Environmental Assessment
Determinations and Compliance Findings for HUD-assisted Projects
24 CFR Part 58

Project Information

Project Name: Mercury Senior Apartments

Responsible Entity: County of Orange
1501 E. St. Andrew Place, 1st Floor
Santa Ana, California 92705

Grant Recipient: C&C Development

State/Local Identifier: California/059

Preparer: Francisco Padilla
Community Development and Administration Manager
OC Housing and Community Development

Certifying Officer Name and Title: Julia Bidwell
Director
OC Housing and Community Development

Consultant (if applicable): Dudek
425 Front Street, Suite 400
Santa Cruz, CA 95060

Direct Comments to: Ernest Hernandez
Compliance and Environmental Coordinator
OC Housing and Community Development
(714) 480-2918
Ernest.Hernandez@occr.ocgov.com

Project Location: Unaddressed parcel located at the southeast corner of Berry Street and Mercury Lane, Brea, CA, 92821.

Additional Location Information: The project site is located on the southeast corner of the Berry Street/Mercury Lane intersection in the City of Brea, Orange County, CA (Assessor's Parcel Number [APN] 296-141-05) (see **Figure 1**).

Description of the Proposed Project [24 CFR 50.21 & 58.32]**:**
The Mercury Senior Apartments (project) involves the construction of a new 5-story, approximately 81,445-square-foot affordable housing development for seniors (aged 62 and older) on an approximately 1.01-acre vacant site. The project would be developed by C&C Development (C&C or the Applicant) and managed by Advanced Property Services Management, Inc. (APS), a wholly owned subsidiary of C&C with over 30 years of experience managing affordable housing communities throughout Southern California.

The project would consist of a single L-shaped residential building located along the northern and western boundaries of the site and containing a total of 85 dwelling units (see **Figure 2**). The unit mix would include 68 one-bedroom units (approximately 595 square feet each) and 17 two-bedroom units (approximately 800 square feet each). One two-bedroom unit would be reserved for an on-site property manager. Of the 84 units available for lease, 74 units would be income restricted to households earning between 30% and 70% of the Area Median Income (AMI) for Orange County. The remaining 10 one-bedroom units would be designated- as Permanent Supportive Housing units for individuals experiencing homelessness with household earnings at 30% of the AMI.

The ground floor would include building support and resident amenity spaces, including a community game room, fitness room, laundry room, lobby and leasing office, mail room, bicycle room, outdoor patio area, maintenance room, utility and storage areas, and a trash room. A rooftop deck would be located on the fifth floor. Residential units would be located on floors two through five, with tuck-under parking provided on the ground floor. A total of 63 parking spaces would be provided, including 24 tuck-under spaces and 39 surface parking spaces. Vehicular access to the site would be provided via a driveway on Mercury Lane at the northeastern corner of the property.

The building would feature a modern architectural design intended to complement the surrounding neighborhood and create a visually prominent and functional landmark at the Berry Street and Mercury Lane intersection. The façade would utilize a combination of materials, textures, varied window treatments, and balcony elements to create visual interest and relate to the historical and urban character of the area.

The project site is located within the Brea Core Specific Plan Area, a mixed commercial and industrial district situated just west of Downtown Brea. The project site and surrounding area are fully developed with existing urban infrastructure, including roadways, utilities, and commercial and industrial development. Surrounding land uses include light and general industrial operations, commercial offices, and manufacturing facilities. A railroad spur is located approximately 0.1 miles north of the site but is no longer active, and freight activity in the area is minimal.

The project site is currently zoned Industrial Commercial (C-M) with a General Plan land use designation of Specific Plan – Brea Core Study Area. With adoption of the Brea Core Specific Plan, the site would be rezoned to Mixed Use (MU-50) to allow residential development consistent with the proposed project.

Construction would result in ground disturbance throughout the 1.01-acre parcel, with excavation extending to a maximum depth of approximately 7 feet.

Statement of Purpose and Need for the Proposal:
The purpose of the project is to develop 85 units of affordable rental housing for senior households, including PSH units, to address unmet housing needs within the City of Brea and the broader Orange County region. The project is intended to provide safe, decent, and affordable housing opportunities for seniors earning between 30% and 70% of the AMI, as well as supportive housing for individuals experiencing homelessness, consistent with federal, state, and local housing policy objectives.

The project is needed due to a persistent shortage of affordable rental housing in Orange County, particularly for lower-income and senior households, in a region characterized by high housing costs, limited affordable housing supply, and constrained land availability. According to the U.S. Department of Housing and Urban Development's (HUD) Comprehensive Housing Market Analysis for the Anaheim–Santa Ana–Irvine Housing Market Area, dated January 1, 2022, the rental market was classified as tight, with a vacancy rate of only 4.0 percent, and a projected demand for 14,200 new rental units over a 3-year period, compared to just 6,000 units under construction (HUD 2022). These conditions indicate a substantial shortfall in housing supply, particularly at affordable rent levels.

At the local level, the need for affordable housing is further documented by the Southern California Association of Governments (SCAG) Regional Housing Needs Allocation (RHNA) for the 2021-2029 planning period, which requires the City of Brea to accommodate 2,365 new housing units, including 669 very-low-income units, 393 low-income units, and 403 moderate-income units (SCAG 2021). The project would directly contribute to meeting these state-mandated housing goals by providing income-restricted senior housing and PSH on an infill site served by existing urban infrastructure.

Existing Conditions and Trends [24 CFR 58.40(a)]**:**
Based on a review of historical aerial photographs of the project site obtained from Environmental Data Resources (EDR), the project site was developed as agricultural land from approximately 1927 until 1995, at which time it transitioned back to undeveloped land. The project site has remained undeveloped since 1995 and currently consists of unpaved, compacted dirt and gravel. Site conditions are characterized by exposed soil with minimal vegetation and evidence of prior grading and surface disturbance. There are no existing permanent structures or paved surfaces on the site. Temporary features are present and include trailers, pickup trucks and other vehicles, a portable restroom, and storage sheds.

The project site is bordered to the south and southeast by large office buildings and a multi-story parking structure. To the east is a commercial manufacturing facility. North of the site, across Mercury Lane, are additional light industrial businesses, including manufacturing and product distribution uses. To the northeast is a business complex with a mix of retail and industrial tenants. To the northwest, across South Berry Street, are additional industrial and commercial service providers.

Funding Information

Grant Number	HUD Program	Funding Amount
N/A	8 Housing Choice Project-Based Vouchers	$3,582,720 (20-year estimated value)

Estimated Total HUD Funded Amount: $3,582,720

Estimated Total Project Cost (HUD and non-HUD funds) [24 CFR 58.32(d)]**:** $44,027,454

Compliance with 24 CFR 50.4, 58.5, and 58.6 Laws and Authorities

Record below the compliance or conformance determinations for each statute, executive order, or regulation. Provide credible, traceable, and supportive source documentation for each authority. Where applicable, complete the necessary reviews or consultations and obtain or note applicable permits of approvals. Clearly note citations, dates/names/titles of contacts, and page references. Attach additional documentation as appropriate.

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
STATUTES, EXECUTIVE ORDERS, AND REGULATIONS LISTED AT 24 CFR 50.4 and 58.6		
Airport Hazards 24 CFR Part 51 Subpart D	Yes ☐ No ☒	HUD's policy is to apply standards to prevent incompatible development around civil airports or military airfields, consistent with Title 24 of the Code of Federal Regulations (CFR), Part 51, Subpart D. The project site is not located within 15,000 feet of a military airport or 2,500 feet of a civilian airport. The nearest civilian airport is Fullerton Municipal Airport, located approximately 5 miles (31,680 feet) southwest of the site. The nearest military airport is Los Alamitos Army Airfield, located approximately 11 miles (68,640 feet) southwest of the site. Therefore, the project is in compliance with airport hazards requirements (see **Attachment 1**; see **Airport Hazards Worksheet**).
Coastal Barrier Resources Coastal Barrier Resources Act, as amended by the Coastal Barrier Improvement Act of 1990 [16 USC 3501]	Yes ☐ No ☒	The Coastal Barrier Resources Act (CBRA) and the Coastal Barrier Improvement Act (CBIA) restrict federal financial assistance within designated Coastal Barrier Resources System (CBRS) units to protect natural coastal resources and reduce development risks in hazard-prone coastal areas. CBRS designations apply primarily to the Atlantic and Gulf coasts, the Great Lakes, Puerto Rico, and the U.S. Virgin Islands. No CBRS units are designated along the Pacific Coast. The project is located in California, which does not contain CBRS units. Therefore, the project is in compliance with the CBRA and CBIA (see **Attachment 2**).
Flood Insurance Flood Disaster Protection Act of 1973 and National Flood Insurance Reform Act of	Yes ☐ No ☒	The Flood Disaster Protection Act of 1973 requires flood insurance for federally assisted projects located in Special Flood Hazard Areas (SFHAs), as identified by the Federal Emergency Management Agency (FEMA). SFHAs are areas subject to a 1%-annual-chance flood (100-year flood) and are labeled on

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
1994 [42 USC 4001-4128 and 42 USC 5154a]		FEMA maps with zones beginning with A or V. Properties in these zones must carry flood insurance through the National Flood Insurance Program (NFIP). Areas outside SFHAs, such as Zone X (shaded or unshaded), B, or C, are not subject to this requirement, though insurance is available in participating communities. FEMA Flood Insurance Rate Maps (FIRMs), numbers 06059C0041J and 06059C0042J, effective December 3, 2009, show that the project site is located within Zone X (shaded), an area with a 0.2% annual chance flood hazard (i.e., 500-year floodplain). Therefore, the project site is not located within a FEMA-designated SFHA. While flood insurance is not mandatory for the project, HUD recommends that all insurable structures maintain flood insurance under the NFIP. According to the NFIP Community Status Book (FEMA 2025), the City of Brea and County of Orange participate in the NFIP (Community Identification Numbers 060214# and 060222C, respectively). The project is in compliance with flood insurance requirements (see **Attachment 3**; see **Flood Insurance Worksheet**).
STATUTES, EXECUTIVE ORDERS, AND REGULATIONS LISTED AT 24 CFR 50.4 & 58.5		
Clean Air Clean Air Act, as amended, particularly section 176(c) & (d); 40 CFR Parts 6, 51, 93	Yes ☐ No ☒	The Clean Air Act, administered by the U.S. Environmental Protection Agency (EPA), aims to protect human health and welfare from air pollution. Revised in 1990, it sets National Ambient Air Quality Standards (NAAQS) for six criteria pollutants: particulate matter (PM_{10} and $PM_{2.5}$), sulfur dioxide (SO_2), nitrogen dioxide (NO_2), ozone (O_3), carbon monoxide (CO), and lead. Geographic areas that meet the NAAQS are designated as attainment areas, while those that do not are designated as nonattainment areas. Nonattainment areas that later achieve compliance enter a maintenance phase to prevent future violations. Section 176(c) requires federal actions to conform to the State Implementation Plan to ensure that they do not cause new air quality violations, worsen existing violations, or delay timely attainment of the NAAQS.

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		Federal conformity regulations establish *de minimis* emission thresholds, below which a formal conformity determination is not required; these thresholds vary by pollutant and attainment status as provided at 40 CFR § 93.153(b)(1) and (b)(2). The project site is located in the South Coast Air Basin (SoCAB), which includes all of Orange County and the urbanized portions of Los Angeles, Riverside, and San Bernardino counties, under the jurisdiction of the South Coast Air Quality Management District (SCAQMD). The SoCAB is designated as extreme nonattainment for O_3, serious nonattainment for $PM_{2.5}$, and partial nonattainment for lead (i.e., Orange County is in attainment but Los Angeles County within the SoCAB is in nonattainment) (EPA 2026). The SoCAB is designated as maintenance for PM_{10}, CO, and NO_2. Project construction and operation would generate criteria air pollutant emissions. Construction-related emissions would primarily result from diesel-powered construction equipment and associated heavy-duty truck trips, as well as fugitive dust emissions (PM_{10} and $PM_{2.5}$) generated during grading and site preparation activities. The project would be required to comply with SCAQMD Rule 403, which requires the implementation of best available dust control measures during activities capable of generating fugitive dust. Construction emissions would vary over time based on construction phasing and activity levels. Long-term operational emissions would result from motor vehicle trips, energy and water use, landscape maintenance equipment, and the generation of solid waste and wastewater. The California Emissions Estimator Model (CalEEMod) Version 2022.1.1.35 was used to estimate emissions from the construction and operational phases of the project. As shown in **Table 1**, annual construction and operational emissions would be below *de minimis* thresholds.

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations

Table 1. Estimated Annual Construction and Operational Criteria Air Pollutant Emissions

Criteria Pollutant	Annual Construction Emissions (tpy)	Annual Operational Emissions (tpy)	*De Minimis* Threshold (tpy)	Thresholds Exceeded?
VOC	0.30	0.64	10	No
NO_x	0.62	0.30	10	No
CO	0.88	3.1	100	No
SO_x	<0.01	0.01	N/A	N/A
PM_{10}	0.09	0.70	100	No
$PM_{2.5}$	0.04	0.18	70	No

The SCAQMD has also established significance thresholds to determine whether a project would have a significant adverse effect on air quality (SCAQMD 2023). As shown in **Table 2** and **Table 3**, the maximum unmitigated daily construction and operational emissions from the project would not exceed the SCAQMD's regional construction or operation emissions thresholds.

Table 2. Estimated Unmitigated Maximum Daily Construction Criteria Air Pollutant Emissions

Criteria Pollutant	Maximum Daily Construction Emissions (lbs/day)	SCAQMD Significance Threshold (lbs/day)	Thresholds Exceeded?
VOC	51	75	No
NO_x	13	100	No
CO	15	550	No
SO_x	0.02	150	No
PM_{10}	3.5	150	No
$PM_{2.5}$	1.9	55	No

<table>
<tr><th>**Compliance Factors**: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</th><th>Are formal compliance steps or mitigation required?</th><th>Compliance determinations</th></tr>
<tr><td></td><td></td><td>

Table 3. Estimated Unmitigated Maximum Daily Operational Criteria Air Pollutant Emissions

Criteria Pollutant	Maximum Daily Operational Emissions (lbs/day)	SCAQMD Significance Threshold (lbs/day)	Thresholds Exceeded?
VOC	3.8	75	No
NO_x	1.6	100	No
CO	20	550	No
SO_x	0.04	150	No
PM_{10}	4.1	150	No
$PM_{2.5}$	1.1	55	No

In summary, project emissions would be below *de minimis* levels and SCAQMD significance thresholds, in accordance with HUD guidance. Therefore, the project is in compliance with the Clean Air Act (see **Attachment 4**; see **Air Quality Worksheet**).
</td></tr>
<tr><td>**Coastal Zone Management**

Coastal Zone Management Act, sections 307(c) & (d)</td><td>Yes ☐ No ☒</td><td>The Coastal Zone Management Act (CZMA) of 1972 (16 U.S.C. 1451 et seq.), administered at the federal level by the Coastal Programs Division within the National Oceanic and Atmospheric Administration's Office of Ocean and Coastal Resource Management (NOAA-OCRM), requires that projects with the potential to affect the coastal zone be carried out in a manner consistent with the state's federally approved coastal zone management program under Section 307(c) and (d) of the CZMA. In California, the California Coastal Commission (CCC) implements the State's Coastal Management Program pursuant to the California Coastal Act, including oversight of development within the state's coastal zone. The California Coastal Act requires that individual jurisdictions adopt a Local Coastal Program (LCP) to implement the California Coastal Act at the local level. Generally, development activity within the coastal</td></tr>
</table>

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		zone requires a Coastal Development Permit from the CCC or local government with a certified LCP. The project site is not located within the coastal zone and is situated approximately 15 miles inland from the coastal zone boundary. Therefore, the project is in compliance with the CZMA (see **Attachment 5**; see **Coastal Zone Management Worksheet**).
Contamination and Toxic Substances 24 CFR Part 50.3(i) & 58.5(i)(2)	Yes ☒ No ☐	HUD policy, as described in Section 50.3(i) and Section 58.5(i)(2), requires all property proposed for use in HUD programs to be free of hazardous materials, contamination, toxic chemicals and gases, and radioactive substances, where a hazard could affect the health and safety of occupants or conflict with the intended utilization of the property. Integrated Property Analysis, Inc. (IPA) prepared a Phase I Environmental Site Assessment (ESA) for the project site in July 2025, which found no evidence of recognized environmental conditions (RECs), historical RECs, controlled RECs, or *de minimis* conditions associated with the property. IPA's Phase I ESA included a review of the findings of a Phase I and Phase II ESA completed by Dynamic Earth Consultants (DEC) in March 2012, which included limited soil sampling conducted to assess potential pesticide-related impacts associated with historic agricultural use of the site. Soil samples were analyzed for organochlorine pesticides (OCPs) and polychlorinated biphenyls (PCBs), including DDT/DDE. No chemicals of concern were detected at concentrations exceeding applicable screening or action thresholds, indicating that significant releases of pesticide products had not occurred at the sampled locations and no further action was warranted. During the July 2025 reconnaissance, IPA observed no evidence of aboveground or underground storage tanks, pipelines, or storage of petroleum products or other hazardous materials on site. In addition, no excessive odors, spills, staining, or accumulation of debris were observed. Because the site does not contain

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		any existing structures, no suspect asbestos-containing materials or lead-based paint were observed. HUD requires new multifamily construction projects to follow radon-resistant construction requirements in accordance with standards developed by the American Association of Radon Scientists and Technologists (AARST) in collaboration with the American National Standards Institute (ANSI) for Soil Gas Control Systems in New Construction of Buildings (ANSI-AARST CC-1000-2018). This standard provides minimum requirements for construction of buildings intended for human occupancy, except for one- and two-family dwellings, to reduce occupant exposure to radon and other hazardous soil gases. HUD also requires post-construction radon testing prior to final completion inspection per Section 9.6.3.5 of the MAP Guide (HUD 2021). If indoor radon levels exceed the EPA action level of 4.0 picoCuries per liter (pCi/L), mitigation is required. Implementation of **MM-TOX-1** would ensure compliance with HUD's radon requirements by requiring post-construction radon testing, followed by mitigation if testing determines that radon levels are at or above the EPA action level. This Environmental Review Record (ERR) will be updated with the radon evaluation and proof of any required mitigation when complete prior to project occupancy. With incorporation of the mitigation measures outlined above, the project is in compliance with HUD's requirements related to contamination and toxic substances (see **Attachment 6**; see **Contamination and Toxic Substances Worksheet**).
Endangered Species Endangered Species Act of 1973, particularly section 7; 50 CFR Part 402	Yes ☐ No ☒	The Endangered Species Act (ESA) of 1973, as amended, is intended to protect and recover species in danger of extinction and the habitats upon which they depend. The environmental review of a proposed project must consider potential impacts to endangered and threatened species and designated critical habitat. A "no effect" determination may be made where project activities have no potential to affect federally listed species or critical habitat.

