included a records search and consultation with Native Americans. The records search at South Central Coastal Information Center on December 16, 2024, indicated that while sites have been previously identified in the vicinity of the project area, no sites have been previously recorded within the project's APE.

Tribal Consultation
The County of Orange initiated consultation on this undertaking with 22 Tribes on May 12, 2025.

The County received three responses to the tribal consultation requests from the Gabrieleño Band of Mission Indians - Kizh Nation; the Gabrielino Tongva Indians of California; and the Juaneño Band of Mission Indians, Acjachemen Nation-Belardes. Kizh Nation requested Native American monitoring and proposed three mitigation measures (TCR-1, TCR-2, and TCR-3). The Gabrielino Tongva Indians Tribe indicated that the Project APE lies within their Tribal territory and likewise requested participation in the monitoring process. The Juaneño Band of Mission Indians also requested Native American monitoring and submitted three mitigation measures (TCR-1, TCR-2, and TCR-3), which closely aligned with those proposed by Kizh Nation. In response to consultation, the County developed three mitigation measures that collectively reflect the input and concerns of all three Tribes expressing interest in the Project APE. No Tribal properties were identified within the APE during the consultation process.

Finding of Effect
Pursuant to 36 CFR § 800.4(d), SHPO does not object to the County of Orange' finding of *No Historic Properties Affected* for the U.S. Department of Housing and Urban Development (HUD)-funded Costa Mesa Senior Apartments Project at 695 West 19th Street in Costa Mesa. Please note that under certain circumstances, such as unanticipated discovery or a change in project description, the County of Orange may have additional future responsibilities for this undertaking under 36 CFR Part 800.

SHPO appreciates the County of Orange's consideration of historic properties in the project planning process. If you have questions, please contact Chris Wendt, Historian II, with the Architectural Review & Environmental Compliance Unit at chris.wendt@parks.ca.gov.

Please note that we are only sending this letter in electronic format. Please confirm receipt of this letter.

Sincerely,

Julianne Polanco
State Historic Preservation Officer

Subject:	Noise Technical Memorandum – Costa Mesa Senior Affordable Housing Project
Date:	2/14/2025
cc:	Jim Cowan, Dudek
Attachment(s):	Figure 1, Project Location
	Figure 2, Noise Model Receiver Locations
	Attachment A, Traffic Noise Model Input/Output Data
	Attachment B, Composite Transmission Loss/Sound Transmission Class Calculations

This technical noise memorandum summarizes the results of the noise analysis conducted for on-site uses of the Costa Mesa Senior Affordable Housing Project (Project) in Costa Mesa, California (see Figure 1).

1 Background

1.1 Project Description

The Costa Mesa Senior affordable housing project is a proposed new construction senior and permanent supportive housing (PSH) community located in downtown Costa Mesa, near the intersection of West 19th Street and Pomona Avenue. The project site is located on the eastern 1.5 acres of APN 424-211-01, which is approximately 2.7 acres total. The western portion of the project parcel is developed with an existing commercial building occupied by the Costa Mesa Senior Center (Senior Center), while the project site is currently developed with an asphalt-paved, 145-stall parking lot and associated landscaping serving the Senior Center. Jamboree Housing Corporation (the Applicant) has control of the project site through an Exclusive Negotiating Agreement with the City approved by the City Council in 2021 and renewed in July 2024.

The proposed project would entail the construction and operation of a new four-story, single-building affordable housing community for seniors aged 62 and older with 70 apartment units. Project design would incorporate Spanish Revival architecture and a courtyard-style layout. Apartments would include 68 one-bedroom units and 2 two-bedroom units, with one of the two-bedroom units reserved for an on-site manager. The other two-bedroom unit would accommodate a small-family configuration or senior with a full-time caregiver. Of the 69 affordable housing units, 34 one-bedroom units would be reserved for seniors experiencing homelessness and with incomes at or below 30% of the area median income (AMI). The remaining 35 one-bedroom units and 1 two-bedroom unit would be reserved for seniors earning at or below 60% AMI. Four units would be Americans with Disabilities Act (ADA) accessible, and two units would be available for residents living with sensory impairments.

The proposed project would include shared communal spaces and amenities, including a leasing office, common area, laundry facilities, individual counseling offices, a community room with kitchen area, library/computer room, pet spa, and multi-purpose flex room with areas set aside for games and media. Residents would have also have access to outdoor amenities and open spaces, including a community courtyard, dog park, fitness lawn, lawn for games, community garden, and outdoor dining area. In addition, the building would be elevator serviced. Remaining parking on site would be shared between residents of the proposed development and the adjacent Senior Center.

1.2 Noise Fundamentals and Terminology

Vibrations, traveling as waves through air from a source, exert a force perceived by the human ear as sound. Sound pressure level (referred to as sound level) is measured on a logarithmic scale in decibels (dB) that represent the fluctuation of air pressure above and below atmospheric pressure. Frequency, or pitch, is a physical characteristic of sound and is expressed in units of cycles per second or hertz (Hz). The normal frequency range of hearing for most people extends from about 20 to 20,000 Hz. The human ear is more sensitive to middle and high frequencies, especially when the noise levels are quieter. As noise levels get louder, the human ear starts to hear the frequency spectrum more evenly. To accommodate for this phenomenon, a weighting system to evaluate how loud a noise level is to a human was developed. The frequency weighting called "A" weighting is typically used for quieter noise levels, which de-emphasizes the low-frequency components of the sound in a manner similar to the response of a human ear. This A-weighted sound level is called the "noise level" and is referenced in units of dBA.

Because sound is measured on a logarithmic scale, a doubling of sound energy results in a 3 dBA increase in the noise level. Changes in a community noise level of less than 3 dB are not typically noticed by the human ear (Caltrans 2013). Changes from 3 to 5 dB may be noticed by some individuals who are extremely sensitive to changes in noise. A 5 dB increase is readily noticeable. The human ear perceives a 10 dB increase in sound level as a doubling of the sound level (i.e., 65 dBA sounds twice as loud as 55 dBA to a human ear).

An individual's noise exposure occurs over a period of time; however, noise level is a measure of noise at a given instant in time. The equivalent continuous sound level (L_{eq}), also referred to as the average sound level, is a single number representing the fluctuating sound level in A-weighted decibels (dBA) over a specified period of time. It is a sound-energy average of the fluctuating level and is equal to a constant unchanging sound of that dB level. Community noise sources vary continuously, being the product of many noise sources at various distances, all of which constitute a relatively stable background or ambient noise environment.

Noise levels are generally higher during the daytime and early evening when traffic (including airplanes), commercial, and industrial activity is the greatest. However, noise sources experienced during nighttime hours when background levels are generally lower can be potentially more conspicuous and irritating to the receiver. In order to evaluate noise in a way that considers periodic fluctuations experienced throughout the day and night, a concept termed "community noise equivalent level" (CNEL) was developed, The CNEL scale represents a time-weighted 24-hour average noise level based on the A-weighted sound level. CNEL accounts for the increased noise sensitivity during the evening hours (7 p.m. to 10 p.m.) and nighttime hours (10 p.m.

to 7 a.m.) by adding 5 dB to the average sound levels occurring during the evening hours and 10 dB to the sound levels occurring during nighttime hours. Additional noise definitions are provided below.

Ambient Noise Level. The composite of noise from all sources near and far. The normal or existing level of environmental noise at a given location.

A-Weighted Sound Level (dBA). The sound pressure level in decibels as measured on a sound level meter using the A-weighted filter network. The A-weighting filter deemphasizes the very low and very high frequency components of the sound in a manner similar to the frequency response of the human ear and correlates well with community responses to noise.

Community Noise Equivalent Level (CNEL). CNEL is the A-weighted equivalent continuous sound exposure level for a 24-hour period with a 10 dB adjustment added to sound levels occurring during the nighttime hours (10 p.m.–7 a.m.) and 5 dB added to the sound during the evening hours (7 p.m.–10 p.m.).

Day Night Average Sound Level (DNL or L_{dn}). Similar to the CNEL noise metric, except that no penalty is added during the evening hours (7 p.m.–10 p.m.). Typically, the CNEL and L_{dn} noise metrics vary by approximately 1 decibel or less and are often considered to be functionally equivalent.

Decibel (dB). The decibel is a unit for measuring sound pressure level and is equal to 10 times the logarithm to the base 10 of the ratio of the measured sound pressure squared to a reference pressure, which is 20 micropascals.

2 Noise Analysis Methodology

2.1 Applicable Noise Standards

Because the proposed Project may receive funding from the U.S. Department of Housing and Urban Development (HUD), the noise standards specified by HUD were used for this analysis. HUD's noise standards may be found in 24 CFR Part 51, Subpart B (CFR 2013). Exterior uses with a day night average sound level (DNL) of 65 dBA or less are considered acceptable. Sites at which the environmental or community noise exposure exceeds 65 decibels DNL are considered noise-impacted areas. For new construction proposed in high noise areas, grantees shall incorporate noise attenuation features to the extent required by HUD environmental criteria and standards contained in Subpart B (Noise Abatement and Control) of 24 CFR Part 51.

The "normally unacceptable" noise zone includes community noise levels from above 65 decibels to 75 decibels. Approvals in this noise zone require a minimum of 5 dB additional sound attenuation for buildings having noise-sensitive uses if the day-night average sound level is greater than 65 dBA but does not exceed 70 dBA, or a minimum of 10 decibels of additional sound attenuation if the day-night average sound level is greater than 70 dBA but does not exceed 75 dBA.

The interior noise standard is 45 dBA DNL.

2.2 Traffic and Rail Noise Modeling

The primary noise source in the Project vicinity is motor vehicle traffic. The western façade of the proposed residential units would face Pomona Avenue, and the northern façade would face West 19th Street. There are no major railroads within 3,000 feet of the Project. California 55 (Newport Boulevard) is approximately 2,100 feet away and is therefore not considered in the traffic noise analysis. The nearest airport, John Wayne Airport, is located approximately 3.9 miles away. Based upon the Airport Environs Land Use Plan for John Wayne Airport (ALUC 2008), the Project site is located approximately 1.8 miles west of the airport's 60 dB CNEL noise contour. Thus, noise from the airport would have a negligible contribution to the on-site noise environment.

