Craig.fee@occr.ocgov.com

Project Location:

Costa Mesa Senior (project or proposed project) is an affordable housing project located at 695 West 19th Street in the City of Costa Mesa (City) in California, 92627 (see **Figure 1, Project Location**). The proposed 1.5-acre project site is located on Assessor's Parcel Number [APN] 424-211-01.

Description of the Proposed Project [24 CFR 50.21 & 58.32]:

The project is a proposed new affordable housing construction for seniors, located in downtown Costa Mesa, near the intersection of West 19th Street and Pomona Avenue. The project site is located on the eastern 1.5 acres of APN 424-211-01, which is approximately 2.7 acres total. The western portion of the project parcel is developed with an existing commercial building occupied by the Costa Mesa Senior Center (Senior Center), while the project site is currently developed with an asphalt-paved,145-stall parking lot and associated landscaping serving the Senior Center. Jamboree Housing Corporation (Jamboree or the Applicant) has control of the project site through an Exclusive Negotiating Agreement with the City approved by the City Council in 2021 and renewed in July 2024.

The proposed project would entail the construction and operation of a new four-story, single-building affordable housing community for seniors aged 62 and older with 70 apartment units. Project design would incorporate Spanish Revival architecture and a courtyard-style layout. Apartments would include 68 one-bedroom units and 2 two-bedroom units, with one of the two-bedroom units reserved for an on-site manager. The other two-bedroom unit would accommodate a small-family configuration or senior with a full-time caregiver. Of the 69 affordable housing units, 33 one-bedroom units and 1 two-bedroom unit would be designated as permanent supportive housing (PSH) for seniors experiencing homelessness with incomes at or below 30% of the area median income (AMI). The remaining 34 one-bedroom units would be reserved for seniors earning at or below 60% AMI. Four units would be Americans with Disabilities Act (ADA) accessible, and two units would be available for residents living with sensory impairments.

The first floor would include offices for supportive services staff to help address the needs of all future residents, including residents that are homeless or at risk of homelessness. The master service provider for Costa Mesa Senior would be Housing with Heart (HWH). Jamboree has directly provided Resident Services at its properties since 1990 when it formed the 501(c)3, HWH. HWH operates under Jamboree's umbrella utilizing best practice, evidence-driven models to transform lives and strengthen communities. At every PSH project, HWH is the master service provider, delivering high-quality supportive services necessary to help residents succeed in staying stably housed at Jamboree's properties, as well as oversee the multiple agencies and partners who are also engaged with the residents. Each resident, regardless of their referral source or eligibility for particular resources, would have the same robust service plan and targeted outcomes based on best practices in the field. The project would also include full wrap-around social services for 24 residents of the 34 PSH units. The Orange County Health Care Agency would provide case management services through the Mental Health Services Act (MSHA). Approximately 11 of the MSHA units would be financed by the Orange County Housing Finance Trust (OCHFT) and the remaining 13 units would be funded by the Orange County Housing and Community Development (OCHCD). The OCHTF would use its Local Housing Trust Fund to finance the remaining 11 units. One full-time case manager would reside on site to provide care coordination and direct service delivery and a part-time resident service coordinator would also provide care coordination and case management support. All residents of the proposed project would be provided access to educational programs, health and wellness services, and other skill-building activities.

FIGURE 1

Project Location

Costa Mesa Senior

The proposed project would include shared communal spaces and amenities, including a leasing office, common area, laundry facilities, individual counseling offices, a community room with kitchen area, library/computer room, pet spa, and multi-purpose flex room with areas set aside for games and media. Residents would also have access to outdoor amenities and open spaces, including a community courtyard, dog park, fitness lawn, lawn for games, community garden, and outdoor dining area. In addition, the building would be elevator serviced. Remaining parking on site would be shared between residents of the proposed development and the adjacent Senior Center.

Statement of Purpose and Need for the Proposal:
The purpose of the project is to develop 69 units of affordable housing for seniors earning between 30% and 60% AMI in an area with high housing costs and limited affordable housing. High housing costs, limited affordable housing supply, and scarcity of land pose challenges in the project area. HUD's most recent comprehensive housing market analysis for Anaheim-Santa Ana-Irvine Housing Market Area, which includes the entirety of Orange County including the City of Costa Mesa, dated January 1, 2022, found the rental market to be "tight" with a vacancy rate of 4.0% and a demand for 14,200 new rental units over a 3-year forecast period and only 6,000 units under construction (HUD 2022). According to the SCAG Regional Housing Needs Allocation (RHNA) Plan for 2021-2029, the City of Costa Mesa needs to add 11,760 new housing units over the planning cycle, including 2,919 units for the very-low income (<50% of AMI) and 1,794 units for the low-income (51-80% of AMI) demographic groups to meet housing needs from 2021 to 2029 (SCAG 2021). The project would help address the City's housing needs in compliance with state requirements.

Existing Conditions and Trends [24 CFR 58.40(a)]**:**
The project site has a General Plan land use designation of General Commercial and is zoned as C1 for Local Business District, within the 19 West Urban Plan overlay zone. The project site is located on the eastern portion of a 2.7-acre parcel that is currently an asphalt-paved parking lot and associated landscaping. According to a review of aerial photography as part of the Phase I Environmental Site Assessment (ESA) completed by Barr & Clark, Inc., in July 2023, the project site was vacant land from as early as 1938 until just prior to 1963, when a parking lot was constructed on part of the site. The parcel consisted of only the parking lot and vacant land until at least 1995, when the project site was developed with the existing commercial building and parking lot. As stated in the project description above, the project site is located in a mixed residential and commercial area.

Surrounding land uses consist of the following:

- **North:** West 19th Street followed by a senior residential property (678 West 19th Street [The Towers on 19th Street])
- **South:** Plumer Street followed by single-family dwellings
- **East:** Commercial (659 West 19th Street [Mouse Graphics and Costa Mesa Blueprint])
- **West:** Commercial (695 West 19th Street [Costa Mesa Senior Center])

Funding Information

Grant Number	HUD Program	Funding Amount
N/A	34 Housing Choice Project-Based Vouchers	$14,010,720 (20-year estimated value)

Estimated Total HUD Funded Amount: $14,010,720

Estimated Total Project Cost (HUD and non-HUD funds) [24 CFR 58.32(d)]**:** $55,433,990

Compliance with 24 CFR 50.4, 58.5, and 58.6 Laws and Authorities

Record below the compliance or conformance determinations for each statute, executive order, or regulation. Provide credible, traceable, and supportive source documentation for each authority. Where applicable, complete the necessary reviews or consultations and obtain or note applicable permits of approvals. Clearly note citations, dates/names/titles of contacts, and page references. Attach additional documentation as appropriate.

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
STATUTES, EXECUTIVE ORDERS, AND REGULATIONS LISTED AT 24 CFR 50.4 and 58.6		
Airport Hazards 24 CFR Part 51 Subpart D	Yes ☐ No ☒	HUD's policy is to apply standards to prevent incompatible development around civil airports or military airfields, consistent with Title 24 of the Code of Federal Regulations (CFR), Part 51, Subpart D. The project site is not located within 2,500 feet of a civilian airport or 15,000 feet of a military airport (EPA 2024b). The nearest civilian airport, John Wayne Airport, is located approximately 3.2 miles northeast of the project site. The nearest military airport is Los Alamitos Army Airfield, approximately 11.9 miles northwest of the project site. Therefore, the project is in compliance with airport hazards requirements (see **Attachment 1**; see **Airport Hazards Worksheet**).
Coastal Barrier Resources Coastal Barrier Resources Act, as amended by the Coastal Barrier Improvement Act of 1990 [16 USC 3501]	Yes ☐ No ☒	The Coastal Barrier Resources Act (CBRA) of 1982 designated relatively undeveloped coastal barriers along the Atlantic and Gulf coasts as part of the John H. Chafee Coastal Barrier Resources System (CBRS) and made these areas ineligible for most new federal expenditures and financial assistance. The Coastal Barrier Improvement Act (CBIA) of 1990 reauthorized the CBRA; expanded the CBRS to include undeveloped coastal barriers along the Florida Keys, Great Lakes, Puerto Rico, and U.S. Virgin Islands. The project is located in California. There are no units of the CBRS in California and the project site is not located within a CBRS Unit (USFWS 2024a). Therefore, the project is in compliance with the CBRA and CBIA (see **Attachment 2**).

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
Flood Insurance Flood Disaster Protection Act of 1973 and National Flood Insurance Reform Act of 1994 [42 USC 4001-4128 and 42 USC 5154a]	Yes ☐ No ☒	The Flood Disaster Protection Act of 1973 (42 USC 4012a) requires that projects receiving federal assistance and located in an area identified by the Federal Emergency Management Agency (FEMA) as being within a Special Flood Hazard Area (SFHA) be covered by flood insurance under the National Flood Insurance Program (NFIP). SFHAs are hazard areas that are subject to inundation by the base flood (1%-annual-chance flood) and are labeled on flood maps as zones starting with the letters A or V. According to the FEMA Flood Insurance Rate Map (FIRM) 06059C0268J, effective December 3, 2009, the project site is located within Zone X (unshaded), an area of minimal flood hazard. Therefore, the project site is not located within a FEMA-designated SFHA. According to the NFIP Community Status Book (FEMA 2024), the project site city (Costa Mesa) participates in the NFIP (Community Identification Number 060216C). Therefore, the project is in compliance with flood insurance requirements (see **Attachment 3**; see **Flood Insurance Worksheet**).
STATUTES, EXECUTIVE ORDERS, AND REGULATIONS LISTED AT 24 CFR 50.4 & 58.5		
Clean Air Clean Air Act, as amended, particularly section 176(c) & (d); 40 CFR Parts 6, 51, 93	Yes ☐ No ☒	The Clean Air Act, administered by the EPA, aims to protect human health and welfare from air pollution. Revised in 1990, it sets National Ambient Air Quality Standards (NAAQS) for six pollutants: particulate matter (PM_{10} and $PM_{2.5}$), sulfur dioxide (SO_2), nitrogen dioxide (NO_2), ozone (O_3), carbon monoxide (CO), and lead. Areas meeting these standards are designated as attainment areas, while those that do not are nonattainment areas. Nonattainment areas that meet the standards enter a maintenance phase to prevent future violations. Section 176(c) requires federal actions to conform to the State Implementation Plan, ensuring they do not cause new air quality violations or worsen existing ones. Federal *de minimis* thresholds specify minimum emission rates below which conformity determinations are not required, varying by pollutant

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		and area status as provided at 40 CFR § 93.153(b)(1) and (b)(2). The project site is located in the South Coast Air Basin (SoCAB), which includes all of Orange County and the urbanized portions of Los Angeles, Riverside, and San Bernardino counties, under the jurisdiction of the South Coast Air Quality Management District (SCAQMD). The SoCAB is designated as in extreme nonattainment with the NAAQS for O_3, serious nonattainment for $PM_{2.5}$, and partial nonattainment for lead (i.e., Orange County is in attainment but Los Angeles County within the SoCAB is in nonattainment) (EPA 2024a). The SoCAB is designated as a maintenance area for PM_{10}, CO, NO_2, and SO_2. Project construction and operation would generate criteria air pollutant emissions. Construction equipment and associated heavy-duty truck traffic generate diesel exhaust, which in turn generates air pollutant emissions. Site preparation activities produce fugitive dust emissions (PM_{10} and $PM_{2.5}$). The project would be required to comply with SCAQMD regulations for controlling fugitive dust pursuant to SCAQMD Rule 403, which requires the implementation of best available dust control measures during active operations capable of generating fugitive dust. Air pollutant emissions from construction activities on site would vary daily as construction activity levels change. Long-term criteria air pollutant emissions would result from the operation of the proposed project. Emissions generated during operation of the proposed project would involve the use of on-road mobile vehicles, electricity, water, and landscape equipment, as well as generation of solid waste and wastewater. Emissions from the construction and operational phases of the project were estimated using the California Emissions Estimator Model (CalEEMod) Version 2022.1.1.28. Table 1 summarizes the CalEEMod results. As shown in Table 1, annual construction and

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations

operational criteria pollutant emissions would be below federal *de minimis* thresholds.

Table 1. Estimated Annual Construction and Operational Criteria Air Pollutant Emissions

Criteria Pollutant	Annual Construction Emissions (2025) (tpy)	Annual Construction Emissions (2026) (tpy)	Annual Operational Emissions (tpy)	*De Minimis* Threshold (tpy)	Thresholds Exceeded?
VOC	0.10	0.42	0.58	10	No
NO_x	0.81	0.38	0.19	10	No
CO	1.06	0.54	1.51	100	No
SO_x	<0.01	<0.01	<0.01	N/A	N/A
PM_{10}	0.11	0.05	0.18	100	No
$PM_{2.5}$	0.05	0.02	0.05	70	No

In addition, the SCAQMD has established significance thresholds to determine whether a project would have a significant adverse effect on air quality (SCAQMD 2023). As shown in Table 2 and Table 3, the maximum unmitigated daily construction and operational emissions from the proposed project would not exceed the SCAQMD's regional construction or operation emissions thresholds.

Table 2. Estimated Unmitigated Maximum Daily Construction Criteria Air Pollutant Emissions

Criteria Pollutant	Maximum Daily Construction Emissions (lbs/day)	SCAQMD Significance Threshold (lbs/day)	Thresholds Exceeded?
VOC	74.1	75	No
NO_x	15.2	55	No
CO	16.4	550	No
SO_x	0.03	150	No
PM_{10}	3.55	150	No
$PM_{2.5}$	1.96	55	No

Table 3. Estimated Unmitigated Maximum Daily Operational Criteria Air Pollutant Emissions

Criteria Pollutant	Maximum Daily Operational Emissions (lbs/day)	SCAQMD Significance Threshold (lbs/day)	Thresholds Exceeded?
VOC	3.59	55	No
NO_x	1.03	55	No
CO	10.6	550	No
SO_x	0.01	150	No
PM_{10}	1.06	150	No
$PM_{2.5}$	0.31	55	No

In summary, project emissions would be below *de minimis* levels and SCAQMD significance thresholds, in accordance with HUD guidance. Therefore, the proposed project is in compliance with the Clean Air Act (see **Attachment 4**; see **Air Quality Worksheet**).

Coastal Zone Management Coastal Zone Management Act, sections 307(c) & (d)	Yes ☐ No ☒	The Coastal Zone Management Act (CZMA) of 1972 (16 USC 1451 et seq.) is administered at the federal level by the Coastal Programs Division within the National Oceanic and Atmospheric Administration's Office of Ocean and Coastal Resource Management (NOAA-OCRM). Projects that can affect the coastal

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		zone must be carried out in a manner consistent with the state coastal zone management program under Section 307(c) and (d) of the CZMA. Under California's federally approved Coastal Management Program, the California Coastal Commission (CCC) manages development along the California coast (except for San Francisco Bay). The California Coastal Act is the foundation of the California Coastal Management Program, and defines the State's coastal management goals and policies, establishes the boundaries of the State's coastal zone, and creates governmental mechanisms for carrying out the management program. The California Coastal Act requires that individual jurisdictions adopt a Local Coastal Program (LCP) to implement the California Coastal Act at the local level. Generally, any "development" activity in the Coastal Zone requires a Coastal Development Permit from the CCC or local government with a certified LCP. The project site is not located within the coastal zone. As such, the project would not occur within or affect a coastal zone. Therefore, the proposed project is in compliance with the CZMA (see **Attachment 5**; see **Coastal Zone Management Worksheet**).
Contamination and Toxic Substances 24 CFR Part 50.3(i) & 58.5(i)(2)	Yes ☒ No ☐	HUD policy, as described in Section 50.3(i) and Section 58.5(i)(2), requires all property proposed for use in HUD programs to be free of hazardous materials, contamination, toxic chemicals and gasses, and radioactive substances, where a hazard could affect the health and safety of occupants or conflict with the intended utilization of the property. Sites known or suspected to be contaminated by toxic chemicals or radioactive materials include, but are not limited to, sites: (i) listed on an EPA Superfund National Priorities or the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) List, or equivalent State list; (ii) located within 3,000 feet of a toxic or solid waste landfill site; or (iii) with an underground storage tank (UST) (which is not a residential fuel tank).

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		A Phase I ESA was prepared for the project by Barr & Clark in July 2023. In accordance with ASTM standards, a recognized environmental condition (REC) is defined as the presence or likely presence of hazardous substances or petroleum products due to a release or likely release or posing a threat of a future release to the environment. A controlled recognized environmental condition (CREC) is defined as a REC that has been addressed to the satisfaction of the applicable regulatory authority with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls. A historical recognized environmental condition (HREC) is defined as a previous release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority meeting unrestricted use criteria without subjecting the project site to any controls. The Phase I did not find any evidence of RECs, HRECs, or CRECs in connection with the project site. No underground storage tanks (USTs) or aboveground storage tanks (ASTs) were observed during the site reconnaissance. In addition, no significant amounts of petroleum products were observed to be in use on site. <u>Asbestos and Lead-Based Paint</u> There are no existing buildings on the project site; therefore, asbestos and lead-based paint are not a concern. <u>Toxic Polychlorinated Biphenyls (PCBs)</u> PCBs have been historically used in electric equipment, though their use outside of totally enclosed equipment was prohibited in 1977. Transformers and other potential PCB-containing equipment, such as indoor transformers, were not observed on the project site during the site visit. In addition, no evidence of pooling liquid, stained soils, pits, ponds, or lagoons were identified on site. <u>Radon</u> HUD guidance issued on January 11, 2024, requires that radon be considered in the contamination analysis for 24

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		CFR Parts 50 or 58. Radon is a naturally occurring, odorless, and invisible gas. Radon is a decay product of the unstable element uranium, a common constituent of soil and rock. Under certain natural conditions, the radon gas can enter surface soils and become part of the soil gas environment, which then can enter the air, including air inside of buildings. When soil gas that contains radon enters a building, radon and its decay products are either directly inhaled, or attached to dust on walls, floors and in the air, which then can be inhaled. These decay products then undergo further decay, resulting in the release of subatomic alpha particles. This alpha particle radiation can cause mutations in lung tissue which can lead to lung cancer. The risk of contracting lung cancer from radon increases with an increase in the concentration of radon in the air that is breathed by building occupants. EPA recommends mitigation for residences with radon concentrations at or above 4.0 picocuries per liter (pCi/L) of air (HUD 2021). HUD requires new multifamily construction projects to follow radon-resistant construction requirements in accordance with standards developed by the American Association of Radon Scientists and Technologists (AARST) in collaboration with the American National Standards Institute (ANSI) for Soil Gas Control Systems in New Construction of Buildings (ANSI-AARST CC-1000-2018). This standard provides minimum requirements for construction of buildings intended for human occupancy, except for one- and two-family dwellings, to reduce occupant exposure to radon and other hazardous soil gases. HUD also requires post-construction radon testing prior to final completion inspection per Section 9.6.3.5 of the MAP Guide (HUD 2021). In addition, per Section 9.6.3.2 of HUD's Multifamily Accelerated Processing (MAP) Guide (revised March 19, 2021), radon testing is required for new construction of multifamily housing at completion of construction and prior to final endorsement. If indoor radon levels are found to exceed the EPA action level of 4.0 pCi/L, then

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		mitigation is required. Implementation of **MM-TOX-1** would ensure compliance with HUD's radon requirements by requiring post-construction radon testing, followed by mitigation if testing determines that radon levels are at or above the EPA's threshold of 4.0 pCi/L. This ERR will be updated with the radon evaluation and proof of any required mitigation when complete prior to project occupancy. Therefore, the proposed project is in compliance with HUD's requirements related to contamination and toxic substances (see **Attachment 6**; see **Contamination and Toxic Substances Worksheet**).
Endangered Species Endangered Species Act of 1973, particularly section 7; 50 CFR Part 402	Yes ☐ No ☒	The Endangered Species Act of 1973, as amended, and its implementing regulations are designed to protect and recover species in danger of extinction and the ecosystems that they depend upon. When passed, the Endangered Species Act spoke specifically to the value—tangible and intangible—of conserving species for future generations. In passing the Endangered Species Act, Congress recognized a key fact that subsequent scientific understanding has only confirmed: the best way to protect species is to conserve their habitat. According to HUD guidance, the environmental review of a proposed project must consider potential impacts to endangered and threatened species and critical habitats. A No Effect determination can be made if none of the activities involved in the project have potential to affect species or habitats. Due to the urban and commercial setting surrounding the project site, no federally listed special-status plant or wildlife species are expected to be present on site. The USFWS offers consultation on threatened and endangered wildlife and plant species, as well as critical habitats, on a project-by-project basis. According to the USFWS Environmental Conservation Online System (ECOS) Information for Planning and Consultation

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		(IPaC), 14 special-status species have the potential to occur on the project site (USFWS 2024b): • **Mammals:** Pacific pocket mouse (*Perognathus longimembris pacificus*) • **Birds:** California least tern (*Sternula antillarum browni*), coastal California gnatcatcher (*Polioptila californica californica*), least Bell's vireo (*Vireo bellii pusillus*), light-footed Ridgway's rail (*Rallus obsoletus levipes*), western snowy plover (*Chardrius nivosus nivosus*) • **Amphibians:** western spadefoot (*Actinemys pallida*) • **Fishes:** Santa Ana sucker (*Catostomus santaanae*) • **Insects:** monarch butterfly (*Danaus plexippus*) • **Reptiles:** southwestern pond turtle (*Actinemys pallida*) • **Crustaceans:** San Diego fairy shrimp (*Branchinecta sandiegonensis*) • **Flowering Plants:** Nevin's barberry (*Berberis nevinii*), salt marsh bird's-beak (*Cordylanthus maritimus* ssp. *maritimus*), San Diego button-celery (*Eryngium aristulatum* var. *parishii*), Ventura marsh milk-vetch (*Astragalus pycnostachyus* var. *lanosissimus*) Although the general habitat ranges of these 14 species overlap with the project location, their critical habitat areas do not intersect with the project site (USFWS 2024b). Given the urbanized nature of the project site and scarcity of on-site native vegetation, it is unlikely that any special-status species would occur on site due to a lack of suitable habitat. As such, the project would not result in potential substantial adverse effects to plant and wildlife species, or their habitats protected under the Endangered Species Act. Therefore, the project is in compliance with the Endangered Species Act (see **Attachments 7** and **8**; see **Endangered Species Act Worksheet**).