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		An official species list was requested from U.S. Fish and Wildlife Service (USFWS) using its Information for Planning and Consultation (IPaC) tool on April 14, 2026. The list identified 7 threatened, endangered, or candidate species under USFWS jurisdiction that have the potential to occur in the project area: • **Birds:** Coastal California gnatcatcher (*Polioptila californica californica*), least Bell's vireo (*Vireo bellii pusillus*), southwestern willow flycatcher (*Empidonax traillii extimus*) • **Reptiles:** Southwestern pond turtle (*Actinemys pallida*) • **Amphibians:** Western spadefoot (*Spea hammondii*) • **Insects:** Monarch butterfly (*Danaus plexippus*) • **Flowering Plants:** Nevin's barberry (*Berberis nevinii*) However, there are no designated or proposed critical habitats within the project area. Furthermore, the project site is currently vacant, disturbed land and is located in a developed area. Therefore, it is unlikely that special-status species occur on site. The project would have no effect on listed species or critical habitats under USFWS jurisdiction. Therefore, the project is in compliance with the Endangered Species Act (see **Attachment 7**; see **Endangered Species Act Worksheet**).
Explosive and Flammable Hazards 24 CFR Part 51 Subpart C	Yes ☐ No ☒	Regulations set forth in 24 CFR Part 51 Subpart C require HUD-assisted projects to maintain an acceptable separation distance (ASD) from facilities that store, handle, or process hazardous substances to protect project occupants from potential injury in the event of a fire or explosion involving flammable or explosive substances. The distance is determined based on the type and volume of materials stored in aboveground storage tanks (ASTs). Projects that do not meet the ASD may be required to implement mitigation measures.

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		A search of the California Environmental Protection Agency (CalEPA) Regulated Site Portal was conducted on January 1, 2026, to identify facilities with aboveground petroleum or chemical storage within a 1-mile radius of the project site (CalEPA 2026). The search identified 116 facilities. HUD's ASD Assessment Tool was used to calculate the minimum required separation distance between the project site and each of the facilities, conservatively assuming that all hazardous materials are stored in unpressurized, un-diked ASTs. Of the facilities identified, eight did not meet the ASD required based on reported chemical storage volumes; five of these facilities store substances listed in Appendix I of 24 CFR Part 51 Subpart C. The five facilities that did not meet HUD's required ASD include Albertson's Distribution Center (200 North Puente Street), Crimson Pipeline Stewart Station (985 Challenger Street), Dr. Squatch Bricc City (114 South Berry Street), Mercury Insurance Group (555 West Imperial Highway), and Moravek Biochemicals Inc. (577 Mercury Lane). In accordance with 24 CFR § 51.205(c) and HUD's ASD Guidebook, further evaluation was conducted to determine whether natural or man-made barriers are present that obstruct a direct line of sight between the hazard and the project site, which may justify reduction or elimination of the ASD requirement. Based on a review of Google Earth Street View imagery, intervening buildings block direct lines of sight between the project site and the Albertson's Distribution Center and Crimson Pipeline Stewart Station facilities. The Dr. Squatch, Mercury Insurance Group, and Moravek Biochemicals facilities are adjacent to the project site; however, ASTs at these locations are situated within enclosed buildings, with no direct line of sight to the project site. Accordingly, the project would not expose project occupants to risk of injury from a potential fire or explosion, and no mitigation is required. Therefore, the project is in compliance with 24 CFR Part 51 Subpart C (see

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		Attachment 8; see **Explosive and Flammable Hazards Worksheet**).
Farmlands Protection Farmland Protection Policy Act of 1981, particularly sections 1504(b) and 1541; 7 CFR Part 658	Yes ☐ No ☒	The purpose of the Farmland Protection Policy Act (FPPA) (7 U.S.C. § 4201 et seq.; implementing regulations 7 CFR Part 658) is to minimize the unnecessary and irreversible conversion of farmland to nonagricultural uses as a result of federal programs. According to the California Department of Conservation's (DOC's) California Important Farmland Finder (DOC 2022), the project site and surrounding area are designated as "Urban and Built-up Land," which includes land that is "used for residential, industrial, commercial, construction, institutional, public administration, railroad and other transportation yards, cemeteries, airports, golf courses, sanitary landfills, sewage treatment, water control structures, and other developed purposes." No farmland is located on or near the project site, and the project would not result in the conversion of farmland to non-agricultural use. Therefore, the project is in compliance with the FPPA (see **Attachment 9**; see **Farmlands Protection Worksheet**).
Floodplain Management Executive Order 11988, particularly section 2(a); 24 CFR Part 55	Yes ☒ No ☐	Executive Orders 11988, 13690, and 14030, and HUD's implementing regulations at 24 CFR Part 55, require evaluation of floodplain impacts and use of the Federal Flood Risk Management Standard (FFRMS) floodplain. For non-critical actions, including residential housing, the FFRMS floodplain corresponds to the 0.2-percent-annual-chance (500-year) floodplain, where mapped. The proposed project is a non-critical action. The project site is located within the FFRMS floodplain, as defined by the 0.2-percent-annual-chance floodplain approach (0.2PFA). FEMA FIRMs 06059C0041J and 06059C0042J, effective December 3, 2009, identify the site as Zone X (shaded), which is within the 500-year floodplain for the Brea Canyon Channel; therefore, the 8-step floodplain decision-making process applies (see **Attachment 10**). In addition, the applicable Flood Insurance Study (FIS) flood profile for the Brea Canyon Channel indicates that the 500-year flood elevation at the project vicinity

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		is 340.5 feet. Topographic information obtained from the USGS National Map indicates that existing site elevations range from approximately 338.3 feet to 343.1 feet, with an average ground elevation of approximately 341.2 feet, placing portions of the site at or near the 500-year flood elevation. Site topography slopes downward to the south at an estimated gradient of approximately 1-2% (SoCalGeo 2018). An Early Notice and Public Review of a Proposed Activity in a FFRMS Floodplain was published by OC Housing and Community Development on its website on April 7, 2026, and public comments were accepted through April 23, 2026. No public comments were received. Practicable alternatives were evaluated, including the No Action Alternative, Alternative Sites, and Design or Density Alternatives. The No Action Alternative would not meet the project's purpose and need for affordable senior housing and permanent supportive housing. No practicable alternative sites outside the FFRMS floodplain were identified that could accommodate the project, and design alternatives would not avoid floodplain impacts because the entire site lies within the 500-year floodplain. The project would affect approximately 1.01 acres of the 500-year floodplain and result in an increase in impervious surface area; however, the site is previously disturbed and highly urbanized, with limited natural or beneficial floodplain functions. The project would incorporate stormwater management, erosion control, and drainage measures consistent with state and local requirements to minimize flood risk and impacts. Development would occur on an infill parcel where floodplain processes are already managed by engineered infrastructure. HUD requires that the lowest floor, including mechanical and utility systems, be elevated to or above the FFRMS floodplain elevation. Accordingly, **MM-FP-1** requires the project to be designed so that the lowest finished floor elevation is at or above 340.5 feet,

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		corresponding to the FFRMS floodplain elevation associated with the Brea Canyon Channel. Based on completion of the 8-step process, no practicable alternative exists to locating the project within the FFRMS floodplain, and all practicable measures to minimize harm have been incorporated. A Final Notice and Public Explanation for a Proposed Activity in a FFRMS Floodplain will be published concurrently with the Finding of No Significant Impact (FONSI). Therefore, the project is in compliance with floodplain management requirements (see **Attachments 3** and **10**; see **Floodplain Management Worksheet**).
Historic Preservation National Historic Preservation Act of 1966, particularly sections 106 and 110; 36 CFR Part 800	Yes ☒ No ☐	The National Historic Preservation Act (NHPA) (16 U.S.C. 470 et seq.) directs federal agencies and tribal, state, and local governments that assume federal responsibilities, to protect historic properties and to avoid, minimize, or mitigate adverse effects that may result from agency actions. The review process, known as Section 106 review (36 CFR Part 800) emphasizes early consideration of historic places and consultation with interested parties including the State Historic Preservation Officer (SHPO) and/or Tribal Historic Preservation Officer (THPO). Dudek prepared a Cultural Resources Constraints Analysis and a Built Environment Inventory and Evaluation Report for the project to determine whether the project would affect historic properties pursuant to the NHPA. The APE for archaeological resources consists of the approximately 1.01-acre undeveloped project site. The APE for built environment resources includes the project site and five adjacent properties built prior to 1981 (located at 550 Mercury Lane and 111, 221, 233, and 114 South Berry Street), where indirect effects could occur. A records search of the California Historical Resources Information System was conducted for the APE and a 1-mile radius. The search identified 31 prior cultural resources studies within 1 mile of the site, including

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		one study overlapping the APE. No previously recorded resources were identified within the APE. Previously recorded resources within 1 mile of the APE include one historic-era shell scatter determined ineligible for listing and two historic-era built environment resources. Historic aerial photographs (1927-2022) and historic topographic maps (1896-2022) indicate the site was used for agriculture and orchards until the mid-1960s and has remained undeveloped since that time. A pedestrian survey of the direct APE was conducted on February 2, 2026, by a qualified archaeologist meeting the Secretary of the Interior's Professional Qualification Standards. No archaeological resources or cultural materials were identified during the survey. An intensive-level survey for historic-age properties within the indirect APE was conducted on February 11, 2026, by a qualified architectural historian meeting the Secretary of the Interior's Professional Qualification Standards. Five adjacent properties over 45 years of age were evaluated and determined not eligible for listing in the National Register of Historic Places (NRHP) under Criteria A-D. A search of the California Native American Heritage Commission (NAHC) Sacred Lands File indicated that the APE is negative for Native American cultural resources. The NAHC provided a list of tribes traditionally and culturally affiliated with the project area. On January 28, 2026, the County sent Section 106 consultation letters to Native American contacts identified by the NAHC. Two Tribes responded requesting consultation. Despite good-faith efforts, one Tribe did not respond to scheduling requests and the other indicated it would not be able to meet in a timely manner, so the County proceeded with Section 106 review while keeping consultation open. No historic properties have been identified in the APE. Implementation of **MM-CUL-1** and **MM-CUL-2** would avoid potential impacts related to the inadvertent discovery of archaeological resources or human remains during ground-disturbing construction activities. Therefore, the County made a finding of "No

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		Historic Properties Affected" under 36 CFR §800.4(d)(1). OC Housing and Community Development sent a letter to the SHPO on May 7, 2026, requesting concurrence with its finding of No Historic Properties Affected. SHPO responded on June 1, 2026, with no objection. Therefore, the project is in compliance with the NHPA (see **Attachments 11, 12, and 13**; see **Historic Preservation Worksheet**).
Noise Abatement and Control Noise Control Act of 1972, as amended by the Quiet Communities Act of 1978; 24 CFR Part 51 Subpart B	Yes ☐ No ☒	HUD noise regulations at 24 CFR Part 51, Subpart B require environmental review for noise-sensitive uses located near major noise sources, including highways, railroads, and airports. Projects located within HUD screening distances (1,000 feet of a major roadway, 3,000 feet of an active railroad, or 15 miles of an airport) must demonstrate that noise exposure does not exceed 65 dBA Day-Night Average Sound Level (DNL). Sites with noise levels above 65 dBA DNL are considered normally unacceptable, and those exceeding 75 dBA DNL are unacceptable for HUD funding without mitigation. Dudek prepared a Noise Technical Memorandum in March 2026 to evaluate project compliance with HUD noise standards. The primary noise source in the project vicinity is vehicular traffic along Berry Street and Imperial Highway, which border the site to the west and south, respectively. The I-57 freeway is located approximately 7,500 feet from the project site and was not included in the analysis. Fullerton Municipal Airport is located approximately 6 miles southwest of the site, well outside the airport's 60 dBA CNEL contour per the Airport Environs Land Use Plan (ALUC 2019), and airport noise would contribute negligibly to on-site conditions. A Union Pacific railroad spur approximately 0.1 miles north of the site is no longer active and was therefore excluded from the analysis. HUD's DNL Calculator was used to screen roadway traffic noise. Results indicated that worst-case exterior façade noise levels would exceed 65 dBA DNL, requiring detailed modeling. Noise levels were

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		modeled at four Noise Assessment Locations (NALs). Exterior noise levels at NAL1 and NAL3, representing the building's southwestern and northwestern façades, were estimated at 69 dBA and 68 dBA DNL, respectively, exceeding HUD's exterior standard. Noise levels at NAL2, representing the fifth-floor outdoor patio, initially exceeded 65 dBA DNL; however, partial shielding from the building itself and vertical separation from roadway traffic provided approximately 4.5 dBA of attenuation, resulting in an exterior noise level of 64.5 dBA DNL, which complies with HUD standards. NAL4, representing the northern façade along Mercury Lane, exhibited the lowest noise level at 61 dBA DNL. Although exterior noise levels at NAL1 and NAL3 exceed HUD's acceptable threshold, all residential units would be equipped with mechanical ventilation systems, allowing windows to remain closed. Typical new multifamily construction provides at least 25 dBA of exterior-to-interior noise reduction. Based on modeled exterior noise levels and standard wall and window construction assumptions, interior noise levels at all modeled locations would range from approximately 35 to 36 dBA DNL, which is well below HUD's 45 dBA interior noise standard. No exterior noise-sensitive use areas are proposed in locations exceeding HUD's exterior standards. Based on these findings, the project would meet HUD interior noise standards without additional mitigation. Therefore, the project is in compliance with 24 CFR Part 51, Subpart B (see **Attachment 14**; see **Noise Abatement Worksheet**).
Sole Source Aquifers Safe Drinking Water Act of 1974, as amended, particularly section 1424(e); 40 CFR Part 149	Yes ☐ No ☒	The Safe Drinking Water Act of 1974 requires protection of drinking water systems that are the sole or principal drinking water source for an area and which, if contaminated, would create a significant hazard to public health. The project site is not located on a sole source aquifer (SSA). The nearest SSA is the Campo/Cottonwood Creek Aquifer located approximately 105 miles to the south in San Diego County, near the California-Mexico border. Therefore, the project is in compliance with the Safe Drinking

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		Water Act of 1974 (see **Attachment 15**; see **Sole Source Aquifers Worksheet**).
Wetlands Protection Executive Order 11990, particularly sections 2 and 5	Yes ☐ No ☒	Wetlands are defined by the presence of hydrology, hydric soils, and vegetation adapted to wet conditions, and include features such as swamps, marshes, bogs, sloughs, wet meadows, potholes, and natural ponds. No wetlands are located on the project site. According to the USFWS National Wetlands Inventory (NWI), the nearest mapped wetland is the Brea Canyon Channel, a riverine feature located approximately 0.07 miles east of the project site. This feature is a concrete flood control channel that originates near the intersection of South Diamond Bar Boulevard and Pathfinder Road in the City of Diamond Bar. According to the NWI, it is classified R4SBCx, an intermittent riverine streambed. It occurs within a channel that conveys flowing water only part of the year and may be dry or contain isolated pools during other periods. The feature is seasonally flooded, with surface water typically present earlier in the growing season and absent later in most years. The channel was excavated by humans, indicating it is not entirely natural in origin. No wetlands would be directly or indirectly impacted by the project. Therefore, the project is in compliance with Executive Order 11990 (see **Attachment 16**; see **Wetlands Protection Worksheet**).
Wild and Scenic Rivers Wild and Scenic Rivers Act of 1968, particularly section 7(b) and (c)	Yes ☐ No ☒	The Wild and Scenic Rivers Act (16 U.S.C. 1271-1287) protects rivers designated as part of the National Wild and Scenic Rivers System (NWSRS) that have outstanding natural, cultural, or recreational values, preserving them in a free-flowing condition. The project site is not within proximity of a NWSRS river. The closest NWSRS river is Deep Creek, located approximately 50 miles northeast of the project site. Therefore, the project is in compliance with the Wild and Scenic Rivers Act (see **Attachment 17**; see **Wild and Scenic Rivers Worksheet**).