A noise analysis of traffic noise from West 19th Street and Pomona Avenue carried out using HUD's DNL Calculator[1] indicated that worst-case exterior building façade noise levels would exceed the "acceptable" HUD standard of 65 dBA DNL. Average Daily Traffic (ADT) volumes for West 19th Street and Pomona Avenue were retrieved from the Orange County Transportation Authority's (OCTA) GIS Open Data Portal (OCTA 2024).

3 Noise Analysis Results

The results of the traffic and rail noise analysis for the modeled on-site receivers (shown on Figure 2) are summarized in Table 1. The modeled input and output data are provided in Attachment A. As shown in Table 1, the highest noise levels would occur at Receivers M1 and M2. M1 and M2 are representative of the exterior façades of the habitable rooms facing north, closest to West 19th Street, where levels are predicted to be 72 dBA DNL. Exterior traffic noise levels at Receivers M3 and M4 (facing southwest/southeast and closest to Plumer Street) would be 63 dBA DNL.

Thus, the exposure from traffic noise at the modeled building façades facing north and West 19th Street would exceed the HUD exterior noise standard of 65 dBA DNL by up to 7 dB, putting these receivers in the "normally unacceptable" noise range.

Table 1 – Traffic and Rail Noise Level Results Summary

Receiver #	Noise Level (DNL (dBA))
M1 - northern exposure	**72**
M2 - northern exposure	**72**
M3 - southwestern exposure	63
M4 - southeastern exposure	63

Source: Attachment A.
Note: **Bolded** numbers indicate that the noise levels exceed the HUD noise standard of 65 dBA DNL.

As detailed in Section 2.1, 24 CFR Part 51, Subpart B states that sites at which environmental or community noise exposure exceeds the day night average sound level (DNL) of 65 dBA are considered

[1] https://www.hudexchange.info/programs/environmental-review/dnl-calculator/.

to be noise-impacted. For new construction proposed in high noise areas, grantees shall incorporate noise attenuation features to the extent required. Approvals in the "normally unacceptable" noise zone require a minimum of 5 dB additional sound attenuation for buildings having noise-sensitive uses if the day-night average sound level is greater than 65 dBA but does not exceed 70 dBA, or a minimum of 10 decibels of additional sound attenuation if the day-night average sound level is greater than 70 dBA but does not exceed 75 dBA.

Typical new construction of multi-family homes with windows closed provides a minimum of 25 dB exterior to interior noise reduction. All residential units will be equipped with a forced air heating ventilation air conditioning (HVAC) unit that allows for a "windows closed" condition (i.e., windows do not need to be left open for ventilation). As such, the interiors of the proposed habitable rooms with doors or windows facing north are anticipated to have maximum noise levels of approximately 47 dBA DNL (i.e., 72 dBA exterior – 25 dBA attenuation = 47 dBA interior). The interiors of the proposed habitable rooms facing southwest/southeast are anticipated to have maximum noise levels of approximately 38 dBA DNL (i.e., 63 dBA exterior – 25 dBA attenuation = 38 dBA interior) or less.

To derive the anticipated noise reduction at each representative receiver, the composite transmission loss (TL) per sound transmission class (STC) window rating was calculated using provided residential unit and window dimensions (feet), and assuming a standard, non-upgraded exterior wall STC rating of 35 and a standard, non-upgraded window STC rating of 25. These calculations are detailed in Attachment B.

Table 2 provides the anticipated noise reduction needed at each representative receiver to reach compliant interior noise levels. With implementation of this requirement, the proposed Project would not exceed the HUD interior noise standard of 45 dBA DNL and would be within the "acceptable" noise range for interior noise.

Table 2 – Interior Noise Levels (DNL (dBA))

Receivers / Location	Maximum Noise Level at Façade[1]	Required Interior Noise Reduction[2]	Minimum Anticipated Interior Noise Reduction[3]	Upgraded Windows /Doors?[4]	Interior Noise Level[5]	Exceedance of Interior Noise Standard?
M1 - northern exposure	72	27	33	No	39	No
M2 - northern exposure	72	27	33	No	39	No
M3 - southwestern exposure	63	18	33	No	30	No
M4 - southeastern exposure	63	18	33	No	30	No

1 - Estimated exterior noise level at the building façade based upon Table 1.
2 - Noise reduction required to satisfy the interior noise standards.
3 - Minimum interior noise reduction with typical new construction windows and doors closed.
4 - Does the required interior noise reduction trigger upgraded windows with an STC greater than 25 or walls/doors with an STC rating greater than 35?
5 - Estimated noise level based upon minimum anticipated noise reduction.

Traffic Noise Model Input/Output Data

Day/Night Noise Level (DNL) Calculator

The Day/Night Noise Level Calculator is an electronic assessment tool that calculates the Day/Night Noise Level (DNL) from roadway and railway traffic. For more information on using the DNL calculator, view the **Day/Night Noise Level Calculator Electronic Assessment Tool Overview (/programs/environmental-review/daynight-noise-level-electronic-assessment-tool/)**.

Guidelines

- To display the Road and/or Rail DNL calculator(s), click on the "Add Road Source" and/or "Add Rail Source" button(s) below.
- All Road and Rail input values must be positive non-decimal numbers.
- All Road and/or Rail DNL value(s) must be calculated separately before calculating the Site DNL.
- All checkboxes that apply must be checked for vehicles and trains in the tables' headers.
- **Note #1:** Tooltips, containing field specific information, have been added in this tool and may be accessed by hovering over all the respective data fields (site identification, roadway and railway assessment, DNL calculation results, roadway and railway input variables) with the mouse.
- **Note #2:** DNL Calculator assumes roadway data is always entered.

Mitigation Options

If your site DNL is in Excess of 65 decibels, your options are:

- **No Action Alternative**: Cancel the project at this location

- **Other Reasonable Alternatives**: Choose an alternate site
- **Mitigation**
    - **Contact your Field or Regional Environmental Officer (/programs/environmental-review/hud-environmental-staff-contacts/)**
    - Increase mitigation in the building walls (only effective if no outdoor, noise sensitive areas)
    - Reconfigure the site plan to increase the distance between the noise source and noise-sensitive uses
    - Incorporate natural or man-made barriers. See ***The Noise Guidebook (/resource/313/hud-noise-guidebook/)***
    - Construct noise barrier. See the **Barrier Performance Module (/programs/environmental-review/bpm-calculator/)**

Composite Transmission Loss/ Sound Transmission Class Calculations

Calculation of Composite TL/STC

The defining equation for TL is:
TL = 10xlog (1/τ), where τ is the transmission coefficient, assuming a homogeneous partition.
To calculate the composite TL, you must first calculate the composite transmission coefficient, based on the τ value of the specific partition component and its surface area (S). So,
τcomp = the sum of the individual components divided by the surface area of the full partition (including all components) = (τ1S1 + τ2S2 + … + τnSn)/S
To determine the τ value for each component, do the inverse of the TL calculation; so:
τ = 10(-TL/10), then calculate the τcomp and use it in the original TL equation above. Although it's not appropriate for laboratory studies, it's fine to say that the mid-frequency (500 to 1,000 Hz) TL is the same as the STC for HUD-types of studies.
Here's an example:
Say you have a main wall with an STC rating of 40 and a window having an STC rating of 25 in the wall. The overall wall surface area is 140 square feet and the window's surface area is 12 square feet.
τwall = 10(-40/10) and τwindow = 10(-25/10), and τcomp = ((140-12)x10-4 + 12x10-2.5)/140 = 0.00036, so:
TL/STCcomp = 10xlog(1/.00036) = 34

WORKSHEETS

OMB No. 2506-0177
(exp.2/28/2025)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Airport Hazards (CEST and EA) – PARTNER

https://www.hudexchange.info/environmental-review/airport-hazards

1. **To ensure compatible land use development, you must determine your site's proximity to civil and military airports. Is your project within 15,000 feet of a military airport or 2,500 feet of a civilian airport?**

   ☒No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide a map showing that the site is not within the applicable distances to a military or civilian airport.*

   ☐Yes → *Continue to Question 2.*

2. **Is your project located within a Runway Potential Zone/Clear Zone (RPZ/CZ) or Accident Potential Zone (APZ)?**

   ☐Yes, project is in an APZ → *Continue to Question 3.*

   ☐Yes, project is an RPZ/CZ → *Project cannot proceed at this location.*

   ☐No, project is not within an APZ or RPZ/CZ

   →*If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide a map showing that the site is not within either zone.*

3. **Is the project in conformance with DOD guidelines for APZ?**

   ☐Yes, project is consistent with DOD guidelines without further action.

   →*If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documentation supporting this determination.*

   ☐No, the project cannot be brought into conformance with DOD guidelines and has not been approved.

   →*Project cannot proceed at this location.*

If mitigation measures have been or will be taken, explain in detail the proposed measures that must be implemented to mitigate for the impact or effect, including the timeline for implementation.

Click here to enter text.

→*Work with the RE/HUD to develop mitigation measures. Continue to the Worksheet Summary below. Provide any documentation supporting this determination.*

Worksheet Summary

The project site is not within 15,000 feet of a military airport or 2,500 feet of a civilian airport.
The nearest municipal airport is the John Wayne Airport, approximately 3.2 miles northeast of the project site and the nearest military airport is at the Los Alamitos Army Airfield, approximately 11.9 miles northwest of the project site.

See Attachment 1.