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
Explosive and Flammable Hazards 24 CFR Part 51 Subpart C	Yes ☐ No ☒	Regulations set forth in 24 CFR Part 51 Subpart C require HUD-assisted projects to be separated from hazardous facilities that store, handle, or process hazardous substances by a distance based on the contents and volume of the facilities' aboveground storage tank (AST), or to implement mitigation measures. The requisite distances are necessary, because project sites that are too close to facilities handling, storing, or processing conventional fuels, hazardous gases, or chemicals of an explosive or flammable nature may expose occupants or end-users of a project to the risk of injury in the event of a fire or an explosion. A search of the California Environmental Protection Agency (CalEPA) website for aboveground petroleum storage and chemical storage sites was conducted to identify aboveground flammable materials storage within a 1-mile radius of the project site (CalEPA 2024). A review of the database search results identified a total of 150 facilities within 1-mile of the project site that reported storing flammable chemicals on site, of which 108 sites contained hazardous chemicals listed in Appendix I of 24 CFR Part 51 Subpart C. Chemicals not listed in § 51.201 were considered non-hazardous. HUD's Acceptable Separation Distance (ASD) Assessment Tool was used to calculate the minimum separation distance between the project site and these 108 CalEPA sites. When calculating the ASD, all ASTs were assumed to be unpressurized and not diked, and the maximum quantity stored was used to calculate the ASD. Results of the analysis identified one property, Winall Oil Company (Mobil gas station), located at 790 West 19th Street, storing hazardous materials located below HUD's minimum ASD. All other chemical storage facilities were located outside of the HUD calculated ASD. Google Earth's Street View was used to identify the location of the chemical storage tanks at the commercial property. Evaluation of imagery on Google Earth did not reveal any ASTs located at the Mobil gas station. Since the commercial property is a gas station,

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		the storage tanks for unleaded gasoline and diesel are located underground and thus are not subject to the regulations set forth in 24 CFR Part 51 Subpart C. Therefore, the project is in compliance with explosive and flammable hazards requirements (see **Attachment 9**; see **Explosive and Flammable Hazards Worksheet**).
Farmlands Protection Farmland Protection Policy Act of 1981, particularly sections 1504(b) and 1541; 7 CFR Part 658	Yes ☐ No ☒	The importance of farmlands to the national and local economy requires the consideration of the impact of activities on land adjacent to prime or unique farmlands. The purpose of the Farmland Protection Policy Act (7 USC Section 4201 et seq, implementing regulations 7 CFR Part 658, of the Agriculture and Food Act of 1981, as amended) is to minimize the effect of federal programs on the unnecessary and irreversible conversion of farmland to nonagricultural uses. According to the California Department of Conservation (DOC) California Important Farmland Finder (DOC 2022), the project site and surrounding area is designated as "Urban and Built-up Land." The DOC defines Urban and Built-up Land as land that is "used for residential, industrial, commercial, construction, institutional, public administration, railroad and other transportation yards, cemeteries, airports, golf courses, sanitary landfills, sewage treatment, water control structures, and other developed purposes." As such, the project site does not contain farmland, and the conversion of farmland to a non-agricultural use would not occur. Therefore, the project is in compliance with the Farmland Protection Policy Act (see **Attachment 10**; see **Farmlands Protection Worksheet**).
Floodplain Management Executive Order 11988, particularly section 2(a); 24 CFR Part 55	Yes ☐ No ☒	The provisions of Executive Order (EO) 11988, Floodplain Management, require federal activities to avoid impacts to floodplains and to avoid direct and indirect support of floodplain development to the extent practicable. EO 13690, Establishing a Federal Flood Risk Management Standard (FFRMS) and a Process for Further Soliciting and Considering Stakeholder Input, revised EO 11988 and established a new FFRMS to

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		address current and future flood risk and improve resiliency. EO 14030, Climate-Related Financial Risk, subsequently furthered measures to address climate-related financial risk. HUD's regulations in 24 CFR Part 55 outline HUD's procedures for complying with EO 11988, EO 13690, and EO 14030. The regulations define a new floodplain of concern, the FFRMS floodplain, which extends beyond the traditional 100-year floodplain to account for increased flood risk over time. The extent of the FFRMS floodplain can be determined using one of three approaches depending on available data and information: the Climate-Informed Science Approach (CISA), the 0.2-Percent-Annual-Chance Floodplain Approach (0.2PFA), and the Freeboard Value Approach (FVA). For non-critical actions, where FEMA has defined the 0.2-percent-annual-chance floodplain, the FFRMS floodplain is the area that FEMA has designated as within the 0.2-percent-annual-chance floodplain. Critical actions are activities where even a slight risk of flooding would be too great, because of the potential loss of life, injury to persons, or damage to properties. This applies to hospitals, nursing homes, fire and police stations, and roads providing sole egress from flood-prone areas. Non-critical actions consist of housing, community centers, independent living for the elderly, and commercial activities. Therefore, the project is a non-critical action. No HUD-approved CISA maps are available for the project site; however, FEMA has mapped the 0.2% annual chance of flood (i.e., 500-year floodplain). Therefore, this analysis uses the 0.2PFA approach. As indicated above, the project site is not located within the FEMA-designated 500-year floodplain. Based on the project location and designation as a non-critical action, the proposed action is not in the coastal or riverine FFRMS floodplain. Therefore, the project is in compliance with 24 CFR Part 55 and EO 11988 (see

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		Attachment 3; see **Floodplain Management Worksheet**).
Historic Preservation National Historic Preservation Act of 1966, particularly sections 106 and 110; 36 CFR Part 800	Yes ☒ No ☐	The National Historic Preservation Act (NHPA) (16 USC 470 et seq.) directs each federal agency, and those tribal, State, and local governments that assume federal agency responsibilities, to protect historic properties and to avoid, minimize, or mitigate possible harm that may result from agency actions. The review process, known as Section 106 review, is detailed in 36 CFR Part 800. Early consideration of historic places in project planning and full consultation with interested parties are key to effective compliance with Section 106. The State Historic Preservation Officer (SHPO) and/or Tribal Historic Preservation Officer (THPO) are primary consulting parties in the process. Dudek prepared a Cultural Resources Constraints Analysis for the project in January 2025 to determine if the project would impact any historic properties pursuant to Section 106 of the NHPA (see **Attachment 11**). The preparation of the report included the development of an area of potential effects (APE), a records search of the California Historical Resources Information System (CHRIS), a review of historic aerial imagery and historic topographic maps, and a review of the geomorphological context of the project APE. The findings of the report are summarized as follows. <u>Area of Potential Effects</u> The project APE consists of the area of direct physical effect for the project, which is currently a parking lot, consisting of a total area of 1.5 acres located on the eastern portion of 695 West 19th Street, Costa Mesa, CA (APN 424-211-01). <u>Records Search and Background Research</u> A confidential records search of the APE and a 1-mile buffer was conducted at the South-Central Coastal Information Center at California State University, Fullerton to identify historic properties located within the APE that might be affected by the proposed undertaking. The records search indicated that 31

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		previous cultural resources technical investigations were conducted within 1 mile of the APE between 1975 and 2014, two of which intersect with the APE. A total of 9 previously identified cultural resources have been recorded within 1 mile of the APE. One resource, the Costa Mesa Senior Center, was previously mapped intersecting the APE. Upon further analysis, this resource is directly adjacent to the APE and does not intersect the APE. The Senior Center was identified as a historic era built environment resource that was evaluated in 2014 and recommended not eligible for the NRHP. Dudek architectural historians reviewed the 2014 Department of Parks and Recreation site form for the property, aerial photographs, and historic newspapers. Research indicated that there was a building on the site as early as 1963, but that it was demolished and subsequently replaced in 1992 by the currently extant Senior Center building. Therefore, the property is not of historic age (45 years or older). None of the other eight previously identified cultural resources are located within or adjacent to the APE. Analysis of historic aerials, topos, and the geomorphic context indicate there is a low potential for encountering intact subsurface archaeological deposits during project implementation. <u>Determination</u> No historic properties were identified within or adjacent to the APE. Dudek's report recommends a finding of No Historic Properties Affected for the project under Section 106 of the NHPA. Implementation of **MM-CUL-1** and **MM-CUL-2** would avoid adverse impacts related to the inadvertent discovery of archaeological resources or human remains during construction consistent with NHPA Section 106 regulations. <u>Consultation</u> Based on a search of HUD's Tribal Directory Assessment Tool (TDAT), no federally recognized tribes that may have an interest in the area where the project is located were identified. The County sent a letter to the SHPO on February 2, 2025, requesting concurrence on the finding of No Historic Properties Affected. The SHPO responded on March 12, 2025, and

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		requested that the County provide the results of a Native American Heritage Commission (NAHC) Sacred Lands File search and evidence of notification and invitation to consult to any tribes identified by the NAHC on the Tribal Contact List pursuant to 36 CFR §800.3(f). The NAHC was contacted on April 22, 2025, and a response, received on May 6, 2025, indicated that the APE is negative for Native American cultural resources. The NAHC also provided a contact list of 22 Native American representatives who may have knowledge of cultural resources in the Project area. On May 12, 2025, the County sent letters to each tribal representative on the NAHC's contact list inviting them to be a consulting party under Section 106 (see **Attachment 12**). Email notifications were also sent to ensure comprehensive outreach and that all parties received the invitation to participate in the consultation process. Responses to the Section 106 Consultation Notifications were received from Gabrieleño Band of Mission Indians - Kizh Nation on May 21, 2025; Gabrielino Tongva Indians of California on June 10, 2025; and Juaneño Band of Mission Indians, Acjachemen Nation-Belardes on June 20, 2025. Kizh Nation requested Native American monitoring and proposed three mitigation measures (TCR-1, TCR-2, and TCR-3). The Gabrielino Tongva Indians Tribe indicated that the Project APE lies within their Tribal territory and likewise requested participation in the monitoring process. The Juaneño Band of Mission Indians also requested Native American monitoring and submitted three mitigation measures (TCR-1, TCR-2, and TCR-3), which closely aligned with those proposed by Kizh Nation. In response to consultation, the County developed three mitigation measures (**MM-TCR-1**, **MM-TCR-2**, and **MM-TCR-3**) that collectively reflect the input and concerns of all three Tribes expressing interest in the Project APE. No historic properties were identified within the APE as a result of the consultation process. Therefore, consultation with tribes is complete in compliance with Section 106. The County sent a letter to the SHPO on July 17, 2025, requesting concurrence on the finding of No Historic

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		Properties Affected (**Attachment 13**). The SHPO responded on July 30, 2025, and indicated that, pursuant to 36 CFR § 800.4(d), SHPO does not object to the County's finding of No Historic Properties Affected. As a result, the County's consultation requirements under NHPA Section 106 are complete (see **Attachments 11**, **12**, and **13**; see **Historic Preservation Worksheet**).
Noise Abatement and Control Noise Control Act of 1972, as amended by the Quiet Communities Act of 1978; 24 CFR Part 51 Subpart B	Yes ☐ No ☒	According to HUD's noise standards set forth in 24 CFR Part 51, Subpart B, all sites whose environmental or community noise exposure exceeds the day night average sound level (DNL) of 65 decibels (dB) are considered noise-impacted areas. HUD guidance includes screening criteria to assist in evaluating a project's consistency with the foregoing standard. Pursuant to HUD guidance, potentially significant noise generators within the vicinity of a project include major roadways, if within 1,000 feet of a project site, railroads, if within 3,000 feet, and military or Federal Aviation Administration-regulated (FAA) airfields, if within 15 miles. Documentation that a project is not within the applicable distances to the foregoing noise generators demonstrates compliance with HUD's noise standard. If within the aforementioned distance, a project may show the noise level is at or below 65 dB to demonstrate consistency with the Noise Control Act of 1972. Dudek prepared a Noise Technical Memorandum for the proposed project in February 2025 to evaluate the project's consistency with HUD's noise standards. The primary noise source in the Project vicinity is motor vehicle traffic. The western façade of the proposed residential units would face Pomona Avenue, and the northern façade would face West 19th Street. Average Daily Traffic (ADT) volumes for West 19th Street and Pomona Avenue were retrieved from the Orange County Transportation Authority's (OCTA) GIS Open Data Portal (OCTA 2024). There are no major railroads within 3,000 feet of the Project. California 55 (Newport Boulevard) is approximately 2,100 feet away and is therefore not considered in the traffic noise analysis. The nearest airport, John Wayne Airport, is located approximately 3.9 miles away. Based upon the Airport

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		Environs Land Use Plan for John Wayne Airport (ALUC 2008), the Project site is located approximately 1.8 miles west of the airport's 60 dB CNEL noise contour. Thus, noise from the airport would have a negligible contribution to the on-site noise environment. A noise analysis of traffic noise from West 19th Street and Pomona Avenue carried out using HUD's DNL Calculator indicated that worst-case exterior building façade noise levels would exceed the "acceptable" HUD standard of 65 dBA DNL. The highest noise levels would occur at the exterior facades of the habitable rooms facing north, closest to West 19th Street, where noise levels are predicted to be 72 dBA DNL. Exterior noise levels at the building facades facing southwest/southeast (closest to Plumer Street) would be 63 dBA DNL and thus within HUD's exterior noise threshold. As described above, 24 CFR Part 51, Subpart B states that sites at which environmental or community noise exposure exceeds the DNL of 65 dBA are considered to be noise-impacted. Approvals in the "normally unacceptable" noise zone require a minimum of 5 dB of additional sound attenuation for buildings having noise-sensitive uses if the day-night average sound level is greater than 65 dBA but does not exceed 70 dBA, or a minimum of 10 dB of additional sound attenuation if the day-night average sound level is greater than 70 dBA but does not exceed 75 dBA. Typical new construction of multi-family homes with windows closed provides a minimum of 25 dB exterior-to-interior noise reduction. All residential units would be equipped with a forced-air heating ventilation air conditioning (HVAC) unit that allows for a "windows closed" condition (i.e., windows do not need to be left open for ventilation). To derive the anticipated noise reduction at each representative receiver, the composite transmission loss (TL) per sound transmission class (STC) window rating was calculated using provided residential unit and

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		window dimensions (feet), and assuming a standard, non-upgraded exterior wall STC rating of 35 and a standard, non-upgraded window STC rating of 25. Minimum interior noise reduction with typical new construction windows and doors closed was calculated for the project to be 33 dBA, resulting in interior noise levels ranging from 30 to 39 dBA, which are all below the HUD interior noise standard of 45 dBA. Therefore, the proposed project would be in compliance with 24 CFR Part 51, Subpart B (see **Attachment 14**; see **Noise Worksheet**).
Sole Source Aquifers Safe Drinking Water Act of 1974, as amended, particularly section 1424(e); 40 CFR Part 149	Yes ☐ No ☒	Aquifers and surface water are drinking water systems that may be impacted by development. The Safe Drinking Water Act of 1974 requires protection of drinking water systems that are the sole or principal drinking water source for an area and which, if contaminated, would create a significant hazard to public health. The project site is not located within an area designated by the EPA as being supported by a sole source aquifer. The project site is located approximately 95 miles to the northwest of the nearest sole source aquifer, which is the Campo/Cottonwood Creek Aquifer in San Diego County (EPA 2024b). As such, the project site is not located in a region that depends solely on an aquifer for access to water or located within a sole source aquifer recharge area. Thus, no impact on sole source aquifers would occur. Therefore, the project is in compliance with the Safe Drinking Water Act of 1974, as amended (see **Attachment 15**; see **Sole Source Aquifers Worksheet**).
Wetlands Protection Executive Order 11990, particularly sections 2 and 5	Yes ☐ No ☒	According to the EPA, wetlands are characterized by hydrology, soils, and vegetation. No wetlands are located on or near the project site. The nearest wetland feature is a freshwater forested/shrub wetland feature located approximately 0.67 miles northwest of the project site, in Canyon Park (USFWS 2025). No settling ponds, lagoons, surface impoundments, wetlands, or natural catch basins are located on site. As such, no impact to wetlands would occur. Therefore, the project

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		is in compliance with EO 11990 (see **Attachment 16**; see **Wetlands Worksheet**).
Wild and Scenic Rivers Wild and Scenic Rivers Act of 1968, particularly section 7(b) and (c)	Yes ☐ No ☒	The Wild and Scenic Rivers Act (16 USC 1271-1287) provides federal protection for certain free-flowing, wild, scenic, and recreational rivers designated as components or potential components of the National Wild and Scenic Rivers System (NWSRS). The NWSRS was created by Congress in 1968 to preserve certain rivers with outstanding natural, cultural, and recreational values in a free-flowing condition for the enjoyment of present and future generations. The project site is not located near any NWSRS river, including designated Wild and Scenic Rivers, study rivers, and Nationwide Rivers Inventory (NRI) river segments. The nearest designated Wild and Scenic River is the Bautista Creek Wild and Scenic River, approximately 62.5 miles to the east in the San Bernardino National Forest (EPA 2024b). As such, the project would not result in impacts on designated Wild and Scenic Rivers. Therefore, the project is in compliance with the Wild and Scenic Rivers Act of 1968 (see **Attachment 17**; see **Wild and Scenic Rivers Worksheet**).