Environmental Assessment Factors [24 CFR 58.40]

Recorded below is the qualitative and quantitative significance of the effects of the proposal on the character, features and resources of the project area. Each factor has been evaluated and documented, as

appropriate and in proportion to its relevance to the proposed action. Verifiable source documentation has been provided and described in support of each determination, as appropriate. Credible, traceable and supportive source documentation for each authority has been provided. Where applicable, the necessary reviews or consultations have been completed and applicable permits of approvals have been obtained or noted. Citations, dates/names/titles of contacts, and page references are clear. Additional documentation is attached, as appropriate. **All conditions, attenuation or mitigation measures have been clearly identified.**

Impact Codes: Use an impact code from the following list to make the determination of impact for each factor.
(1) Minor beneficial impact
(2) No impact anticipated
(3) Minor Adverse Impact – May require mitigation
(4) Significant or potentially significant impact requiring avoidance or modification which may require an Environmental Impact Statement

Environmental Assessment Factor	Impact Code	Impact Evaluation
LAND DEVELOPMENT		
Conformance with Plans / Compatible Land Use and Zoning / Scale and Urban Design	1	<u>Conformance with Plans</u> The project site is located within the Brea Core Plan Area, which encompasses the area generally north of Imperial Highway, west of the SR-57 Freeway, south of Lambert Road, and east of South Berry Street. This area has been identified by the City of Brea as a focus for higher-density, mixed-use redevelopment intended to support housing production, walkability, and efficient use of existing urban infrastructure. The project is consistent with the City's 2021-2029 Housing Element, which identifies the project as one of three higher density housing initiatives approved by the Brea City Council to help meet the City's RHNA obligations (City of Brea 2021a). The City is currently advancing the Brea Core Specific Plan, with the most recent Review Draft published on February 11, 2026, to guide land use transitions in the downtown core area. Implementation of the Specific Plan would rezone the project site to Mixed-Use (MU-50), reflecting the City's long-term vision for compact, mixed-use, housing-supportive development (City of Brea 2026j). The project is consistent with this policy framework and would advance the City's adopted planning goals related to affordable housing, infill development, and downtown revitalization. <u>Compatible Land Use and Zoning</u> The project site is situated within a commercial and industrial area west of Brea Downtown, surrounded by light and general industrial operations, commercial offices, and manufacturing facilities. While the site is currently zoned Industrial Commercial (C-M), its General Plan Land Use designation of Specific Plan – Brea Core Study Area

Environmental Assessment Factor	Impact Code	Impact Evaluation
		anticipates a transition to mixed-use development pursuant to adoption of the Brea Core Specific Plan. Under the proposed MU-50 zoning designation, residential and mixed-use development would be permitted at densities of up to 50 dwelling units per acre, with a minimum residential density of 30 dwelling units per acre, and single-family detached housing would be prohibited (City of Brea 2026j). The proposed senior affordable housing development is consistent with these standards and represents an appropriate transitional land use within the evolving downtown core. The site's proximity to downtown amenities—connected via the Mercury Lane Bridge, which provides access to public parking, the multi-use Tracks at Brea Trail, and services approximately 580 feet east—further supports the compatibility of residential use at this location. <u>Scale and Urban Design</u> The project would consist of a 5-story, approximately 81,445-square-foot residential building, introducing higher-density residential use within an area planned for mixed-use redevelopment. The building height and massing are consistent with the urban scale envisioned for the Brea Core Plan Area, where compact, multi-story development is encouraged to support a walkable downtown environment and efficient land use. The project's modern architectural design is intended to complement surrounding development while signaling the area's transition toward mixed-use and residential activity. Building orientation, pedestrian connections, and proximity to downtown services support an urban design framework that reduces vehicle dependence and integrates housing into the downtown fabric. Overall, the scale, design, and density of the proposed development are consistent with adopted and emerging City planning policies and would contribute positively to the ongoing evolution of the Brea Downtown core. Based on the analysis above, the proposed project is consistent with applicable local plans and policies, represents a compatible land use within the evolving Brea Core Plan Area, and is appropriate in scale and urban design for the surrounding context.
Soil Suitability/ Slope/ Erosion/ Drainage/ Storm Water Runoff	2	<u>Soil Suitability</u> Based on information from the Phase I Environmental Site Assessment and the U.S. Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Web Soil Survey (USDA 2019), the project site is underlain by Sorrento series soils, consisting of Sorrento loam (64%) and Sorrento clay loam (36%). Surface soils consist of loam from approximately 0 to 11 inches

Environmental Assessment Factor	Impact Code	Impact Evaluation
		below ground surface, underlain by silty clay loam from approximately 11 to 61 inches, and stratified loamy fine sand to silt loam from approximately 61 to 72 inches. These soils are deep to moderately deep and well drained, with moderately coarse textures, making them generally suitable for urban development with appropriate design and construction practices. Sorrento soils are classified as Hydrologic Soil Group B, indicating moderate infiltration rates and moderate runoff potential. Sorrento soils are also characterized as prime farmland if irrigated, although the site is in a fully urbanized setting and no longer used for agricultural production. <u>Slope</u> Topography across the site is relatively level to gently sloping. Ground surface elevations range from approximately 338 feet to 343 feet above mean sea level, and the site generally slopes to the south with gradients of approximately 1-3% (Fuscoe Engineering 2019). These low slopes reduce the potential for slope instability and are generally favorable for development. <u>Erosion, Drainage, and Stormwater Runoff</u> Construction of the project would involve ground-disturbing activities that could result in temporary and minor soil erosion. Because the project would disturb more than one acre, it is subject to the State Water Resources Control Board (SWRCB) National Pollutant Discharge Elimination System (NPDES) Construction General Permit. Compliance with this permit requires submittal of a Notice of Intent (NOI) and preparation and implementation of a Stormwater Pollution Prevention Plan (SWPPP) prior to initiation of construction. The SWPPP will include appropriate erosion and sediment control Best Management Practices (BMPs) to protect water quality during site preparation, grading, and construction. These measures would include temporary BMPs such as silt fencing, fiber rolls, stabilized construction entrances, and temporary soil cover to prevent off-site sedimentation. With implementation of these measures, erosion impacts would be less than significant. The project site is underlain by well-drained soils, and existing drainage patterns are influenced by prior grading and surrounding urban infrastructure. Drainage across the site is generally southerly and southeasterly. The western one-third of the site drains to the adjacent property to the south, while the eastern two-thirds drains to an existing gutter within a drainage easement at the southeast corner of the site (Fuscoe Engineering 2019). That drainage easement conveys runoff to the Brea Canyon Channel, a County of Orange Flood Control District facility located approximately 400 feet east of the project site.

Environmental Assessment Factor	Impact Code	Impact Evaluation
		The site does not currently drain to either Berry Street or Mercury Lane, and no underground storm drain facilities are present on site. An existing storm drain located in Berry Street collects and conveys street drainage only; site drainage is not tributary to this system. The project site is located within the Brea Creek Watershed, and stormwater ultimately drains to Orange County Flood Control District facilities associated with Brea Canyon Channel. The proposed project would increase on-site impervious surfaces associated with building footprints, pavement, and walkways, which could increase stormwater runoff if unmitigated. The project would therefore be designed in conformance with the City of Brea Master Plan of Drainage and applicable Public Works and Building and Safety standards and guidelines, incorporating stormwater management measures consistent with municipal and NPDES requirements. These measures may include on-site collection and controlled conveyance, infiltration or biotreatment where feasible, and energy dissipation features to reduce runoff velocity. With implementation of required erosion control and stormwater management measures, the project would not result in substantial soil erosion, altered drainage patterns, or increased downstream flooding. Accordingly, the project would not result in adverse impacts related to soil suitability, slope stability, erosion, drainage, and stormwater runoff.
Hazards and Nuisances including Site Safety and Noise	2	<u>Hazards and Site Safety</u> No hazardous liquid pipelines or natural gas transmission pipelines intersect the project site (PHMSA 2026). The nearest natural gas transmission pipeline is located approximately 0.1 miles north of the project site. The nearest hazardous liquid pipeline is located approximately 0.3 miles north of the site (see **Attachment 18**). No oil or gas wells are located near the project site (CalGEM 2026). The nearest mapped feature is a plugged dry hole located approximately 0.5 miles northeast of the project site (see **Attachment 19**). No overhead high-voltage transmission lines intersect the project site (HIFLD 2026). The closest transmission line is a 66-kV overhead line located approximately 65 feet west of the project site (see **Attachment 20**). The project site is not located within the utility easement or right-of-way. Therefore, the project site is not subject to hazards associated with high-voltage transmission lines. The site is situated in a seismically active area that has historically experienced moderate to high levels of ground shaking during earthquakes. The project site is approximately 1.8 miles southwest of the Whittier Fault within the Elsinore Fault Zone, and similar levels of ground shaking are expected over the life of the project

Environmental Assessment Factor	Impact Code	Impact Evaluation
		from nearby fault activity and regional seismic events. The project site is not located within an Alquist-Priolo Earthquake Fault Zone or a Landslide Zone, but is located within a Liquefaction Zone (CGS 2024) (see **Attachment 21**). Standard practice requires preparation of a project-specific geotechnical investigation, which will evaluate site-specific soil conditions and identify appropriate design and construction measures in accordance with Chapter 18 of the California Building Code (CBC). Design and construction consistent with current CBC requirements and geotechnical recommendations would reduce liquefaction-related risks to acceptable levels, ensuring structural stability and occupant safety. The project site is not located within a Fire Hazard Severity Zone (FHSZ). The nearest FHSZ is located approximately 1 mile northeast of the project site (CAL FIRE 2026) (see **Attachment 22**). Therefore, the project site is not subject to wildland fire hazards. <u>Nuisances</u> The project would not be affected by nuisances atypical of an urban environment. No nearby industrial uses are present that would generate substantial odors, fumes, or smoke affecting the project site. Although a railroad spur is located approximately 0.1 miles north of the site, it would not constitute a nuisance because this segment is no longer active. During construction, temporary nuisances related to traffic, noise, dust, and vapor or equipment emissions, could affect construction workers or nearby properties. However, these impacts would be short-term, localized, and minimized through compliance with applicable local regulations and best management practices, including SCAQMD Rule 403 for fugitive dust. The project would not involve activities that would generate unusual noise, light, or dust beyond typical construction-related impacts. <u>Noise</u> Construction would generate temporary noise associated with the operation of heavy equipment and other construction activities in the vicinity of the project site. Noise levels would vary depending on the specific construction phase and would be intermittent and temporary in nature. Pursuant to Chapter 8.20, Noise Control, of the City's Municipal Code, construction activities would be limited to daytime hours between 7:00 a.m. and 7:00 p.m., Monday through Saturday. The project would be required to adhere to all applicable provisions of the City's noise ordinance. Once operational, the project would not be a noise-generating facility. Operational noise levels would be consistent with existing conditions and similar to other multifamily residential uses in the City.

Environmental Assessment Factor	Impact Code	Impact Evaluation
SOCIOECONOMIC		
Employment and Income Patterns	1	Project construction would generate a limited number of temporary jobs, and operation would result in a nominal number of permanent positions (e.g., management, clerical, janitorial), potentially contributing to a minor increase in per-capita income. Construction activities may also produce direct economic effects through increased spending on materials, equipment, and services. The extent of these economic benefits to the City's economy would depend on the degree to which labor, goods, and services are sourced locally. Overall, the project is expected to have a relatively minor benefit on the City's economy.
Demographic Character Changes, Displacement	2	According to the 2023 American Community Survey 5-Year Estimates, the City of Brea has a population of approximately 47,337 residents. The racial and ethnic composition includes 37% White (non-Hispanic), 31% Hispanic or Latino (of any race), 26% Asian, and 2% Black or African American. The project site is located within Census Tract 15.03, which has a population of approximately 5,220 residents and a similar demographic profile: 39% White (non-Hispanic), 42% Hispanic or Latino (of any race), 13% Asian, and 1% Black or African American. While Census Tract 15.03 generally reflects citywide demographic trends, there are some notable distinctions. The City's median household income is $124,837, with a per capita income of $58,128, compared to $97,748 and $38,830 respectively in the Census Tract. The poverty rate in the Census Tract is 16.1%, more than double the City's rate of 6.4%. Housing characteristics in the Census Tract and City are comparable. The City contains 17,205 housing units with a 4% vacancy rate, while the Census Tract has 1,849 units and a 4% vacancy rate. Owner occupancy is higher in the Census Tract (64%) than in the City overall (60%). Additionally, the median age in the Census Tract is 39.3 compared to 39.6 in the City. Approximately 17% of the City's population is aged 65 and older, while about 15% of the Census Tract population is aged 65 and older (see **Attachment 23**). The project would introduce new residents and incrementally increase the senior population within the census tract; however, these demographic shifts would be minor. Because the site is currently vacant, no displacement of existing residences or businesses would occur. Therefore, no adverse impacts related to demographic character changes or displacement would occur.

Environmental Assessment Factor	Impact Code	Impact Evaluation
COMMUNITY FACILITIES AND SERVICES		
Educational and Cultural Facilities	2	Educational Facilities The project site is located within the Brea-Olinda Unified School District, a K-12 public school district with an enrollment of approximately 5,700 students across 10 schools (BOUSD 2026). Because the project would be restricted to senior residents, it is not anticipated to generate school-aged children or affect enrollment, capacity, or operations at local schools. As a result, the project would not increase demand for classroom space, staffing, transportation, or other educational services, nor would it necessitate the construction or expansion of school facilities. Accordingly, the proposed project would have no adverse impact on educational facilities. Cultural Facilities Cultural facilities include publicly accessible buildings and venues that support arts, heritage, and cultural activities, such as museums, libraries, galleries, performance spaces, and community gathering facilities. Numerous cultural facilities would be accessible to project occupants within the City of Brea and the broader Orange County region. Cultural facilities located near the project site include the Brea Museum and Historical Society approximately 0.8 miles south of the site, and Lagos de Moreno Park, approximately 1 mile east. The Brea Civic and Cultural Center, which encompasses the Brea Library, Brea Art Gallery, and Curtis Theatre, is located at 1 Civic Center Circle, approximately 1.3 miles east of the project site. The Brea Community Center, also located at 1 Civic Center Circle, provides additional cultural and community spaces, including an Art Studio, Arts Garden, and Community Hall used for gatherings and events (City of Brea 2026b). The project would result in an incremental increase in demand for cultural facilities. However, as an affordable senior housing development, the project would be expected to serve existing area residents by addressing existing unmet needs for affordable housing in the project area, rather than introducing a substantial influx of new residents. Furthermore, due to the relatively small project size, any incremental increase in demand would not exceed the capacity of existing facilities. The City offers a wide range of cultural programming, including art exhibitions, festivals, concerts, and community events, supported by adequate facilities throughout the city. Accordingly, sufficient cultural facilities exist to accommodate any potential increase in use associated with the project, and no adverse impacts to cultural facilities are anticipated.

Environmental Assessment Factor	Impact Code	Impact Evaluation
Commercial Facilities	1	The project site is located within the Downtown Brea core area, a planned mixed-use district characterized by commercial, light industrial, civic, and residential uses and guided by the Brea Core Plan. The surrounding area includes a range of commercial and service-oriented facilities and benefits from convenient access to major transportation routes, including Imperial Highway and State Route 57. Nearby commercial destinations include Brea Mall, Brea Plaza Shopping Center, Brea Gateway Center, and Brea Downtown, as well as numerous restaurants, retail establishments, and personal service businesses within approximately 2 miles of the project site. The proposed development would not displace or physically alter any existing commercial facilities. Instead, the addition of affordable senior housing may result in a minor, beneficial increase in demand for nearby goods and services. Because the project is modest in scale and intended to serve seniors, any increase in commercial activity would be incremental and well within the capacity of existing facilities. Affordable housing can also support local economic vitality by allowing residents to allocate a greater portion of their income toward non-housing expenditures, such as retail, dining, and personal services. Overall, the project would be compatible with surrounding commercial uses and would not result in adverse impacts to commercial facilities.
Health Care and Social Services	2	<u>Health Care</u> The project site is located in a well-served urban area with access to a range of health care and social service providers. The site is approximately 0.5 miles east of the St. Joseph Heritage Hospital and 1.5 miles south of the Brea Urgent Care Center. Residents of the proposed development would also have easy access to PIH Urgent Care in La Habra, located approximately 2 miles west of the project site, and to Kindred Hospital Brea, approximately 2 miles northeast of the proposed development. The surrounding community includes pharmacies, urgent care centers, and hospitals accessible via major roadways and public transit. <u>Social Services</u> While the project includes 10 PSH units, supportive services for residents, if required, would be provided through external service providers and coordinated off site. The project does not include space for on-site case management, counseling, or clinical services. Social services are offered by a wide variety of both public and private non-profit agencies in the City of Brea and broader community within Orange County. These agencies provide a variety of services to residents including benefits enrollment,

Environmental Assessment Factor	Impact Code	Impact Evaluation
		connection to other community services such as health care, education/vocational training and career development, harm reduction strategies, veteran's services, child protective services, foster care, nutrition assistance, and cash aid, among others. The City of Brea is one of 11 cities in Orange County that participates in The North Orange County Public Safety Collaborative (NOCPSC), a coalition of cities, police agencies, nonprofits, and agencies dedicated to providing health and human services to the community (NOCPSC 2021). The project could result in an incremental increase in demand for health care and social services. Because the project would serve seniors and would not introduce a substantial increase in population, it would not place a disproportionate demand on existing social service resources. No adverse impacts to health care or social services would occur as a result of the project.
Solid Waste Disposal / Recycling	2	Solid waste and recycling services for the project site would be provided by Republic Services, the City of Brea's franchised waste hauler. Republic Services provides regular refuse, recycling, and organics collection throughout the City in compliance with local and state requirements, including the City's organics recycling program implemented pursuant to Senate Bill 1383 (City of Brea 2025, 2026d). Solid waste landfill capacity is provided to the City by Orange County Waste and Recycling (OCWR). OCWR owns and operates three active landfills: Olinda Alpha Landfill at 1942 North Valencia Avenue in Brea, Frank R. Bowerman Landfill at 11002 Bee Canyon Access Road in Irvine, and Prima Deshecha Landfill at 32250 La Pata Avenue in San Juan Capistrano. The waste generated by the City is taken to the Olinda Alpha Landfill. The Olinda Alpha Landfill has a permitted disposal capacity of 8,000 tons per day with a remaining capacity (as of October 2020) of 17,500,000 cubic yards, and an estimated closure date of 2036 (CalRecycle 2026c). Additionally, the Frank R. Bowerman Sanitary Landfill has a permitted disposal capacity of 11,500 tons per day with a remaining capacity (as of September 2023) of 160,896,082 cubic yards, and an estimated closure date of 2053 (CalRecycle 2026b). The Prima Deshecha Landfill has a permitted disposal capacity of 4,000 tons per day with a remaining capacity (as of September 2023) of 128,800,000 cubic yards, with an estimated closure date of 2102 (CalRecycle 2026d). The project would generate solid waste and recyclable materials during construction as well as during operation, associated with residential occupancy and routine property maintenance. The project would include designated on-site waste and recycling

Environmental Assessment Factor	Impact Code	Impact Evaluation
		facilities, including an enclosed trash room on the ground floor, to support proper separation and storage of waste streams. Waste and recyclable materials generated by residents would be collected on a regular schedule consistent with City service standards. According to CalRecycle, multifamily residential uses generate between 3.6 to 8.6 pounds of solid waste per dwelling unit per day (CalRecycle 2026a). Once operational, based on the most conservative multifamily generation rate of 8.6 pounds per dwelling unit per day, the project would generate approximately 731 pounds of solid waste per day (approximately 0.37 tons per day). This level of waste generation could be accommodated by the Olinda Alpha Landfill as well as other regional landfills operated by OCWR. During construction, the project would be required to comply with Assembly Bill (AB) 939 and related state requirements, including SB 1374, requiring all cities to implement ordinances or other measures that require the diversion of 75% of all construction and demolition waste from landfills. Therefore, adverse impacts related to solid waste disposal and recycling would not occur as a result of the projects.
Waste Water / Sanitary Sewers	2	The project would be served by the City of Brea's municipal sanitary sewer system. The City's Public Works Department operates and maintains the local wastewater collection system, which provides service throughout the City and Sphere of Influence. The project site is identified in the Brea 2050: Focused General Plan Update and Brea Core Specific Plan Program Environmental Impact Report (Brea 2050 PEIR) (City of Brea 2026a) as an area planned for future development, and wastewater service to the site is contemplated as part of the City's long-range infrastructure planning. The project would connect to existing City sewer infrastructure and would be designed in accordance with the City's Sewer Master Plan (SMP) (City of Brea 2021c) and applicable Public Works and Building & Safety standards. No on-site wastewater treatment or septic systems would be used. Wastewater generated by the project would be conveyed through the City's sewer collection system to regional facilities operated by the Orange County Sanitation District (OCSD). OCSD owns and operates the regional sewer collection and treatment system serving the area, including two wastewater treatment plants (Reclamation Plant No. 1 in Fountain Valley and Treatment Plant No. 2 in Huntington Beach) which provide secondary and advanced treatment in compliance with applicable federal and state regulations (OCSD 2017).