OMB No. 2506-0177
(exp.2/28/2025)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Air Quality (CEST and EA) – PARTNER

https://www.hudexchange.info/environmental-review/air-quality

1. **Does your project include new construction or conversion of land use facilitating the development of public, commercial, or industrial facilities OR five or more dwelling units?**

   ☒ Yes → *Continue to Question 2.*

   ☐ No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Provide any documents used to make your determination.*

2. **Is your project's air quality management district or county in non-attainment or maintenance status for any criteria pollutants?**
   Follow the link below to determine compliance status of project county or air quality management district:
   http://www.epa.gov/oaqps001/greenbk/

   ☐ No, project's county or air quality management district is in attainment status for all criteria pollutants
   → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination.*

   ☒ Yes, project's management district or county is in non-attainment or maintenance status for one or more criteria pollutants. → *Continue to Question 3.*

3. **Determine the estimated emissions levels of your project for each of those criteria pollutants that are in non-attainment or maintenance status on your project area. Will your project exceed any of the *de minimis or threshold* emissions levels of non-attainment and maintenance level pollutants or exceed the screening levels established by the state or air quality management district?**

   ☒ No, the project will not exceed *de minimis* or threshold emissions levels or screening levels
   → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Explain how you determined that the project would not exceed de minimis or threshold emissions.*

☐ Yes, the project exceeds *de minimis* emissions levels or screening levels.

→ *Continue to Question 4. Explain how you determined that the project would not exceed de minimis or threshold emissions in the Worksheet Summary.*

4. **For the project to be brought into compliance with this section, all adverse impacts must be mitigated. Explain in detail the exact measures that must be implemented to mitigate for the impact or effect, including the timeline for implementation.**
   Click here to enter text.

Worksheet Summary

CalEEMod Version 2022.1.1.28 was used to model emissions during the construction and operational phases of the proposed project. Results of the model indicate that the proposed project would not exceed the South Coast Air Quality Management District's *de minimis* emissions thresholds for criteria pollutants (VOC, NO_x, CO, SO_x, PM_{10}, and $PM_{2.5}$) during the construction or operational phases. In addition, the maximum unmitigated daily construction and operational emissions from the proposed project would not exceed the SCAQMD's regional construction or operation emissions thresholds. Therefore, the proposed project is in compliance with HUD guidance and the Clean Air Act.

See Attachment 4.

OMB No. 2506-0177
(exp.2/28/2025)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Coastal Zone Management Act (CEST and EA)

General requirements	Legislation	Regulation
Federal assistance to applicant agencies for activities affecting any coastal use or resource is granted only when such activities are consistent with federally approved State Coastal Zone Management Act Plans.	Coastal Zone Management Act (16 USC 1451-1464), particularly section 307(c) and (d) (16 USC 1456(c) and (d))	15 CFR Part 930
References		
https://www.onecpd.info/environmental-review/coastal-zone-management		

Projects located in the following states must complete this form.

Alabama	Florida	Louisiana	Mississippi	Ohio	Texas
Alaska	Georgia	Maine	New Hampshire	Oregon	Virgin Islands
American Samona	Guam	Maryland	New Jersey	Pennsylvania	Virginia
California	Hawaii	Massachusetts	New York	Puerto Rico	Washington
Connecticut	Illinois	Michigan	North Carolina	Rhode Island	Wisconsin
Delaware	Indiana	Minnesota	Northern Mariana Islands	South Carolina	

1. Is the project located in, or does it affect, a Coastal Zone as defined in your state Coastal Management Plan?

☐Yes → *Continue to Question 2.*

☒No → *Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide a map showing that the site is not within a Coastal Zone.*

2. Does this project include activities that are subject to state review?

☐Yes → *Continue to Question 3.*

☐No → *Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide documentation used to make your determination.*

3. **Has this project been determined to be consistent with the State Coastal Management Program**?

☐Yes, with mitigation. → *Continue to Question 4.*

☐Yes, without mitigation. → *Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide documentation used to make your determination.*

☐No, project must be canceled.

Project cannot proceed at this location.

4. **Explain in detail the proposed measures that must be implemented to mitigate for the impact or effect, including the timeline for implementation.**

→ *Continue to the Worksheet Summary below. Provide documentation of the consultation (including the State Coastal Management Program letter of consistency) and any other documentation used to make your determination.*

Worksheet Summary

The proposed project site is not within the California Coastal Zone. Therefore, the proposed undertaking is in compliance with HUD's Coastal Zone Management Act regulations, and no mitigation is warranted. The project is in compliance with the Coastal Zone Management Act. See Attachment 2.

Are formal compliance steps or mitigation required?

☐ Yes

☒ No

OMB No. 2506-0177
(exp. 2/28/2025)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Contamination and Toxic Substances (Multifamily and Non-Residential Properties) – PARTNER

https://www.hudexchange.info/programs/environmental-review/site-contamination

1. **How was site contamination evaluated?** [1] **Select all that apply.**

   ☒ ASTM Phase I ESA
   ☐ ASTM Phase II ESA
   ☐ Remediation or clean-up plan
   ☒ ASTM Vapor Encroachment Screening
   ☐ None of the above

   → *Provide documentation and reports and include an explanation of how site contamination was evaluated in the Worksheet Summary.*
   Continue to Question 2.

2. **Were any on-site or nearby toxic, hazardous, or radioactive substances found that could affect the health and safety of project occupants or conflict with the intended use of the property? (Were any recognized environmental conditions or RECs identified in a Phase I ESA and confirmed in a Phase II ESA?)**

   ☒ No → **Explain below.**

   The proposed project site is currently vacant. A Phase I Environmental Site Assessment (ESA) conducted by Barr & Clark, Inc. (Barr & Clark) in July 2023 did not find any recognized environmental conditions (RECs), controlled RECs, or historical RECs on the project site.

   → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

[1] HUD regulations at 24 CFR § 58.5(i)(2)(ii) require that the environmental review for multifamily housing with five or more dwelling units or non-residential property include the evaluation of previous uses of the site or other evidence of contamination on or near the site. For acquisition and new construction of multifamily and nonresidential properties HUD strongly advises the review include an ASTM Phase I Environmental Site Assessment (ESA) to meet real estate transaction standards of due diligence and to help ensure compliance with HUD's toxic policy at 24 CFR §58.5(i) and 24 CFR §50.3(i). Also note that some HUD programs require an ASTM Phase I ESA.

☐ Yes → *Describe the findings, including any recognized environmental conditions (RECs), in Worksheet Summary below. Continue to Question 3.*

3. **Can adverse environmental impacts be mitigated?**

☐ Adverse environmental impacts cannot feasibly be mitigated → <u>HUD assistance may not be used for the project at this site. Project cannot proceed at this location.</u>

☐ Yes, adverse environmental impacts can be eliminated through mitigation.
→ *Provide all mitigation requirements*[2] *and documents. Continue to Question 4.*

4. **Describe how compliance was achieved. Include any of the following that apply: State Voluntary Clean-up Program, a No Further Action letter, use of engineering controls**[3]**, or use of institutional controls**[4]**.**

Click here to enter text.

If a remediation plan or clean-up program was necessary, which standard does it follow?

☐ Complete removal

☐ Risk-based corrective action (RBCA)

→ *Continue to the Worksheet Summary.*

<u>Worksheet Summary</u>

A Phase I Environmental Site Assessment (ESA) conducted by Barr & Clark in July 2023 did not find any recognized environmental conditions (RECs), controlled RECs, or historical RECs on the project site. An Asbestos Inspection Report and Lead-Based Paint Inspection Report for the project site was not applicable to the project site, which is currently used as a parking lot for the neighboring Costa Mesa Senior Center.

HUD requires new multifamily construction projects to follow radon-resistant construction requirements in accordance with standards developed by the American Association of Radon Scientists and Technologists (AARST) in collaboration with the American National Standards Institute (ANSI) for Soil Gas Control Systems in New Construction of Buildings (ANSI-AARST CC-1000-2018). This standard provides minimum requirements for construction of buildings intended for human occupancy, except for one- and two-family dwellings, to reduce occupant exposure to radon and other hazardous soil gases.

---

[2] Mitigation requirements include all clean-up actions required by applicable federal, state, tribal, or local law. Additionally, provide, as applicable, the long-term operations and maintenance plan, Remedial Action Work Plan, and other equivalent documents.

[3] Engineering controls are any physical mechanism used to contain or stabilize contamination or ensure the effectiveness of a remedial action. Engineering controls may include, without limitation, caps, covers, dikes, trenches, leachate collection systems, signs, fences, physical access controls, ground water monitoring systems and ground water containment systems including, without limitation, slurry walls and ground water pumping systems.

[4] Institutional controls are mechanisms used to limit human activities at or near a contaminated site, or to ensure the effectiveness of the remedial action over time, when contaminants remain at a site at levels above the applicable remediation standard which would allow for unrestricted use of the property. Institutional controls may include structure, land, and natural resource use restrictions, well restriction areas, classification exception areas, deed notices, and declarations of environmental restrictions.

HUD also requires post-construction radon testing prior to final completion inspection per Section 9.6.3.5 of the MAP Guide (HUD 2021).

In addition, per Section 9.6.3.2 of HUD's Multifamily Accelerated Processing (MAP) Guide (revised March 19, 2021), radon testing is required for new construction of multifamily housing at completion of construction and prior to final endorsement. If indoor radon levels are found to exceed the EPA action level of 4.0 pCi/L, then mitigation is required. Implementation of **MM-TOX-1** would ensure compliance with HUD's radon requirements by requiring post-construction radon testing, followed by mitigation if testing determines that radon levels are at or above the EPA's threshold of 4.0 pCi/L. This ERR will be updated with the radon evaluation and proof of any required mitigation when complete prior to project occupancy. Therefore, the proposed project is in compliance with HUD's requirements related to contamination and toxic substances.

See Attachment 6.

OMB No. 2506-0177
(exp.2/28/2025)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Endangered Species Act (CEST and EA) – PARTNER

https://www.hudexchange.info/environmental-review/endangered-species

1. Does the project involve any activities that have the potential to affect species or habitats?

☐No, the project will have No Effect due to the nature of the activities involved in the project.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination.*

☐No, the project will have No Effect based on a letter of understanding, memorandum of agreement, programmatic agreement, or checklist provided by local HUD office.

Explain your determination:

Click here to enter text.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination.*

☒Yes, the activities involved in the project have the potential to affect species and/or habitats. → *Continue to Question 2.*

2. Are federally listed species or designated critical habitats present in the action area?

Obtain a list of protected species from the Services. This information is available on the FWS Website.