Environmental Assessment Factors [24 CFR 58.40]

Recorded below is the qualitative and quantitative significance of the effects of the proposal on the character, features and resources of the project area. Each factor has been evaluated and documented as appropriate and in proportion to its relevance to the proposed action. Verifiable source documentation has been provided and described in support of each determination, as appropriate. Credible, traceable and supportive source documentation for each authority has been provided. Where applicable, the necessary reviews or consultations have been completed, and applicable permits of approvals have been obtained or noted. Citations, dates/names/titles of contacts, and page references are clear. Additional documentation is attached, as appropriate. **All conditions, attenuation or mitigation measures have been clearly identified.**

Impact Codes: Use an impact code from the following list to make the determination of impact for each factor.

(1) Minor beneficial impact
(2) No impact anticipated

(3) Minor Adverse Impact – May require mitigation
(4) Significant or potentially significant impact requiring avoidance or modification which may require an Environmental Impact Statement

Environmental Assessment Factor	Impact Code	Impact Evaluation
LAND DEVELOPMENT		
Conformance with Plans / Compatible Land Use and Zoning / Scale and Urban Design	2	The project would include development of a 68-unit senior affordable housing community on the site of the existing Costa Mesa Senior Center's parking lot. The project site has a General Plan land use designation of General Commercial and is currently zoned as C1 for Local Business District, which is designed to meet the local business needs of the community by providing a wide range of goods and services in a variety of locations throughout the city. However, Measure K allows housing development in commercial and industrial areas without requiring a zoning change. Since affordable housing projects that comply with state or federal mandates or city ordinances are exempt from certain Measure K provisions, the project qualifies under these conditions. The project site is on land included in the 19 West Urban Plan overlay zone (City of Costa Mesa 2016). The goal of the 19 West Urban Plan is to improve the City's Urban Plan area by providing visual enhancement and facilitating development of mixed-use urban villages along the specified areas of West 17th Street, West 19th Street, and Superior Avenue. The Westside Urban Plans allow for a maximum density of 20 dwelling units per acre (du/ac) (City of Costa Mesa 2025). However, the project is requesting a Density Bonus pursuant to California Government Code Sections 65915-65918, which allows 100% affordable housing projects to utilize the 80% Density Bonus increase and permits up to four concessions/incentives from the City's development standards. The Density Bonus allows the project to have a density of 46.6 du/ac. Pursuant to the State Density Bonus Law, the project also includes requested concessions from the City's front setback requirements, development lot minimum open space requirements, and parking stall width requirements. The project would be consistent with zoning regulations pursuant to provisions under the State Density Bonus Law, which allow for waivers and concessions to the City's zoning regulations, the approval of which would not render the project inconsistent with City zoning requirements. The court decision in *Wollmer v. City of Berkeley* expressly held that the waivers and concessions a city was required to grant for a density-bonus-eligible project did not result in planning and zoning inconsistencies, because the mandatory nature of the waivers meant that those standards were inapplicable to the project. Therefore, the project is consistent with the applicable

Environmental Assessment Factor	Impact Code	Impact Evaluation
		General Plan land use designation and all applicable General Plan policies as well as with the applicable zoning designation and regulations. The project would be consistent with local land use plans and regulations and no adverse impacts to existing and future land use would occur.
Soil Suitability/ Slope/ Erosion/ Drainage/ Storm Water Runoff	2	<u>Soil Suitability and Slope</u> As reported in the Phase I ESA prepared for the project, the soils on the project site consist of Myford sandy loam. The vertical soil profile is sandy loam from 0 to 11 inches, sandy clay from 11 to 18 inches, sandy clay loam from 18 to 70 inches and sandy loam from 70 to 79 inches. These soils are in the Class D Hydrologic Group with very slow infiltration rates. These soils are described as clayey, have a high-water table, or are shallow to impervious layer. These soils are moderately well drained. Depth to water table is 0 inches. As required by local and state regulations and policies, a geotechnical report would be prepared for the project prior to issuance of a building permit to determine soil suitability and provide recommendations for the project, including recommendations for site grading, foundation construction, and other geotechnical considerations, which the project would be required to adhere to. Therefore, no impacts related to soil suitability or slope are anticipated. <u>Erosion, Drainage, and Stormwater Runoff</u> The U.S. Geological Survey 7.5-minute series topographic map for Newport Beach, California was used to determine the slope of the project site. According to the contour lines on the topographic map, the project site is located at approximately 96 feet above mean sea level and slopes gently towards the east. Erosion due to stormwater runoff at the project site would be minimized by the lack of exposed soils. According to the Phase I ESA, stormwater is removed from the project site primarily through sheet flow action across the paved surface parking lot towards storm drains located onsite and in the public right of way. Stormwater from roofs, landscaped areas, and paved areas is directed to the public right of way, and to onsite storm strains. The project site is connected to a municipal owned and maintained sewer system. Project construction would include ground disturbance, which could result in increased potential for erosion. The State Water Resources Control Board (SWRCB) has implemented a National Pollutant Discharge Elimination System (NPDES) Construction General Permit for the State of California for projects disturbing 1 or more of acres of soil, requiring dischargers to obtain coverage under the General Permit, file a Notice of Intent (NOI), and prepare a stormwater pollution prevention plan (SWPPP) prior to

Environmental Assessment Factor	Impact Code	Impact Evaluation
		commencement of construction. Because the project footprint is greater than 1 acre, it would be subject to the NPDES permit requirements for construction site stormwater discharges and would comply with those requirements. A SWPPP is required to be prepared and implemented under these requirements, which includes appropriate erosion-control and water-quality-control best management practices (BMPs) during site preparation, grading, construction, and post-construction. Implementation of the SWPPP for the project would minimize short-term impacts related to erosion and stormwater runoff. Therefore, the project would not have adverse impacts related to erosion and stormwater runoff.
Hazards and Nuisances including Site Safety and Noise	2	<u>Hazards and Site Safety</u> Hazards related to contamination and toxic substances and explosives or flammable hazardous materials are discussed above. As previously discussed, the Phase I ESA conducted by Barr & Clark in July 2023 did not identify any RECs, CRECs, HRECs, asbestos, or LBP on the project site, and the project would not expose occupants to risks from nearby facilities storing hazardous materials in ASTs. Also, as indicated above, the project site is not within a flood zone and is not subject to flood hazards. The city, including the project site, is located within a seismically active margin between the North American and Pacific tectonic plates. The project site is not located within an Alquist-Priolo Earthquake Fault Zone, Liquefaction Zone, or Landslide Zone (CGS 2024) (see **Attachment 18**). The nearest earthquake fault to the project site is the Whittier Fault, located approximately 3.08 miles to the northwest. As a result, the project site could experience strong seismic ground shaking during an earthquake. Seismic hazards would be addressed through compliance with California building codes which are focused on prioritizing protection of life and property from seismic-related impacts and require adherence to recommendations of a project geotechnical report, including factors for seismic design. Due to its location in an urbanized area, the project site is not subject to wildfire hazards (CAL FIRE 2024) (see **Attachment 19**). The project site is not within the State Responsibility Area. <u>Nuisances</u> The project would not be affected by nuisances atypical of an urban environment. There are no industrial uses nearby that would generate substantial odors, fumes, smoke, or other nuisances affecting the project site. It is possible that during construction of the project, construction traffic, noise, dust, and vapor encroachment could be considered a nuisance to the construction crew or immediate neighbors; however, any such nuisances would be temporary. As discussed in the Air Quality section, the project

Environmental Assessment Factor	Impact Code	Impact Evaluation
		would be required to comply with SCAQMD regulations for controlling fugitive dust pursuant to SCAQMD Rule 403, which requires the implementation of best available dust control measures during active operations capable of generating fugitive dust, to control fugitive dust emissions from project construction. <u>Noise</u> Construction of the project would generate noise associated with the operation of heavy construction equipment and construction-related activities in the vicinity of the project site. This would result in temporary, intermittent increases in ambient noise levels which would fluctuate depending on the particular construction phase. Pursuant to Chapter 8, Noise Control, of the City's Code of Ordinances, noise associated with construction is exempt from the provisions of the noise ordinance, provided that activities take place between the hours of 7:00 a.m. and 7:00 p.m. on Mondays through Fridays and between 9:00 a.m. and 6:00 p.m. on Saturdays. Construction activities would be prohibited on Sundays and specified federal holidays. The project would not require nighttime construction or construction on weekends or holidays, and therefore construction noise would not be subject to the City's noise standards identified in §13-279 Exceptions for Construction (City of Costa Mesa 2024b).

Environmental Assessment Factor	Impact Code	Impact Evaluation
SOCIOECONOMIC		
Employment and Income Patterns	1	Project construction would generate a limited number of temporary construction jobs, and operation would generate a nominal number of permanent jobs (e.g., management, clerical, and janitorial jobs), which could result in a minor increase in per-capita income. Construction activities could result in direct economic effects related to increased spending on construction materials, equipment, and services. The magnitude of the economic benefits of construction spending to the City's economy would depend on the proportion of employment, goods, and services procured from local residents and businesses, and would likely have a relatively minor benefit on the City's economy.
Demographic Character Changes, Displacement	2	The project would not have an adverse impact on demographic character or result in the displacement of existing businesses or individuals. The project would occur on land that has been utilized as a parking lot since 1995; therefore, no existing residents or businesses would be displaced. Since the immediate neighborhood bordering the site is a mixture of residential uses including single-family residential, multi-family residential, and commercial uses,

Environmental Assessment Factor	Impact Code	Impact Evaluation
		the proposed development would maintain existing demographic character.

Environmental Assessment Factor	Impact Code	Impact Evaluation
COMMUNITY FACILITIES AND SERVICES		
Educational and Cultural Facilities	2	Given the availability of educational institutions in the area, as well as the project's target population of only seniors (aged 62+), adverse impacts to schools near the proposed project are not anticipated because the project is specifically for senior citizens. The project is near multiple educational facilities, as follows: • Wilson Elementary School, located approximately 1.2 miles north of the project site • Estancia High School, located approximately 1.3 miles north of the project site • Page Academy, located approximately 0.8 miles north of the project site • Estancia High School Pacifica Christian High School, located approximately 1.5 miles southwest of the project site • Victoria Elementary School, located approximately 1.5 miles northwest of the project site Cultural facilities include publicly accessible buildings, structures, and establishments that are used primarily for the performance, exhibition, or benefit of arts and heritage activities, including, but not limited to, performing arts, visual arts, heritage and cultural endeavors. Numerous cultural facilities would be accessible to project occupants in the immediate project area and beyond within the City of Costa Mesa, including cinemas, galleries, libraries, museums, theaters, and stadiums. Cultural facilities near the project site include the Costa Mesa Playhouse approximately 0.8 miles to the north and the Costa Mesa Historical Society approximately 0.3 miles to the west, adjacent to the Norma Hertzog Community Center and Downtown Recreation Area. The Segerstrom Center of the Arts located at 600 Town Center Drive is about 5.4 miles northeast of the project site. The project would result in an incremental increase in demand for cultural facilities. However, as an affordable housing project, the project would be expected to serve existing area residents by addressing existing unmet needs for rental assistance in the project area, rather than result in an influx of new residents. Furthermore, due to the relatively small project size, any incremental increase in

Environmental Assessment Factor	Impact Code	Impact Evaluation
		demand would not exceed the capacity of existing facilities. There are adequate cultural facilities in the city and surrounding areas of the County to accommodate any potential increased usage generated by the project. Impacts to educational and cultural facilities would be less than significant.
Commercial Facilities	2	No adverse impacts to adjacent commercial facilities are anticipated. The project is primarily bordered by a mix of residential and commercial land uses. According to the Phase I ESA, the project site is bordered by a commercial land use to the east (Mouse Graphics and Costa Mesa Blueprint) and west (Costa Mesa Senior Center and Smart & Final Grocery Store). Construction of affordable housing could result in an incremental beneficial impact to local businesses since placing residents in more affordable housing provides more disposable income for spending on non-housing related goods and services.
Health Care and Social Services	2	The project would result in an incremental increase in demand for health care and social services. Adverse impacts to healthcare and social services are not anticipated due to the availability of service providers near the project site. The project is near numerous healthcare facilities, including the following: • Costa Mesa Medical Clinic Inc., approximately 0.3 miles east of the project site at 745 W 19th St F, Costa Mesa, CA 92627 • Express Urgent Care, about 1 mile southeast of the project site at 131 E 17th St, Costa Mesa, CA 92627 • Victoria Healthcare and Rehabilitation, approximately 1.4 miles northeast of the project site at 340 Victoria St, Costa Mesa, CA 92627 • UCI Health Pacific Medical Plaza, about 1.1 miles southeast of the project site at 1640 Newport Blvd, Costa Mesa, CA 92627 • Exer Urgent Care- Costa Mesa, approximately 1.2 miles southeast of the project site at 235 E 17th St, Costa Mesa, CA 92627
Solid Waste Disposal / Recycling	2	The City's Public Works Department oversees all commercial waste collection and recycling services while residential waste collection services are administered by the Costa Mesa Sanitary District (CMSD). The City uses a non-exclusive franchise system to manage trash and recycling service to multi-family (5 or more units) and business properties, as well as any for-hire hauling of temporary waste collection containers from construction and demolition projects (City of Costa Mesa 2024c).

Environmental Assessment Factor	Impact Code	Impact Evaluation
		All waste generated during the construction and operational phases of the project would be properly disposed of and recycled where possible. In compliance with California Green Building Standards Code, 2016 Editions, California Code of Regulations, Title 24, Part 11, permitted building projects relating to construction and demolition- newly constructed buildings, additions, alterations, interior and exterior demolitions, etc.- are required to divert a minimum of 65% of nonhazardous construction and demolition waste from the landfill by recycling, reuse, or salvage. Generally, these materials include brick, drywall, other masonry, cardboard, green waste, paper, carpet, lumber, plastic, concrete and/or metals. Asphalt, concrete, excavated soil and and-clearing debris should be 100% diverted from disposal (Costa Mesa, 2024d). The amount of solid waste generated by the proposed project during the construction and operational phases would be a fraction of the throughput taken in by CMSD daily. Adverse impacts from solid waste disposal associated with the proposed project are not anticipated.
Waste Water / Sanitary Sewers	2	The CMSD supplies wastewater and sewage disposal/treatment services to the proposed project site. The CMSD maintains a 224-mile gravity sewer wastewater collection system that collects and transmits wastewater to Orange County Sanitation District facilities for treatment and disposal. Sewage is treated by the Orange County Sanitation District, a public agency that provides wastewater collection, treatment, and disposal services for approximately 2.6 million people in central and northwest Orange County (OCSD 2025). There are approximately 5,650 sewer manholes within the system, which are used as access points for cleaning and inspection purposes. As of 2019, CMSD's wastewater system contains a total of 47,471 connections to single family residences, commercial properties, and industrial properties. The system also includes 20 pump stations that convey wastewater flow from low lying areas to higher elevations where it can continue its gravity flow (CMSD 2024). No wastewater treatment facilities or septic systems were observed or reported on site during the Phase I ESA site visit. The project would connect to existing wastewater and sanitary sewer facilities. The proposed project would not require construction of additional sewage infrastructure. Adverse impacts to wastewater systems and sanitary sewers servicing the project site are not anticipated.
Water Supply	2	Mesa Water District supplies potable water to the City of Costa Mesa, parts of Newport Beach, and some unincorporated areas of Orange County, including John Wayne Airport. Mesa Water is an AAA-rated independent special district that provides water service to 110,000 residents in an 18-square-mile area. Mesa Water's primary source of water is groundwater, pumped from Orange

Environmental Assessment Factor	Impact Code	Impact Evaluation
		County's natural groundwater basin via seven wells. Backup for Mesa Water's well water is imported water, which comes from Northern California and the Colorado River. Water flows through aqueducts to Metropolitan's Robert B. Diemer Filtration Plant in Yorba Linda (Mesa Water District, 2025). The project would connect to existing water infrastructure and would result in an incremental demand for water. Adverse impacts to the City's water supply are not anticipated.
Public Safety - Police, Fire and Emergency Medical	2	The Costa Mesa Police Department provides law enforcement services to the City of Costa Mesa. The City's Police Department's offices are located at 99 Fair Drive, Costa Mesa CA, 92626, approximately 2.8 miles northeast of the project site. The project site is located near two fire stations in the City of Costa Mesa. Costa Mesa Fire Station Department #3 is the closest fire station to the project site and is at 1865 Park Avenue, Costa Mesa, CA 92627, approximately 0.4 miles east of the project site. Civic Center Fire Station #5, approximately 2.7 miles northeast of the project site at 2450 Fair Dr, Costa Mesa, CA 92626, could also administer emergency services. The project would not create a noticeable increase in demand for police, fire, and emergency medical services from nearby areas since the proposed project would attract residents from the surrounding community. Additionally, the proposed project would be required to comply with all applicable codes for fire safety and emergency access. Therefore, the project would not have adverse impacts on public safety.
Parks, Open Space and Recreation	2	Public recreational spaces in proximity to the project site include the following: • Lions Park, about 0.5 miles southeast of the project site at 570 W 18th St, Costa Mesa, CA 92627 • Heller Park, approximately 1.1 miles southeast of the project site at 257 E 16th St, Costa Mesa, CA 92627 • Mariners Park & VJ Community Center, about 2 miles southeast of the project site at 1300 Irvine Ave, Newport Beach, CA 92660 • Canyon Park, approximately 1.1 miles west of the project site at 970 Arbor St, Costa Mesa, CA 92627 • Talbert Regional Park, about 1.2 miles west of the project site at 1298 Victoria St, Costa Mesa, CA 92627 The project would result in an incremental increase in demand for public parks that could be absorbed by existing open spaces near the project site. Site plans for the proposed project include three outdoor

Environmental Assessment Factor	Impact Code	Impact Evaluation
		courtyards with picnic tables, planter boxes, and barbeque areas where residents can enjoy the outdoors without visiting surrounding parks. Therefore, the project would not have adverse impacts on parks, open space, and recreation.
Transportation and Accessibility	2	Pre-existing urban development and readily available public transit near the project site would further minimize transportation and accessibility issues associated with the project, such as traffic. The nearest bus stop to the project site is located at the intersection of Pomona Avenue and West 19th Street, at the northwest corner of the project site. The proposed project site is located near markets, restaurants, healthcare, retail, and other services along West 19th Street to the North and Anaheim Avenue to the East. The proposed project would be accessed via a single driveway located along West 19th Street.

Environmental Assessment Factor	Impact Code	Impact Evaluation
NATURAL FEATURES		
Unique Natural Features, Water Resources	2	The project site, which is located within a developed area and currently occupied by the former campus of the Rehabilitation Institute of Southern California and associated parking and landscaped areas, does not encompass any unique natural features. Federally protected natural resources, such as rivers, wetlands, coastal zones, and endangered species, are not present on the project site or adjacent properties. Therefore, the proposed project would not result in the alteration of any waterways, unique features, or critical habitat, nor would it result in the loss of any federally listed species.
Vegetation, Wildlife	3	The project site is developed with an existing asphalt parking lot and does not contain native vegetation or wildlife habitat. Although the proposed project is within the ranges of 14 endangered or threatened species, none are likely to occur on site due to a lack of suitable habitat (USFWS 2024b) (see **Attachments 7** and **8**). The IPaC report found that several species of migratory birds and eagles, which are protected under the Bald and Golden Eagle Protection Act (BGEPA) and/or the Migratory Bird Treaty Act (MBTA), have the potential to occur in the project area. Trees on the project site provide potential nesting habitat for protected avian species. Implementation of **MM-BIO-1** would ensure that pre-construction surveys are conducted for nesting birds prior to site disturbance if vegetation clearing would be conducted during the nesting season. If nesting birds are present, mitigation requires avoidance of active nests. With implementation of the required

Environmental Assessment Factor	Impact Code	Impact Evaluation
		mitigation, adverse impacts to protected avian species would be avoided. Therefore, the project would not have a significant impact on vegetation or wildlife.
Other Factors		None.