Environmental Assessment Factor	Impact Code	Impact Evaluation
		The Brea 2050 PEIR evaluated wastewater demand associated with full buildout of land uses under the Focused General Plan Update and Brea Core Specific Plan and determined that projected development would not exceed the capacity of the City's sewer collection system or OCSD's regional treatment facilities, provided that future development complies with adopted infrastructure planning and improvement requirements. The proposed project, consisting of 85 residential units, represents a small incremental portion of the growth evaluated in the Brea 2050 PEIR and would not result in a substantial increase in wastewater flows beyond those already planned for under the City's adopted land use framework. As part of project design and permitting, the project would be subject to City and OCSD requirements, including any applicable site-specific sewer capacity analysis. If localized improvements were identified as necessary, they would be implemented in accordance with City standards. The project would also be required to pay applicable wastewater connection fees and ongoing user charges, which are designed to fund system operations, maintenance, and capacity improvements. Based on the Brea 2050 PEIR's program-level analysis, existing and planned wastewater infrastructure, and compliance with applicable City and regional requirements, the proposed project would have adequate wastewater service available and would not result in adverse impacts to wastewater collection or treatment facilities.
Water Supply	2	The project would be served by the City of Brea's potable water system, which is operated and maintained by the City's Water Division. The City provides water through a diversified supply portfolio that includes imported water and local groundwater, in coordination with the California Domestic Water Company (CDWC) and the Municipal Water District of Orange County (MWDOC). Imported supplies include groundwater from the Main San Gabriel Groundwater Basin provided by CDWC, as well as water from the State Water Project and the Colorado River delivered by the Metropolitan Water District of Southern California through MWDOC. The City also pumps groundwater from the La Habra Groundwater Basin, which is used for irrigation only. The City's water infrastructure includes multiple connections to imported water sources, storage reservoirs, booster pump stations, pressure-regulating stations, emergency interconnections with neighboring agencies, and an extensive distribution network (City of Brea 2021b). Water delivered to customers meets all applicable federal and state water quality standards (City of Brea 2024).

Environmental Assessment Factor	Impact Code	Impact Evaluation
		The City's 2020 Urban Water Management Plan (UWMP) evaluated water supply reliability under normal, single-dry, and multiple-dry year hydrologic conditions through 2045 and concluded that sufficient water supplies are available to meet projected demands under all scenarios (City of Brea 2021b). The Brea 2050 PEIR evaluated water demand associated with planned growth and determined that the City's existing and planned water supplies and infrastructure are adequate to serve future development, including land uses identified as future development within the Core Plan Area. The project would result in an incremental increase in water demand associated with development of 85 residential units on a currently vacant site identified in the Brea 2050 PEIR as planned for future development. Construction-related water use would be temporary and would cease upon project completion. The project would connect to existing water mains in the vicinity of the site and would be designed in compliance with City standards and applicable water conservation requirements, including Title 24 water-efficiency provisions. Based on the UWMP, the Brea 2050 PEIR's program-level analysis, and the project's incremental demand relative to Citywide water supplies, adequate water supply is available to serve the project. The project would not require new water supply sources or expansion of regional water infrastructure and would not result in adverse impacts on water supply or water service reliability.
Public Safety - Police, Fire and Emergency Medical	2	Police protection services to the project site are provided by the Brea Police Department (BPD), which is located at 1 Civic Center Circle, approximately 1.4 miles east of the project site. BPD provides comprehensive law enforcement services throughout the City, including patrol, traffic enforcement, investigations, and emergency response. The Patrol Division responds to calls for service, traffic collisions, medical incidents, and citizen assistance requests. In 2024, BPD responded to more than 16,000 calls for service, made 1,220 arrests, and completed over 4,000 police reports. BPD maintains specialized investigative units addressing crimes against persons and property, as well as a crimes suppression unit and a Special Weapons and Tactics (SWAT) team trained to respond to critical incidents. BPD has full jurisdiction within City boundaries, with the Orange County Sheriff's Department providing law enforcement services in adjacent unincorporated county areas. As identified in the Brea 2050 PEIR, the City's police

Environmental Assessment Factor	Impact Code	Impact Evaluation
		services are designed to accommodate planned growth within designated future development areas, including the project site. Fire protection and life safety services are provided by the Brea Fire Services Department, which offers 24-hour emergency response for fire suppression, medical emergencies, hazardous materials incidents, traffic accidents, and public assistance calls. The Department also operates active Fire Prevention and Emergency Preparedness programs, including fire inspections, hazardous process permitting, fire code enforcement, and public education. The Brea Fire Services Department operates under a Shared Command Staff Agreement with the City of Fullerton, overseeing service provision across multiple stations and jurisdictions. According to City reporting, the Fire Department maintains an average emergency response time of approximately 7 minutes and 29 seconds, with the majority of responses occurring in less than 8 minutes (City of Brea 2020a). Fire Station #2, located at 200 North Brea Boulevard, is approximately 1 mile northeast of the project site, providing proximate coverage. In January 2025, the Brea Fire Services Department implemented an in-house ambulance program, under which the City owns and operates emergency ambulances staffed by City-employed Emergency Medical Technicians. This program allows the City to maintain direct oversight of training, protocols, and patient care. The City operates two dedicated ambulances on a 24-hour basis, housed at Fire Stations #2 and #3, and dispatched through the Metro Cities Communications Center. The project would result in an incremental increase in demand for police, fire, and emergency medical services associated with development of 85 residential units. This level of growth is consistent with development assumptions evaluated in the Brea 2050 PEIR, which concluded that existing and planned public safety services are adequate to serve future development within identified growth areas. The project would comply with all applicable California Building Code and Fire Code requirements, including standards for emergency access, fire flow, water pressure, and life-safety systems. Project design would incorporate standard safety features such as adequate lighting, secure access controls, and visibility. The site is accessible from Mercury Lane and is located near major arterial roads, including Berry Street, West Lambert Road, and Imperial Highway, which facilitate efficient emergency response.

Environmental Assessment Factor	Impact Code	Impact Evaluation
		Based on existing public safety service capacity, proximity of police and fire facilities, compliance with applicable codes, and the project's consistency with City planning assumptions, the project would not adversely affect police, fire, or emergency medical service levels.
Parks, Open Space and Recreation	2	The City of Brea is served by a wide range of local, regional, and state parks, open space areas, and recreational facilities. The City's Public Works Department maintains more than 370 acres of public parks and open space, excluding smaller pocket parks and municipal golf courses, with a substantial portion consisting of regional park facilities (City of Brea 2026c). In addition, the Brea Recreation Department operates the Brea Community Center and Brea Senior Center and offers a broad range of recreational programs and services for residents of all ages, including sports leagues, aquatics, fitness, youth and senior programs, and recreational classes. The project site is located near several existing neighborhood and regional parks, including Arovista Park (approximately 0.2 miles south), City Hall Park and Plunge (approximately 0.8 miles southeast), Tamarack Park (approximately 0.9 miles northeast), Lagos de Moreno Park (approximately 1 mile east), and Craig Regional Park (approximately 2.1 miles southeast in the City of Fullerton). Larger regional recreational resources are also available nearby, including Carbon Canyon Regional Park and Chino Hills State Park, which are located within approximately five miles of the project site and provide extensive open space and recreational opportunities. The City also maintains the Tracks at Brea Trail, a 4-mile, multi-use linear park and trail system that includes pedestrian pathways, fitness stations, seating areas, drinking fountains, and restrooms (City of Brea 2026e). Segment 2 of the Tracks at Brea Trail is located approximately 0.5 miles northeast of the project site, providing convenient access to active transportation and recreational opportunities. The project would result in an incremental increase in demand for parks and recreational facilities. This demand would be partially met through the project's on-site recreational amenities and common open space, which include a landscaped courtyard with seating, a children's play area, pet relief area, internal walkways, and multiple rooftop deck areas. These amenities would provide accessible recreational opportunities for residents and reduce reliance on off-site facilities. Given the availability of nearby neighborhood and regional parks, access to trail systems and open space, and the inclusion of on-site recreational amenities, the

Environmental Assessment Factor	Impact Code	Impact Evaluation
		project would not adversely affect the availability or quality of parks, open space, or recreational services.
Transportation and Accessibility	2	The project site is located in an urbanized area of the City of Brea and is served by an established roadway network. Vehicular access to the site would be provided via Mercury Lane, a local roadway that connects to Berry Street, which in turn provides access to West Lambert Road and Imperial Highway, major arterial roadways that facilitate local and regional travel. Vehicular access to the project site would be safe and adequate, and the project would provide parking consistent with applicable local code requirements, including accommodations for service and moving vehicles. No barriers to emergency vehicle access would be created. Public transit service in the project area is provided by the Orange County Transportation Authority (OCTA) and Foothill Transit, which operate fixed-route bus service within the City of Brea and provide connections to regional transit hubs, including the Fullerton Transportation Center and Anaheim Regional Intermodal Transportation Center, where riders may transfer to Metrolink and Amtrak services. The nearest fixed-route transit stops are located along Brea Boulevard, approximately 0.7 miles east of the project site. While the project is not located within one-quarter mile of a fixed-route bus stop, transit service is available within a reasonable walking distance and provides access to regional employment centers, services, and amenities. The project would not relocate residents from an area of relatively good transit access to an area of poorer access. The project area is served by existing sidewalks and crosswalks, which support pedestrian access to surrounding residential and commercial areas. Class II bicycle lanes are located along Berry Street, and the Tracks at Brea Trail, a Class I off-street multi-use path, is located approximately 0.5 miles northeast of the project site and provides a continuous active transportation corridor across the city (City of Brea 2020b). The project would provide enclosed, secure bicycle storage for residents and would be designed to support pedestrian movement within the site and to adjoining public rights-of-way. The project would be designed to comply with the Americans with Disabilities Act (ADA) and applicable state and local accessibility standards, including the provision of accessible routes, building entrances, parking spaces, and loading areas. These features would ensure that the project is accessible to persons with disabilities and elderly residents.

Environmental Assessment Factor	Impact Code	Impact Evaluation
		Existing and reasonably foreseeable roadway, transit, pedestrian, and bicycle facilities and services would be adequate to meet the transportation needs of the project. The project would not result in significant adverse impacts to the local or regional transportation system and would provide safe and accessible multimodal transportation options for future residents.

Environmental Assessment Factor	Impact Code	Impact Evaluation
NATURAL FEATURES		
Unique Natural Features, Water Resources	2	The project site is located within a developed urban area and is currently vacant and unpaved. The site is surrounded by commercial, light industrial land uses. As such, the site does not contain any unique natural features or water resources, such as wetlands, riparian areas, significant topographic variation, or native habitat areas. The site is not located within or adjacent to any designated open space, parkland, or conservation area. No streams, creeks, or water bodies traverse the site, and no known geological or hydrological features of significance are present. The proposed project would not impact any scenic vistas, natural landmarks, or sensitive environmental resources. Therefore, the project would have no impact on unique natural features or water resources.
Vegetation, Wildlife	2	The project site is located within an urbanized area of the City of Brea that has been previously disturbed and is surrounded by existing roadway infrastructure and developed land uses. Vegetation on and immediately adjacent to the project site is limited and primarily consists of ruderal or ornamental landscaping typical of developed urban settings. Due to long-term disturbance, fragmentation, and surrounding urban uses, the urban portions of the City, including the project site, generally provide limited value as wildlife habitat and do not support native vegetation communities. Wildlife species that may occur in the vicinity are expected to be common, urban-adapted species, such as birds, small mammals, and reptiles that are tolerant of human activity. Due to the absence of native habitat and limited vegetative cover, the site is not expected to support special-status-plant or wildlife species, significant wildlife movement corridors, or regionally important habitat linkages. Development of the project would result in the removal of existing disturbed vegetation and replacement with landscaped areas consistent with City standards, including ornamental trees, shrubs, and groundcover. Landscaping would be maintained and managed as

Environmental Assessment Factor	Impact Code	Impact Evaluation
		part of the project's long-term operations. Construction activities could temporarily disturb common wildlife species; however, these species are expected to relocate to adjacent developed areas during construction and return to the vicinity following completion. Consistent with City requirements, any landscaping would be subject to applicable water-efficient-landscaping standards and maintenance practices. Trees and shrubs near the project site provide potential nesting habitat for avian species protected by the Migratory Bird Treaty Act (MBTA). If nesting birds are present during construction, activities would be required to comply with the MBTA and applicable state regulations, including avoidance or timing measures if active nests are identified. These requirements are standard conditions for development in the City and region. In compliance with the MBTA, implementation of **MM-BIO-1** would ensure that pre-construction surveys are conducted for nesting birds prior to site disturbance if construction activities would be conducted during the nesting season. If nesting birds are present, mitigation requires avoidance of active nests. With implementation of the required mitigation, adverse impacts to protected avian species would be avoided. Therefore, the proposed project would not result in adverse impacts to vegetation or wildlife resources.
Other Factors	2	No other environmental factors have been identified that would be adversely affected by the project.

Environmental Assessment Factor	Impact Code	Impact Evaluation
ENERGY		
Energy Efficiency	2	The proposed project is located within the service area of Southern California Edison (SCE), which provides electrical service to much of Southern California. According to the Brea Core Specific Plan Public Review Draft and analysis in the Brea 2050 PEIR, SCE has indicated that adequate electrical power and associated distribution facilities are available or can be provided to serve planned development within the Specific Plan area, including the project site. The project would be designed and constructed to comply with applicable energy-efficiency standards, including the California Green Building Standards Code (CALGreen) and the 2022 California Building Energy Efficiency Standards (Title 24). These standards require energy-efficient building design, installation of high-efficiency mechanical and lighting systems, improved building envelope performance, and other measures intended to reduce long-term energy consumption. The project would be constructed to meet or exceed current state energy-performance requirements, resulting

Environmental Assessment Factor	Impact Code	Impact Evaluation
		in lower per-unit energy demand compared to older housing stock. Therefore, the project would not have an adverse effect related to energy efficiency.

List of Permits Obtained:

None

Public Outreach [24 CFR 50.23 & 58.43]**:**
The Draft Environmental Assessment and the combined Notice of Finding of No Significant Impact (FONSI) and Notice of Intent to Request Release of Funds (NOI-RROF) will be published concurrently and made available for public review and comment beginning on June 25, 2026, and concluding on July 13, 2026, for a 15-day public comment period. The combined notice will be published on the OC Housing and Community Development website and will include information on where the public may review the Environmental Review Record pertinent to the project and how comments may be submitted. Any comments received during the public comment period will be reviewed and considered prior to finalization of the environmental review. If substantive comments are received, responses will be prepared and included in the Environmental Review Record, as appropriate.

Cumulative Impact Analysis [24 CFR 58.32]**:**
The project site is located within an urbanized area of the City of Brea that is planned for residential and mixed-use development under adopted local planning policies. Other reasonably foreseeable actions in the vicinity include infill development, redevelopment of existing properties, infrastructure maintenance activities, and implementation of public improvement projects consistent with adopted City plans. These activities generally represent incremental changes within an established urban environment rather than substantial new land-use conversions.

As evaluated in the individual environmental resource sections of this Environmental Assessment, the project would utilize existing infrastructure and public services, including transportation systems, utilities, wastewater, water supply, parks, and public safety services, all of which are planned to accommodate projected growth. The project would result in minor incremental increases in demand for these services but would not exceed available capacity or require expansion of off-site facilities beyond those already planned. With respect to environmental resources, the project would be developed on a previously disturbed site and would not result in the loss of sensitive biological resources, historic properties, or open space. Temporary construction-related effects such as noise, traffic, and emissions would be localized and short term, and would not combine with other activities to create long-term environmental degradation. Operational effects associated with project occupancy would be consistent with surrounding residential uses. The project would comply with applicable state and local building codes, energy efficiency standards, water conservation requirements, floodplain management regulations, and accessibility standards, which collectively reduce the potential for cumulative adverse effects related to resource consumption, public safety, and environmental quality.

When considered in combination with other reasonably foreseeable development in the area, the project's contribution to cumulative environmental impacts would be incremental and limited. No resource area evaluated in this Environmental Assessment would experience adverse cumulative impacts as a result of the project. Based on the analysis presented in this Environmental Assessment, the project would not result in significant cumulative impacts.

Alternatives [24 CFR 58.40(e)]**:**
Identification of suitable sites for affordable housing has proven to be a significant challenge. Residential sites available at a reasonable cost are extremely limited, and many potential sites are eliminated due to financial infeasibility, incompatible land use designations, lack of site control, or the need for substantial new infrastructure. The project sponsor evaluates potential affordable housing sites based on feasibility, location, affordability, land use compatibility, and ownership or site control. In addition, physical and social constraints, such as access to utilities and services, proximity to transportation, surrounding land uses, and neighborhood context, are considered when identifying and rejecting alternatives. Based on these criteria and constraints, no other practicable build alternatives were identified that would meet the project's purpose and need. Accordingly, no additional build alternatives are analyzed in this Environmental Assessment.

No Action Alternative [24 CFR 58.40(e)]**:**
Under the No Action Alternative, the project would not be implemented and HUD funds would not be provided. The project site would remain undeveloped, and no new affordable residential units or community-serving amenities would be constructed as part of the proposed action. As a result, the site would not contribute to meeting identified affordable housing needs in the near term. While the No Action Alternative would avoid temporary construction-related effects associated with the project (e.g., noise, dust, and traffic disruptions), it would also forgo the long-term benefits of the project. These benefits include the development of 85 affordable rental units, including 10 units designated for PSH, and productive use of a vacant infill parcel served by existing infrastructure and public services.