☒No, the project will have No Effect due to the absence of federally listed species and designated critical habitat.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination. Documentation may include letters from the Services, species lists from the Services' websites, surveys or other documents and analysis showing that there are no species in the action area.*

☐Yes, there are federally listed species or designated critical habitats present in the action area. → *Continue to Question 3.*

3. **Recommend one of the following effects that the project will have on federally listed species or designated critical habitat:**

☐No Effect: Based on the specifics of both the project and any federally listed species in the action area, you have determined that the project will have absolutely no effect on listed species or critical habitat.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination. Documentation should include a species list and explanation of your conclusion, and may require maps, photographs, and surveys as appropriate.*

☐May Affect, Not Likely to Adversely Affect: Any effects that the project may have on federally listed species or critical habitats would be beneficial, discountable, or insignificant.

→ Partner entities should not contact the Services directly. *If the RE/HUD agrees with this recommendation, they will have to complete Informal Consultation. Provide the RE/HUD with a biological evaluation or equivalent document. They may request additional information, including surveys and professional analysis, to complete their consultation.*

☐Likely to Adversely Affect: The project may have negative effects on one or more listed species or critical habitat.

→ Partner entities should not contact the Services directly. *If the RE/HUD agrees with this recommendation, they will have to complete Formal Consultation. Provide the RE/HUD with a biological evaluation or equivalent document. They may request additional information, including surveys and professional analysis, to complete their consultation.*

Worksheet Summary

The U.S. Fish and Wildlife Service IPaC database was used to identify federally protected species at the project site. Fourteen (14) species classified as endangered or threatened were identified as possibly occurring on the project site. However, given the urban and commercial setting of the site and of the surrounding project area, no federally listed special-status plant or wildlife species are expected to be present due to the lack of suitable habitat.

See Attachments 7 and 8.

OMB No. 2506-0177
(exp.2/28/2025)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Explosive and Flammable Hazards (CEST and EA) – PARTNER

https://www.hudexchange.info/environmental-review/explosive-and-flammable-facilities

1. **Does the proposed HUD-assisted project include a hazardous facility (a facility that mainly stores, handles or processes flammable or combustible chemicals such as bulk fuel storage facilities and refineries)?**

   ☒ No
   → *Continue to Question 2.*

   ☐ Yes
   Explain:
   Click here to enter text.
   → *Continue to Question 5.*

2. **Does this project include any of the following activities: development, construction, rehabilitation that will increase residential densities, or conversion?**

   ☐ No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

   ☒ Yes → *Continue to Question 3.*

3. **Within 1 mile of the project site, are there any current *or planned* stationary aboveground storage containers:**
   - Of more than 100-gallon capacity, containing common liquid industrial fuels OR
   - Of any capacity, containing hazardous liquids or gases that are not common liquid industrial fuels?

   ☐ No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide all documents used to make your determination.*

   ☒ Yes → *Continue to Question 4.*

4. **Is the Separation Distance from the project acceptable based on standards in the Regulation?**
   Please visit HUD's website for information on calculating Acceptable Separation Distance.

   ☒ Yes
   → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

Provide map(s) showing the location of the project site relative to any tanks and your separation distance calculations. If the map identifies more than one tank, please identify the tank you have chosen as the "assessed tank."

☐ No

→ *Continue to Question 6.*

Provide map(s) showing the location of the project site relative to any tanks and your separation distance calculations. If the map identifies more than one tank, please identify the tank you have chosen as the "assessed tank."

5. **Is the hazardous facility located at an acceptable separation distance from residences and any other facility or area where people may congregate or be present?**

Please visit HUD's website for information on calculating Acceptable Separation Distance.

☐ Yes

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

Provide map(s) showing the location of the project site relative to residences and any other facility or area where people congregate or are present and your separation distance calculations.

☐ No

→ *Continue to Question 6.*

Provide map(s) showing the location of the project site relative to residences and any other facility or area where people congregate or are present and your separation distance calculations.

6. **For the project to be brought into compliance with this section, all adverse impacts must be mitigated. Explain in detail the exact measures that must be implemented to make the Separation Distance acceptable, including the timeline for implementation. If negative effects cannot be mitigated, cancel the project at this location.**

Note that only licensed professional engineers should design and implement blast barriers. If a barrier will be used or the project will be modified to compensate for an unacceptable separation distance, provide approval from a licensed professional engineer.

Click here to enter text.

Worksheet Summary

The following resources were reviewed to identify aboveground storage tank (AST) locations, contents, volumes, and distance from subject property:

- California Environmental Protection Agency (CalEPA) Regulated Site Portal at https://siteportal.calepa.ca.gov/nsite/map/help
- Appendix I to Subpart C of Parts 51- Specific Hazardous Substances at https://www.ecfr.gov/current/title-24/subtitle-A/part-51/subpart-C
- HUD Acceptable Separation Distance (ASD) Electronic Assessment Tool at https://www.hudexchange.info/programs/environmental-review/asd-calculator/

The CalEPA Regulated Site Portal website was used to identify aboveground petroleum storage and chemical storage sites within a 1-mile radius of the proposed project site. Chemicals listed for each site

were compared to a list of hazardous substances provided in Appendix I to Subpart C of Part 51 (§ 51.201). With the exception of petrochemicals, including waste oil, motor oil, oil, diesel, and petroleum, chemicals not listed in § 51.201 were considered non-hazardous. HUD's Acceptable Separation Distance (ASD) Assessment Tool was used to calculate the acceptable separation distance between the project site and the CalEPA sites that contained hazardous materials.

Of the 150 chemical storage sites within 1-mile of the project site, 108 sites contained hazardous chemicals listed in § 51.201. Almost all sites identified as potentially storing hazardous or flammable materials in ASTs were located adequate distances away from the project site. One site owned by the Winall Oil Company (the site is occupied by a Mobil gas station), was located within the HUD calculated ASD. Google Earth's Street View was used to identify the location of the chemical storage tanks at the commercial property. Evaluation of imagery on Google Earth did not reveal any ASTs located at the Mobil gas station. Since the commercial property is a gas station, the storage tanks for unleaded gasoline and diesel are located underground and thus are not subject to the regulations set forth in 24 CFR Part 51 Subpart C. Therefore, the project is in compliance with HUD's explosive and flammable hazards requirements.

Maps and ASD calculations for the sites that contain materials listed 24 CFR 51C are provided in **Attachment 9**.

OMB No. 2506-0177
(exp.2/28/2025)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Farmlands Protection (CEST and EA)

General requirements	Legislation	Regulation
The Farmland Protection Policy Act (FPPA) discourages federal activities that would convert farmland to nonagricultural purposes.	Farmland Protection Policy Act of 1981 (7 U.S.C. 4201 et seq.)	7 CFR Part 658
Reference		
https://www.hudexchange.info/environmental-review/farmlands-protection		

1. **Does your project include any activities, including new construction, acquisition of undeveloped land or conversion, that could convert agricultural land to a non-agricultural use?**

   ☒Yes → *Continue to Question 2.*

   ☐No

   Explain how you determined that agricultural land would not be converted:

   → *Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documentation supporting your determination.*

2. **Does "important farmland," including prime farmland, unique farmland, or farmland of statewide or local importance regulated under the Farmland Protection Policy Act, occur on the project site?**

   You may use the links below to determine important farmland occurs on the project site:

   - Utilize USDA Natural Resources Conservation Service's (NRCS) Web Soil Survey http://websoilsurvey.nrcs.usda.gov/app/HomePage.htm
   - Check with your city or county's planning department and ask them to document if the project is on land regulated by the FPPA (zoning important farmland as non-agricultural does not exempt it from FPPA requirements)

- Contact NRCS at the local USDA service center http://offices.sc.egov.usda.gov/locator/app?agency=nrcs or your NRCS state soil scientist http://soils.usda.gov/contact/state_offices/ for assistance

☒No → *Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination.*

☐Yes → *Continue to Question 3.*

3. **Consider alternatives to completing the project on important farmland and means of avoiding impacts to important farmland.**
   - Complete form **AD-1006**, "Farmland Conversion Impact Rating" http://www.nrcs.usda.gov/Internet/FSE_DOCUMENTS/stelprdb1045394.pdf and contact the state soil scientist before sending it to the local NRCS District Conservationist. (NOTE: for corridor type projects, use instead form **NRCS-CPA-106**, "Farmland Conversion Impact Rating for Corridor Type Projects: http://www.nrcs.usda.gov/Internet/FSE_DOCUMENTS/stelprdb1045395.pdf.)
   - Work with NRCS to minimize the impact of the project on the protected farmland. When you have finished with your analysis, return a copy of form AD-1006 (or form NRCS-CPA-106 if applicable) to the USDA-NRCS State Soil Scientist or his/her designee informing them of your determination.

Document your conclusion:

☐Project will proceed with mitigation.

Explain in detail the proposed measures that must be implemented to mitigate for the impact or effect, including the timeline for implementation.

→ *Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide form AD-1006 and all other documents used to make your determination.*

☐Project will proceed without mitigation.

Explain why mitigation will not be made here:

→ *Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide form AD-1006 and all other documents used to make your determination.*

Worksheet Summary

The California Department of Conservation's California Important Farmland Finder, accessed at https://maps.conservation.ca.gov/dlrp/ciff/, was used to identify Important Farmlands in the project area. The project site is on land designated as Urban and Built-Up Land. Furthermore, the proposed project would be built above an existing garage, and no ground-disturbing activities are required. There are no Important Farmlands on the project site or in adjacent areas. The project is in compliance with the Farmland Protection Policy.

See Attachment 10.