Environmental Assessment Factor	Impact Code	Impact Evaluation
ENERGY		
Energy Efficiency	2	The project would be required to comply with applicable building energy efficiency standards pursuant to Title 24, Part 6 of the California Code of Regulations. At the building permit stage, the project would comply with the CALGreen Code that establishes mandatory green building standards for all buildings in California. The project would be 100% electric and would not use natural gas. The proposed project would include EV charging stations. The project site is also located in close proximity to public transportation, with bus stops adjacent to the project site. Therefore, the project would not have an adverse effect related to energy efficiency.

Additional Studies Performed:

- *Phase I Environmental Site Assessment Report*, prepared by Barr & Clark Inc., July 2023
- *Noise Technical Memorandum,* prepared by Dudek, February 2025
- *Cultural Resources Constraints Analysis for the Costa Mesa Senior Apartments Project, City of Costa Mesa, Orange County, California*, prepared by Dudek, January 2025

Field Inspection (Date and completed by)**:**

Public Outreach [24 CFR 50.23 & 58.43]**:**
The Draft Environmental Assessment will be made available for public review and comment beginning on September 4, 2025, and concluding on September 19, 2025. The combined Notice of Finding of No Significant Impact (FONSI)/Notice of Intent to Request Release of Funds (NOI-RROF) will be published in the newspaper and will contain information about where the public may find the Environmental Review Record pertinent to the project.

Cumulative Impact Analysis [24 CFR 58.32]**:**
The proposed project would not contribute to a significant cumulative impact because it would consist of an urban infill development project consistent with the site's General Plan land use and zoning designations and would be near existing transit services and commercial amenities. State and local planning guidelines encourage the development of urban multifamily housing in areas served by transit and near commercial amenities because this type of development contributes less to cumulative effects on the environment in comparison to development of previously undisturbed sites in more remote locations with fewer transit connections, many of which may contain native vegetation and wildlife species.

Alternatives [24 CFR 58.40(e)]**:**
Site identification has proven to be a major obstacle in providing affordable housing units. Residential sites available at reasonable cost are extremely limited, and sites that do not meet cost and land use criteria are generally eliminated as alternatives. The developer identifies potential properties for affordable housing based on feasibility, location, affordability, and ownership/site control of a potential project site. In addition to the developer's site selection criteria, physical and social constraints are also considered in identifying and rejecting alternatives. Based on the developer's site selection criteria and constraints that limit identification of alternative affordable housing project sites, and well as the State Density Bonus Law, no other build alternatives are analyzed or included in this environmental document.

No Action Alternative [24 CFR 58.40(e)]**:**
Under the No Action Alternative, the proposed project would not proceed, and the project site would remain as is for the foreseeable future. The beneficial impacts identified in this EA would not occur related to providing much-needed affordable housing and associated amenities to the community. The project site may remain as a parking lot for the Costa Mesa Senior Center or potentially sold for other development purposes. It is unknown at this time if or when another proposed development would be forthcoming, and the project site may remain in its existing use as a surface parking lot. As previously stated, the project site is zoned as C1 for Local Business District, which is designed to meet the local business needs of the community by providing a wide range of goods and services in a variety of locations throughout the city. The permitted and conditional uses, as well as the development standards, are aimed towards reducing impacts on surrounding properties, especially in areas where residential uses are in the vicinity (City of Costa Mesa 2024a). Thus, it is reasonable to assume that any forthcoming proposed projects could involve such uses. Physical impacts to the environment would occur if and when the project site was developed with another use, whether subsidized with federal funds or built at market rates.

Summary of Findings and Conclusions:
The project involves the construction of a 70-unit affordable housing development, including one manager's unit, on a 695 West 19th Street in the City of Costa Mesa, CA. The project would benefit the City of Costa Mesa and low- and very-low-income seniors needing affordable housing by providing high-quality affordable housing in a desirable area with access to transit services, commercial amenities, employment opportunities, and all standard community services. Residents of the affordable housing project would benefit from being in proximity to transportation corridors and activity centers which would provide opportunity for employment, social engagement, and commerce. The proximity of existing transit options to the project site would reduce long-term air pollutant emissions and energy use associated with motor vehicle travel.

Because the project is within a developed urban area, the project would be adequately served by utilities and public services. The project would conform to all applicable federal, state, and local regulations associated with land use compatibility, air pollutant emissions, water quality, geologic hazards, and related environmental resources addressed herein. Based on the analyses of environmental issues contained in this document, the project is not expected to have significant environmental impacts.

Mitigation Measures and Conditions

Summarize below all mitigation measures adopted by the Responsible Entity to reduce, avoid, or eliminate adverse environmental impacts and to avoid non-compliance or non-conformance with the above-listed authorities and factors. These measures/conditions must be incorporated into project contracts, development agreements, and other relevant documents. The staff responsible for implementing and monitoring mitigation measures should be clearly identified in the mitigation plan.

Law, Authority, or Factor	Mitigation Measure
Contamination and Toxic Substances	**MM-TOX-1: Post-Construction Radon Evaluation.** In accordance with Section 9.6.3.2 of HUD's Multifamily Accelerated Processing (MAP) Guide (revised March 19, 2021), after completion of construction and issuance of the occupancy certificate for the project and before residents move in, indoor radon testing shall be conducted for 100% of ground-contact units and 10% of units on each floor above ground level in all buildings included in the project. Testing shall be performed by, or under the direct supervision of, a licensed Radon Professional certified by the American Association of Radon Scientists and Technologists (AARST), National Radon Proficiency Program (NRPP) or the National Radon Safety Board (NRSB). Radon testing shall follow the AARST Protocol for Conducting Radon and Radon Decay Product Measurements in Multifamily Buildings (ANSI-AARST MAMF-2017). If testing determines that indoor radon levels are or may be above the U.S. EPA's threshold for unacceptability of 4.0 pCi/L, then the project applicant must implement a radon mitigation plan. The mitigation plan must identify the radon level on site, describe the radon reduction system that will be installed, establish an ongoing maintenance plan, establish a reasonable timeframe for system implementation, and require post-installation testing by a licensed radon professional. A radon report shall be prepared and submitted at final completion inspection, and shall document the results of testing performed, the sampling strategy, the details of any mitigation deemed necessary, and the timing of any such mitigation. Indoor radon levels must be demonstrated to be below the EPA action level of 4.0 pCi/L prior to project occupancy. Incoming project occupants shall be informed of radon mitigation activities.
Historic Preservation	**MM-CUL-1: Unanticipated Discovery of Archaeological Resources.** In the event that archaeological resources (sites, features, and artifacts) are exposed during construction activities involving ground disturbance for the proposed Project, all construction work occurring within 50 feet of the

Law, Authority, or Factor	Mitigation Measure
	find shall immediately stop until a qualified specialist, meeting the Secretary of the Interior's Professional Qualification Standards, can evaluate the significance of the find and determine whether additional study is warranted. This avoidance buffer may be adjusted following inspection of this area by that qualified specialist. Prehistoric archaeological deposits may be indicated by the presence of discolored or dark soil, fire-affected material, concentrations of fragmented or whole shell, burned or complete bone, non-local lithic materials, or characteristics observed to be atypical of the surrounding area. Common prehistoric artifacts may include modified or battered lithic materials; lithic or bone tools that appeared to have been used for chopping, drilling, or grinding; projectile points; fired clay ceramics or non-functional items; and other items. Historic-age deposits are often indicated by the presence of glass bottles and shards, ceramic material, building or domestic refuse, ferrous metal, or old features such as concrete foundations or privies. Depending upon the significance of the find under the NHPA, the archaeologist may simply record the find and allow work to continue. Feasible options for avoidance must also be considered. If the discovery proves significant under the NHPA, additional work, such as preparation of an archaeological treatment plan, testing, or data recovery may be warranted. **MM-CUL-2: Unanticipated Discovery of Human Remains.** In accordance with Section 7050.5 of the California Health and Safety Code, if human remains are found, the Orange County Coroner shall be immediately notified of the discovery. No further excavation or disturbance of the site or any nearby area reasonably suspected to overlie adjacent remains shall occur until the Orange County Coroner has determined, within 2 working days of notification of the discovery, the appropriate treatment and disposition of the human remains. If the Orange County Coroner determines that the remains are, or are believed to be, Native American, the coroner shall notify the NAHC in Sacramento within 24 hours. In accordance with California Public Resources Code Section 5097.98, the NAHC must immediately notify those persons it believes to be the MLD from the deceased Native American. The MLD shall complete inspection within 48 hours of being granted access to the site. The designated Native American representative would then determine, in consultation with the property owner, the disposition of the human remains and associated grave goods.

	MM-TCR-1: Retain a Native American Monitor Prior to Commencement of Ground-Disturbing Activities. a) The project applicant shall retain a Native American Monitor from or approved by the Consulting Tribes. The monitor shall be retained prior to the commencement of any ground-disturbing activity for the subject project at all project locations (i.e., both on-site and any off-site locations that are included in the project description/definition and/or required in connection with the project, such as public improvement work). "Ground-disturbing activity" shall include, but is not limited to, demolition, pavement removal, potholing, auguring, grubbing, tree removal, boring, grading, excavation, drilling, and trenching. b) A copy of the executed monitoring agreement shall be submitted to the County prior to the commencement of any ground-disturbing activity, or the issuance of any permit necessary to commence a ground-disturbing activity. c) The monitor will complete daily monitoring logs that will provide descriptions of the relevant ground-disturbing activities, the type of construction activities performed, locations of ground-disturbing activities, soil types, cultural-related materials, and any other facts, conditions, materials, or discoveries of significance to the Consulting Tribes. Monitor logs will identify and describe any discovered tribal cultural resources(TCRs), including but not limited to, Native American cultural and historical artifacts, remains, places of significance, etc., as well as any discovered Native American (ancestral) human remains and burial goods. Copies of monitor logs will be provided to the project applicant/County upon written request to the Consulting Tribes. d) On-site tribal monitoring shall conclude upon the latter of the following: (1) written confirmation to the Consulting Tribes from a designated point of contact for the project applicant that all ground-disturbing activities and phases that may involve ground-disturbing activities on the project site or in connection with the project are complete; or (2) a determination and written notification by the Consulting Tribes to the project applicant that no future, planned construction activity and/or

Law, Authority, or Factor	Mitigation Measure
	development/construction phase at the project site possesses the potential to impact TCRs. **MM-TCR-2:_Unanticipated Discovery of Tribal Cultural Resource Objects (Non-Funerary/Non-Ceremonial).** Upon discovery of any tribal cultural resources (TCRs), all construction activities in the immediate vicinity of the discovery shall cease (i.e., not less than the surrounding 50 feet) and shall not resume until the discovered TCR has been fully assessed by the Native American Monitor. The Consulting Tribes will recover and retain all discovered TCRs in the form and/or manner the Consulting Tribes deem appropriate and for any purpose the Consulting Tribes deem appropriate, including for educational, cultural and/or historic purposes. **MM-TCR-3: Unanticipated Discovery of Human Remains and Associated Funerary or Ceremonial Objects.** a) Native American human remains are defined in Public Resources Code Section 5097.98 (d)(1) as an inhumation or cremation, and in any state of decomposition or skeletal completeness. Funerary objects, called associated grave goods in Public Resources Code Section 5097.98, are also to be treated according to this statute. b) If Native American human remains and/or grave goods are discovered or recognized on the project site, then Public Resource Code 5097.9 as well as Health and Safety Code Section 7050.5 shall be followed. c) Human remains and grave/burial goods shall be treated alike per California Public Resources Code Section 5097.98(d)(1) and (2). d) Preservation in place (i.e., avoidance) is the preferred manner of treatment for discovered human remains and/or burial goods. e) Any discovery of human remains/burial goods shall be kept confidential to prevent further disturbance.
Vegetation, Wildlife	**MM-BIO-1: Pre-Construction Nesting Bird Survey.** Vegetation clearing should be conducted outside of the nesting season (January 1 through October 31). If avoidance of the nesting season is not feasible, then a qualified biologist shall conduct a pre-construction nesting bird survey within three days prior to any disturbance to the project site. Site

Docusign Envelope ID: D3A5648A-5F89-4ABB-A265-AA748DC8574E

Law, Authority, or Factor	Mitigation Measure
	disturbance includes disking, demolition activities, vegetation removal and grading. If active nests are identified, the biologist shall establish appropriate avoidance buffers around the nest (based on the species detected), and the buffer areas shall be avoided until the nests are no longer occupied (through routine nest monitoring by the qualified biologist) and the juvenile birds can survive independently from their nest(s). In addition, if portions of the project site have not been disturbed within three days after the initial nesting bird survey, additional nesting bird surveys will be conducted (within the nesting bird season, January 1 to October 31) until all portions of the project site have been disturbed appropriately (as determined by a qualified biologist) as to not provide potential nesting habitat.

Determination:

☒ **Finding of No Significant Impact** [24 CFR 58.40(g)(1)]
The project will not result in a significant impact on the quality of the human environment.

☐ **Finding of Significant Impact** [24 CFR 58.40(g)(2)]
The project may significantly affect the quality of the human environment.

California Emissions Estimator Model

Detailed Report

Costa Mesa SC Housing Project Detailed Report

Table of Contents

1. Basic Project Information

1.1. Basic Project Information

1.2. Land Use Types

1.3. User-Selected Emission Reduction Measures by Emissions Sector

2. Emissions Summary

2.1. Construction Emissions Compared Against Thresholds

2.2. Construction Emissions by Year, Unmitigated

2.4. Operations Emissions Compared Against Thresholds

2.5. Operations Emissions by Sector, Unmitigated

3. Construction Emissions Details

3.1. Demolition (2025) - Unmitigated

3.3. Site Preparation (2025) - Unmitigated

3.5. Grading (2025) - Unmitigated

3.7. Building Construction (2025) - Unmitigated

3.9. Building Construction (2026) - Unmitigated

3.11. Paving (2026) - Unmitigated

3.13. Architectural Coating (2026) - Unmitigated

4. Operations Emissions Details

4.1. Mobile Emissions by Land Use

4.1.1. Unmitigated

4.2. Energy

4.2.1. Electricity Emissions By Land Use - Unmitigated

4.2.3. Natural Gas Emissions By Land Use - Unmitigated

4.3. Area Emissions by Source

4.3.1. Unmitigated

4.4. Water Emissions by Land Use

4.4.1. Unmitigated

4.5. Waste Emissions by Land Use

4.5.1. Unmitigated

4.6. Refrigerant Emissions by Land Use

4.6.1. Unmitigated

4.7. Offroad Emissions By Equipment Type

4.7.1. Unmitigated

4.8. Stationary Emissions By Equipment Type

4.8.1. Unmitigated

4.9. User Defined Emissions By Equipment Type

4.9.1. Unmitigated

4.10. Soil Carbon Accumulation By Vegetation Type

4.10.1. Soil Carbon Accumulation By Vegetation Type - Unmitigated

4.10.2. Above and Belowground Carbon Accumulation by Land Use Type - Unmitigated

4.10.3. Avoided and Sequestered Emissions by Species - Unmitigated

5. Activity Data

5.1. Construction Schedule

5.2. Off-Road Equipment

5.2.1. Unmitigated

5.3. Construction Vehicles

5.3.1. Unmitigated

5.4. Vehicles

5.4.1. Construction Vehicle Control Strategies

5.5. Architectural Coatings

5.6. Dust Mitigation

5.6.1. Construction Earthmoving Activities

5.6.2. Construction Earthmoving Control Strategies

5.7. Construction Paving

5.8. Construction Electricity Consumption and Emissions Factors

5.9. Operational Mobile Sources

5.9.1. Unmitigated

5.10. Operational Area Sources

5.10.1. Hearths

5.10.1.1. Unmitigated

5.10.2. Architectural Coatings

5.10.3. Landscape Equipment

5.11. Operational Energy Consumption

5.11.1. Unmitigated

5.12. Operational Water and Wastewater Consumption

5.12.1. Unmitigated

5.13. Operational Waste Generation

5.13.1. Unmitigated

5.14. Operational Refrigeration and Air Conditioning Equipment

5.14.1. Unmitigated

5.15. Operational Off-Road Equipment

5.15.1. Unmitigated

5.16. Stationary Sources

5.16.1. Emergency Generators and Fire Pumps

5.16.2. Process Boilers

5.17. User Defined

5.18. Vegetation

5.18.1. Land Use Change

5.18.1.1. Unmitigated

5.18.1. Biomass Cover Type

5.18.1.1. Unmitigated

5.18.2. Sequestration

5.18.2.1. Unmitigated

6. Climate Risk Detailed Report

6.1. Climate Risk Summary

6.2. Initial Climate Risk Scores

6.3. Adjusted Climate Risk Scores

6.4. Climate Risk Reduction Measures

7. Health and Equity Details

7.1. CalEnviroScreen 4.0 Scores

7.2. Healthy Places Index Scores

7.3. Overall Health & Equity Scores

7.4. Health & Equity Measures

7.5. Evaluation Scorecard

7.6. Health & Equity Custom Measures

8. User Changes to Default Data

1. Basic Project Information

1.1. Basic Project Information

Data Field	Value
Project Name	Costa Mesa SC Housing Project
Construction Start Date	6/1/2025
Operational Year	2026
Lead Agency	—
Land Use Scale	Project/site
Analysis Level for Defaults	County
Windspeed (m/s)	2.50
Precipitation (days)	16.2
Location	695 W 19th St, Costa Mesa, CA 92627, USA
County	Orange
City	Costa Mesa
Air District	South Coast AQMD
Air Basin	South Coast
TAZ	5913
EDFZ	7
Electric Utility	Southern California Edison
Gas Utility	Southern California Gas
App Version	2022.1.1.29

1.2. Land Use Types

Land Use Subtype	Size	Unit	Lot Acreage	Building Area (sq ft)	Landscape Area (sq ft)	Special Landscape Area (sq ft)	Population	Description
Retirement Community	70.0	Dwelling Unit	0.71	46,559	3,297	—	209	—

General Office Building	47.3	1000sqft	0.00	47,284	0.00	—	—	—
Parking Lot	133	Space	0.79	0.00	0.00	—	—	—

1.3. User-Selected Emission Reduction Measures by Emissions Sector

No measures selected

2. Emissions Summary

2.1. Construction Emissions Compared Against Thresholds

Criteria Pollutants (lb/day for daily, ton/yr for annual) and GHGs (lb/day for daily, MT/yr for annual)

Un/Mit.	TOG	ROG	NOx	CO	SO2	PM10E	PM10D	PM10T	PM2.5E	PM2.5D	PM2.5T	BCO2	NBCO2	CO2T	CH4	N2O	R	CO2e
Daily, Summer (Max)	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Unmit.	74.1	74.1	15.2	16.4	0.03	0.64	2.91	3.55	0.59	1.37	1.96	—	3,656	3,656	0.18	0.18	4.71	3,718

Tree Type	Number	Electricity Saved (kWh/year)	Natural Gas Saved (btu/year)

6. Climate Risk Detailed Report

6.1. Climate Risk Summary

Cal-Adapt midcentury 2040–2059 average projections for four hazards are reported below for your project location. These are under Representation Concentration Pathway (RCP) 8.5 which assumes GHG emissions will continue to rise strongly through 2050 and then plateau around 2100.