The project site is located within an area planned for future development under the Brea Core Specific Plan. Under the No Action Alternative, the site would remain available for future development consistent with adopted land use designations, and continued vacancy is not anticipated as a long-term condition. If the site were developed in the future under another project, environmental impacts comparable to or potentially greater than those associated with the proposed project could still occur, whether development is subsidized with federal funds or undertaken at market rates. The No Action Alternative would not support the City's adopted planning objectives related to housing production or implementation of state housing mandates, nor would it address the need for permanent supportive housing for individuals experiencing or at risk of homelessness. Consequently, the No Action Alternative would result in missed opportunities to advance housing equity, community development, and sustainability goals while not necessarily avoiding future environmental effects associated with redevelopment of the site.

Summary of Findings and Conclusions:
The proposed Mercury Senior Apartments Project, located at the southeast corner of Berry Street and Mercury Lane in the City of Brea, California, involves the construction of an 85-unit affordable rental housing development for seniors (aged 62 and older), including 10 units designated for PSH. The project would include a range of on-site amenity and support spaces, including a community room, fitness room, laundry facilities, lobby and leasing office, mail and bicycle rooms, outdoor patio and rooftop deck areas, and supporting maintenance and utility areas. The project site is currently vacant, located within a developed urban area, and is planned for mixed-use residential development under the City's adopted land use framework. The proposed project is consistent with the City of Brea's General Plan, zoning regulations, and housing policies, and would represent an appropriate infill use on a site already served by existing infrastructure and public services.

This Environmental Assessment evaluated the potential environmental effects of the proposed action across all applicable resource areas identified under 24 CFR Part 58, including land use compatibility, soil and drainage conditions, hazards and nuisances, air quality, noise, water supply, wastewater, public services, transportation and accessibility, parks and recreation, biological resources, cultural resources, floodplain management, energy efficiency, and cumulative impacts. Based on these analyses, the project would not result in significant adverse impacts on the quality of the human environment, provided that identified mitigation measures and compliance conditions are implemented. Where temporary impacts could occur during construction, such as short-term noise, dust, traffic disruptions, or construction emissions, these effects would be localized, temporary, and managed through applicable regulations and best management practices. Operational impacts would be consistent with surrounding urban residential uses and would not exceed the capacity of existing utilities, infrastructure, or public services.

The project would provide substantial community and social benefits by increasing the supply of high-quality affordable housing for seniors, including PSH for individuals experiencing homelessness. Residents would benefit from proximity to public transportation, commercial services, healthcare facilities, parks, and other community amenities, supporting mobility, social connection, and access to essential services. The project would also support the City's efforts to meet state housing requirements and RHNA

obligations, while promoting efficient use of urban land and existing infrastructure. Its infill location and access to multimodal transportation options would contribute to reduced vehicle dependence and long-term reductions in air pollutant emissions and energy consumption. The project would comply with all applicable federal, state, and local laws and regulations, including those related to environmental protection, floodplain management, hazardous materials, historic preservation, building safety, energy efficiency, water conservation, and accessibility.

Based on the analyses presented in this Environmental Assessment and the implementation of required mitigation measures, the project would not have a significant effect on the quality of the human environment. Accordingly, preparation of an Environmental Impact Statement is not required, and issuance of a Finding of No Significant Impact (FONSI) is appropriate.

Mitigation Measures and Conditions

Summarize below all mitigation measures adopted by the Responsible Entity to reduce, avoid, or eliminate adverse environmental impacts and to avoid non-compliance or non-conformance with the above-listed authorities and factors. These measures/conditions must be incorporated into project contracts, development agreements, and other relevant documents. The staff responsible for implementing and monitoring mitigation measures should be clearly identified in the mitigation plan.

Law, Authority, or Factor	Mitigation Measure
Contamination and Toxic Substances	**MM-TOX-1: Post-Construction Radon Evaluation.** In accordance with Section 9.6.3.2 of HUD's Multifamily Accelerated Processing (MAP) Guide (revised March 19, 2021), after completion of construction and issuance of the occupancy certificate for the project and before residents move in, indoor radon testing shall be conducted for 100% of ground-contact units and 10% of units on each floor above ground level in all buildings included in the project. Testing shall be performed by, or under the direct supervision of, a licensed Radon Professional certified by the American Association of Radon Scientists and Technologists (AARST), National Radon Proficiency Program (NRPP) or the National Radon Safety Board (NRSB). Radon testing shall follow the AARST Protocol for Conducting Radon and Radon Decay Product Measurements in Multifamily Buildings (ANSI-AARST MAMF-2017). If testing determines that indoor radon levels are or may be above the U.S. EPA's threshold for unacceptability of 4.0 pCi/L, then the project applicant must implement a radon mitigation plan. The mitigation plan must identify the radon level on site, describe the radon reduction system that will be installed, establish an ongoing maintenance plan, establish a reasonable timeframe for system implementation, and require post-installation testing by a licensed radon professional. A radon report shall be prepared and submitted at final completion inspection, and shall document the results of testing performed, the sampling strategy, the details of any mitigation deemed necessary, and the timing of any such

Law, Authority, or Factor	Mitigation Measure
	mitigation. Indoor radon levels must be demonstrated to be below the EPA action level of 4.0 pCi/L prior to project occupancy. Incoming project occupants shall be informed of radon mitigation activities.
Floodplain Management	**MM-FP-1: Floodplain Elevation Compliance.** Prior to issuance of building permits, the applicant shall demonstrate that all new construction associated with the project is designed and constructed such that the lowest finished floor, including all mechanical, electrical, and plumbing systems, is elevated to at least 340.5 feet, corresponding to the Federal Flood Risk Management Standard (500-year or 0.2%-annual-chance) floodplain elevation for the Brea Canyon Channel, as identified in the applicable Flood Insurance Study. Project design plans shall clearly document compliance with this elevation requirement.
Historic Preservation	**MM-CUL-1: Unanticipated Discovery of Archaeological Resources.** All construction crews should be alerted to the potential to encounter archaeological resources. In the event that archaeological resources (sites, features, and artifacts) are exposed during construction activities involving ground disturbance for the proposed project, all construction work occurring within a 50-foot buffer of the find shall immediately stop until a qualified specialist meeting the Secretary of the Interior's Professional Qualification Standards can evaluate the significance of the find and determine whether additional study is warranted. This avoidance buffer may be adjusted following inspection of this area by that qualified specialist. Prehistoric archaeological deposits may be indicated by the presence of discolored or dark soil, fire-affected material, concentrations of fragmented or whole shell, burned or complete bone, non-local lithic materials, or characteristics observed to be typical of the surrounding area. Common prehistoric artifacts may include modified or battered lithic materials; lithic or bone tools that appear to have been used for chopping, drilling, or grinding; projectile points; fired clay ceramics or nonfunctional items; and other items. Historic-age deposits are often indicated by the presence of glass bottles and shards, ceramic material, building or domestic refuse, ferrous metal, or features such as old concrete foundations or privies. Significance of the find will be assessed based on processes outlined by Section 106 of the NHPA. Feasible options for avoidance must also be considered. If the discovery proves significant under the NHPA, additional work, such as preparation of an archaeological treatment plan, testing, or data recovery may be warranted. **MM-CUL-2: Unanticipated Discovery of Human Remains.** In accordance with Section 7050.5 of the California Health and

Law, Authority, or Factor	Mitigation Measure
	Safety Code, if human remains are found, the Orange County Coroner shall be immediately notified of the discovery. No further excavation or disturbance of the site or any nearby area reasonably suspected to overlie adjacent remains shall occur until the Orange County Coroner has determined, within 2 working days of notification of the discovery, the appropriate treatment and disposition of the human remains. If the Orange County Coroner determines that the remains are, or are believed to be, Native American, the coroner shall notify the NAHC in Sacramento within 24 hours. In accordance with California Public Resources Code Section 5097.98, the NAHC must immediately notify those persons it believes to be the MLD from the deceased Native American. The MLD shall complete inspection within 48 hours of being granted access to the site. The designated Native American representative would then determine, in consultation with the property owner, the disposition of the human remains and associated grave goods.
Vegetation, Wildlife	**MM-BIO-1: Pre-Construction Nesting Bird Survey.** If vegetation removal, tree trimming, demolition, grading, or other construction activities are scheduled to occur during the nesting season (February 1 through September 15), a qualified biologist shall conduct a pre-construction nesting bird survey within three days prior to any disturbance to the project site to determine the presence/absence of any nesting bird species within 100 feet of the project site. If active nests are identified, the biologist shall establish appropriate avoidance buffers around the nest (based on the species detected), and the buffer areas shall be avoided until the nests are no longer occupied (through routine nest monitoring by the qualified biologist) and the juvenile birds can survive independently from their nest(s). In addition, if portions of the project site have not been disturbed within three days after the initial nesting bird survey, additional nesting bird surveys will be conducted (within the nesting bird season, February 1 to September 15) until all portions of the project site have been disturbed appropriately (as determined by a qualified biologist) as to not provide potential nesting habitat.

Determination:

☒ **Finding of No Significant Impact** [24 CFR 58.40(g)(1)]
The project will not result in a significant impact on the quality of the human environment.

☐ **Finding of Significant Impact** [24 CFR 58.40(g)(2)]
The project may significantly affect the quality of the human environment.

Docusign Envelope ID: 5C62780A-C53F-8D22-838B-61EE613688E4

Determination:

☒ **Finding of No Significant Impact** [24 CFR 58.40(g)(1)]
The project will not result in a significant impact on the quality of the human environment.

☐ **Finding of Significant Impact** [24 CFR 58.40(g)(2)]
The project may significantly affect the quality of the human environment.

5.18.2.1. Unmitigated

Tree Type	Number	Electricity Saved (kWh/year)	Natural Gas Saved (btu/year)

6. Climate Risk Detailed Report

6.1. Climate Risk Summary

Cal-Adapt midcentury 2040–2059 average projections for four hazards are reported below for your project location. These are under Representation Concentration Pathway (RCP) 8.5 which assumes GHG emissions will continue to rise strongly through 2050 and then plateau around 2100.

Climate Hazard	Result for Project Location	Unit
Temperature and Extreme Heat	12	annual days of extreme heat
Extreme Precipitation	5.2	annual days with precipitation above 20 mm
Sea Level Rise	—	meters of inundation depth
Wildfire	0.59	annual hectares burned

Temperature and Extreme Heat data are for grid cell in which your project are located. The projection is based on the 98th historical percentile of daily maximum/minimum temperatures from observed historical data (32 climate model ensemble from Cal-Adapt, 2040–2059 average under RCP 8.5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Extreme Precipitation data are for the grid cell in which your project are located. The threshold of 20 mm is equivalent to about ¾ an inch of rain, which would be light to moderate rainfall if received over a full day or heavy rain if received over a period of 2 to 4 hours. Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Sea Level Rise data are for the grid cell in which your project are located. The projections are from Radke et al. (2017), as reported in Cal-Adapt (Radke et al., 2017, CEC-500-2017-008), and consider inundation location and depth for the San Francisco Bay, the Sacramento-San Joaquin River Delta and California coast resulting different increments of sea level rise coupled with extreme storm events. Users may select from four scenarios to view the range in potential inundation depth for the grid cell. The four scenarios are: No rise, 0.5 meter, 1.0 meter, 1.41 meters

Wildfire data are for the grid cell in which your project are located. The projections are from UC Davis, as reported in Cal-Adapt (2040–2059 average under RCP 8.5), and consider historical data of climate, vegetation, population density, and large (> 400 ha) fire history. Users may select from four model simulations to view the range in potential wildfire probabilities for the grid cell. The four simulations make different assumptions about expected rainfall and temperature are: Warmer/drier (HadGEM2-ES), Cooler/wetter (CNRM-CM5), Average conditions (CanESM2), Range of different rainfall and temperature possibilities (MIROC5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

6.2. Initial Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	1	0	0	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	0	0	N/A
Wildfire	1	0	0	N/A
Flooding	N/A	N/A	N/A	N/A
Drought	N/A	N/A	N/A	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	0	0	0	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.
The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores do not include implementation of climate risk reduction measures.

6.3. Adjusted Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	1	1	1	2
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	1	1	2
Wildfire	1	1	1	2
Flooding	N/A	N/A	N/A	N/A
Drought	N/A	N/A	N/A	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	1	1	1	2

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.
The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores include implementation of climate risk reduction measures.

6.4. Climate Risk Reduction Measures

7. Health and Equity Details

7.1. CalEnviroScreen 4.0 Scores

The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Exposure Indicators	—
AQ-Ozone	57
AQ-PM	83
AQ-DPM	72
Drinking Water	94
Lead Risk Housing	64
Pesticides	0.00
Toxic Releases	99
Traffic	70
Effect Indicators	—
CleanUp Sites	73
Groundwater	2.1
Haz Waste Facilities/Generators	92
Impaired Water Bodies	0.00
Solid Waste	88
Sensitive Population	—
Asthma	21

Cardio-vascular	25
Low Birth Weights	29
Socioeconomic Factor Indicators	—
Education	47
Housing	31
Linguistic	38
Poverty	26
Unemployment	24

7.2. Healthy Places Index Scores

The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Economic	—
Above Poverty	61.00346465
Employed	73.4377005
Median HI	70.61465418
Education	—
Bachelor's or higher	64.6862569
High school enrollment	100
Preschool enrollment	80.67496471
Transportation	—
Auto Access	70.20402926
Active commuting	51.04581034
Social	—
2-parent households	69.02348261
Voting	63.01809316
Neighborhood	—
Alcohol availability	39.95893751

Park access	81.35506224
Retail density	84.84537405
Supermarket access	52.8551264
Tree canopy	39.71512896
Housing	—
Homeownership	50.03208007
Housing habitability	50.34004876
Low-inc homeowner severe housing cost burden	23.91890158
Low-inc renter severe housing cost burden	55.25471577
Uncrowded housing	39.26600796
Health Outcomes	—
Insured adults	37.80315668
Arthritis	5.4
Asthma ER Admissions	81.6
High Blood Pressure	9.4
Cancer (excluding skin)	6.6
Asthma	37.3
Coronary Heart Disease	5.2
Chronic Obstructive Pulmonary Disease	10.5
Diagnosed Diabetes	40.6
Life Expectancy at Birth	58.6
Cognitively Disabled	87.2
Physically Disabled	88.8
Heart Attack ER Admissions	72.4
Mental Health Not Good	50.5
Chronic Kidney Disease	14.8
Obesity	62.5
Pedestrian Injuries	19.6

Physical Health Not Good	37.9
Stroke	13.0
Health Risk Behaviors	—
Binge Drinking	68.3
Current Smoker	48.5
No Leisure Time for Physical Activity	45.0
Climate Change Exposures	—
Wildfire Risk	0.0

Foreign-born	31.4
Outdoor Workers	66.0
Climate Change Adaptive Capacity	—
Impervious Surface Cover	50.4
Traffic Density	66.5
Traffic Access	51.4
Other Indices	—
Hardship	48.7
Other Decision Support	—
2016 Voting	83.4

7.3. Overall Health & Equity Scores

Metric	Result for Project Census Tract
CalEnviroScreen 4.0 Score for Project Location (a)	44
Healthy Places Index Score for Project Location (b)	70
Project Located in a Designated Disadvantaged Community (Senate Bill 535)	No

Project Located in a Low-Income Community (Assembly Bill 1550)	No
Project Located in a Community Air Protection Program Community (Assembly Bill 617)	No

a: The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.
b: The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

7.4. Health & Equity Measures

No Health & Equity Measures selected.