OMB No. 2506-0177
(exp.2/28/2025)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Flood Insurance (CEST and EA)

General requirements	Legislation	Regulation
Certain types of federal financial assistance may not be used in floodplains unless the community participates in National Flood Insurance Program and flood insurance is both obtained and maintained.	Flood Disaster Protection Act of 1973 as amended (42 USC 4001-4128)	24 CFR 50.4(b)(1) and 24 CFR 58.6(a) and (b); 24 CFR 55.1(b).
Reference		
https://www.hudexchange.info/environmental-review/flood-insurance		

1. **Does this project involve mortgage insurance, refinance, acquisition, repairs, construction, or rehabilitation of a structure, mobile home, or insurable personal property?**

   ☐No. This project does not require flood insurance or is excepted from flood insurance. à*Continue to the Worksheet Summary.*

   ☒Yes à *Continue to Question 2.*

2. **Provide a FEMA/FIRM map showing the site.**

   The Federal Emergency Management Agency (FEMA) designates floodplains. The FEMA Map Service Center provides this information in the form of FEMA Flood Insurance Rate Maps (FIRMs). For projects in areas not mapped by FEMA, use the best available information to determine floodplain information. Include documentation, including a discussion of why this is the best available information for the site. Provide FEMA/FIRM floodplain zone designation, panel number, and date within your documentation.

   Is the structure, part of the structure, or insurable property located in a FEMA-designated Special Flood Hazard Area?

   ☒No à *Continue to the Worksheet Summary.*

   ☐Yes à *Continue to Question 3.*

3. Is the community participating in the National Flood Insurance Program *or* has less than one year passed since FEMA notification of Special Flood Hazards?

☐Yes, the community is participating in the National Flood Insurance Program.

For loans, loan insurance or loan guarantees, flood insurance coverage must be continued for the term of the loan. For grants and other non-loan forms of financial assistance, flood insurance coverage must be continued for the life of the building irrespective of the transfer of ownership. The amount of coverage must equal the total project cost or the maximum coverage limit of the National Flood Insurance Program, whichever is less.

Provide a copy of the flood insurance policy declaration or a paid receipt for the current annual flood insurance premium and a copy of the application for flood insurance.

à *Continue to the Worksheet Summary.*

☐Yes, less than one year has passed since FEMA notification of Special Flood Hazards.

If less than one year has passed since notification of Special Flood Hazards, no flood Insurance is required.

à *Continue to the Worksheet Summary.*

☐No. The community is not participating, or its participation has been suspended.

Federal assistance may not be used at this location. Cancel the project at this location.

Worksheet Summary

According to the FEMA Flood Insurance Rate Map (FIRM) 06059C0268J, effective December 3, 2009 (FEMA 2009), the project site is located within Zone X (unshaded), an area of minimal flood hazard. Therefore, the project site is not located within a FEMA-designated SFHA.

According to the NFIP Community Status Book (FEMA 2024a), the project site city (Costa Mesa) participates in the NFIP (Community Identification Number 060216C). Therefore, the project is in compliance with flood insurance requirements.

See Attachment 3.

Are formal compliance steps or mitigation required?

☐ Yes

☒ No

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Floodplain Management (CEST and EA)

General Requirements	Legislation	Regulation
Executive Order 11988, Floodplain Management, requires Federal activities to avoid impacts to floodplains and to avoid direct and indirect support of floodplain development to the extent practicable.	Executive Order 11988 Executive Order 13690 42 USC 4001-4128 42 USC 5154a	24 CFR 55
Reference		
https://www.hudexchange.info/environmental-review/floodplain-management		

1. **Does this project meet an exemption at 24 CFR 55.12 from compliance with HUD's floodplain management regulations in Part 55 or utilize the delayed compliance date for certain Office of Housing programs?**
   ☐ Yes
   Select the applicable citation at 24 CFR 55.12 and provide supporting documentation for the determination if applicable.

   a) ☐ HUD-assisted activities described in 24 CFR 58.34 and 58.35(b)
   b) ☐ HUD-assisted activities described in 24 CFR 50.19, except as otherwise indicated in § 50.19
   c) ☐ The approval of financial assistance for restoring and preserving the natural and beneficial functions and values of floodplains and wetlands, including through acquisition of such floodplain and wetland property, where a permanent covenant or comparable restriction is place on the property's continued use for flood control, wetland projection, open space, or park land, but only if:
      (1) The property is cleared of all existing buildings and walled structures; and
      (2) The property is cleared of related improvements except those which:
         (i) Are directly related to flood control, wetland protection, open space, or park land (including playgrounds and recreation areas);
         (ii) Do not modify existing wetland areas or involve fill, paving, or other ground disturbance beyond minimal trails or paths; and
         (iii) Are designed to be compatible with the beneficial floodplain or wetland function of the property.

d) ☐ An action involving a repossession, receivership, foreclosure, or similar acquisition of property to protect or enforce HUD's financial interests under previously approved loans, grants, mortgage insurance, or other HUD assistance

e) ☐ Policy-level actions described at 24 CFR 50.16 that do not involve site-based decisions

f) ☐ A minor amendment to a previously approved action with no additional adverse impact on or from a floodplain or wetland;

g) ☐ HUD's or the responsible entity's approval of a project site, an incidental portion of which is situated in the FFRMS floodplain (not including the floodway, LiMWA, or coastal high hazard area) but only if:

(1) The proposed project site does not include any existing or proposed buildings or improvements that modify or occupy the FFRMS floodplain except de minimis improvements such as recreation areas and trails; and

(2) the proposed project will not result in any new construction in or modifications of a wetland

h) ☐ Issuance or use of Housing Vouchers or other forms of rental subsidy where HUD, the awarding community, or the public housing agency that administers the contract awards rental subsidies that are not project-based (i.e., do not involve site-specific subsidies)

i) ☐ Special projects directed to the removal of material and architectural barriers that restrict the mobility of and accessibility to elderly and persons with disabilities.

Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below.

☐ Yes. Office of Housing programs utilizing the January 1, 2025 compliance date. These reviews must comply with the 2013 version of the Part 55 regulations. Continue to Worksheet Summary for 2013 version to upload supporting documentation.

☒ No. *Continue to Question 2.*

2. Does the project include a Critical Action?

☐ Yes. Describe the Critical Action. Examples of Critical Actions include projects involving hospitals, fire and police stations, nursing homes, hazardous chemical storage, storage of valuable records, and utility plants. Continue to Question 4.

☒ No. Continue to Question 3.

3. **Determine the extent of the FFRMS floodplain and provide mapping documentation in support of that determination.**
   The extent of the FFRMS floodplain can be determined using a Climate Informed Science Approach (CISA), 0.2 percent flood approach (0.2 PFA), or freeboard value approach (FVA). For projects in areas without available CISA data or without FEMA Flood Insurance Rate Maps (FIRMs), Flood Insurance Studies (FISs) or Advisory Base Flood Elevations (ABFEs), use the best available information to determine flood elevation. Include documentation and an explanation of why this is the best available information for the site. Note that newly constructed and substantially improved structures must be elevated to the FFRMS floodplain regardless of the approach chosen to determine the floodplain.

   Select one of the following three options:

   ☐ CISA for non-critical actions. If using a local tool, data, or resources, ensure that the FFRMS elevation is higher than would have been determined using the 0.2 PFA or the FVA.

   ☒ 0.2-PFA. Where FEMA has defined the 0.2-percent-annual-chance floodplain, the FFRMS floodplain is the area that FEMA has designated as within the 0.2-percent-annual-chance floodplain.

   ☐ FVA. If neither CISA nor 0.2-PFA is available, for non-critical actions, the FFRMS floodplain is the area that results from adding two feet to the base flood elevation as established by the effective FIRM or FIS or—if available —a FEMA-provided preliminary or pending FIRM or FIS or advisory base flood elevations, whether regulatory or informational in nature. However, an interim or preliminary FEMA map cannot be used if it is lower than the current FIRM or FIS.

a. **Does your project occur in the FFRMS floodplain?**
   ☐Yes, continue to part b.
   ☒ No. Review for floodplain management is complete.

b. **Is your project located in any of the floodplain categories below? Select all that apply. If none apply, continue to question 7.**

   ☐ Floodway: *Continue to Question 5. Floodways.*

   ☐ Coastal High Hazard Area (V Zone) or Limit of Moderate Wave Action (LiMWA): *Continue to Question 6. Coastal High Hazard Areas and LiMWAs.*

4. **Determine the extent of the FFRMS floodplain and provide mapping documentation in support of that determination.**
   The extent of the FFRMS floodplain can be determined using a Climate Informed Science Approach (CISA), or the higher of the 0.2 percent flood approach (0.2 PFA), or freeboard value approach (FVA). For projects in areas without available CISA data or without FEMA Flood Insurance Rate Maps (FIRMs), Flood Insurance Studies (FISs) or Advisory Base Flood Elevations (ABFEs), use the best available information to determine flood elevation. Note that newly constructed and substantially improved structures must be elevated to the FFRMS floodplain regardless of the approach chosen to determine the floodplain.

Utilize CISA to determine the FFRMS floodplain for critical actions

☐ CISA for Critical Actions. If using a local tool, ensure that the FFRMS elevation provided is higher than the 0.2 PFA or 3' above the base flood elevation.

OR;

Choose the higher of 0.2 PFA or FVA elevations

☐ 0.2-PFA. Where FEMA has defined the 0.2-percent-annual-chance floodplain, the FFRMS floodplain is the area that FEMA has designated as within the 0.2-percent-annual-chance floodplain.

☐ FVA. For critical actions, the FFRMS floodplain is the area that results from adding three feet to the base flood elevation as established by the effective FEMA FIRM or FIS or—if available —a FEMA-provided preliminary or pending FIRM or FIS or advisory base flood elevations, whether regulatory or informational in nature. However, an interim or preliminary FEMA map cannot be used if it is lower than the current FIRM or FIS.

a. Does your project occur in the FFRMS floodplain?

☐Yes, continue to part b.

☐No. Review for floodplain management is complete.

b. Is your project located in any of the floodplain categories below? Select all that apply. If none apply, continue to question 7.

☐ Floodway: *Continue to Question 5. Floodways.*

☐ Coastal High Hazard Area (V Zone) or LiMWA: *Continue to Question 6. Coastal High Hazard Areas and LiMWAs.*

5. Floodways

Do the floodway exemptions at 55.8 or 55.21 apply?