Climate Hazard	Result for Project Location	Unit
Temperature and Extreme Heat	9.33	annual days of extreme heat
Extreme Precipitation	3.30	annual days with precipitation above 20 mm

Sea Level Rise	—	meters of inundation depth
Wildfire	0.00	annual hectares burned

Temperature and Extreme Heat data are for grid cell in which your project are located. The projection is based on the 98th historical percentile of daily maximum/minimum temperatures from observed historical data (32 climate model ensemble from Cal-Adapt, 2040–2059 average under RCP 8.5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Extreme Precipitation data are for the grid cell in which your project are located. The threshold of 20 mm is equivalent to about ¾ an inch of rain, which would be light to moderate rainfall if received over a full day or heavy rain if received over a period of 2 to 4 hours. Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Sea Level Rise data are for the grid cell in which your project are located. The projections are from Radke et al. (2017), as reported in Cal-Adapt (Radke et al., 2017, CEC-500-2017-008), and consider inundation location and depth for the San Francisco Bay, the Sacramento-San Joaquin River Delta and California coast resulting different increments of sea level rise coupled with extreme storm events. Users may select from four scenarios to view the range in potential inundation depth for the grid cell. The four scenarios are: No rise, 0.5 meter, 1.0 meter, 1.41 meters
Wildfire data are for the grid cell in which your project are located. The projections are from UC Davis, as reported in Cal-Adapt (2040–2059 average under RCP 8.5), and consider historical data of climate, vegetation, population density, and large (> 400 ha) fire history. Users may select from four model simulations to view the range in potential wildfire probabilities for the grid cell. The four simulations make different assumptions about expected rainfall and temperature are: Warmer/drier (HadGEM2-ES), Cooler/wetter (CNRM-CM5), Average conditions (CanESM2), Range of different rainfall and temperature possibilities (MIROC5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

6.2. Initial Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	1	0	0	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	0	0	N/A
Wildfire	1	0	0	N/A
Flooding	N/A	N/A	N/A	N/A
Drought	N/A	N/A	N/A	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	0	0	0	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.
The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores do not include implementation of climate risk reduction measures.

6.3. Adjusted Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	1	1	1	2

Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	1	1	2
Wildfire	1	1	1	2
Flooding	N/A	N/A	N/A	N/A
Drought	N/A	N/A	N/A	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	1	1	1	2

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.
The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores include implementation of climate risk reduction measures.

6.4. Climate Risk Reduction Measures

7. Health and Equity Details

7.1. CalEnviroScreen 4.0 Scores

The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Exposure Indicators	—
AQ-Ozone	48.5
AQ-PM	55.1
AQ-DPM	76.4
Drinking Water	6.18
Lead Risk Housing	75.0
Pesticides	0.00
Toxic Releases	83.9
Traffic	71.9
Effect Indicators	—

CleanUp Sites	97.0
Groundwater	90.2
Haz Waste Facilities/Generators	90.4
Impaired Water Bodies	0.00
Solid Waste	55.5
Sensitive Population	—
Asthma	47.8
Cardio-vascular	24.2
Low Birth Weights	65.8
Socioeconomic Factor Indicators	—
Education	86.4
Housing	97.4
Linguistic	68.2
Poverty	96.1
Unemployment	47.0

7.2. Healthy Places Index Scores

The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Economic	—
Above Poverty	11.5616579
Employed	71.06377518
Median HI	23.89323752
Education	—
Bachelor's or higher	24.38085461
High school enrollment	100
Preschool enrollment	8.764275632
Transportation	—

Other Decision Support	—

2016 Voting	34.6

7.3. Overall Health & Equity Scores

Metric	Result for Project Census Tract
CalEnviroScreen 4.0 Score for Project Location (a)	82.0
Healthy Places Index Score for Project Location (b)	16.0
Project Located in a Designated Disadvantaged Community (Senate Bill 535)	Yes
Project Located in a Low-Income Community (Assembly Bill 1550)	Yes
Project Located in a Community Air Protection Program Community (Assembly Bill 617)	No

a: The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.
b: The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

7.4. Health & Equity Measures

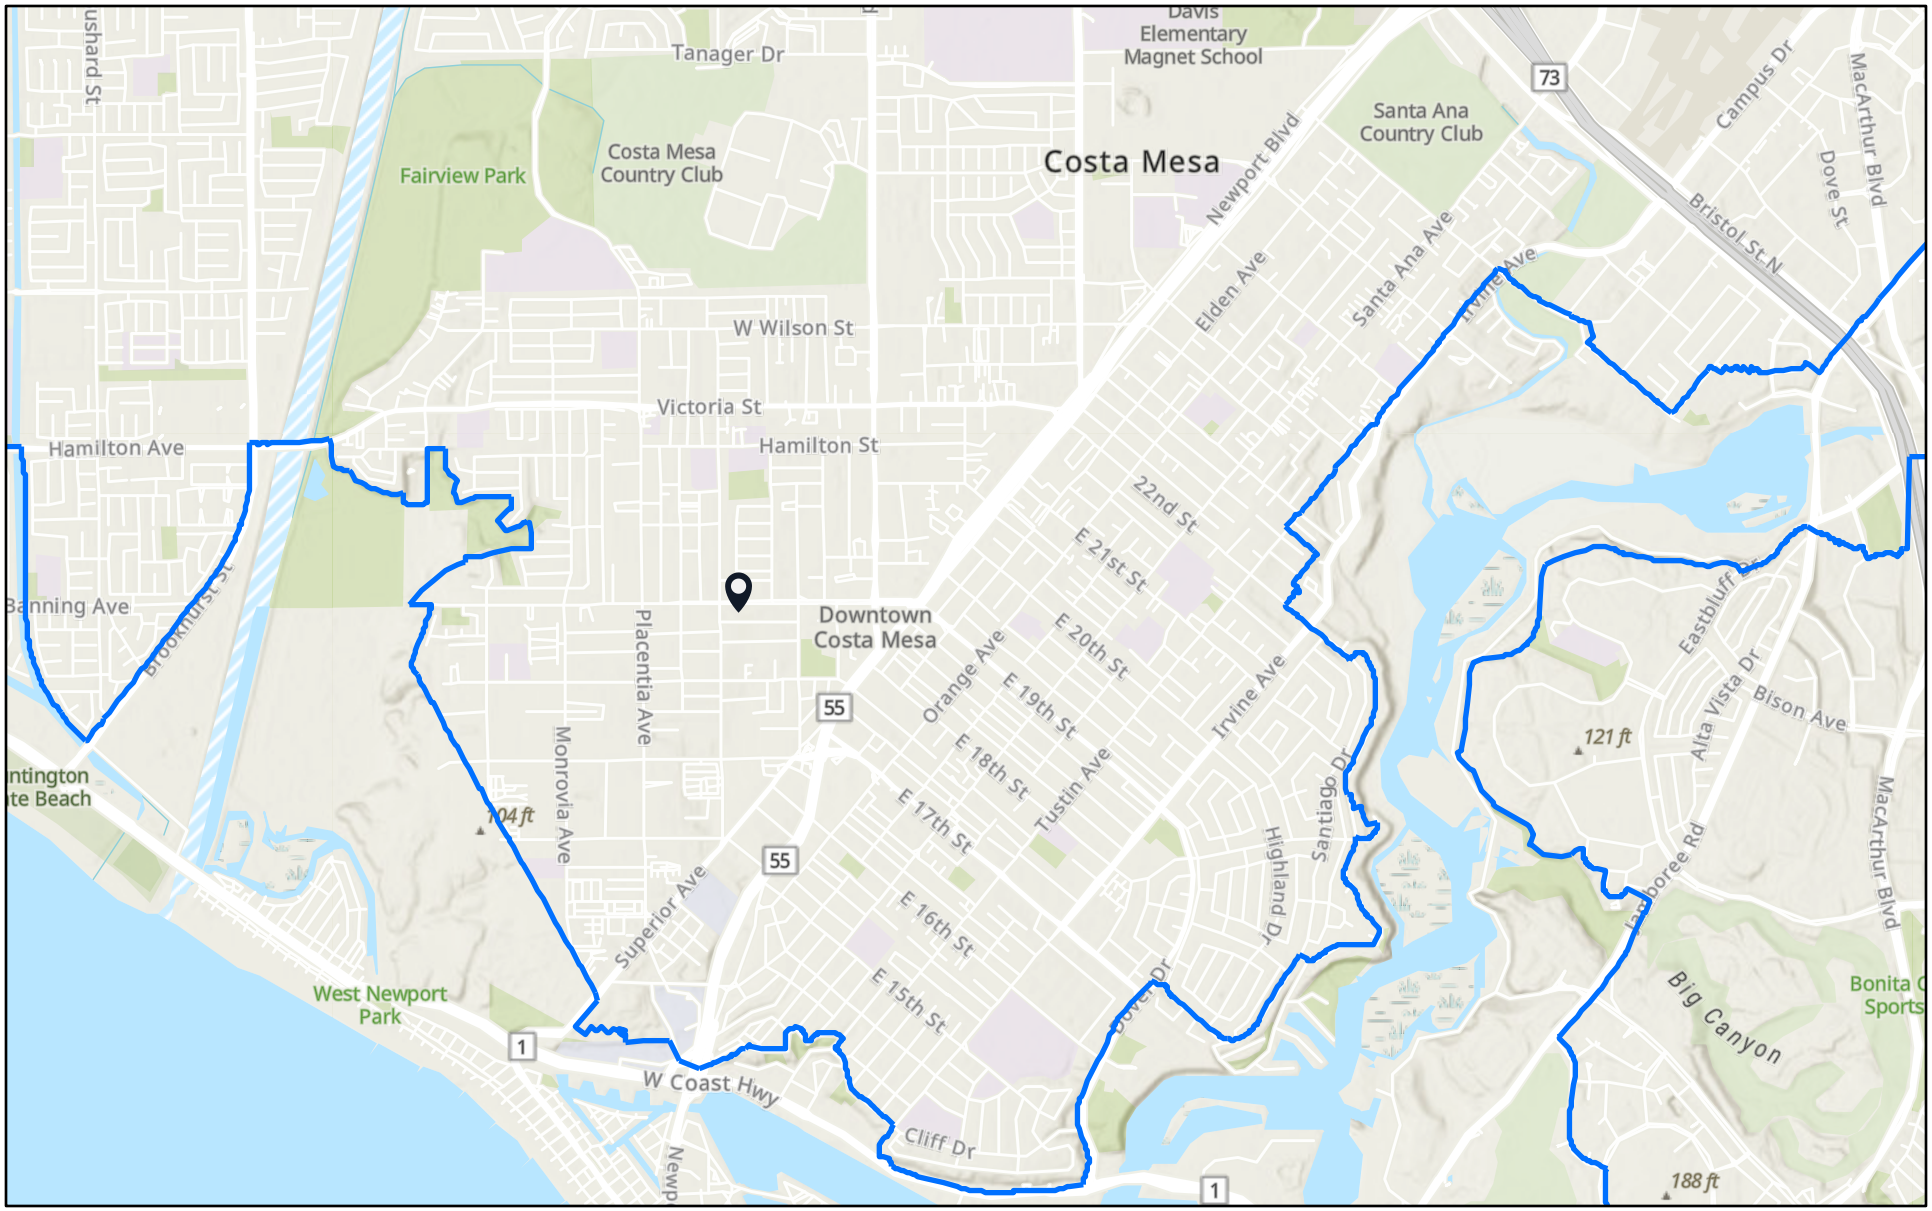
No Health & Equity Measures selected.

7.5. Evaluation Scorecard

Health & Equity Evaluation Scorecard not completed.

7.6. Health & Equity Custom Measures

No Health & Equity Custom Measures created.



8. User Changes to Default Data

Screen	Justification
Land Use	Project includes 70 dwelling units and associated uses (including leasing office, community room, etc) and 133 parking spaces.
Construction: Trips and VMT	Rounded default vehicle trips up to nearest even value. Also added vendor trucks during Site Preparation and Grading to account for water trucks.
Operations: Vehicle Data	Default trip rates assumed for the residential units. Zeroed out trip rates for the "General Office Building" surrogate use, as it represents on-site office and amenities that would serve the residents and would not result in additional trips.
Operations: Hearths	No fireplaces or wood stoves assumed

1.0 EXECUTIVE SUMMARY

Barr & Clark completed a Phase I Environmental Site Assessment (Phase I ESA) for the Parking Lot located at 695 West 19th Street, Costa Mesa, CA 92627 (the Subject Property).

The Subject Property consists of the eastern portion of the regular-shaped parcel of land (shared with the Costa Mesa Senior Center) located in Costa Mesa, California. The Subject Property is identified as Orange County Assessor's Parcel Number (APN): 424-211-01.

The Subject Property is improved with an asphalt-paved parking lot and associated landscaping. According to historical sources reviewed, the Subject Property has been a parking lot since at least 1995. Prior to the development of the current Subject Property improvements, the Subject Property was vacant land from as early as 1938 until prior to 1963 when the Subject Property appeared to be developed with a parking lot and vacant land until at least 1995 when the Subject Property appeared to be developed with the current Subject Property improvements. The Subject Property consist of approximately 1.37 acres (eastern portion of the 2.67 acre parcel) according to records reviewed by Barr & Clark.

The Subject Property is located in a neighborhood of Costa Mesa which is located in a mixed residential and commercial area. The immediately surrounding properties consist of West 19th Street followed by a senior residential property (678 West 19th Street) to the north; a commercial building (Mouse Graphics and Costa Mesa Blueprint at 659 West 19th Street) to the east, Plumer Street followed by single-family dwellings to the south; and a commercial building (Costa Mesa Senior Center at 695 West 19th Street) to the west.

Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut was retained to perform an environmental database search for locations identified as hazardous substance and/or hazardous waste facilities near the Subject Property. The Subject Property address was listed in the databases searched by EDR.

- The Subject Property address is listed on the following databases:

  - The Subject Property, listed as 1X City of Costa Mesa, at 695 West 19th Street is listed on the HWTS and HAZNET databases.

    The subject property was identified on the HAZNET databases under EPA ID Number CAD067786749 and CAC000296097. The HAZNET listings relate to the on-site generation of 14.9625 tons of asbestos containing waste in 1990. No current violations were found under this address. Based on the current regulatory status and absence of reported releases, the database listings for the Subject Property are not expected to represent a significant environmental concern. Barr & Clark does not consider this listing a REC.

    Based on the current regulatory status and absence of reported releases, the database listings for the Subject Property are not expected to represent a significant environmental concern to the Subject Property.

  - The property at 659 West 19th Street, located adjacent to the east of the Subject Property, was listed in the databases searched by EDR.

    - The property, listed as ML Enterprise LLC, dba Mouse Graphics and Orange Coast Reprographics Inc., dba Acosta Mesa Blueprint Co., was identified on the RCRA NonGen / NLR database.

    - No current violations were found under this address. Based on the current regulatory status, the database listings for the site are not expected to represent a significant environmental concern to the Subject Property. Barr & Clark does not consider this listing a REC.

- The property at 678 West 19th Street, located adjacent to the north of the Subject Property across West 19th Street, was listed in the databases searched by EDR.

  - The property, listed as Sandra Bolanos and the Towers on 19th Street, was identified on the RCRA NonGen / NLR database.

  - No current violations were found under this address. Based on the current regulatory status, the database listings for the site are not expected to represent a significant environmental concern to the Subject Property. Barr & Clark does not consider this listing a REC.

- The property at 700 West 19th Street, located approximately 478 feet to the east/northeast of the Subject Property, was listed in the databases searched by EDR.

  - The property, listed as Don J Johnson, was identified on the EDR Hist Auto database. The property is identified as a gasoline service station as Don J Johnson from 1969 through 1975 and a general automotive repair shop as Martin's Auto Care in 1979. No other listings regarding the historical automotive use of the property were provided. The property is currently occupied by medical office suites.

  - No current violations were found under this address. Based on the current regulatory status, the database listings for the site are not expected to represent a significant environmental concern to the Subject Property. Barr & Clark does not consider this listing a REC.

The EDR database search identified several additional facilities located within the search distances specified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Designation E1527-21). Based on the reported information, the listed facilities have a low potential to impact soil or groundwater beneath the Subject Property.

Barr & Clark has performed a Phase I Environmental Site Assessment in conformance with the Scope of Work required by 40 CFR §312 et al and Jamboree Housing Corporation for a full Phase I Environmental Site Assessment of the Parking Lot located at 695 West 19th Street, Costa Mesa, CA 92627 (the Subject Property). Any exceptions to, or deletions from, Jamboree Housing Corporation's Scope of Work were previously described in this report where applicable. This assessment has revealed no evidence of recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), or controlled recognized environmental conditions (CRECs) in connection with the Subject Property. No further action or investigation is recommended at the Subject Property in relation to recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), or controlled recognized environmental conditions (CRECs).

This executive summary is provided solely for the purpose of overview. Any party authorized to rely on this document must read the full report. The executive summary may omit details, any one of which could be crucial to the proper understanding and risk assessment of the subject matter. This report must be read in its entirety, no one page, sentence or section stands alone.

2.0 INTRODUCTION

2.1 Subject Property

This Phase I Environmental Site Assessment (Phase I ESA) was conducted by Barr & Clark, Inc. in general accordance with criteria listed in the ASTM Standard E1527-21 (the Standard) and in conformance with the Scope of Work required by Jamboree Housing Corporation to evaluate the Parking Lot located at 695 West 19th Street, Costa Mesa, CA 92627 (the Subject Property, see attached Figure 1) for the possible presence of contaminants as defined by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA, 42 USC Section 9601). The assessment was also conducted to evaluate the possible presence of petroleum products at the Subject Property which are not regulated by CERCLA. Finally, the assessment was conducted in general accordance with the *All Appropriate Inquiries* (AAI) criteria as defined by 42 USC Section 9601. Barr & Clark was retained by Jamboree Housing Corporation (client) to conduct this assessment. This report is formatted to provide general consistency with the guidelines provided by the Standard.

2.2 Scope of Services

This assessment was conducted to evaluate environmental concerns caused by past or present on-site and off-site activities. The scope of work for this assessment consisted of the following tasks as relevant and possible:

- An on-site reconnaissance and inspection by a Barr & Clark environmental professional to evaluate current conditions at the Subject Property and vicinity;
- A review of environmental databases, including listings of known or suspected contaminated sites, known landfill locations, known leaking underground storage tank (LUST) locations, and operations regulated under federal or state hazardous waste regulations;
- A review of historical aerial photographs and topographic maps;
- A review of previous documented environmental site assessments and evaluations performed at the subject site as such are relevant and provided to Barr & Clark;
- A review of title documentation for evidence of environmental liens on the Subject Property;
- An interview with the Subject Property owner's representative;
- A description of the regional geologic and hydrogeologic setting for the Subject Property; and
- Preparation of a written report.

Issues that were evaluated with respect to the Subject Property consisted of the following as relevant and possible:

- Storage, use and disposal of chemicals, hazardous materials, or hazardous waste at the Subject Property;
- Previous on-site activities;
- Possible contamination resulting from off-site sources and nearby properties; and
- Historical or current circumstances that suggest that the Subject Property could be a source of contamination.

2.3 Significant Assumptions

This assessment was conducted in general accordance with ASTM Standard E1527-21 and in conformance with the Scope of Work required by Jamboree Housing Corporation. Accordingly, it is understood that the assessment is not exhaustive. General conformance to the Standard is intended to reduce but not eliminate uncertainties regarding potential *Recognized Environmental Conditions* (RECs) at the Subject Property. It is recognized within the Standard that there are reasonable limits of time and cost to conduct a Phase I ESA that must always be considered.