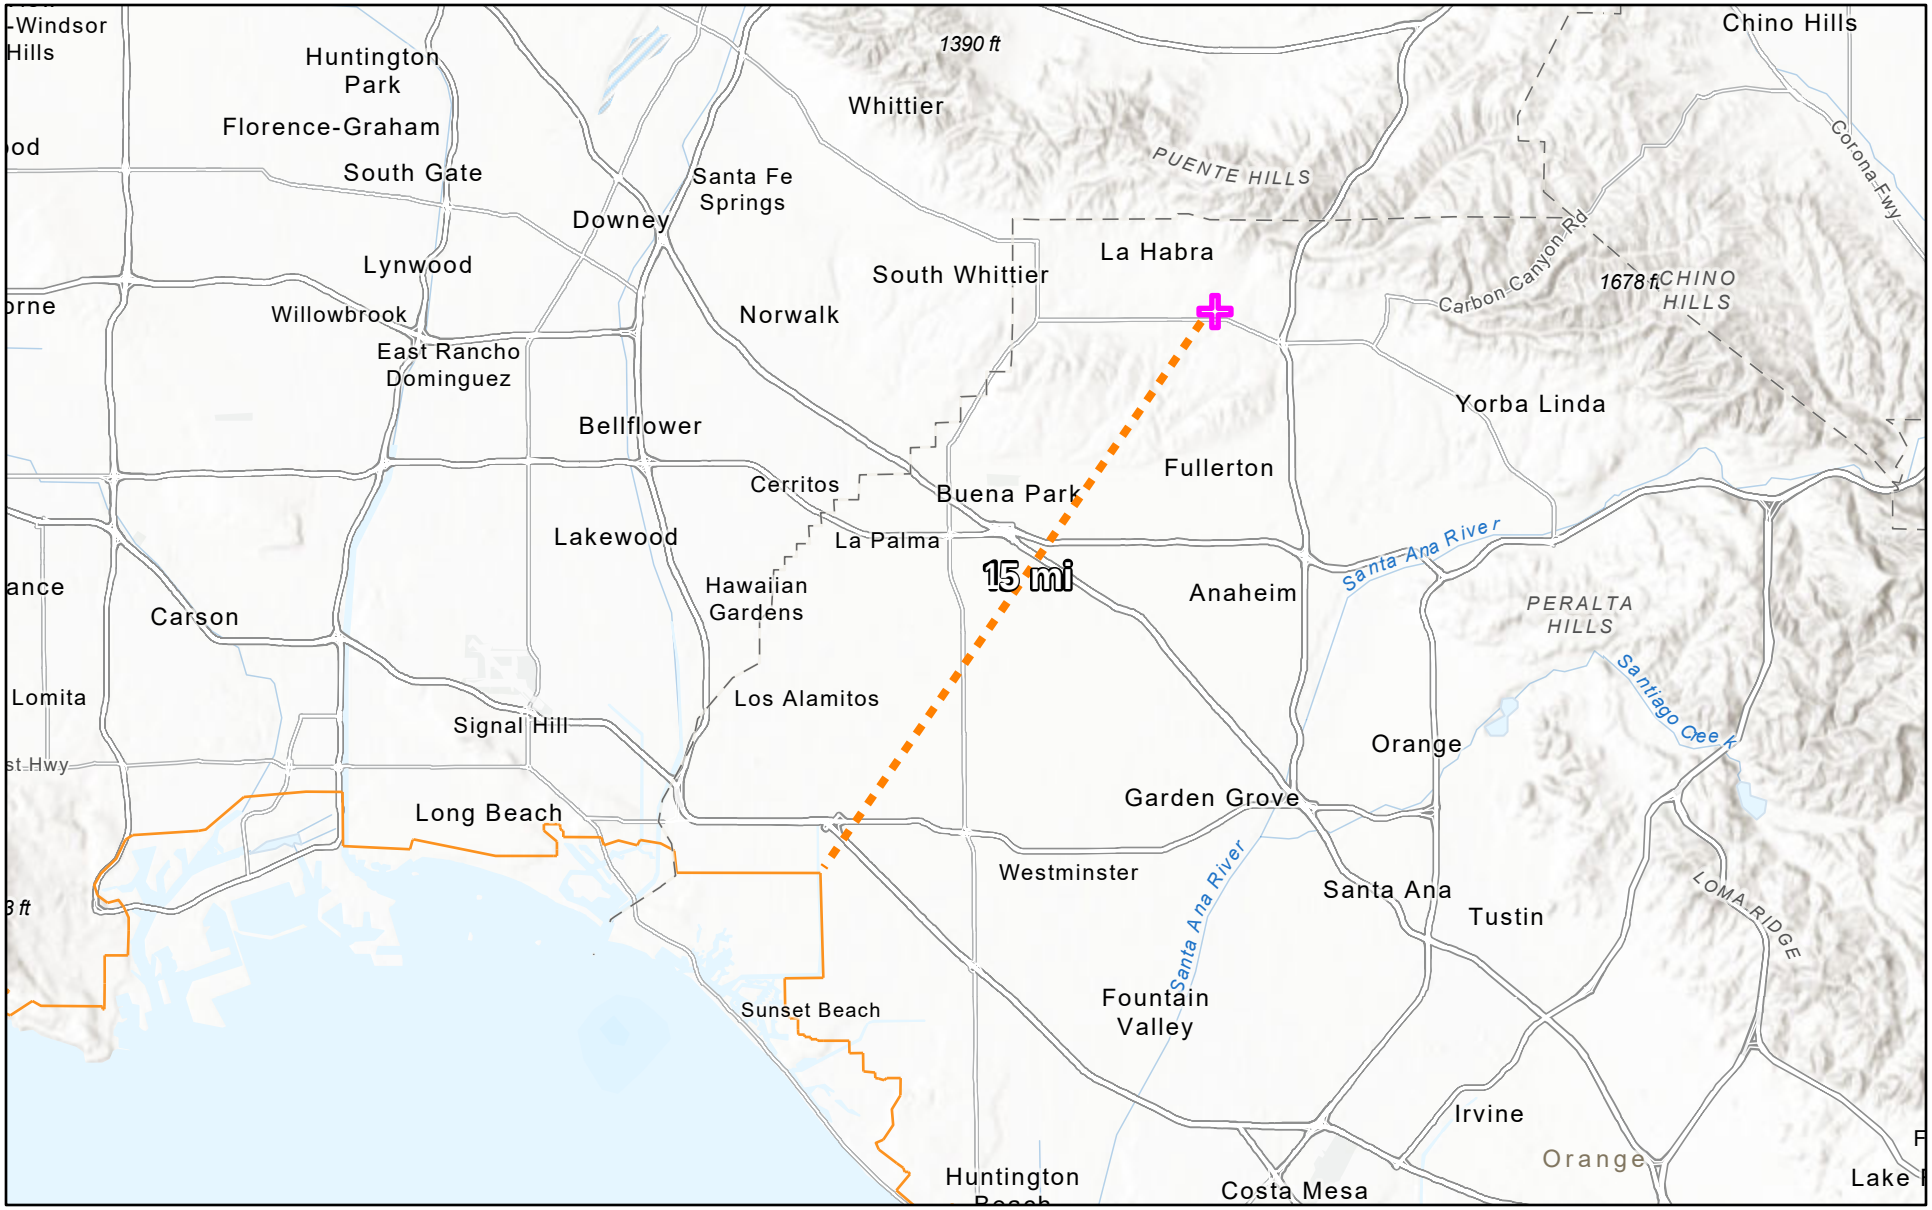
7.5. Evaluation Scorecard

Health & Equity Evaluation Scorecard not completed.

7.6. Health & Equity Custom Measures

No Health & Equity Custom Measures created.

8. User Changes to Default Data



8.1. Justifications

Screen	Justification
Land Use	Land uses based on proposed architectural plans for the project
Construction: Construction Phases	Default construction phases and duration assumed. No demolition anticipated.
Construction: Trips and VMT	Rounded one-way trips/day up to nearest even number. Added vendor trips to Site Preparation and Grading phases to account for water trucks.
Operations: Vehicle Data	Default trip generation assumed for residential units. Zeroed out additional trips for the amenities as they would be private to the project.
Operations: Hearths	No woodburning fireplaces or wood stoves assumed. Conservatively added electric fireplaces for the units.

1. Certification

Integrated Property Analysis, Inc. (IPA) has completed a Phase I Environmental Site Assessment (ESA) of the Vacant Land (the Subject Property), located at the southeast corner of Berry Street and Mercury Lane, Brea, California 92821. IPA performed the Phase I ESA utilizing generally accepted Phase I industry standards in accordance with ASTM Standard E 1527-21.

This report is considered confidential and privileged information which was prepared for the sole and exclusive use and information of C&C Development, Co., LLC (the Client). IPA understands that this report will be used to assist in evaluating environmental issues and site conditions. This report is for the exclusive use of the Client or its legal counsel.

Surveyed by:	Michael Atallah, President/IPA
Written by:	Michael Atallah, President/IPA

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed the all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

Michael Atallah

President

2. Executive Summary

IPA performed a Phase I Environmental Site Assessment that included on-site observations of the accessible areas of the Vacant Land (the "Subject Property"), on July 7, 2025. The Subject Property is located at the southeast corner of Berry Street and Mercury Lane, Brea, California 92821.

The Subject Property consists of one regular-shaped parcel (APN 296-143-01), containing a total of approximately 1.012 acres. The Subject Property is located on one regular-shaped parcel located at the southeast corner of Berry Street and Mercury Lane, in the City of Brea, Orange County, California.

Based on a review of historical sources, the Subject Property was identified to consist of undeveloped land and row crops from 1928 and 1995. Between 1995 and 2010, the Subject Property was used as a palm tree and various tree and plant species growing ground and storage lot. The Subject Property has been undeveloped land since 2014.

The Subject Property is located in a neighborhood of Brea which is located in a commercial area. The immediately surrounding properties consist of Mercury Lane followed by a commercial office/manufacturing building (Dr. Squatch at 114 Berry Street) the north; a commercial industrial building (SPX Recold Inc. at 550 Mercury Lane) to the east, a commercial office building (Mercury Insurance at 555 West Imperial Highway) to the south, and Berry Street followed by commercial industrial buildings (A vacant industrial building at 221 Berry Street and Yorba Linda Electric at 233 Berry Street) to the west.

The following summarizes the independent conclusions representing IPA's best professional judgment based on information and data available to us during the course of this assignment. Factual information regarding operations, conditions, and test data provided by the Client, owner, or their representative have been assumed to be correct and complete. Additionally, the conclusions presented are based on the conditions that existed at the time of the assessment.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 of the Vacant Land, located at the southeast corner of Berry Street and Mercury Lane, Brea, California 92821. Any exceptions to, or deletions from, this practice are described in Section 3 of this report.

Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut was retained to perform an environmental database search for locations identified as hazardous substance and/or hazardous waste facilities near the Subject Property. The Subject Property address was not listed in the databases searched by EDR.

The EDR database search identified several additional facilities located within the search distances specified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Designation E1527-21).

- Electronic Precision Specialties, Inc, located approximately 650 feet northeast of the Subject Property at 537 – 541 Mercury Lane across Mercury Lane is identified on the PFAS ECHO database. The listing is related to the activities performed at the site, including "Fabricated Metal Product Manufacturing". No current violations were found under this address. No records or violations were identified at the site in the ECHO listings. Based on the current regulatory status, the listings are not considered a REC.

- Mercury Insurance, located adjacent to the south of the Subject Property at 555 Imperial Highway, is an office building identified on the RCRA NonGen / NLR, E-Manifest, UST, UST FINDER, CERS HAZ WASTE, CERS TANKS, CERS, HWTS and HAZNET databases. The Underground Storage Tank database identified one 3,000 gallon double wall steel underground storage tank containing diesel fuel installed in 2001. No current violations were found under this address. Based on the current regulatory status, the listings are not considered a REC.

- Dr. Squatch, located adjacent to the north of the Subject Property across Mercury Lane at 114 South Berry Street, is a commercial manufacturing building identified on the RCRA NonGen / NLR, E-Manifest and PFAS ECHO databases. The listing is related to the activities performed at the site, including "Chemical Manufacturing". This site is identified as a RCRA Non-Generator, the site does not presently generate hazardous waste. No current violations were found under this address. No records or violations were identified at the site in the ECHO listings. Based on the current regulatory status, the listings are not considered a REC.

- N C R, located adjacent to the north of the Subject Property across Mercury Lane at 114 South Berry Street, is a commercial manufacturing building identified on the RCRA Listings, CPS-SLIC, CERS HAZ WASTE, UST, HIST UST, Orange Co. Ind Site, EMI, HWTS and CERS databases. Two underground storage tanks, installed in 1977, were reported on site. The former underground storage tanks included one 1,500 gallon tank containing isopropyl alcohol and one 500 gallon tank containing paint thinner. The Orange County Industrial Site database identified the property as a Closed Status site (as of September 25, 2009) with the release of ink/solvent, perchloroethylene, ethylbenzene, toluene and xylene. No current violations were found under this address. Based on the current regulatory status, the listings are not considered a REC.

- Blaine Event Services, IDI Logistics, LLC and DGC, located adjacent to the north of the Subject Property across Mercury Lane at 114 South Berry Street, is a commercial manufacturing building identified on the RCRA NonGen / NLR and E-Manifest databases. This site is identified as a RCRA Non-Generator, the site does not presently generate hazardous waste. No current violations were found under this address. Based on the current regulatory status, the listings are not considered a REC.

- Recold and SPX Cooling Technologies, located adjacent to the east of the Subject Property at 550 Mercury Avenue, is a commercial industrial building identified on the RCRA – SQG, CERS HAZ WASTE, TRIS, FINDS, ECHO, HWTS, HAZNET, CERS and E MANIFEST databases. No current violations were found under this address. Based on the current regulatory status, the listings are not considered a REC.

- Thompson-Hayward Chem Co, Leffingwell and Pacific Plastics, Inc., located approximately adjacent to the east of the Subject Property at 550 Mercury Avenue, feet to the northwest of the Subject Property across Berry Street, is a commercial industrial building identified on the SEMS-ARCHIVE, RCRA-SQG, CERS HAZ WASTE, FINDS, ECHO, HWTS, HAZNET, NPDES, WDS, CIWQS, CERS, CPS-SLIC, ENVIROSTOR, HIST UST, EMI, RCRA – NonGen/NLR and E MANIFEST databases. No current violations were found under this address. Based on the current regulatory status, the listings are not considered a REC.

This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the Subject Property. A recognized environmental condition (REC) refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

This assessment has revealed no evidence of historical recognized environmental conditions (HRECs) in connection with the Subject Property. A historical recognized environmental condition (HREC) refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

This assessment has revealed no evidence of controlled recognized environmental conditions (CRECs) in connection with the Subject Property. A controlled recognized environmental condition (CREC) refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

No further action or investigation is recommended at the Subject Property in relation to RECs, HRECs or CRECs, however, the following environmental issues were identified that warrants mention:

- IPA reviewed a Phase II Environmental Site Assessment – Limited Soil Sampling, prepared by Dynamic Earth Consultants (DEC) and dated March 7, 2012. A summary of the findings for this assessment are described below. The Phase II Environmental Site Assessment – Limited Soil Sampling report revealed the following:

    - The purpose of the Phase II ESA Limited Soil Sampling was to investigate areas of concern identified from the Phase I Environmental Site Assessment dated Monday, February 13, 2012 (project number 2012-005).
    - The Subject Property has been used as an Palm Tree and various tree and plant species growing ground and storage lot since sometime between 1994 and 2010. Prior to 1994, the land appears to have been vacant land. From 1927 to sometime before 1968, the land was part of an orchard and small farm.
    - This investigation is intended as a screening-level tool to determine whether pesticide related impacts to the subject property exist at the specific portions of the property discussed below.
    - The locations of the investigation included directly adjacent to the existing shed which has been removed, the above ground storage tank which has been removed, in the center of the subject site adjacent to the asphalt mound and abandoned cast iron pipe(8" dia.). From the five borings, a total of sixteen soil samples were collected at locations determined by on-site personnel.
    - Five boreholes were advanced by Geoprobe type rig to approximately 5-30 feet below ground surface (bgs). Sample collection depths were determined by screening the cuttings for visual indicators contaminants. The boreholes where logged under the supervision of a California Registered Geologist. The retrieved soil was described, select samples were collected in sterile, clean liner tubes, capped, and labeled. The selected samples were immediately placed on ice and transported under chain of custody to DHS-certified Enviro-Chem Inc. in Pomona, California.

- The selected samples were analyzed for Organochlorine Pesticides (OCP) & PCBs including DDT/DDE.
- No chemicals of concern were detected in concentrations exceeding the standard of industry action levels.
- Dynamic Earth Consultants, Inc. conducted a Limited Phase II ESA Soil Sampling Investigation and non detectable levels of OrganoChlorine Pesticides (OCP including DDT, DDD & DDE) were identified in the soil samples analyzed. This indicates that no substantially significant unauthorized releases of pesticide products have been released into the environment at the sampled locations. Based on the results of this assessment, further environmental investigation is not recommended at this time for the subject property.

2.1. Findings/Conclusions

Historical Review (Section 6)

- The review of the historical data available for the Subject Property and surrounding area revealed no evidence that may have lead to an environmental impact to the Subject Property. No further action or investigation is recommended regarding historical uses.

Operational Activities (Section 7.1)

- IPA observed no circumstances of environmental concern associated with the operational activities at the Subject Property. No further action or investigation is recommended regarding operational activities at the Subject Property.

Hazardous Materials/Petroleum Products (Section 7.2)

- No hazardous materials or petroleum products were observed at the Subject Property. No further action or investigation is recommended regarding the use of hazardous materials or petroleum products at the Subject Property.

Wastes (Section 7.3)

- The Subject Property does not generate, treat, store, or dispose of hazardous, medical, or regulated wastes. Furthermore, the non-hazardous solid and liquid wastes generated at the Subject Property appear to be stored and disposed of properly. No further action or investigation is recommended regarding wastes at the Subject Property.

Polychlorinated Biphenyls (PCBs) (Section 7.4)

- IPA did not identify any utility-owned transformers at the Subject Property. No further action or investigation is recommended regarding the transformer at the Subject Property.

Asbestos-Containing Materials (ACM) (Section 7.5)

- Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are "presumed asbestos-containing material" (PACM).

  The Subject Property is currently unimproved land and no suspect ACM were observed during the site assessment. No further action or investigation is recommended regarding ACM at the Subject.

Radon Gas (Section 7.6)

- Review of the USEPA's Radon Map for Orange County, California indicated that the Subject Property is located in Zone 2, areas with a predicted average indoor radon screening level from 2.0 to 4.0 pCi/L (picoCuries per liter of air). The USEPA action level for radon is 4 pCi/L. Based upon the radon zone classification, radon is not considered to be a significant environmental concern. No further action or investigation is recommended with regard to radon gas levels at the Subject Property.

Lead-Based Paint (LBP) (Section 7.7)

- Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm2 (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

  The Subject Property is currently unimproved land and no suspect lead-based paint was observed during the site assessment. No further action or investigation is recommended regarding LBP at the Subject.

Lead in Drinking Water (Section 7.8)

- Based on published utility department information, the water at the Subject Property is not expected to contain elevated levels of lead. No further action or investigation is recommended regarding lead in drinking water at the Subject Property.

PFAS (Section 7.9)

- PFOS and PFOA are part of a larger group of chemicals called per- and polyfluoroalkyl substances (PFASs). PFASs, which are highly fluorinated aliphatic molecules, have been released to the environment through industrial manufacturing and through use and disposal of PFAS-containing products. PFOS and PFOA are the most widely studied of the PFAS chemicals. PFOS and PFOA are persistent in the environment and resistant to typical environmental degradation processes. As a result, they are widely distributed across all trophic levels and are found in soil, air and groundwater at sites across the United States. The toxicity, mobility and bioaccumulation potential of PFOS and PFOA result in potential adverse effects on the environment and human health.

  As noted in the database reviews; PFAS have been documented at parts per trillion (PPT) levels in many "desalter well" within the database search radii. The closest of these is Well 21 located 100-feet to the east southeast of the subject property. PFAS are noted as a regional contamination issue in groundwater, which is present at depths of >100-feet below grade. The lack of past industrial development of the subject property would indicate that such chemicals would not likely have originated on the subject property. Additionally cleanup concentrations have not been approved by regulators at this time. IPA does not consider these PFAS to be a REC due to groundwater depth and the extremely low (parts per trillion) levels documented in regional groundwater.

  Based on the current and previous uses of the Subject Property, PFAS chemicals are unlikely to have been used at the Subject Property. No further action or investigation is recommended regarding PFAS chemicals at the Subject Property.

Storage Tanks/Pipelines (Section 7.10)

- No evidence of storage tanks or pipelines (above or below ground) was identified. No further action or investigation is recommended regarding storage tanks or pipelines at the Subject Property.

Surface Areas (Section 7.11)

- No issues associated with surface areas were identified. No further action or investigation is recommended regarding surface areas at the Subject Property.