☐ Yes

The 8-Step Process is required. Document mitigation measures necessary to meet the requirements in 55.8 or 55.21. Provide a completed 8-Step Process, including the early public notice and the final notice.

Continue to Question 7. 8-Step Process.

☐ No

Federal assistance may not be used at this location. You must either choose an alternate site or cancel the project at this location.

6. Coastal High Hazard Area (V Zone) and LiMWAs

Do the exemptions at 55.8 or 55.21 apply?

☐ Yes

The 8-Step Process is required. Document mitigation measures necessary to mee the requirements in 55.8 or 55.21. Provide a completed 8-Step Process, including the early public notice and the final notice.

Continue to Question 7. 8-Step Process.

☐ No

Federal assistance may not be used at this location. You must either choose an alternate site or cancel the project at this location.

7. 8-Step Process.

Does the 8-Step Process apply? Select one of the following options:

☐ 8-Step Process is inapplicable per 55.13.

Select the applicable citation:

☐ (a) HUD's mortgage insurance actions and other financial assistance for the purchasing, mortgaging, or refinancing of existing one- to four-family properties in communities that are in the Regular Program of the NFIP and in good standing (i.e., not suspended from program eligibility or placed on probation under 44 CFR 59.24), where the action is not a critical action and the property is not located in a floodway, coastal high hazard area, or LiMWA;

☐ (b) Financial assistance for minor repairs or improvements on one- to four-family properties that do not meet the thresholds for "substantial improvement" under § 55.2(b)(12);

☐ (c) HUD or a recipient's actions involving the disposition of individual HUD or recipient held, one- to four-family properties;

☐ (d) HUD guarantees under the Loan Guarantee Recovery Fund Program (24 CFR part 573), where any new construction or rehabilitation financed by the existing loan or mortgage has been completed prior to the filing of an application under the program, and the refinancing will not allow further construction or rehabilitation, nor result in any physical impacts or changes except for routine maintenance;

☐ (e) The approval of financial assistance to lease units within an existing structure located within the floodplain, but only if;

(1) The structure is located outside the floodway or coastal high hazard area, and is in a community that is in the Regular Program of the NFIP and in good standing (i.e., not suspended from program eligibility or placed on probation under 44 CFR 59.24); and

(2) The project is not a critical action; and

(3) The entire structure is or will be fully insured or insured to the maximum extent available under the NFIP for at least the term of the lease.

☐ (f) Special projects for the purpose of improving efficiency of utilities or installing renewable energy that involve the repair, rehabilitation, modernization, weatherization, or improvement of existing structures or infrastructure, do not meet the thresholds for "substantial improvement" under § 55.2(b)(12), and do not include the installation of equipment below the FFRMS floodplain elevation.

Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below.

☐ 5-Step Process is applicable per 55.14.

Provide documentation of 5-Step Process.

Select the applicable citation:

- ☐ (a) HUD actions involving the disposition of HUD-acquired multifamily housing projects or "bulk sales" of HUD-acquired one- to four-family properties in communities that are in the Regular Program of the National Flood Insurance Program (NFIP) and in good standing (i.e., not suspended from program eligibility or placed on probation under 44 CFR 59.24).
- ☐ (b)HUD's actions under the National Housing Act (12 U.S.C. 1701) for the purchase or refinancing of existing multifamily housing projects, hospitals, nursing homes, assisted living facilities, board and care facilities, and intermediate care facilities, in communities that are in good standing under the NFIP.
- ☐ (c) HUD's or the recipient's actions under any HUD program involving the repair, rehabilitation, modernization, weatherization, or improvement of existing multifamily housing projects, hospitals, nursing homes, assisted living facilities, board and care facilities, intermediate care facilities, and one- to four-family properties, in communities that are in the Regular Program of the National Flood Insurance Program (NFIP) and are in good standing, provided that the number of units is not increased more than 20 percent, the action does not involve a conversion from nonresidential to residential land use, the action does not meet the thresholds for "substantial improvement" under § 55.2(b)(10), and the footprint of the structure and paved areas is not increased by more than 20 percent.
- ☐ (d) HUD's (or the recipient's) actions under any HUD program involving the repair, rehabilitation, modernization, weatherization, or improvement of existing nonresidential buildings and structures, in communities that are in the Regular Program of the NFIP and are in good standing, provided that the action does not meet the thresholds for "substantial improvement" under § 55.2(b)(10) and that the footprint of the structure and paved areas is not increased by more than 20 percent
- ☐ (e) HUD's or the recipient's actions under any HUD program involving the repair, rehabilitation, or replacement of existing nonstructural improvements including streets, curbs and gutters, where any increase of the total impervious surface area of the facility is de minimis. This provision does not include critical actions, levee systems, chemical storage facilities (including any tanks), wastewater facilities, or sewer lagoons.

Continue to Question 8. Mitigation.

☐ 8-Step Process applies.

Provide a completed 8-Step Process, including the early public notice and the final notice.

Continue to Question 8. Mitigation.

8. Mitigation

For the project to comply with this section, all adverse impacts must be mitigated. Explain in detail the measures that must be implemented to mitigate the impact or effect, including the timeline for implementation. Note: newly constructed and substantially improved structures within the FFRMS floodplain must be elevated to the FFRMS floodplain elevation or floodproofed, if applicable.

Which of the following if any mitigation/minimization measures have been identified for this project in the 8-Step or 5-Step Process? Select all that apply.

- ☐ Buyout and demolition or other supported clearance of floodplain structures
- ☐ Insurance purchased in excess of statutory requirement under the Flood Disaster Protection Act of 1973
- ☐ Permeable surfaces
- ☐ Natural landscape enhancements that maintain or restore natural hydrology
- ☐ Planting or restoring native plant species
- ☐ Bioswales
- ☐ Stormwater capture and reuse
- ☐ Green or vegetative roofs with drainage provisions
- ☐ Natural Resources Conservation Service conservation easements or similar easements
- ☐ Floodproofing of structures as allowable (e.g. non-residential floors)
- ☐ Elevating structures (including freeboard above the required base flood elevations)
- ☐ Levee or structural protection from flooding
- ☐ Channelizing or redefining the floodway or floodplain through a Letter of Map Revision (LOMR)

Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below.

Worksheet Summary

No HUD-approved CISA maps are available for the project site; however, FEMA has mapped the 0.2% annual chance of flood (i.e., 500-year floodplain). Therefore, this analysis uses the 0.2PFA approach. According to FEMA Flood Insurance Rate Map No. 06059C0268J, effective December 3, 2009, the project site is located within unshaded Zone X, in an area of minimal flood hazard. The project site is not located within the FEMA-designated 0.2-percent-annual-chance floodplain. Therefore, based on the project location and designation as a non-critical action, the proposed action is not in the coastal or riverine FFRMS floodplain. See Attachment 3.

Historic Preservation (CEST and EA) – PARTNER

https://www.hudexchange.info/environmental-review/historic-preservation

Threshold

Is Section 106 review required for your project?

☐ No, because a Programmatic Agreement states that all activities included in this project are exempt. (See the PA Database to find applicable PAs.)
Either provide the PA itself or a link to it here. Mark the applicable exemptions or include the text here:
Click here to enter text.
→ *Continue to the Worksheet Summary.*

☐ No, because the project consists solely of activities included in a No Potential to Cause Effects memo or other determination [36 CFR 800.3(a)(1)].
Either provide the memo itself or a link to it here. Explain and justify the other determination here:
Click here to enter text.
→ *Continue to the Worksheet Summary.*

☒Yes, because the project includes activities with potential to cause effects (direct or indirect). → *Continue to Step 1.*

The Section 106 Process
After determining the need to do a Section 106 review, HUD or the RE will initiate consultation with regulatory and other interested parties, identify and evaluate historic properties, assess effects of the project on properties listed on or eligible for the National Register of Historic Places, and resolve any adverse effects through project design modifications or mitigation.
Step 1: Initiate consultation
Step 2: Identify and evaluate historic properties
Step 3: Assess effects of the project on historic properties
Step 4: Resolve any adverse effects

Only RE or HUD staff may initiate the Section 106 consultation process. Partner entities may gather information, including from SHPO records, identify and evaluate historic properties, and make initial assessments of effects of the project on properties listed in or eligible for the National Register of Historic Place. Partners should then provide their RE or HUD with all of their analysis and documentation so that they may initiate consultation.

Step 1 - Initiate Consultation

The following parties are entitled to participate in Section 106 reviews: Advisory Council on Historic Preservation; State Historic Preservation Officers (SHPOs); federally recognized Indian tribes/Tribal Historic Preservation Officers (THPOs); Native Hawaiian Organizations (NHOs); local governments; and project grantees. The general public and individuals and organizations with a demonstrated interest in a project may participate as consulting parties at the discretion of the RE or HUD official. Participation varies with the nature and scope of a project. Refer to HUD's website for guidance on consultation, including the required timeframes for response. Consultation should begin early to enable full consideration of preservation options.

Use the When To Consult With Tribes checklist within Notice CPD-12-006: Process for Tribal Consultation to determine if the RE or HUD should invite tribes to consult on a particular project. Use the Tribal Directory Assessment Tool (TDAT) to identify tribes that may have an interest in the area where the project is located. Note that only HUD or the RE may initiate consultation with Tribes. Partner entities may prepare a draft letter for the RE or HUD to use to initiate consultation with tribes, but may not send the letter themselves.

List all organizations and individuals that you believe may have an interest in the project here:
State Historic Preservation Office

→ *Continue to Step 2.*

Step 2 - Identify and Evaluate Historic Properties

Provide a preliminary definition of the Area of Potential Effect (APE), either by entering the address(es) or providing a map depicting the APE. Attach an additional page if necessary.
The project APE consists of the area of direct physical effect for the project, which is currently a parking lot, consisting of a total area of 1.5 acres located on the eastern portion of 695 West 19th Street, Costa Mesa, CA (APN 424-211-01).