The Standard also recognizes that the level of inquiry will vary from one site to another depending on, but not limited to factors such as: size, age, history, chemical usage, past remedial efforts and/or off-site concerns.

In evaluating the Subject Property, Barr & Clark has relied in good faith on information provided by individuals as noted in this report. We assume that the information provided is factual and accurate. We accept no responsibility for any deficiency, misstatements or inaccuracies contained in this report as a result of omissions, misinterpretation, deception or fraudulent acts of the persons interviewed or contacted.

This assessment represents Barr & Clark's professional interpretation and judgment of the existing site conditions based on the facts currently available within the limits of the mutually agreed scope of work, budget and schedule, which are not intended to be exhaustive in scope. It is Barr & Clark's specific intent that the conclusions and recommendations presented herein be used as guidance and not necessarily as a firm course of action unless explicitly stated as such. We make no warranties, express or implied, as to the functionality of the Subject Property for a particular purpose. The information provided in this report is not to be construed as legal advice.

2.4 Limitations and Exceptions

This assessment was prepared based on the information collected by Barr & Clark during this evaluation. Barr & Clark cannot guarantee the accuracy or completeness of governmental or site records. This report documents the condition of the sites on the date visited.

The services conducted by Barr & Clark have been rendered in a manner generally consistent with the level of skill and care ordinarily exercised by members of the environmental consulting profession currently practicing under similar conditions. As noted above, this assessment was conducted in general accordance with the ASTM Standard and the Barr & Clark proposal. Accordingly, no evaluation was completed with respect to the following potential issues as part of this project: an assessment of the regional potential for radon contamination of structures on the Subject Property or a measurement of the radon concentration in structures on the Subject Property; an assessment of the possible asbestos content of building materials; a geophysical survey for buried vaults, tanks or sumps; an assessment of wetlands on the Subject Property; an assessment of molds or fungi or other air quality issues that may be present; an assessment of California Prop 65 issues; geotechnical/Seismic/Methane/EMF issues; an assessment of endangered flora or fauna; paleontological, cultural or historical resources; soils or groundwater testing; Environmental, Safety and Industrial Hygiene regulatory compliance of the operations conducted at the facility; an evaluation of possible lead concentration in drinking water at the Subject Property; and an evaluation of possible lead concentration in on-site paints.

Barr & Clark is not engaged in environmental reporting for the purpose of advertising, sales promotion, or endorsement of any client's interest, including raising investment capital, recommending investment decisions, or other publicity purposes. Our client acknowledges that this report has been prepared for the exclusive use of the client and agrees that Barr & Clark reports and correspondence will not be used nor relied upon in any prospectus or offerings circular. This report is based on data and information collected during the evaluation of the Subject Property conducted by Barr & Clark personnel and is based solely on the Subject Property conditions encountered on the date and time of the site visit, supplemented by relevant historical information and data as provided and described in this report. No assurance is made regarding changes in conditions that could occur subsequent to the time of the assessment.

2.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-21.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past or current owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.5), this data gap is not expected to alter the findings of this assessment.

- Barr & Clark requested information relative to deed restrictions and environmental liens and a title search. This information was not provided at the time of the assessment.

- Barr & Clark was not able to document the historical use of the Subject Property prior to 1938. The following sources were reviewed during the course of this assessment and found to be limited: aerial photographs were not available prior to 1938; historical topographic maps were not available prior to 1896, and Sanborn fire insurance maps were not available for the Subject Property. This data failure is not considered critical and does not change the conclusions of this report, as the 1938 historical aerial photograph revealed the Subject Property to be undeveloped land.

2.6 User Reliance

This report is prepared for the sole use and benefit of Barr & Clark's client (Jamboree Housing Corporation) and it is reasonable for the client to rely upon the extent, character, and conclusions of this report.

3.0 SITE DESCRIPTION

3.1 Property Location and Description

The Subject Property consists of the eastern portion of the regular-shaped parcel of land (shared with the Costa Mesa Senior Center) located in Costa Mesa, California. (Figures 1 through 2).

The Subject Property is improved with an asphalt-paved parking lot and associated landscaping. According to historical sources reviewed, the Subject Property has been a parking lot since at least 1995. Prior to the development of the current Subject Property improvements, the Subject Property was vacant land from as early as 1938 until prior to 1963 when the Subject Property appeared to be developed with a parking lot and vacant land until at least 1995 when the Subject Property appeared to be developed with the current Subject Property improvements. The Subject Property consist of approximately 1.37 acres (eastern portion of the 2.67 acre parcel) according to records reviewed by Barr & Clark.

The Subject Property is identified as Orange County Assessor's Parcel Number (APN): 424-211-01.

The Subject Property is located in a neighborhood of Costa Mesa which is located in a mixed residential and commercial area. The immediately surrounding properties consist of West 19th Street followed by a senior residential property (678 West 19th Street) to the north; a commercial building (Mouse Graphics and Costa Mesa Blueprint at 659 West 19th Street) to the east, Plumer Street followed by single-family dwellings to the south; and a commercial building (Costa Mesa Senior Center at 695 West 19th Street) to the west.

3.2 Physical Setting

The United States Geological Survey (USGS), *Newport Beach, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the Subject Property is located at approximately 96 feet above mean sea level (MSL). The contour lines in the area of the Subject Property indicate the area slopes gently towards the east.

According to California's Groundwater: Bulletin 118, published by the State of California Department of Water Resources, the Subject Property is located in the Coastal Plain of Orange County Groundwater Basin. The Coastal Plain of Orange County Groundwater Basin (Orange County Basin) underlies a coastal alluvial plain in the northwestern portion of Orange County. The basin is bounded by consolidated rocks exposed on the north in the Puente and Chino Hills, on the east in the Santa Ana Mountains, and on the south in the San Joaquin Hills. The basin is bounded by the Pacific Ocean on the southwest and by a low topographic divide approximated by the Orange County - Los Angeles County line on the northwest. The basin underlies the lower Santa Ana River watershed.

The landscaped areas of the Subject Property parcel were the only areas of exposed soil/landscape that were observed on the Subject Property properties during the site reconnaissance. No other significant areas of exposed soils were observed on the Subject Property.

Review of soils information for the Subject area provided by EDR indicated the following: According to the soils information provided by EDR, the soils beneath the Subject Property are identified as Myford sandy loam. The typical soil profile is sandy loam from 0 to 11 inches, sandy clay from 11 to 18 inches, sandy clay loam from 18 to 70 inches and sandy loam from 70 to 79 inches. These soils are in the Class D Hydrologic Group with very slow infiltration rates. These soils are described as clayey, have a high water table, or are shallow to impervious layer. These soils are moderately well drained. Depth to water table is 0 inches.

The nearest surface water in the vicinity of the Subject Property is the Santa Ana River, located approximately 1.47 mile to the west of the Subject Property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the Subject Property during this assessment.

According to environmental documentation posted on the State Water Resources Control Board, GeoTracker website (http://geotracker.swrcb.ca.gov), the depth and direction of groundwater in the vicinity of the Subject Property is inferred to be present at approximately 28 to 35 feet below ground surface (bgs) and the flow is northwest.

3.3 Current and Historic Use of Site

According to historical sources reviewed, the Subject Property has been a parking lot since at least 1995. Prior to the development of the current Subject Property improvements, the Subject Property was vacant land from as early as 1938 until prior to 1963 when the Subject Property appeared to be developed with a parking lot and vacant land until at least 1995 when the Subject Property appeared to be developed with the current Subject Property improvements. The Subject Property consist of approximately 1.37 acres (eastern portion of the 2.67 acre parcel) according to records reviewed by Barr & Clark.

3.4 Historical Uses of Site

3.4.1 Historical Aerial Photographs

Information regarding the history of the Subject Property was obtained by purchasing and reviewing historical aerial photographs from EDR of Shelton, Connecticut. A total of 15 aerial photographs were reviewed for the following years: 1938, 1947, 1953, 1963, 1972, 1977, 1987, 1990, 1995, 2002, 2005, 2009, 2012, 2016 and 2020. The following observations were made from our review of the historical aerial photographs:

- 1938, 1947, 1953. The Subject Property appears to be undeveloped land. The adjacent properties to the north across West 19th Street, south, east and west appear to be undeveloped land.
- 1963. The Subject Property appears to be a parking lot for the commercial building to the west and a vacant lot. The adjacent property to the north across West 19th Street appears to be undeveloped land. The adjacent property to the east appears to be developed with a commercial building. The adjacent properties to the south across Plumer Street appears to be developed with the existing single-family dwellings. The adjacent property to the west appears to be developed with a commercial building.
- 1972, 1977, 1987, 1990. The Subject Property appears to be a parking lot for the commercial building to the west and a vacant lot. The adjacent property to the north across West 19th Street appears to be developed with the existing senior residential property. The adjacent property to the east appears to be developed with a commercial building. The adjacent properties to the south across Plumer Street appears to be developed with existing single-family dwellings. The adjacent property to the west appears to be developed with a commercial building.
- 1995. The Subject Property appears to be developed with the existing drive and parking areas for the existing commercial building to the west of the Subject Property. The adjacent property to the north across West 19th Street appears to be developed with the existing senior residential property. The adjacent property to the east appears to be developed with a commercial building. The adjacent properties to the south across Plumer Street appears to be developed with the existing single-family dwellings. The adjacent property to the west appears to be developed with the existing commercial building.

- 2002, 2005, 2009, 2012, 2016 and 2020. The Subject Property appears to be developed with the existing drive and parking areas for the existing commercial building to the west of the Subject Property. The adjacent property to the north across West 19th Street appears to be developed with the existing senior residential property. The adjacent property to the east appears to be developed with the existing commercial building. The adjacent properties to the south across Plumer Street appears to be developed with the existing single-family dwellings. The adjacent property to the west appears to be developed with the existing commercial building.

3.4.2 Sanborn Fire Insurance Map Review

Information regarding the history of the Subject Property was obtained by purchasing and reviewing historical Sanborn Fire Insurance maps from EDR of Shelton, Connecticut. According to EDR, Sanborn Map coverage was not available for the Subject Property and adjacent properties.

3.5 Oil and Gas History

Barr & Clark researched the State of California Department of Conservation, Division of Oil, Gas and Geothermal Resources (DOGGR), DOGGR Online Mapping System (http://maps.conservation.ca.gov/dog) for information regarding oil and gas development. According to the DOGGR Online Mapping System, no oil or gas wells are located on or adjacent to the Subject Property.

3.6 Adjacent Sites

The Subject Property is located in a neighborhood of Costa Mesa which is located in a mixed residential and commercial area. The following adjacent properties were observed:

- North: West 19th Street followed by a senior residential property (678 West 19th Street).
- East: A commercial building (Mouse Graphics and Costa Mesa Blueprint at 659 West 19th Street).
- South: Single-family dwellings.
- West: a commercial building (Costa Mesa Senior Center at 695 West 19th Street).

4.0 USER PROVIDED INFORMATION

4.1 Interviews

4.1.1 Interview with Owner

Mr. Enyelber Franco, Manager and Designated Representative of the Owner / Property Manager, indicated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Subject Property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Subject Property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

4.1.2 Interview with Report User

Mr. Eric Cushman, Designated Representative of the User, indicated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Subject Property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Subject Property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

4.1.3 Interview with Key Site Manager

Mr. Enyelber Franco, Maintenance Technician and Designated Representative of the Owner / Property Manager, indicated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Subject Property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Subject Property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

4.1.4 Interviews with Past Owners, Operators or Occupants

Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap.

4.1.5 Interview with Others

As the Subject Property is not an abandoned property as defined by ASTM E1527-21, interview with others were not performed.

4.2 Title Records

A chain-of-title report was not requested by the client for this project.

4.3 Environmental Liens/Activity and Use Limitations

An environmental liens/activity and use limitations report was not requested by the client for this project.

4.4 Specialized Knowledge

No specialized knowledge of the Subject Property was communicated from the client to Barr & Clark.

4.5 Commonly Known Information

No commonly known information that could relate to a Recognized Environmental Condition (REC) associated with the Subject Property was communicated from the client to Barr & Clark.

4.6 Valuation Reduction for Environmental Issues

No information was received from the client indicating that the selling price of the Subject Property was *significantly* reduced due to the chemical impacts existing on the Subject Property.

4.7 Owner/Property Manager/Occupant Information

The Subject Property consists of the eastern portion of the regular-shaped parcel of land (shared with the Costa Mesa Senior Center) located in Costa Mesa, California. The Subject Property is identified as Orange County Assessor's Parcel Number (APN): 424-211-01.

The Subject Property is improved with an asphalt-paved parking lot and associated landscaping.

4.8 Reason for Conducting this Phase I ESA

According to the client, this Phase I ESA is being conducted for due diligence purposes.

4.9 Other

No additional information was provided to Barr & Clark for review.

4.10 Historical Uses of Site

Other than as indicated in Section 5.3 below, no other specific adverse historical uses of the Subject Property resulting in potential environmental concerns was communicated to Barr & Clark by the client.

5.0 RECORDS REVIEW

5.1 Federal and State Database Records

Barr & Clark retained Environmental Data Resources (EDR) of Shelton, Connecticut to provide a search of available environmental database records. The records search was conducted to meet the requirements of ASTM Standard Practice for Environmental Site Assessments, E1527-21. Search distances (radii) were selected generally pursuant to the ASTM E1527-21 standard. A copy of the EDR Report, included as Appendix C, normally contains the results of a review of the following databases and often others:

- Federal Records: US Environmental Protection Agency's Comprehensive Environmental Response Compensation, and Liability Information System (CERCLIS); National Priority List (NPL); RCRA Treatment, Storage, and Disposal Sites; toxic release reporting, Resource Conservation and Recovery Act (RCRA) violators; toxic substance manufacturers and importers; generators, or transporters, commercial storers and/or brokers and disposers of polychlorinated biphenyls (PCBs); hazardous material spill incidents reported to the department of Transportation; and Federal Superfund Liens.

- California Records: State hazardous waste sites; wastewater treatment facilities; solid waste facilities/landfill sites; and registered and leaking underground storage tank (UST) incident reports.

5.1.1 Subject Property

Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut was retained to perform an environmental database search for locations identified as hazardous substance and/or hazardous waste facilities near the Subject Property. The Subject Property address was listed in the databases searched by EDR.

- The Subject Property address is listed on the following databases:

  - The Subject Property, listed as 1X City of Costa Mesa, at 695 West 19th Street is listed on the HWTS and HAZNET databases.

    The subject property was identified on the HAZNET databases under EPA ID Number CAD067786749 and CAC000296097. The HAZNET listings relate to the on-site generation of 14.9625 tons of asbestos containing waste in 1990. No current violations were found under this address. Based on the current regulatory status and absence of reported releases, the database listings for the Subject Property are not expected to represent a significant environmental concern. Barr & Clark does not consider this listing a REC.

5.1.2 Off-Site Facilities with Known Locations

The EDR report refers to numerous properties listed on databases indicating environmental impairment in the vicinity of the Subject Property.

- The property at 695 West 19th Street, located adjacent to the east of the Subject Property, was listed in the databases searched by EDR.

  - The property, listed as ML Enterprise LLC, dba Mouse Graphics and Orange Coast Reprographics Inc., dba Acosta Mesa Blueprint Co., was identified on the RCRA NonGen / NLR database.

  - No current violations were found under this address. Based on the current regulatory status, the database listings for the site are not expected to represent a significant environmental concern to the Subject Property. Barr & Clark does not consider this listing a REC.

- The property at 678 West 19th Street, located adjacent to the north of the Subject Property across West 19th Street, was listed in the databases searched by EDR.

  - The property, listed as Sandra Bolanos and the Towers on 19th Street, was identified on the RCRA NonGen / NLR database.

  - No current violations were found under this address. Based on the current regulatory status, the database listings for the site are not expected to represent a significant environmental concern to the Subject Property. Barr & Clark does not consider this listing a REC.

- The property at 700 West 19th Street, located approximately 478 feet to the east/northeast of the Subject Property, was listed in the databases searched by EDR.

  - The property, listed as Don J Johnson, was identified on the EDR Hist Auto database. The property is identified as a gasoline service station as Don J Johnson from 1969 through 1975 and a general automotive repair shop as Martin's Auto Care in 1979. No other listings regarding the historical automotive use of the property were provided. The property is currently occupied by medical office suites.

  - No current violations were found under this address. Based on the current regulatory status, the database listings for the site are not expected to represent a significant environmental concern to the Subject Property. Barr & Clark does not consider this listing a REC.

5.2 Orphan Summary

Three properties were identified in the EDR report as "orphan sites". These are properties listed in environmental databases, but which EDR has been unable to locate with adequate precision to determine whether they are pertinent to the investigation at the Subject Property.

Barr & Clark was able to determine to a reasonable degree of certainty that the listed orphan sites were not within the specified database search distances, or if a site was in the distance specified, it was not an identified concern.

5.3 State, City and County Files

Public agencies were contacted to review file information, if available, regarding the possible presence of environmental impacts, remedial activities, hazardous materials storage or hazardous material usage at the subject property. The information obtained from the governmental agencies is summarized below.

5.3.1 California Regional Water Quality Control Board

The Regional Water Quality Control Board (RWQCB) maintains records for groundwater contamination and remedial activities at selected impacted sites. Barr & Clark researched the RWQCB GeoTracker website (www.geotracker.waterboards.ca.gov) was researched on June 26, 2023. No records regarding a release on the Subject Property were on-file on the RWQCB GeoTracker website.

5.3.2 California Department of Toxic Substances Control

The California Department of Toxic Substances Control (DTSC) files include records of hazardous materials storage and/or impacts at various sites. Barr & Clark researched the DTSC EnviroStor website on June 26, 2023. No records regarding a release on the Subject Property were on-file at the DTSC.

5.3.3 Fire Department

A written request for file review was submitted to the Orange County Fire Authority on June 26, 2023 for records pertaining to underground storage tanks, hazardous materials and fire prevention information. As of the date of this report, no response has been received regarding the Subject Property from the Orange County Fire Authority.

5.3.4 Building Department

Barr & Clark visited the City of Costa Mesa Building Department on June 26, 2023 for information regarding historical tenants and property use of the Subject Property. No potential environmental concerns were identified in the review of the building records for the Subject Property.

5.3.5 Planning Department

Barr & Clark visited the City of Costa Mesa Planning Department on June 26, 2023 for information regarding historical tenants and property use of the Subject Property. According to the Planning Division, the Subject Property is zoned C1 for Local Business.

5.3.6 Bay Area Air Quality Management District (BAAQMD)

Barr & Clark researched the Air Quality Management District (AQMD) online database on June 26, 2023 for information regarding any Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) records for the subject property related to air emission equipment, which may include dry cleaning machines and USTs. The subject property is not listed on the AQMD databases. No PTOs, NOVs or NTCs were issued for the Subject Property.

5.4 Historical Environmental Reports

Although requested, no previous reports or other pertinent documentation was provided to Barr & Clark for review during the course of this assessment.

6.0 SITE RECONNAISSANCE

6.1 Summary of Site Reconnaissance

Barr & Clark assessor Michael Atallah visited the Subject Property on June 26, 2023. The weather at the time of the site visit was clear and approximately 80 degrees Fahrenheit.

The Subject Property consists of the eastern portion of the regular-shaped parcel of land (shared with the Costa Mesa Senior Center) located in Costa Mesa, California. The Subject Property is identified as Orange County Assessor's Parcel Number (APN): 424-211-01.