- Visual observation of the storm water system did not identify any abnormal accumulation of petroleum run-off or foreign material. No unusual blockages of the storm water control system were observed. No unusual ponding of storm waters was observed. No further action or investigation is recommended regarding storm water systems at the Subject Property.

Mold (Section 7.12)

- The Subject Property is currently unimproved land and no mold, conditions conducive to mold, or evidence of moisture problems were observed during the site assessment. No further action or investigation is recommended regarding mold at the Subject Property.

Regulatory Review (Section 9)

- Based on review of the regulatory database report, the Subject Property is not identified on the databases evaluated. The adjacent properties are listed on the databases evaluated, however, the adjacent property listings and off-site listed facilities are not anticipated to have negatively impacted the environmental integrity of the Subject Property. In addition, the review does not suggest that the Subject Property is involved in the generation, treatment, storage, or disposal of hazardous waste. No further action or investigation is recommended regarding the regulatory review.

Vapor Encroachment Screen (Section 10)

- Based on review of environmental records searched by EDR for the Tier 1 Vapor Encroachment Screen, IPA concludes that the Subject Property is not listed as a site where the potential for a vapor encroachment condition exists. In addition, the Area of Concern (AOC) did not identify any contaminated sites. No further action or investigation is recommended regarding the Vapor Encroachment Screen.

Adjacent Properties (Section 11)

- IPA identified no current adjacent property uses that are anticipated to have a negative impact on the environmental integrity of the Subject Property. No further action or investigation is recommended regarding the adjacent properties.

2.2. Recommendations

This assessment has revealed no evidence of recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), or controlled recognized environmental conditions (CRECs) in connection with the Site. No further action or investigation is recommended at the Subject Property in relation to RECs, HRECs or CRECs.

3. Survey Approach/Purpose/Limitations

IPA conducted an on-site Environmental Site Assessment of the Subject Property that consisted of a walk-through observation of the accessible areas and interviews with facility personnel and local agency representatives. On-site activities and/or interviews were conducted by Mr. Michael Atallah, President with IPA, with:

- Mr. Todd Cottle, C&C Development
- Mr. Scott Bering, C&C Development

Areas accessed included accessible ground areas and the Subject Property boundaries.

Weather conditions at the time of the Subject Property assessment were clear and warm.

IPA reviewed available federal, state, and local records in an effort to identify sites of known or suspected hazardous waste activity located at or near the Subject Property which could have an adverse impact on the Subject Property. In an attempt to determine whether historical uses of the Subject Property and surrounding area have had an environmental impact on the Subject Property, IPA interviewed individuals knowledgeable about the Subject Property and reviewed available pertinent records and documents. This assessment is based on the evaluation of the information gathered, laboratory analysis of samples collected (when required), and accessibility at the time of the assessment.

The purpose of this report is to provide the Client an assessment concerning environmental conditions (limited to those issues identified in the report) as they existed at the Subject Property. The assessment was conducted utilizing generally accepted Phase I industry standards using the American Society for Testing and Materials (ASTM) Standard Practice E 1527-21. The scope of work included an evaluation of:

- The Subject Property history in an attempt to identify any possible ownership(s) and/or uses that would suggest an impact to the environmental integrity of the Subject Property as identified through review of reasonably ascertainable standard historical sources.

- Physical characteristics of the Subject Property as identified through review of reasonably ascertainable topographic maps.

- Current Subject Property conditions (as applicable), including compliance with appropriate regulations as they pertain to the presence or absence of:

  - Facility storage tanks, drums, containers (above or below ground), etc.
  - Transformers and other electrical equipment which utilize fluid which may potentially contain PCBs
  - The use of hazardous materials/chemicals and petroleum products, and/or the generation, treatment, storage, or disposal of hazardous, regulated, or medical wastes

- An evaluation of information contained in programs such as the NPL, CERCLIS, SHWS, RCRIS, SWF, LUST, and other governmental information systems within specific search distances of the Subject Property. This evaluation was performed to identify any sites that would have the potential to impact the environmental integrity of the Subject Property.

  The regulatory agency report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The report is based on a radius search which focuses on both the Subject Property and neighboring sites that may impact the Subject Property. Neighboring sites listed in governmental environmental records are identified within a specific search distance. The search distance varies depending upon the particular government record being checked. The search is designed to meet the requirements of ASTM Standard E 1527-21. The information provided is assumed to be correct and complete.

- Visual observation of the adjacent properties to identify high-risk neighbors and the potential for known or suspected contamination to migrate onto the Subject Property.

- A Tier 1 Vapor Encroachment Screen in accordance with ASTM Standard E 2600-15.

In addition, at the Client's request, the assessment included the following:

- A review of the physical characteristics of the Subject Property as identified through review of reasonably ascertainable wetlands, flood plain, soils, geology, and groundwater data.

- A screening approach for the potential existence of:

  - Asbestos, including the identification of all suspect materials in visible/readily accessible areas (interior and exterior). The basis for "suspect" determination is taken from the materials listed in Appendix G of the United States Environmental Protection Agency (USEPA) publication Managing Asbestos in Place (the "Green Book"). Therefore, all materials listed in the Green Book which were installed prior to 1981 are considered suspect with the exception of resilient floor tile, asbestos-cement board (transite), and roofing felt, which are considered suspect regardless of installation date (these materials continue to be manufactured and installed in the United States). No materials were sampled as part of the assessment. This screening approach is not a comprehensive (i.e., AHERA-Style) asbestos survey, nor is it intended to fulfill the NESHAP requirements for demolition/renovation purposes, but is intended to identify the potential for an asbestos hazard in accessible areas. This screening is not intended to be used for demolition, abatement, renovation, or repair work. Visual observation of pipe chases and behind walls was not performed as a part of this assessment.

  – Radon gas propensity, through the review of the USEPA's Map of Radon Zones.

  – Lead-based paint for all residential properties constructed prior to 1978. The basis for this determination is taken from the Lead Paint Poisoning Act passed by the Congress of the United States that banned the use of lead paint starting January 1, 1978. Therefore, all paint applied prior to 1978 is considered suspect.

  – Lead in water, based on information provided by the municipal water provider.

  – Mold, including the identification of visible mold growth, conditions conducive for mold growth, and evidence of moisture in accessible areas of the Subject Property. In addition, IPA interviewed Subject Property personnel regarding any known or suspected mold contamination, water intrusion, or mildew like odor problems. Sampling was not performed as a part of this assessment. IPA notes that this assessment does not constitute a comprehensive mold survey of the Subject Property, and the conclusions made are based solely on observable conditions in readily accessible interior areas of the Subject Property on the assessment date.

Limitations

The information presented in this report is based on the agreed upon scope of work as outlined. IPA makes no warranties or guarantees as to the accuracy or completeness of information obtained from information provided or compiled by others. It is possible that information exists beyond the scope of this investigation. Also, changes in site use may have occurred sometime in the past due to variations in rainfall, temperature, water usage, economic, agricultural or other factors. Limited site specific information was made available to IPA about the site. Additional information that was not found or available to IPA at the time of writing the report, may result in a modification of the conclusions and recommendations presented. This report is not a legal opinion. The services performed by IPA have been conducted in a manner consistent with the level of care ordinarily exercised by members of our profession currently practicing under similar conditions. No other warranty, expressed or implied, is made.

It should be noted that all surficial environmental assessments are inherently limited in the sense that conclusions are drawn and recommendations developed from information obtained from limited research and site evaluation. Subsurface conditions were not field investigated as part of this study and may differ from the conditions implied by the surficial observations. Additionally, the passage of time may result in a change in the environmental characteristics at this site and surrounding properties.

It must be noted that no investigation can absolutely rule out the existence of any hazardous materials at a given site. This assessment has been based upon prior site history and observable conditions and activities. Existing hazardous materials and contaminants can escape detection using these methods.

The work performed in conjunction with this assessment and the data developed are intended as a description of available information at the dates and location given. This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated. In addition, this report is not intended as a regulatory agency compliance/safety audit or for the purpose of ensuring that all applicable permits and/or operating procedures are current and/or appropriate.

IPA recommends that any periodic review of any property should include an update of information on environmental conditions in the area. Note that no soils, groundwater, or potable water testing for the presence of hazardous substances was performed for this assessment.

This report is considered confidential and privileged information. It was prepared for the sole and exclusive use and information of the Client and its affiliates, rating agencies, and certain limited investors involved in the Securitization of the property.

3.1. Data Gaps

Data gaps in information exist. However, because the data gaps were not determined to be material in identifying a Recognized Environmental Conditions (RECs) they are not considered by ASTM standards to be *significant* and are therefore not individually addressed in this report.

4. User Provided Information

This Section documents whether the user reported to IPA information pursuant to the responsibilities described in Section 6 of the ASTM Standard E 1527-21.

4.1. User Engaged Environmental Cleanup Liens and Activity And Use Limitation (AUL) Review

The user did not engage IPA to review title and judicial records for environmental liens or Activity and Use Limitations (AULs) recorded against the Subject Property. Furthermore, these documents were not provided to IPA for review. The lack of or inability to obtain this information represents a data gap. Based on the findings of this report, the absence of this information is not considered a *significant* data gap.

4.2. User Questionnaire

A User Questionnaire was provided to the user (Client) to assist the user and IPA in gathering information from the user that may be material to identifying RECs. A copy of the User Questionnaire is provided in the Appendices (Section 12).

4.3. Reason for Assessment

The reason of the assessment was not provided by the user, therefore, it is assumed that the purpose is for due diligence purposes.

5. Subject Location/Description

The Subject Property is located on one regular-shaped parcel located at the southeast corner of Berry Street and Mercury Lane, in the City of Brea, Orange County, California`.

5.1. Subject Description

Age of Subject Property:	Based on a review of historical sources, the Subject Property was identified to consist of undeveloped land and row crops from 1928 and 1995. Between 1995 and 2010, the Subject Property was used as a palm tree and various tree and plant species growing ground and storage lot. The Subject Property has been undeveloped land since 2014.
Building area:	The Subject Property is currently undeveloped land.
Site drainage:	The Subject Property is currently undeveloped land. Storm water is removed from the Subject Property primarily by sheet flow action.
Utilities:	The property is reportedly serviced by Southern California Edison for electricity services, the City of Brea for water and sewer services, and Southern California Gas Company for natural gas services.
Built Improvements:	The Subject Property is currently undeveloped land.
Parking:	The Subject Property is currently undeveloped land.
Amenities/Common Areas:	The Subject Property is currently undeveloped land.

5.2. Environmental Setting

5.2.1. Topography

Review of the La Habra, California Topographic Quadrangle, published by the United States Geological Survey (USGS) and dated 2022, indicated the following:

- The Subject Property has an average elevation of approximately 342.03 feet above mean sea level. Elevations vary slightly across the Subject Property. Slope in the general area of the Subject Property is to the southwest.

- The Subject Property area is depicted as undeveloped land.

- No surface water features are located in the immediate vicinity of the Subject Property.

5.2.2. Wetlands

Wetlands information provided by EDR and coverage for the U.S. Fish and Wildlife Service National Wetland Inventory (NWI) Maps was reviewed via the U.S. Fish and Wildlife Service website at http://wetlandsfws.er.usgs.gov/wtlnds/launch.html. Information provided by EDR and on NWI maps indicated the following:

- No wetland areas are indicated at the Subject Property or adjacent properties.

5.2.3. Floodplain

The property is located in Flood Zone X – Shaded – Areas of 0.2% annual chance flood hazard. Community panel #06059C0041J and 06059C0042J, effective date December 3, 2009.

5.2.4. Soils/Geology

Review of soils information for the Subject Property area provided by EDR indicated the following:

- The Subject Property is located in an area comprised of soil known as Sorrento loam. The soil is described as loam from 0 to 11 inches, silty clay loam from 11 to 61 inches and stratified loamy fine sand to silt loam from 61 to 72 inches. The soil is well drained. These soils are in the Class B Hydrologic Group with moderate infiltration rates. These soils are described as deep and moderately deep, moderately well and well drained soils with moderately course textures.

Review of geologic information for the Subject Property area provided by EDR indicated the following:

Rock Stratigraphic Unit

- Era: Cenozoic
- System: Tertiary
- Series: Pliocene

Geologic Age Identification

- Category: Stratified Sequence

5.2.5. Groundwater Hydrology

According to California's Groundwater: Bulletin 118, published by the State of California Department of Water Resources, the Subject Property is located within the Coastal Plain of Orange County Groundwater Basin. The Coastal Plain of Orange County Groundwater Basin (Orange County Basin) underlies a coastal alluvial plain in the northwestern portion of Orange County. The basin is bounded by consolidated rocks exposed on the north in the Puente and Chino Hills, on the east in the Santa Ana Mountains, and on the south in the San Joaquin Hills. The basin is bounded by the Pacific Ocean on the southwest and by a low topographic divide approximated by the Orange County - Los Angeles County line on the northwest. The basin underlies the lower Santa Ana River watershed.

Shallow ground water levels in the area of the Subject Property are estimated to be more than five feet below ground surface.

Shallow groundwater flow is expected to follow the ground level slope of surface elevations. The direction of this flow at the Subject Property is anticipated to be toward the southwest.

According to environmental documentation posted on the State Water Resources Control Board, GeoTracker website (http://geotracker.swrcb.ca.gov), the depth and direction of groundwater in the vicinity of the Subject Property is inferred to be present at approximately 29 to 30 feet below ground surface (bgs). Estimated groundwater levels may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations.

The nearest surface water in the vicinity of the Subject Property is the Brea Canyon, located approximately 375 feet east of the Subject Property. The Brea Canyon has been developed into a Concrete Wall Channel in this area. No lagoons, surface impoundments, wetlands or natural catch basins were observed at the Subject Property during this assessment.

6. Historical Review

6.1. Chain of Title

A Chain of Title review was not performed for this assessment.

6.2. Prior Use Interviews

According to the Subject Property Point of Contact, the Subject Property has historically been in use as palm tree and various tree and plant species growing ground and storage lot or was historically unimproved or agricultural land.

6.3. Local and/or State Government Agency Record Review/Interviews

IPA visited the Brea Fire Department regarding file information for the Subject Property on July 7, 2025. As the Subject Property is currently undeveloped and does not have an associated address, no files have been found for the Subject Property.

IPA contacted the Orange County Health Care Agency (OCHCA) regarding file information for the Subject Property on July 7, 2025. As of this writing, the OCHCA has not responded to IPA's request. In addition, IPA accessed the OCHCA online reports maintained by the OCHCA at the website: http://ochealthinfo.com/eh/home/reports. The Subject Property was not identified on any of the following reports.

Aboveground Petroleum Storage Tank Listing, Hazardous Waste Facilities Listing, Industrial Cleanup Program, Local Oversight Program (LOP) Lead Cases, Non-Petroleum Underground Storage Tank Listing, or the Underground Tank Facilities Listing.

Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.

IPA reviewed building permits for the Subject Property at the City of Brea Department of Building & Safety on July 7, 2025. According to City of Brea, no records pertaining to the original development of the Subject Property were reasonably ascertainable from the City of Brea. As the Subject Property is currently undeveloped and does not have an associated address, no files have been found for the Subject Property.

Review of available zoning records at the City of Brea, Planning Division indicates that the majority of the subject property is zoned "C-M INDUSTRIAL COMMERCIAL".

The Regional Water Quality Control Board (RWQCB) maintains records for groundwater contamination and remedial activities at selected impacted sites. IPA researched the RWQCB GeoTracker website (www.geotracker.waterboards.ca.gov) on July 7, 2025. No records regarding a release on the Subject Property were on-file on the RWQCB GeoTracker website.

The California Department of Toxic Substances Control (DTSC) files include records of hazardous materials storage and/or impacts at various sites. IPA researched the DTSC EnviroStor website on July 7, 2025. No records regarding a release on the Subject Property were on-file at the DTSC.

IPA researched the Air Quality Management District (AQMD) online database on July 7, 2025 for information regarding any Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) records for the subject property related to air emission equipment, which may include dry cleaning machines and USTs. The subject property is not listed on the AQMD databases. No PTOs, NOVs or NTCs were issued for the Subject Property

IPA researched the State of California Department of Conservation, Division of Oil, Gas and Geothermal Resources (DOGGR), DOGGR Online Mapping System https://www.conservation.ca.gov/dog/Pages/Wellfinder.aspx for information regarding oil and gas development on July 7, 2025. According to the DOGGR Online Mapping System, no oil or gas wells are located on or adjacent to the Subject Property.

6.4. Historical Maps

IPA contacted EDR in an attempt to determine if there were any historic maps in the EDR Historic Map Collection for the Subject Property area.

Review of historical topographic maps back to 1896 did not identify any environmental concerns in the Subject Property area.

6.5. Historical City Directories

Historical city directories as provided by EDR were reviewed for the Subject Property. City directories have tenant listings by address.

Subject Property listings prior to 1982 were not provided in the city directory abstract. No information of environmental significance was identified in the historical city directory review.

6.6. Aerial Photography

Historical aerial photographs were provided by EDR. Review of the photographs identified the following:

1928

Subject Property: The Subject Property appears to be developed for agricultural use as row crops.

Adjacent: The surrounding adjacent properties to the north, south and west appear to be developed for agricultural use as row crops. The surrounding adjacent properties to the east appear to be undeveloped land.

1938

Subject Property: No significant changes visible.

Adjacent: The surrounding adjacent properties to the north, east and west appear to be developed for agricultural use as row crops. The surrounding adjacent properties to the south appear to be developed for agricultural use as row crops and a single family residential property.

1947

Subject Property: No significant changes visible.

Adjacent: No significant changes visible on the surrounding adjacent properties.

1953

Subject Property: No significant changes visible.

Adjacent: No significant changes visible on the surrounding adjacent properties.

1963

Subject Property: No significant changes visible.

Adjacent: No significant changes visible on the surrounding adjacent properties.

1972

Subject Property: The Subject Property appears to be undeveloped land.

Adjacent: The surrounding adjacent properties to the north, east and south appear to be undeveloped land. The adjacent properties to the west appear to be developed with the existing commercial buildings.

1977

Subject Property: The Subject Property appears to be cleared flat land.

Adjacent: The surrounding adjacent properties to the east and south appear to be cleared flat land. The adjacent properties to the west and north appear to be developed with the existing commercial buildings.

1987

Subject Property: The Subject Property appears to be undeveloped land.

Adjacent: The adjacent properties to the north, south east and west appear to be developed with the existing commercial buildings.