Gather information about known historic properties in the APE. Historic buildings, districts and archeological sites may have been identified in local, state, and national surveys and registers, local historic districts, municipal plans, town and county histories, and local history websites. If not already listed on the National Register of Historic Places, identified properties are then evaluated to see if they are eligible for the National Register. Refer to HUD's website for guidance on identifying and evaluating historic properties.

In the space below, list historic properties identified and evaluated in the APE.
Every historic property that may be affected by the project should be listed. For each historic property or district, include the National Register status, whether the SHPO has concurred with the finding, and whether information on the site is sensitive. Attach an additional page if necessary.
Click here to enter text.

Provide the documentation (survey forms, Register nominations, concurrence(s) and/or objection(s), notes, and photos) that justify your National Register Status determination.

Was a survey of historic buildings and/or archeological sites done as part of the project?

If the APE contains previously unsurveyed buildings or structures over 50 years old, or there is a likely presence of previously unsurveyed archeological sites, a survey may be necessary. For Archeological surveys, refer to HP Fact Sheet #6, Guidance on Archeological Investigations in HUD Projects.

☐ Yes → *Provide survey(s) and report(s) and continue to Step 3.*
Additional notes:
Click here to enter text.

☒ No → *Continue to Step 3.*

Step 3 - Assess Effects of the Project on Historic Properties

Only properties that are listed on or eligible for the National Register of Historic Places receive further consideration under Section 106. Assess the effect(s) of the project by applying the Criteria of Adverse Effect. (36 CFR 800.5) Consider direct and indirect effects as applicable as per HUD guidance.

Choose one of the findings below to recommend to the RE or HUD.
Please note: this is a recommendation only. It is **not** the official finding, which will be made by the RE or HUD, but only your suggestion as a Partner entity.

☒ No Historic Properties Affected
Document reason for finding:
☒ No historic properties present.
☐ Historic properties present, but project will have no effect upon them.

☐ No Adverse Effect
Document reason for finding and provide any comments below.
Comments may include recommendations for mitigation, monitoring, a plan for unanticipated discoveries, etc.

☐ Adverse Effect
Document reason for finding:
Copy and paste applicable Criteria into text box with summary and justification.
Criteria of Adverse Effect: 36 CFR 800.5]
Click here to enter text.

Provide any comments below:

Comments may include recommendations for avoidance, minimization, and/or mitigation.

Dudek prepared a Cultural Resources Constraints Analysis for the project in January 2025 to determine if the project would impact any historic properties pursuant to Section 106 of the NHPA (see **Attachment 11**). The preparation of the report included the development of an area of potential effects (APE), a records search of the California Historical Resources Information System (CHRIS), a review of historic aerial imagery and historic topographic maps, and a review of the geomorphological context of the project APE. The findings of the report are summarized as follows.

Area of Potential Effects

The project APE consists of the area of direct physical effect for the project, which is currently a parking lot, consisting of a total area of 1.5 acres located on the eastern portion of 695 West 19th Street, Costa Mesa, CA (APN 424-211-01).

Records Search and Background Research

A confidential records search of the APE and a 1-mile buffer was conducted at the South-Central Coastal Information Center at California State University, Fullerton to identify historic properties located within the APE that might be affected by the proposed undertaking. The records search indicated that 31 previous cultural resources technical investigations were conducted within 1 mile of the APE between 1975 and 2014, two of which intersect with the APE. A total of 9 previously identified cultural resources have been recorded within 1 mile of the APE. One resource, the Costa Mesa Senior Center, was previously mapped intersecting the APE. Upon further analysis, this resource is directly adjacent to the APE and does not intersect the APE. The Senior Center was identified as a historic era built environment resource that was evaluated in 2014 and recommended not eligible for the NRHP. Dudek architectural historians reviewed the 2014 Department of Parks and Recreation site form for the property, aerial photographs, and historic newspapers. Research indicated that there was a building on the site as early as 1963, but that it was demolished and subsequently replaced in 1992 by the currently extant Senior Center building. Therefore, the property is not of historic age (45 years or older). None of the other eight previously identified cultural resources are located within or adjacent to the APE. Analysis of historic aerials, topos, and the geomorphic context indicate there is a low potential for encountering intact subsurface archaeological deposits during project implementation.

Determination

No historic properties were identified within or adjacent to the APE. Dudek's report recommends a finding of No Historic Properties Affected for the project under Section 106 of the NHPA. Implementation of **MM-CUL-1** and **MM-CUL-2** would avoid adverse impacts related to the inadvertent discovery of archaeological resources or human remains during construction consistent with NHPA Section 106 regulations.

Consultation

Based on a search of HUD's Tribal Directory Assessment Tool (TDAT), no federally recognized tribes that may have an interest in the area where the project is located were identified. The County sent a letter to the SHPO on February 2, 2025, requesting concurrence on the finding of No Historic Properties Affected. The SHPO responded on March 12, 2025, and requested that the County provide the results of a Native American Heritage Commission (NAHC) Sacred Lands File search and evidence of notification and invitation to consult to any tribes identified by the NAHC on the Tribal Contact List pursuant to 36 CFR §800.3(f). The NAHC was contacted on April 22, 2025, and a response, received on May 6, 2025, indicated that the APE is negative for Native American cultural resources. The NAHC also provided a contact list of 22 Native American representatives who may have knowledge of cultural resources in the Project area. On May 12, 2025, the County sent letters to each tribal representative on the NAHC's contact list inviting them to be a consulting party under Section 106 (see **Attachment 12**). Email notifications were also sent to ensure comprehensive outreach and that all parties received the invitation to participate in the consultation

process. Responses to the Section 106 Consultation Notifications were received from Gabrieleño Band of Mission Indians - Kizh Nation on May 21, 2025; Gabrielino Tongva Indians of California on June 10, 2025; and Juaneño Band of Mission Indians, Acjachemen Nation-Belardes on June 20, 2025. Kizh Nation requested Native American monitoring and proposed three mitigation measures (TCR-1, TCR-2, and TCR-3). The Gabrielino Tongva Indians Tribe indicated that the Project APE lies within their Tribal territory and likewise requested participation in the monitoring process. The Juaneño Band of Mission Indians also requested Native American monitoring and submitted three mitigation measures (TCR-1, TCR-2, and TCR-3), which closely aligned with those proposed by Kizh Nation. In response to consultation, the County developed three mitigation measures (**MM-TCR-1**, **MM-TCR-2**, and **MM-TCR-3**) that collectively reflect the input and concerns of all three Tribes expressing interest in the Project APE. No historic properties were identified within the APE as a result of the consultation process. Therefore, consultation with tribes is complete in compliance with Section 106.

The County sent a letter to the SHPO on July 17, 2025, requesting concurrence on the finding of No Historic Properties Affected (**Attachment 13**). The SHPO responded on July 30, 2025, and indicated that, pursuant to 36 CFR § 800.4(d), SHPO does not object to the County's finding of No Historic Properties Affected. As a result, the County's consultation requirements under NHPA Section 106 are complete (see **Attachments 11**, **12**, and **13**).

Noise (EA Level Reviews) – PARTNER
https://www.hudexchange.info/programs/environmental-review/noise-abatement-and-control

1. **What activities does your project involve? Check all that apply:**

☒ New construction for residential use

NOTE: HUD assistance to new construction projects is generally prohibited if they are located in an Unacceptable zone, and HUD discourages assistance for new construction projects in Normally Unacceptable zones. See 24 CFR 51.101(a)(3) for further details.
→ *Continue to Question 2.*

☐ Rehabilitation of an existing residential property

NOTE: For major or substantial rehabilitation in Normally Unacceptable zones, HUD encourages mitigation to reduce levels to acceptable compliance standards. For major rehabilitation in Unacceptable zones, HUD strongly encourages mitigation to reduce levels to acceptable compliance standards. See 24 CFR 51 Subpart B for further details.
→ *Continue to Question 2.*

☐ None of the above

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

2. **Complete the Preliminary Screening to identify potential noise generators in the vicinity (1000' from a major road, 3000' from a railroad, or 15 miles from an airport).**
Indicate the findings of the Preliminary Screening below:

☐ There are no noise generators found within the threshold distances above.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide a map showing the location of the project relative to any noise generators.*

☒ Noise generators were found within the threshold distances.

→ *Continue to Question 3.*

3. **Complete the Noise Assessment Guidelines to quantify the noise exposure. Indicate the findings of the Noise Assessment below:**

☐ Acceptable (65 decibels or less; the ceiling may be shifted to 70 decibels in circumstances described in §24 CFR 51.105(a))

Indicate noise level here: Click here to enter text.
→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide noise analysis, including noise level and data used to complete the analysis.*

☒ Normally Unacceptable: (Above 65 decibels but not exceeding 75 decibels; the floor may be shifted to 70 decibels in circumstances described in 24 CFR 51.105(a))
Indicate noise level here: 72 dBA DNL
→

<u>If project is rehabilitation:</u>
→ *Continue to Question 4. Provide noise analysis, including noise level and data used to complete the analysis.*

<u>If project is new construction:</u>
Is the project in a largely undeveloped area[1]?
☒ No
☐ Yes → ***The project requires completion of an Environmental Impact Statement (EIS) pursuant to 51.104(b)(1)(i).***

→ *Continue to Question 4. Provide noise analysis, including noise level and data used to complete the analysis.*

☐ Unacceptable: (Above 75 decibels)
Indicate noise level here: Click here to enter text.

<u>If project is rehabilitation:</u>
HUD strongly encourages conversion of noise-exposed sites to land uses compatible with high noise levels. Consider converting this property to a non-residential use compatible with high noise levels.
→ *Continue to Question 4. Provide noise analysis, including noise level and data used to complete the analysis, and any other relevant information.*

<u>If project is new construction:</u>
The project requires completion of an Environmental Impact Statement (EIS) pursuant to 51.104(b)(1)(i). *Work with HUD or the RE to either complete an EIS or obtain a waiver signed by the appropriate authority.*
→ *Continue to Question 4.*

4. **HUD strongly encourages mitigation be used to eliminate adverse noise impacts. Work with the RE/HUD on the development of the mitigation measures that must be implemented to mitigate for the impact or effect, including the timeline for implementation.**
   ☐ Mitigation as follows will be implemented:

[1] A largely undeveloped area means the area within 2 miles of the project site is less than 50 percent developed with urban uses or does not have water and sewer capacity to serve the project.