The Subject Property is improved with an asphalt-paved parking lot and associated landscaping. According to historical sources reviewed, the Subject Property has been a parking lot since at least 1995. Prior to the development of the current Subject Property improvements, the Subject Property was vacant land from as early as 1938 until prior to 1963 when the Subject Property appeared to be developed with a parking lot and vacant land until at least 1995 when the Subject Property appeared to be developed with the current Subject Property improvements. The Subject Property consist of approximately 1.37 acres (eastern portion of the 2.67 acre parcel) according to records reviewed by Barr & Clark.

The Subject Property is located in a neighborhood of Costa Mesa which is located in a mixed residential and commercial area. The immediately surrounding properties consist of West 19th Street followed by a senior residential property (678 West 19th Street) to the north; a commercial building (Mouse Graphics and Costa Mesa Blueprint at 659 West 19th Street) to the east, Plumer Street followed by single-family dwellings to the south; and a commercial building (Costa Mesa Senior Center at 695 West 19th Street) to the west.

Southern California Edison (SCE) provides electricity, the City of Costa Mesa provides sewer services, the Mesa Water District provides water services and Southern California Gas Company (natural gas) provides natural gas service to the Subject Property. Trash and recycling services are provided by a licensed trash hauler, which is detailed in Section 6.2.5 below.

6.2 Evaluation of Specific Concerns

6.2.1 Hazardous Substances and Petroleum Products

No hazardous materials or petroleum products were observed at the subject property. No further action or investigation is recommended regarding the use of hazardous materials or petroleum products at the subject property.

6.2.2 Storage Tanks

No underground storage tanks (USTs) or aboveground storage tanks (ASTs) for hazardous materials storage were reported for the Subject Property. No visible evidence of such was observed during the site reconnaissance.

6.2.3 Polychlorinated Biphenyls

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – "Non-PCB;" 2) 50 ppm-500 ppm – "PCB-Contaminated;" and, 3) Greater than 500 ppm – "PCB-Containing." The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

The on-site reconnaissance addressed indoor and outdoor transformers that may contain PCBs. Transformers were not observed at the subject property.

Additionally, no other potential PCB-containing equipment (interior transformers, oil-filled switches, hoists, lifts, dock levelers, balers, etc.) was observed on the Subject Property during Barr & Clark's reconnaissance.

6.2.4 Waste Disposal

The Subject Property is currently a parking lot and is not involved in the generation of wastes. No further action or investigation is recommended regarding wastes at the Subject.

6.2.5 Sewage Discharge and Disposal

Sanitary discharges on the Subject Property are directed into the municipal sanitary sewer system. The City of Costa Mesa services the Subject Property vicinity. No wastewater treatment facilities or septic systems were observed or reported on the Subject Property.

6.2.6 Stained Soils

No evidence of stained soils or distressed vegetation was observed during the Barr & Clark site reconnaissance.

6.2.7 Surface Runoff

Storm water is removed from the Subject Property primarily by sheet flow action across the paved surfaces towards storm water drains located throughout the Subject Property and in the public right of way. Subject Property storm water from roofs, landscaped areas, and paved areas is directed to the public right of way, and to on-site storm water drains. The Subject Property is connected to a municipal owned and maintained sewer system.

6.2.8 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the Subject Property were observed.

6.2.9 Pools of Liquid

No evidence of pools of liquid was observed during the Barr & Clark site reconnaissance.

6.2.10 Pits, Ponds or Lagoons

No evidence of pits, ponds or lagoons was observed during the Barr & Clark site reconnaissance.

6.2.11 Strong, Pungent or Noxious Odors

No evidence of strong, pungent or noxious odors was evident during the Barr & Clark site reconnaissance.

6.2.12 Stressed Vegetation

No evidence of stressed vegetation was observed at the Subject Property during the Barr & Clark site reconnaissance.

6.2.13 Clarifiers, Sumps, Oil Water Separators or Septic Tanks

No clarifiers, sumps or oil water separators were observed or reported for the Subject Property addresses.

6.2.14 Groundwater Wells

No groundwater wells were observed or reported for the Subject Property.

6.2.15 Oil Wells / Pipelines

No oil wells or pipelines were observed or reported for the Subject Property.

6.2.16 High Voltage Power Lines

No high voltage power lines were observed in the nearby vicinity of the Subject Property.

6.2.17 Imported Fill

No information related to the use of imported fill material was identified in records for the Subject Property addresses.

6.2.18 Wetlands

Review of wetlands information provided by EDR indicated that no wetland areas are indicated at the Subject or adjacent properties.

Barr & Clark performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06059C0268J, dated December 3, 2009, the subject property appears to be located in Zone X, Areas of minimal flood hazard.

6.2.19 Asbestos

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are "presumed asbestos-containing material" (PACM).

National Emission Standards for Hazardous Air Pollutants (NESHAP) regulations require sampling potential ACBM prior to demolition or extensive renovation, regardless of the dates of construction; therefore, if such activities are planned, it may be required to conduct a survey of the entire facility, or that portion slated for renovation or demolition, before initiating such destructive activities. That survey should include an assessment of all subject building materials, including those in areas which are normally inaccessible. Any material found to be ACBM should be handled in accordance with applicable regulations.

The Subject Property is a parking lot and no suspect ACBM were observed during the site assessment. No further action or investigation is recommended regarding ACBM at the Subject.

6.2.20 Lead Based Paints

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm2 (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

The Subject Property is currently a parking lot and no suspect lead-based paint was observed during the site assessment. No further action or investigation is recommended regarding LBP at the Subject.

6.2.21 Radon

The Subject Property is located in Radon Zone 3, which has a predicted average indoor screening level less than 2.0 pCi/L. The USEPA action level for radon is 4 pCi/L. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.2.22 Drinking Water Quality

According to available information, a public water system operated by the Mesa Water District serves the Subject Property vicinity. According to a representative of the Mesa Water District, shallow groundwater beneath the Subject Property is not utilized for domestic purposes. The sources of public water for the Mesa Water District are from local groundwater sources. Groundwater, or well water, is pumped from Orange County's natural underground reservoir, or groundwater basin, via Mesa Water's seven wells.

According to the 2022 Water Quality Report, water supplied to the Subject Property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.2.23 Water Intrusion and Mold Growth

As part of this assessment, Barr & Clark performed a limited visual inspection for the conspicuous presence of mold in the Subject Property building. Barr & Clark inspected the accessible interior areas of the Subject Property building, including walls and ceilings, in-unit and common mechanical/electrical closets, areas under sinks, and flat roofs (for evidence of water ponding) and around windows and exterior doors for the presence of conspicuous mold or observed water intrusion or accumulation. Barr & Clark did not note conspicuous visual or olfactory indications of the presence of mold, nor did Barr & Clark observe obvious indications of significant water damage at the time of the inspection (in the areas inspected). No sampling was conducted as part of this assessment.

This activity was not designed to discover all areas which may be affected by mold growth on the Subject Property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the Subject Property. This evaluation did not include a review of pipe chases, HVAC systems (if present), areas behind enclosed walls, attics, crawl spaces, ceilings or other areas that were difficult to access.

7.0 VAPOR ENCROACHMENT SCREEN

Barr & Clark has completed a Tier 1 Vapor Encroachment Screen of the Subject Property in accordance with ASTM Standard E 2600-10: Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions.

7.1 Purpose

The purpose of this Tier 1 Vapor Encroachment Screen (VES) is to identify, to the extent feasible pursuant to the procedures presented in the ASTM E 2600-10 standard guide, the potential for a Vapor Encroachment Condition (VEC) to exist at the Subject Property.

7.2 Methodology

Barr & Clark utilized for this assessment EDR's VEC App to accurately identify and document potential VEC sites within the Subject's Area of Concern (AOC). By using integrated data applications and state-of-the-art analytical tools, EDR's VEC App has been specifically designed to adhere to ASTM E 2600-10. EDR's VEC App performs an initial search of all ASTM E 2600-10 standard government record databases and EDR proprietary historical records related to former dry cleaners, gas stations, and manufactured gas plants within the 1/3 mile maximum distance defined in ASTM E 2600-10 for COC-contaminated sites.

7.3 Results

Subject: Based on review of environmental records searched by EDR for this Tier 1 VES, Barr & Clark concludes that the Subject Property is not listed as a site where the potential for a vapor encroachment condition exists.

Area of Concern (AOC): Based on review of environmental records searched by EDR for this Tier 1 VES, The AOC search did not identify any contaminated sites.

Several sites identified in the records search were determined to be outside of the AOC or were not identified as contaminated sites; therefore, a Vapor Encroachment Condition (VEC) regarding these sites could be ruled out.

8.0 FINDINGS AND RECOMMENDATIONS

Barr & Clark has performed a Phase I Environmental Site Assessment in conformance with the Scope of Work required by 40 CFR §312 et al and Jamboree Housing Corporation for a full Phase I Environmental Site Assessment of the Parking Lot located at 695 West 19th Street, Costa Mesa, CA 92627 (the Subject Property). Any exceptions to, or deletions from, Jamboree Housing Corporation's Scope of Work were previously described in this report where applicable. This assessment has revealed no evidence of recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), or controlled recognized environmental conditions (CRECs) in connection with the Subject Property. No further action or investigation is recommended at the Subject Property in relation to recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), or controlled recognized environmental conditions (CRECs).

This executive summary is provided solely for the purpose of overview. Any party authorized to rely on this document must read the full report. The executive summary may omit details, any one of which could be crucial to the proper understanding and risk assessment of the subject matter. This report must be read in its entirety, no one page, sentence or section stands alone.

9.0 SIGNATURE PAGE

By signing below, Barr & Clark declares that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR §312. Barr & Clark has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. Barr & Clark has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

RAYTHEON COMPANY EPA ID:: CAD057468944	***500 SUPERIOR AVE***	***S 1/2 - 1 (0.864 mi.)***	***Z100***	***914***

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

PACIFIC SPRINKLER SU EPA ID:: CAR000335232	770 W 19TH STREET	WNW 1/8 - 1/4 (0.226 mi.)	H32	215

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there are 5 RESPONSE sites within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which

there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/23/2023 has revealed that there are 20 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 8 CPS-SLIC sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

WMUDS/SWAT: The Waste Management Unit Database System is used for program tracking and inventory of waste management units. The source is the State Water Resources Control Board.

A review of the WMUDS/SWAT list, as provided by EDR, and dated 04/01/2000 has revealed that there is 1 WMUDS/SWAT site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/06/2023 has revealed that there are 27 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there are 2 DRYCLEANERS sites within approximately 0.25 miles of the target property.

Database: DRYCLEAN SOUTH COAST, Date of Government Version: 02/17/2023				

EXECUTIVE SUMMARY

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 19 HIST CORTESE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Eval Type: Routine done by local agency
Eval Notes: Onsite to conduct a routine hazardous waste inspection. Met with Rose Aguilar. Inspected hazardous waste broken products and returns in storage bins and drums. Drums and bins were provided with a lid, stored in a secure manner and appear to be in good condition. A Hazardous Waste label was noted on all drums and bins with the required identification. Municipal dumpster area does not appear to contain any hazardous waste. Hazardous Waste Emergency Response plan was available for review. Manifests and bills of lading for all hazardous waste streams were reviewed today. Ensure all hazardous waste manifests/disposal documents are maintained on site for at least three years from the date of transport and are available for review during normal business hours. Please continue to ensure all universal wastes (fluorescent lamps, batteries, paint, electronics, etc.) are managed appropriately. Continue to maintain disposal records for these hazardous wastes. Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-16-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for routine Hazardous Materials Business Plan (HMBP) inspection. Honor Valentin, manager, provided permission to inspect. Observed the following materials on site at reportable quantities: - CO2 (48 gallons) Hazardous Materials disclosed in CERS match what is reported on site. Per California Health & Safety Code Ch. 6.95, businesses that store and handle hazardous materials at or over reportable quantities (55 gal of a liquid, 500 lbs of a solid, 200 cubic ft of a compressed gas) must prepare and implement an HMBP.

Eval Type:	Routine done by local agency
Eval Notes:	On site for routine UST inspection, monitoring system certification, and spill bucket testing. Met this date with Alfredo Zamora, Station Manager. The facility has three (3) double-walled tanks (87, 91, and diesel) monitored by a Veeder Root TLS-350 system. The monitor is operational for audible and visual alarms. The Veeder Root panel display reads "all functions normal." Fill sumps, turbine sumps, and UDCs have VR 208 sensors. Tank annulars have VR 420 sensors. Product piping is double-walled and pressurized and has Veeder Root PLLD (8484) on the 87 and 91 tanks and VMI LD-2000 on the diesel tank. Sensors were observed at the lowest point. Sensor out and fail-safe were verified and passed. All sensors tested and verified to be operational. Positive shutdown and fail-safe programming were verified. Overfill prevention is provided by flapper valves in the fill tube of each tank. Spill buckets were tested hydrostatically and passed. Testing was conducted by [Truncated]

Eval Notes:	On site for routine UST inspection, monitoring system certification, and spill bucket testing. The facility has three double-walled tanks (87, 91, D) monitored by a Veeder Root TLS-350R system. The site has double-walled pressurized piping with electronic (87, 91) and mechanical (D) line leak detectors. Positive shutdown and fail safe programming were verified. Flapper valves are used for overfill prevention. Testing was conducted by Steven Loera of Fastech. Tester certifications (VR, ICC, VMI) were verified. Please submit the test reports to this Agency within 30 days. Secondary containment testing was last conducted on 6/21/19. Overfill Prevention Inspection was last conducted on 2/3/21. Both must be tested every 36 months.

Violation Source: CERS,

Site ID: 172045
Site Name: WINALL OIL CO
Violation Date: 10-27-2020
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 02/17/2021. OBSERVATION: Overfill Prevention Equipment Inspection Form dated 10/22/20 indicate the following components failed: Diesel, 87#1, 87#2, 91, and 89 tank shut-off valves (flapper) - All activate at greater than 95% capacity. CORRECTIVE ACTION: Correct all overfill prevention equipment so as to shut-off flow to the tank when the tank is filled to no more than 95% capacity. Provide test results to this agency within 30 days.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-30-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine monitoring certification inspection. Met with Jose Rodriguez, service technician with California Maintenance & Environmental. The following certifications were verified: ICC, VR, VMI. Also met with Jonathan Rivera, manager at the site. The facility has five double-walled USTs: 12K Diesel, 12K 87 #1, 12K 87 #2, 12K 91, and 12K 89. Overfill prevention is provided by a flapper valve in the drop tube of each tank. The UST system is monitored using a Gilbarco EMC panel. The tanks are monitored as follows: Dry Annulars: VR-420 STP Sumps/Fill Sumps/TLM Sumps: VR-208 Mechanical line leak detectors: FE PETRO STP-MLD All sensors were tested hydrostatically and passed. Fail safe and sensor-out were demonstrated operational. Spill buckets were tested hydrostatically for 1 hour and passed. The following documents were reviewed: -Permit -Monitoring Plan, Response Plan -DO Monthly Reports, DO Training -Last Monitoring Cert Date: [Truncated]

Eval Notes: On site for routine UST inspection, monitoring system certification, spill bucket testing, and overfill. The facility has five (5) 12,000 gallon Joor double-walled tanks monitored by a Veeder Root TLS-350 system. The monitor is operation for audible and visual alarms. Panel display reads "All functions normal." Turbine sumps, fill sumps, and UDC's have 208 senors. Tank annulars have 420 sensors. Product piping is double-walled and pressurized and all have Petro STP-MLD line leak detectors. Sensor out and fail-safe were verified and passed. All sensors tested and verified to be operational. Flapper valves are used for overfill prevention. A ball float was noted during the inspection below each of the flappers and were removed. The CERS information will need to be updated within 30 days. The line leak detector and spill buckets were not witnesses by this Agency. Testing was conducted by Jose Rodriguez of California Maintenance & Environmental. Tester [Truncated]

Eval Date: 10-11-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for annual underground storage tank inspection - to inspect tank sumps, dispenser containment (UDC) sumps, sensor placement, and review required documentation during the monitoring system certification, leak detector and spill bucket testing. Testing is being performed prior to the annual test due date of January 2018 due to completion of construction (SR0130288) to replace UDCs and remove Healy tank. New Bravo fiberglass single-wall UDCs were replaced for all 9 dispensers, the Healy tank was removed and Veeder Root Carbon Canister installed, installation of vent transition box, replacement of FE Petro 1.5 HP turbines for all 5 USTs with FE Petro 2.0 HP turbines, and replacing the VMI LD2000 MLLDs with FE Petro STP MLLDs. Agreed this date would begin the new annual testing cycle. Met with Miguel Gomez and Dave Tungate, both with contractor Petro Builders. Testing of monitoring equipment was performed by Patrick McMurphy with California Maintenance & [Truncated]

Violations:

Site ID:	397468
Site Name:	Mesa Water District
Violation Date:	04-22-2021
Citation:	HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description:	Failure to complete and electronically submit a site map with all required content.
Violation Notes:	Returned to compliance on 05/14/2021. OBSERVATION: Your site map must be submitted with the following elements: loading area and emergency shut-offs (electrical, gas, and water). Additionally, move all of your site maps from the Emergency Response & Training Plans section to the Site Map section. CORRECTIVE ACTION: Please make these changes to your site map and upload it to the California Environmental Reporting System (CERS) within 30 days.
Violation Division:	Orange County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS,

Site ID:	397468
Site Name:	Mesa Water District
Violation Date:	04-22-2021
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each container s supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas.
Violation Notes:	Returned to compliance on 05/21/2021. OBSERVATION: The secondary containment (interstitial space) of the 8,000 gallon split tank containing gasoline & diesel is not being inspected monthly per the SPCC plan. CORRECTIVE ACTION: Please identify a method to check the interstitial space of the 8,000 gallon fuel tank and document it in your monthly inspection log. Perform the monthly inspection and provide a copy of the monthly inspection log to this agency for review within 30 days.
Violation Division:	Orange County Environmental Health
Violation Program:	APSA
Violation Source:	CERS,

Site ID:	397468
Site Name:	Mesa Water District
Violation Date:	04-22-2021
Citation:	HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 05/14/2021. OBSERVATION: Please remove N.O.S. from your inventory as it was not observed above the reporting threshold. For Bleach, remove the State Waste Code and the Annual Waste Amount - add the Storage Pressure and Storage Temperature. For Engine Oil, remove the Annual Waste Amount - leave blank - and increase the Maximum Daily Amount = 330. For Lead Acid Batteries, remove the State Waste Code - leave blank. CORRECTIVE ACTION: Please

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-22-2021
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Met with Kaying Lee, compliance supervisor, and Jessica Penhall, BSI consultant. Facility is a small quantity generator of used oil, coolant, and oily debris wastes. Walked the facility, perimeter, and inspected the hazardous waste storage area. Containers were closed and properly labeled. Inspected the municipal trash for hazardous waste. No hazardous waste was observed in the dumpster. The following documents were reviewed: - Manifests - Employee training records - Weekly inspection logs - Emergency response plan Maintain copies of your hazardous waste manifests on site for review for 3 years. Hazardous waste(s) must be labeled with the following information: 1. The word "Hazardous Waste" 2. Generator Name and Address 3. Accumulation Start Date 4. Physical State/Hazardous Properties 5. Chemical Contents Emailed a copy of this report to KaylingL@mesawater.org and JessicaP@mesawater.org.