→ *Provide drawings, specifications, and other materials as needed to describe the project's noise mitigation measures.*
Continue to the Worksheet Summary.

☒ No mitigation is necessary.
Explain why mitigation will not be made here:
Minimum interior noise reduction with typical new construction windows and doors closed was calculated for the project to be 33 dBA, resulting in interior noise levels ranging from 30 to 39 dBA, which are all below the HUD interior noise standard of 45 dBA.
→ *Continue to the Worksheet Summary.*

Worksheet Summary

Dudek completed a Technical Noise Memorandum for the proposed project in January 2025 to evaluate the project's consistency with HUD's noise standards. The primary noise source in the project vicinity is motor vehicle traffic. The primary noise source in the Project vicinity is motor vehicle traffic. The western façade of the proposed residential units would face Pomona Avenue, and the northern façade would face West 19th Street. Average Daily Traffic (ADT) volumes for West 19th Street and Pomona Avenue were retrieved from the Orange County Transportation Authority's (OCTA) GIS Open Data Portal (OCTA 2024).

A noise analysis of traffic noise from West 19th Street and Pomona Avenue carried out using HUD's DNL Calculator indicated that worst-case exterior building façade noise levels would exceed the "acceptable" HUD standard of 65 dBA DNL. The highest noise levels would occur at the exterior facades of the habitable rooms facing north, closest to West 19th Street, where noise levels are predicted to be 72 dBA DNL. Exterior noise levels at the building facades facing southwest/southeast (closest to Plumer Street) would be 63 dBA DNL and thus within HUD's exterior noise threshold.

Typical new construction of multi-family homes with windows closed provides a minimum of 25 dB exterior to interior noise reduction. All residential units will be equipped with a forced-air heating ventilation air conditioning (HVAC) unit that allows for a "windows closed" condition (i.e., windows do not need to be left open for ventilation).

To derive the anticipated noise reduction at each representative receiver, the composite transmission loss (TL) per sound transmission class (STC) window rating was calculated using provided residential unit and window dimensions (feet), and assuming a standard, non-upgraded exterior wall STC rating of 35 and a standard, non-upgraded window STC rating of 25. Minimum interior noise reduction with typical new construction windows and doors closed was calculated for the project to be 33 dBA, resulting in interior noise levels ranging from 30 to 39 dBA, which are all below the HUD interior noise standard of 45 dBA. Therefore, the proposed project would be in compliance with 24 CFR Part 51, Subpart B.

See Attachment 13.

OMB No. 2506-0177
(exp.2/28/2025)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Sole Source Aquifers (CEST and EA)

General requirements	Legislation	Regulation
The Safe Drinking Water Act of 1974 protects drinking water systems which are the sole or principal drinking water source for an area and which, if contaminated, would create a significant hazard to public health.	Safe Drinking Water Act of 1974 (42 U.S.C. 201, 300f et seq., and 21 U.S.C. 349)	40 CFR Part 149
Reference		
https://www.hudexchange.info/environmental-review/sole-source-aquifers		

1. Does your project consist solely of acquisition, leasing, or rehabilitation of an existing building(s)?

☐Yes → *Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below.*

☒No → *Continue to Question 2.*

2. Is the project located on a sole source aquifer (SSA)[1]?

☒No → *Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide documentation used to make your determination, such as a map of your project (or jurisdiction, if appropriate) in relation to the nearest SSA and its source area.*

☐Yes → *Continue to Question 3.*

3. Does your region have a memorandum of understanding (MOU) or other working agreement with EPA for HUD projects impacting a sole source aquifer?

Contact your Field or Regional Environmental Officer or visit the HUD webpage at the link above to determine if an MOU or agreement exists in your area.

[1] A sole source aquifer is defined as an aquifer that supplies at least 50 percent of the drinking water consumed in the area overlying the aquifer. This includes streamflow source areas, which are upstream areas of losing streams that flow into the recharge area.

☐Yes → *Provide the MOU or agreement as part of your supporting documentation. Continue to Question 4.*

☐No → *Continue to Question 5.*

4. Does your MOU or working agreement exclude your project from further review?

☐Yes → *Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide documentation used to make your determination and document where your project fits within the MOU or agreement.*

☐No → *Continue to Question 5.*

5. Will the proposed project contaminate the aquifer and create a significant hazard to public health?

Consult with your Regional EPA Office. Your consultation request should include detailed information about your proposed project and its relationship to the aquifer and associated streamflow source area. EPA will also want to know about water, storm water and waste water at the proposed project. Follow your MOU or working agreement or contact your Regional EPA office for specific information you may need to provide. EPA may request additional information if impacts to the aquifer are questionable after this information is submitted for review.

☐No → *Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide your correspondence with the EPA and all documents used to make your determination*.

☐Yes → *Work with EPA to develop mitigation measures. If mitigation measures are approved, attach correspondence with EPA and include the mitigation measures in your environmental review documents and project contracts. <u>If EPA determines that the project continues to pose a significant risk to the aquifer, federal financial assistance must be denied.</u> Continue to Question 6.*

6. In order to continue with the project, any threat must be mitigated, and all mitigation must be approved by the EPA. Explain in detail the proposed measures that can be implemented to mitigate for the impact or effect, including the timeline for implementation.

→ *Continue to the Worksheet Summary below. Provide documentation of the consultation (including the Managing Agency's concurrence) and any other documentation used to make your determination.*

Worksheet Summary

According the EPA Sole Source Aquifer Locations Map, accessed at https://www.epa.gov/dwssa/map-sole-source-aquifer-locations, there are no sole-source aquifers in or near the project site. The proposed project is in compliance with the Safe Water Drinking Act.

See Attachment 14.

WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Wetlands (CEST and EA) – Partner

https://www.hudexchange.info/environmental-review/wetlands-protection

1. **Does this project involve new construction as defined in Executive Order 11990, expansion of a building's footprint, or ground disturbance?**
   The term "new construction" includes draining, dredging, channelizing, filling, diking, impounding, and related activities and construction of any structures or facilities.

   ☐ No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

   ☒ Yes → *Continue to Question 2.*

2. **Will the new construction or other ground disturbance impact a wetland as defined in E.O. 11990?**

   ☒ No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide a map or any other relevant documentation to explain your determination.*

   ☐ Yes → *Work with HUD or the RE to assist with the 8-Step Process. Continue to Question 3.*

3. **Does Section 55.12 state that the 8-Step Process is not required?**

   ☐ No, the 8-Step Process applies.
   This project will require mitigation and may require elevating structure or structures. See the link to the HUD Exchange above for information on HUD's elevation requirements.
   → *Work with the RE/HUD to assist with the 8-Step Process. Continue to Worksheet Summary.*

   ☐ 5-Step Process is applicable per 55.12(a).
   Provide the applicable citation at 24 CFR 55.12(a) here.
   Click here to enter text.
   → *Work with the RE/HUD to assist with the 5-Step Process. This project may require mitigation or alternations. Continue to Worksheet Summary.*

   ☐ 8-Step Process is inapplicable per 55.12(b).
   Provide the applicable citation at 24 CFR 55.12(b) here.
   Click here to enter text.
   → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to Worksheet Summary.*

☐ 8-Step Process is inapplicable per 55.12(c).

Provide the applicable citation at 24 CFR 55.12(c) here.

Click here to enter text.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to Worksheet Summary.*

Worksheet Summary

According to the National Wetlands Inventory map regulated by the U.S. Fish and Wildlife Service and accessible at https://www.fws.gov/program/national-wetlands-inventory/wetlands-mapper, there are no wetlands on the project site. The nearest wetland feature is a riverine feature located approximately 0.67 miles northwest of the project site, in Canyon Park. In addition, according to the Phase I ESA, no wetland features were observed onsite or near the project site during the site reconnaissance. As a result, the proposed project is in compliance with Executive Order 11990.

See Attachment 15.

OMB No. 2506-0177
(exp.2/28/2025)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Wild and Scenic Rivers (CEST and EA) – PARTNER

https://www.hudexchange.info/environmental-review/wild-and-scenic-rivers

1. Is your project within proximity of a Wild and Scenic River, Study River, or Nationwide Rivers Inventory River?

☒ No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Provide documentation used to make your determination.*

☐ Yes → *Continue to Question 2.*

2. Could the project do *any* of the following?

- Have a direct and adverse effect within Wild and Scenic River Boundaries,
- Invade the area or unreasonably diminish the river outside Wild and Scenic River Boundaries, or
- Have an adverse effect on the natural, cultural, and/or recreational values of a NRI segment.

Consult with the appropriate federal/state/local/tribal Managing Agency(s), pursuant to Section 7 of the Act, to determine if the proposed project may have an adverse effect on a Wild & Scenic River or a Study River and, if so, to determine the appropriate avoidance or mitigation measures.

Select one:

☐ The Managing Agency has concurred that the proposed project will not alter, directly, or indirectly, any of the characteristics that qualifies or potentially qualifies the river for inclusion in the NWSRS.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Provide documentation of the consultation (including the Managing Agency's concurrence) and any other documentation used to make your determination.*

☐ The Managing Agency was consulted and the proposed project may alter, directly, or indirectly, any of the characteristics that qualifies or potentially qualifies the river for inclusion in the NWSRS.

→ *The RE/HUD must work with the Managing Agency to identify mitigation measures to mitigate the impact or effect of the project on the river.*

Worksheet Summary

According to the EPA's NEPAssist mapping tool, the project site does not contain any rivers protected under the Wild and Scenic Rivers Act. The closest protected waterway is the Bautista Creek Wild and

Scenic River, approximately 62.5 miles east of the project site. Therefore, the proposed project is in compliance with Executive Order 11990.

See Attachment 16.