CERS Description: Chemical Storage Facilities

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-04-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for routine Hazardous Materials Business Plan (HMBP). Tony Huerta, store manager, provided permission to inspect. Observed the following materials on site at reportable quantities: - Used Motor Oil (220 gallons) - Used Absorbent Containing Oil (550 pounds) Hazardous Materials disclosed in CERS match what is reported on site. Per California Health & Safety Code Ch. 6.95, businesses that store and handle hazardous materials at or over reportable quantities (55 gal of a liquid, 500 lbs of a solid, 200 cubic ft of a compressed gas) must prepare and implement an HMBP. The facility is responsible for identifying all hazardous materials, including hazardous wastes, which are at or above disclosure thresholds. If there is a change in the type of amount of chemicals that are maintained on site, please submit revised documents (electronically though CERS) within 30 days of

KRAGEN #725 (Continued) **S103636171**

change. The HMBP must be submitted online through the California Environmental Reporting [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-04-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Tony Huerta, store manager , provided permission to inspect. The facility has one 220 gallon container for used oil, and a 55 gallon drum for used oil filters. The facility is a used oil and used filter collection site. A perimeter walk was conducted. Municipal dumpster does not appear to contain any hazardous waste. Manifests from Safety Kleen were available and reviewed. Emergency response information is posted and employees are reported to be trained. No hazardous waste violations were observed on this date. Inspection report mailed to facility and emailed to environmental contact regulatory@verisk3e.com

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110070930693

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Site Name:	G&M Oil Co. #43

G & M OIL #43 (Continued) **U001576902**

Violation Date:	03-23-2021
Citation:	23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)
Violation Description:	Failure of the functional line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping when a leak is detected.
Violation Notes:	Returned to compliance on 03/23/2021. The 87 line leak detector failed during testing. The line leak detector was repaired during the inspection, retested, and passed. No further action required.
Violation Division:	Orange County Environmental Health
Violation Program:	UST
Violation Source:	CERS,
Site ID:	118545
Site Name:	G&M Oil Co. #43
Violation Date:	05-08-2017
Citation:	23 CCR 6.7 25284, 25286 - California Code of Regulations, Title 23, Chapter 6.7, Section(s) 25284, 25286
Violation Description:	Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.
Violation Notes:	Returned to compliance on 06/07/2017. UST submission not accepted in CERS. Please make all required corrections and resubmit within 30 days.
Violation Division:	Orange County Environmental Health
Violation Program:	UST
Violation Source:	CERS,
Site ID:	118545
Site Name:	G&M Oil Co. #43
Violation Date:	03-17-2016
Citation:	23 CCR 16 2638 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2638
Violation Description:	Failure to test leak detection equipment as required every 12 months (VPH, sensor, LLD, ATG, etc.) and/or submit monitoring system certification to the CUPA within 30 days of completion of the test
Violation Notes:	Returned to compliance on 03/23/2016. The annual monitor certification and spill bucket testing was last done on 3/16/2017. The monitoring certifications are required within 12 months of the last certification. Violation abated at this time. Also noted, please modify the 9/23/2015 to present DO reports as they have the last monitor certification/spill bucket testing as 3/6/2015 instead of 3/16/2015. Modify to the accurate date.

Violation Description: Failure to maintain secondary containment (e.g. failure of secondary containment testing).
Violation Notes: Returned to compliance on 03/06/2018. 87 STP sump failed secondary containment testing. Please submit plans for the repair within 30 days.
Violation Division: Orange County Environmental Health
Violation Program: UST
Violation Source: CERS,

Site ID: 118545
Site Name: G&M Oil Co. #43
Violation Date: 04-08-2021
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes: Returned to compliance on 05/12/2021. The 87 spill bucket failed during the annual testing conducted on 3/23/2021. Please repair, re-test, and provide passing test results to this Agency within 30 days.
Violation Division: Orange County Environmental Health

Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes: Returned to compliance on 03/23/2021. The 87 spill bucket failed during testing. Spill bucket was repaired during the inspection, re-tested, and passed. No further action required.

Eval Notes: On site for a routine UST inspection, monitoring system certification, and spill bucket testing. Inspection was conducted with Kevin Kragen of G&M. The facility has 4 double-walled tanks (diesel, E85, 87, and 91) with pressurized piping. The UST system is monitored by an EMC system. The monitor is operational for audible and visual alarms. Flapper valves are used for overfill protection. Alarm history was reviewed. The sensors in the tank annulars (301 for E85 and 87; 302 for 91; 303 for diesel) and piping sumps (323 for E85; 208 for diesel, 87 and 91)) were tested and passed when submerged in fluid. Line leak detectors were tested and operational. UDC sensors (323 for E85 pumps 3, 4, 5, 6, 11, and 12; 208 for pumps 1, 2, 7, 8, 9, 10) were tested and passed passed. Spill bucket testing produced passing results Testing was conducted by Enrique Aguirre of Tank Tek. Technician certifications (ICC/ VR) were verified. Please submit the test reports to this agency within [Truncated]

Eval Notes: On site for routine UST inspection, monitoring system certification, and spill bucket testing. The facility has four double-walled tanks (87, 89, 91, D) monitored by a Veeder Root TLS-350R system. The site has double-walled pressurized piping with electronic line leak detectors. Positive shutdown and fail safe programming were verified. Flapper valves are used for overfill prevention. Testing was conducted by Robert Slunaker with Tank-Tek. Tester certifications (VR, ICC, VMI) were verified. Please submit the test reports to this Agency within 30 days. Secondary containment(SB989) testing was last conducted on 5/4/20. Overfill Prevention Inspection was last conducted on flappers on 3/23/21, and ball floats on 4,14,21. Overfill and SB989 must be tested every 3 years.

Eval Notes: Mark Sutphin at site to inspect UST facility modification SR0124998 .
I inspected the site with Kevin Kragen of G & M Oil. The facility converted the former diesel tank to E-85, the Supreme tank to diesel, the plus tank to supreme and the regular unleaded remained the same. New penetrations were installed in the E-85 tank sump and the three UDCs for E-85 dispensers. Veederoot 323 sensors were installed in the E-85 sumps and the three E -85 UDCs. The modifications were inspected and were correct per plan Check SR0124998. SB989 testing of sumps and UDCs was performed and passed on 8-14-15. Plan check can be closed

Eval Notes: On site to conduct an annual routine Hazardous Waste Inspection.
Facility contains: 2-55 gallon drums for flammable fuel waste one for liquids one for solids Hazardous waste containers are properly labeled and covered. All containers storing hazardous waste must be labeled with the following information: 1. The words HAZARDOUS Waste 2. Waste (name) 3. Hazardous property of the waste (e.g. toxic, flammable, corrosive, etc.) 4. Physical state of the waste (liquid or solid) 5. Name and address of the business. 6. Accumulation date (date the first drop of waste has been placed in container) Documents Available for review: 1. Hazardous waste Manifest/Receipts (keep a copy on site for three years). - Note: A copy of the federal manifest must be sent to

G & M OIL #43 (Continued) **U001576902**

DTSC. (Department of Toxic Substances Control, P.O. Box 400, Sacramento, CA 95812-0400). 2. Hazardous Waste Emergency Response information. Verified contact and owner information.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

Eval Notes: The company manufactures pen inks and parts. Review of the 00-01AR shows low pH and high TSS. The SWPPP could not be located during the inspection. Their consultant was contacted and said he would e-mail the plan in the same day. Staff discussed with the contact of the requirement to have a copy of the plan at the facility for use by their personnel and review by Board staff during inspections. Staff also asked that the plan be reviewed at least once a year. There was only five drums of chemical stored outside. All of them were inside contained area. A new water cooling container was just installed earlier in the day and it was leaking water to the storm swales. Mr.

THE HARTLEY CO (Continued) **1000414755**

Davis stated that the water had been turn off and the leak would be fixed later in the day.

Eval Type: Other, not routine, done by local agency
Eval Notes: Mr. Michael Quinley, the Vice President, contacted this Agency to inform that the facility no longer stores more than 55 gallons of petroleum products in an underground area. Mr. Quinley stated that all 55 gallon drums are now stored above grade, and that the clarifier tank stored in an underground area has been reduced to one compartment which stores less than 55 gallons. The following violations will be marked as unobserved: I085, I009, and I039. All violations have been corrected. No further action is required at this time. A copy of this inspection report will be emailed to davishartley@wmconnect.com; HARTLEYRACON@AOL.COM.

Eval Notes: The company manufactures pen inks and parts. Review of the 00-01AR shows low pH and high TSS. The SWPPP could not be located during the inspection. Their consultant was contacted and said he would e-mail the plan in the same day. Staff discussed with the contact of the requirement to have a copy of the plan at the facility for use by their personnel and review by Board staff during inspections. Staff also asked that the plan be reviewed at least once a year. There was only five drums of chemical stored outside. All of them were inside contained area. A new water cooling container was just installed earlier in the day and it was leaking water to the storm swales. Mr. Davis stated that the water had been turn off and the leak would be fixed later in the day.

Eval Notes: On site to conduct a routine recycling inspection. The site meets Exclusion HSC 25143.2(d)(1) for used machine oil. Michael Quinley, the Vice President, was present for the inspection. Machine oil is used to manufacture brass pen tips. The process causes the machine oil to accumulate waste brass scrap metal. The operator removes the machine oil from the process when saturated with brass shavings. The machine oil is placed into a 4 stage clarifier (located in the underground parking area). The tank is labeled Excluded Recyclable Material (ERM). The facility recycles less than 100 KG/month (approximately 22 gallons) of oil and therefore, no recyclable materials report was generated. The reclaimed machine oil is then put back into the manufacturing process on-site. Further, machine oil is reclaimed from the remaining brass shavings with the use of gravity filtering and is placed back into the manufacturing process on-site. Please maintain a log of the date and of oil [Truncated]

THE HARTLEY CO (Continued) **1000414755**

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 10/07/2021. Owner/Operator is a small quantity generator and failed to send hazardous waste offsite for treatment, storage, or disposal within 180 days: Used Tramos Economics Cleaner - 55 gallon drum Used oil - two 55 gallon drums Solvent ink waste - 55 gallon drum Gel ink waste - 55 gallon drum Waste Bio T-Max - 55 gallon drum CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit. Provide documentation that the violation has been corrected to the Agency by email or mail within 30 days.

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: The company manufactures pen inks and parts. Review of the 00-01AR shows low pH and high TSS. The SWPPP could not be located during the inspection. Their consultant was contacted and said he would e-mail the plan in the same day. Staff discussed with the contact of the requirement to have a copy of the plan at the facility for use by their personnel and review by Board staff during inspections. Staff also asked that the plan be reviewed at least once a year. There was only five drums of chemical stored outside. All of them were inside contained area. A new water cooling container was just installed earlier in the day and it was leaking water to the storm swales. Mr. Davis stated that the water had been turn off and the leak would be fixed later in the day.

Eval Notes: On site to conduct a routine recycling inspection. The site meets Exclusion HSC 25143.2(d)(1) for used machine oil. Michael Quinley, the Vice President, was present for the inspection. Machine oil is used to manufacture brass pen tips. The process causes the machine oil to accumulate waste brass scrap metal. The operator removes the machine oil from the process when saturated with brass shavings. The machine oil is placed into a 4 stage clarifier (located in the underground parking area). The tank is labeled Excluded Recyclable Material (ERM). The facility recycles less than 100 KG/month (approximately 22 gallons) of oil and therefore, no recyclable materials report was generated. The reclaimed machine oil is then put back into the manufacturing process on-site. Further, machine oil is reclaimed from the remaining brass shavings with the use of gravity filtering and is placed back into the manufacturing process on-site. Please maintain a log of the date and of oil [Truncated]

Site History:	The current site building (1726 Superior Avenue) was constructed in at least 1947 and was occupied by a roller skating rink until 1982, when the building was converted to a Liquor Barn. In 1992, it was converted to Tower Records. Tower Records occupied the building, which is currently vacant, until 2006. Belond Muffler occupied a building (1740 Superior Avenue) in the northeast portion of the property from 1961 until at least 1971, when the building was occupied by Steam Master Carpet Cleaners. Some time prior to 1981 the building was occupied by Ralph s Discount Furniture. The 1740 Superior Avenue building was demolished by 1990. a Phase I Environmental Site Assessment (ESA 2; BV, 2007b); a limited subsurface investigation (BV, 2007a); a subsurface investigation (ATC, 2008); pilot testing (ATC, 2009b); and, groundwater monitoring and sampling (ATC, 2009a).

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

RWQCB Region:	SANTA ANA RWQCB (REGION 8)
Site History:	The primary chemical contaminant at the site is TCE; however, other compounds were detected at concentrations of concern, including: cis1,2-dichloroethylene (DCE), 1,1-DCE, vinyl chloride, tetrachloroethylene (PCE), 1,2-dichloroethane (DCA), methyl tertiary butyl ether (MtBE) and benzene. Depth-discrete groundwater sampling indicated the likelihood that a region of dense non-aqueous phase liquid (DNAPL) was present at the base of the shallow water-bearing zone beneath a portion of the west side of the site. This conclusion was based on the large vertical concentration gradient and the maximum concentration of trichloroethylene (TCE) of 71,000 micrograms per liter (g/l) at CPT10. The lateral extent of the expected DNAPL was estimated based on the VOC concentrations greater than 10,000 g/l in groundwater samples from the lower portion of the shallow water-bearing zone that lies above the fine-grained Monterey Formation. Groundwater in the western portion of the site was remediated using in-situ chemical oxidation. Concentrations of chemicals of concern in soil vapor were present across the site and are being mitigated during development using engineered controls, including geotextiles, passive venting systems and other land use constraints.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
STATE MASTER
HAZARDOUS WASTE BIENNIAL REPORTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

COSTA MESA DISPOSAL (Continued) **1000594824**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Eval Date: 09-08-2010
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Contact was unable to produce a SWPPP; produced a "rough draft" SWPPP instead. Found two large batteries against the rear-central wall of site. One battery was damaged and leaking. Found a closed 5-gal bucket out in the open along south fence with small pool of oil on the lid. Found another bucket out in the open in a household 'recycling' bin; both the bucket and the bin had no lids and the bucket contained an oil filter and a small quantity of oil and other domestic waste. Found a hobby car stored covered on site with a spill of an unidentifiable material beneath it. Found animal waste scattered in the bin storage

COSTA MESA DISPOSAL (Continued) **1000594824**

area belonging to a small dog living in an RV parked on site. Storage area for the site's fleet trucks had extensive oil staining on the ground indicative of chronic leaks; 'rough draft' SWPPP alleges that "absorbents, drip pans, and spill kits [are] on hand' but evidently not in use. Site is otherwise neat and orderly. Site has three drop inlets: one within the diked vehicle maintenance area (contains an apparent sump pump); one within the diked fueling/vehicle washing area (with a metal fixture inside surrounding the outlet pipe); and one in the ribbon gutter leading to the street (plugged with dirt). SWPPP only identifies 2, stating that they drain to "sanitation". All drainage areas would allow rainwater to enter the inlets. Contact was unaware of the drainage design of the site and unable to explain.

Eval Notes:	On site for a routine UST inspection, monitoring system certification, and spill bucket testing. Testing was conducted by the DO, John Reily of RPFS. The facility has 1 double-walled diesel tank with pressurized piping. The UST system is monitored by a VR TLS-300C system. The monitor is operational for audible and visual alarms. Flapper valves are used for overfill protection. Alarm history was reviewed. The sensors in the tank annulars (VR 420) and piping sumps (VR 208) were tested and passed when submerged in fluid. Line leak detectors could not be tested at this time. Please document repairs and submit testing results when complete. UDC float chain was tested and did not pass. Spill bucket testing was completed after inspector departure. Testing was conducted by John Reily of RPFS. Technician certifications (ICC /VR) were verified. Please submit the test reports to this agency within 30 days. The current permit and training documents from the last 12 months. DO [Truncated]

Violation Date:	03-10-2021
Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Returned to compliance on 03/17/2021. Facility failed to retain the Overfill Prevention Equipment inspection report dated 6/14/19 (re-test). Notify this agency within 30 days of obtaining a copy of the test report and maintaining the document on site.

Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Contact was unable to produce a SWPPP; produced a "rough draft" SWPPP instead. Found two large batteries against the rear-central wall of site. One battery was damaged and leaking. Found a closed 5-gal bucket out in the open along south fence with small pool of oil on the lid. Found another bucket out in the open in a household 'recycling' bin; both the bucket and the bin had no lids and the bucket contained an oil filter and a small quantity of oil and other domestic waste. Found a hobby car stored covered on site with a spill of an unidentifiable material beneath it. Found animal waste scattered in the bin storage area belonging to a small dog living in an RV parked on site. Storage area for the site's fleet trucks had extensive oil staining on the ground indicative of chronic leaks; 'rough draft' SWPPP alleges that "absorbents, drip pans, and spill kits [are] on hand' but evidently not in use. Site is otherwise neat and orderly. Site has three drop inlets: one within the diked vehicle maintenance area (contains an apparent sump pump); one within the diked fueling/vehicle washing area (with a metal fixture inside surrounding the outlet pipe); and one in the ribbon gutter leading to the street (plugged with dirt). SWPPP only identifies 2, stating that they drain to "sanitation". All drainage areas would allow rainwater to enter the inlets. Contact was unaware of the drainage design of the site and unable to explain.

Eval Notes: On site for a routine UST inspection, monitoring system certification, and spill bucket testing. Testing was conducted by the DO, John Reily of RPFS. The facility has 1 double-walled diesel tank with pressurized piping. The UST system is monitored by a VR TLS-300C system. The monitor is operational for audible and visual alarms. Flapper valves are used for overfill protection. Alarm history was reviewed. The sensors in the tank annulars (VR 420) and piping sumps (VR 208) were tested and passed when submerged in fluid. Line leak detectors could not be tested at this time. Please document repairs and submit testing results when complete. UDC float chain was tested and did not pass. Spill bucket testing was completed after inspector departure. Testing was conducted by John Reily of RPFS. Technician certifications (ICC /VR) were verified. Please submit the test reports to this agency within 30 days. The current permit and training documents from the last 12 months. DO [Truncated]

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 02/08/1991
Comments: PA report was reviewed by Region 4 staff. The site is now a condominium development located at the end of 19th Street in the NW corner of Newport Beach, Orange County. The condos were constructed under RWQCB oversight in 1972. The area overwhich the condos were constructed was formerly Newport City Dump #1, a Class II landfill.

Completed Document Type:	Site Screening
Completed Date:	04/25/1995
Comments:	RWQCB INVESTIGATING THE HUGHES SITE FOR PCE AND TCE CONTAMINATION IN GROUNDWATER. 12/06/94 FILE INDICATES ORANGE CO HEALTH CARE AGENCY (OCHCA) ISSUED THE PERMIT TO OPERATE USTS. IN 1991 OCHCA REQUESTED AN INVESTIGATION OF A POSSIBLE UNDERGROUND FUEL STORAGE TANK THAT HAD BEEN REMOVED FROM THE SITE. OCHCA CONDUCTED A REMEDIAL INVESTIGATION

NEWPORT BEACH CORPORATE YARD (Continued) **S108241203**

THAT INCLUDED SUBSURFACE SAMPLING AT THE FORMER TANK AREA. SITE IS LOCATED ADJACENT TO HUGHES AIRCRAFT CO. HUGHES IS CURRENTLY UNDER INVESTIGATION BY RWQCB. NFA FOR DTSC.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	06/29/1992
Comments:	The Preliminary Assessment report was screened by R-4 staff. There are problems in the area of methane gas escaping when- ever excavation is done. The RWQCB is investigating the Hughes site for PCE and TCE contamination in groundwater. Staff recommends low priority PEA.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D011
Waste Description: Silver

Waste Code: D028
Waste Description: 1,2-Dichloroethane

Waste Code: D040
Waste Description: Trichlorethylene

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

RAYTHEON COMPANY (Continued) **1000240988**

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F007
Waste Description: Spent Cyanide Plating Bath Solutions From Electroplating Operations.