1990

Subject Property: No significant changes visible.

Adjacent: No significant changes visible.

1995

Subject Property: No significant changes visible.

Adjacent: No significant changes visible.

2005

Subject Property: No significant changes visible.

Adjacent: No significant changes visible.

2010

Subject Property: Plantings were observed throughout the Subject Property.

Adjacent: No significant changes visible.

2014

Subject Property: The Subject Property appears to be undeveloped land. Numerous vehicles appear to be parked at the Subject Property.

Adjacent: No significant changes visible.

2018

Subject Property: The Subject Property appears to be undeveloped land. Numerous vehicles and trailers appear to be parked at the Subject Property.

Adjacent: No significant changes visible.

2022

Subject Property: The Subject Property appears to be undeveloped land.

Adjacent: No significant changes visible.

6.7. Sanborn Fire Insurance Map Review

Information regarding the history of the subject property was obtained by purchasing and reviewing historical Sanborn Fire Insurance maps from EDR of Shelton, Connecticut. According to EDR, Sanborn Map coverage was not available for the Subject Property and adjacent properties.

6.8. Previous Investigations/Assessments

IPA reviewed a Phase II Environmental Site Assessment – Limited Soil Sampling, prepared by Dynamic Earth Consultants (DEC) and dated March 7, 2012. A summary of the findings for this assessment are described below. The Phase II Environmental Site Assessment – Limited Soil Sampling report revealed the following:

- The purpose of the Phase II ESA Limited Soil Sampling was to investigate areas of concern identified from the Phase I Environmental Site Assessment dated Monday, February 13, 2012 (project number 2012-005).
- The Subject Property has been used as an Palm Tree and various tree and plant species growing ground and storage lot since sometime between 1994 and 2010. Prior to 1994, the land appears to have been vacant land. From 1927 to sometime before 1968, the land was part of an orchard and small farm.
- This investigation is intended as a screening-level tool to determine whether pesticide related impacts to the subject property exist at the specific portions of the property discussed below.
- The locations of the investigation included directly adjacent to the existing shed which has been removed, the above ground storage tank which has been removed, in the center of the subject site adjacent to the asphalt mound and abandoned cast iron pipe(8" dia.). From the five borings, a total of sixteen soil samples were collected at locations determined by on-site personnel.

- Five boreholes were advanced by Geoprobe type rig to approximately 5-30 feet below ground surface (bgs). Sample collection depths were determined by screening the cuttings for visual indicators contaminants. The boreholes where logged under the supervision of a California Registered Geologist. The retrieved soil was described, select samples were collected in sterile, clean liner tubes, capped, and labeled. The selected samples were immediately placed on ice and transported under chain of custody to DHS-certified Enviro-Chem Inc. in Pomona, California.
- The selected samples were analyzed for Organochlorine Pesticides (OCP) & PCBs including DDT/DDE.
- No chemicals of concern were detected in concentrations exceeding the standard of industry action levels.
- Dynamic Earth Consultants, Inc. conducted a Limited Phase II ESA Soil Sampling Investigation and non detectable levels of OrganoChlorine Pesticides (OCP including DDT, DDD & DDE) were identified in the soil samples analyzed. This indicates that no substantially significant unauthorized releases of pesticide products have been released into the environment at the sampled locations. Based on the results of this assessment, further environmental investigation is not recommended at this time for the subject property.

6.9. Plans and Specifications

As-built/renovation-site plans, drawings, or specifications were not available for review at the Subject Property or local agency offices visited for this assessment.

6.10. Historical Summary

Based upon a review of local agency records, historical maps, historical aerial photographs, historical city directories, and interviews with knowledgeable personnel, was identified to consist of undeveloped land and row crops from 1928 and 1995. Between 1995 and 2010, the Subject Property was used as a palm tree and various tree and plant species growing ground and storage lot. The Subject Property has been undeveloped land since 2014.

7. Subject Reconnaissance

7.1. Operational Activities/Noteworthy Tenants

The Subject Property is undeveloped land. No environmentally noteworthy tenants occupy the Subject Property and no environmentally significant operations are conducted at the Subject Property.

Considering the operations assessed at the Subject Property, no environmental permits, registrations or notifications appear to be required.

7.2. Hazardous Materials/Petroleum Products Storage and Handling

Visual observation for the use and/or storage of hazardous materials and petroleum products was performed. The Subject Property is undeveloped land. No evidence of hazardous materials or petroleum storage and handling were observed.

No evidence of spills or staining was observed in the areas of product storage/usage.

Urea formaldehyde insulation was used during the 1970's and early 1980's to reinsulate buildings with little or no existing insulation. Urea and formaldehyde were mixed with a foaming agent injected into the walls of buildings. A problem can ensue when excess formaldehyde is present in the mixture. The formaldehyde can slowly escape from the foam to permeate the building. Release of excess formaldehyde can take a year or more. Gaseous formaldehyde can cause eye, nose, and throat irritation, disturbed sleep, and allergic reactions. Some researchers have claimed that the substance can promote cancer, but this has not been proven conclusively. No evidence of UFFI was observed during the site survey.

7.3. Waste Generation, Treatment, Storage, and Disposal

Visual observation for the generation, treatment, storage, and disposal of wastes was performed.

The Subject Property is currently a vacant lot and is not involved in the generation of wastes. During IPA's site survey, we observed small amounts of miscellaneous nuisance trash. No evidence of hazardous materials or petroleum products was observed in the areas of the miscellaneous nuisance trash. Further, this trash is not considered environmentally significant. No further action or investigation is recommended regarding wastes at the Subject Property.

No excessive odors or overflowing/excessive ground trash were noted in the vicinity of the trash areas. No hazardous, regulated, or medical wastes were noted in the trash areas.

7.4. Polychlorinated Biphenyls (PCBs)

IPA identified no utility-owned transformers at the Subject Property. No further action or investigation is recommended regarding the transformer at the Subject Property.

No additional equipment with the potential to utilize dielectric or hydraulic fluid was observed during the site assessment.

7.5. Asbestos-Containing Materials (ACM)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The Subject Property is currently unimproved land and no suspect ACM were observed during the site assessment. No further action or investigation is recommended regarding ACM at the Subject.

7.6. Radon Gas

Review of the USEPA's Radon Map for Orange County, California indicated that the Subject Property is located in Zone 2, areas with a predicted average indoor radon screening level from 2.0 to 4.0 pCi/L (picoCuries per liter of air). The USEPA action level for radon is 4 pCi/L. Based upon the radon zone classification, radon is not considered to be a significant environmental concern. No further action or investigation is recommended with regard to radon gas levels at the Subject Property.

7.7. Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm2 (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

The Subject Property is currently unimproved land and no suspect lead-based paint was observed during the site assessment. No further action or investigation is recommended regarding LBP at the Subject.

7.8. Lead in Drinking Water

According to published utility department information for the City of Brea, the water supplied to the Subject Property is within federal, state, and local drinking water quality standards.

7.9. PFAS

PFOS and PFOA are part of a larger group of chemicals called per- and polyfluoroalkyl substances (PFASs). PFASs, which are highly fluorinated aliphatic molecules, have been released to the environment through industrial manufacturing and through use and disposal of PFAS-containing products. PFOS and PFOA are the most widely studied of the PFAS chemicals. PFOS and PFOA are persistent in the environment and resistant to typical environmental degradation processes. As a result, they are widely distributed across all trophic levels and are found in soil, air and groundwater at sites across the United States. The toxicity, mobility and bioaccumulation potential of PFOS and PFOA result in potential adverse effects on the environment and human health.

Based on the current and previous uses of the Subject Property, PFAS chemicals are unlikely to have been used at the Subject Property. No further action or investigation is recommended regarding PFAS chemicals at the Subject Property.

7.10. Facility Storage Tanks and Pipelines (above or below ground)

Visual observations for manways, vent pipes, fill connections, concrete pads, and saw cuts did not identify any surface connections or disturbances that would indicate the potential for an underground storage tank (UST) installation at the Subject Property.

No aboveground storage tanks (ASTs) were observed at the Subject Property.

Based on the review of the state list of registered USTs, no USTs are registered for the Subject Property.

Interviews with persons knowledgeable of the Subject Property did not identify any evidence of current or historic storage tanks (above or below ground) at the Subject Property.

Visual observations did not identify any surface markings indicating the existence of subsurface product pipelines at the Subject Property.

7.11. Surface Areas

Observations during IPA's assessment identified that the Subject Property lands are developed with structures, unpaved, bare soil, or covered with vegetation. The land surface of the Subject Property is slightly undulated, with slight changes in elevation. Surface water flow is in a southern direction.

Visual observation of the storm water system did not identify any abnormal accumulation of petroleum run-off or foreign material. No unusual blockages of the storm water control system were observed. No unusual ponding of storm waters was observed.

Visual observation of the Subject Property and adjacent properties did not identify any evidence of distressed vegetation, staining, or surface migration of petroleum releases or hazardous materials onto or off the Subject Property.

Visual observations did not identify any evidence of on-site surface impoundment facilities, pits, dry wells, or dumping of apparent hazardous substances at the Subject Property.

Visual observations did not identify any surface water features including lagoons, ponds or other bodies of water at the Subject Property.

7.12. Mold

The Subject Property is currently unimproved land and no mold, conditions conducive to mold, or evidence of moisture problems were observed during the site assessment. No further action or investigation is recommended regarding mold at the Subject Property.

8. Interviews

8.1. Key Site Manager

Property-related personnel were present at the Subject Property on the day of the site assessment and answered questions to the best of their knowledge regarding Subject Property site systems and conditions.

A Pre-Survey Questionnaire was completed as a part of this assessment. The Questionnaire was completed by Mr. Michael Atallah through an interview with Mr. Todd Cottle of C&C Development, the Subject Property Point of Contact. Information obtained from the Questionnaire has been used in the preparation of this report. Mr. Cottle indicated that he was not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products, or notices from any governmental entity regarding possible violation of environmental laws or possible liability related to hazardous substances or petroleum products.

8.2. Owner

IPA submitted an Owner Questionnaire to the user in an effort to identify the owner of the Subject Property that could be interviewed to provide information regarding proceedings involving the Subject Property. The Questionnaire was completed by Mr. Michael Atallah through an interview with Ms. Shannon Watson of Mercury CXIV LLC, the Owner. Information obtained from the Questionnaire has been used in the preparation of this report. Ms. Watson indicated that she was not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products, or notices from any governmental entity regarding possible violation of environmental laws or possible liability related to hazardous substances or petroleum products.

8.3. User

IPA submitted a User Questionnaire in an effort to obtain information regarding proceedings involving the Subject Property. The User Questionnaire was completed by Mr. Todd Cottle, designated representative of the user. Mr. Cottle indicated that he was not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products, or notices from any governmental entity regarding possible violation of environmental laws or possible liability related to hazardous substances or petroleum products.

8.4. Occupants

The Subject Property is undeveloped land and contains no non-residential tenants. Therefore, based on the ASTM Standard guidance, residential occupants were not interviewed.

8.5. Past Owners, Operators, and Occupants

No past owners, operators, or occupants of the Subject Property who would likely have material information regarding the potential for contamination at the Subject Property were identified.

8.6. Owners Or Occupants of Adjacent or Nearby Property

The Subject Property was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews were not conducted with adjacent or nearby property owners or occupants.

8.7. Interviews with Others

No other individuals were interviewed as part of this assessment.

9. Regulatory Database Review

Based on review of the regulatory database report, and by cross-referencing name, address, and zip code, IPA concludes that the Subject Property is not a listed site. The area search of the Subject Property for listed sites identified various sites outlined in the regulatory database report included in the Appendices, Section 11. Information about the listed sites is included below.

IPA also reviewed the unmappable sites in the database report, cross-referencing addresses and site names. Unmappable sites are environmental risk sites that cannot be plotted with confidence, but can be located by zip code or city name. In general, a site cannot be geocoded because of inaccurate or missing location information in the record provided by the agency. Any identified unmappable site within the specified search radii is included below.

The following are some of the databases which were reviewed for this assessment. See the appended regulatory database report for a complete listing of databases reviewed for this assessment:

- **NPL Listing:** The National Priorities (Superfund) List (NPL) is United States Environmental Protection Agency (USEPA's) database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund Program.

- **Delisted NPL Listing:** The Delisted NPL database is a listing of sites which have been deleted from the NPL list by the USEPA.

- **RCRA-TSD Facilities Listing:** The USEPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA-TSD database is a compilation by the USEPA of reporting facilities that transport, treat, store or dispose of hazardous waste.

- **RCRA-Corracts Facilities Listing:** The USEPA's Resource Conservation and Recovery Act (RCRA) Corrective Action Sites Listing contains information pertaining to hazardous waste treatment, storage, and disposal facilities (RCRA TSD) which have conducted, or are currently conducting, a corrective action(s) as regulated under RCRA.

- **CERCLIS Listing:** This database is a compilation of sites which the USEPA has investigated or is currently investigating for a release or threatened release of hazardous substances.

- **NFRAP Listing:** This database contains information regarding sites which have been removed from the USEPA CERCLIS database.

- **RCRIS-Generator Listing:** The USEPA identifies and tracks hazardous waste from the point of generation to the point of disposal through the Resource Conservation and Recovery Information System (RCRIS). The RCRIS-Generators database is a compilation by the USEPA of facilities that report hazardous waste generation.

- **Emergency Response Notification System (ERNS):** The ERNS is a national database used to collect information on reported releases of oil or hazardous substances.

- **Federal institutional control registry:** This database contains information on sites with federal institutional controls.

- **Federal engineering control registry:** This database contains information on sites with federal engineering controls.

- **SHWS Listing:** This database is a comprehensive listing of sites which are considered to be a threat to the public health and welfare by the California Department of Toxic Substances Control. Further, this is the ASTM equivalent of a State Hazardous Waste Sites List.

- **SWF Listing:** This database is a comprehensive listing of all State Permitted Solid Waste Landfills.

- **Leaking Underground Storage Tanks:** This database contains a summary of information pertaining to leaking underground storage tank (LUST) sites identified by the state.

- **Underground Storage Tanks:** This database contains a summary of information pertaining to registered underground storage tanks (USTs) identified by the state.

- **State Voluntary Cleanup Sites**: This database contains a listing of sites which are in the State voluntary cleanup program

- **Tribal LUST:** This database contains information on Tribal LUST sites.

- **Tribal UST:** This database contains information on Tribal UST sites.

The subject property address was not listed in the databases searched by EDR.

The EDR database search identified several additional facilities located within the search distances specified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Designation E1527-21).

- Electronic Precision Specialties, Inc, located approximately 650 feet northeast of the Subject Property at 537 – 541 Mercury Lane across Mercury Lane is identified on the PFAS ECHO database. The listing is related to the activities performed at the site, including "Fabricated Metal Product Manufacturing". No current violations were found under this address. No records or violations were identified at the site in the ECHO listings. Based on the current regulatory status, the listings are not considered a REC.

- Mercury Insurance, located adjacent to the south of the Subject Property at 555 Imperial Highway, is an office building identified on the RCRA NonGen / NLR, E-Manifest, UST, UST FINDER, CERS HAZ WASTE, CERS TANKS, CERS, HWTS and HAZNET databases. The Underground Storage Tank database identified one 3,000 gallon double wall steel underground storage tank containing diesel fuel installed in 2001. No current violations were found under this address. Based on the current regulatory status, the listings are not considered a REC.

- Dr. Squatch, located adjacent to the north of the Subject Property across Mercury Lane at 114 South Berry Street, is a commercial manufacturing building identified on the RCRA NonGen / NLR, E-Manifest and PFAS ECHO databases. The listing is related to the activities performed at the site, including "Chemical Manufacturing". This site is identified as a RCRA Non-Generator, the site does not presently generate hazardous waste. No current violations were found under this address. No records or violations were identified at the site in the ECHO listings. Based on the current regulatory status, the listings are not considered a REC.

- N C R, located adjacent to the north of the Subject Property across Mercury Lane at 114 South Berry Street, is a commercial manufacturing building identified on the RCRA Listings, CPS-SLIC, CERS HAZ WASTE, UST, HIST UST, Orange Co. Ind Site, EMI, HWTS and CERS databases. Two underground storage tanks, installed in 1977, were reported on site. The former underground storage tanks included one 1,500 gallon tank containing isopropyl alcohol and one 500 gallon tank containing paint thinner. The Orange County Industrial Site database identified the property as a Closed Status site (as of September 25, 2009) with the release of ink/solvent, perchloroethylene, ethylbenzene, toluene and xylene. No current violations were found under this address. Based on the current regulatory status, the listings are not considered a REC.

- Blaine Event Services, IDI Logistics, LLC and DGC, located adjacent to the north of the Subject Property across Mercury Lane at 114 South Berry Street, is a commercial manufacturing building identified on the RCRA NonGen / NLR and E-Manifest databases. This site is identified as a RCRA Non-Generator, the site does not presently generate hazardous waste. No current violations were found under this address. Based on the current regulatory status, the listings are not considered a REC.

- Recold and SPX Cooling Technologies, located adjacent to the east of the Subject Property at 550 Mercury Avenue, is a commercial industrial building identified on the RCRA – SQG, CERS HAZ WASTE, TRIS, FINDS, ECHO, HWTS, HAZNET, CERS and E MANIFEST databases. No current violations were found under this address. Based on the current regulatory status, the listings are not considered a REC.

- Thompson-Hayward Chem Co, Leffingwell and Pacific Plastics, Inc., located approximately adjacent to the east of the Subject Property at 550 Mercury Avenue, feet to the northwest of the Subject Property across Berry Street, is a commercial industrial building identified on the SEMS-ARCHIVE, RCRA-SQG, CERS HAZ WASTE, FINDS, ECHO, HWTS, HAZNET, NPDES, WDS, CIWQS, CERS, CPS-SLIC, ENVIROSTOR, HIST UST, EMI, RCRA – NonGen/NLR and E MANIFEST databases. No current violations were found under this address. Based on the current regulatory status, the listings are not considered a REC.

Remaining Listed Sites

Review of the regulatory agency database report identified that all of the remaining sites are plotted 0.25-mile or farther from the Subject Property. Based on various factors such as distance, gradient relationship, estimated direction of groundwater flow, media impacted, and/or current regulatory status, these sites are not anticipated to have negatively impacted the environmental integrity of the Subject Property.

Orphan Sites

A total of ten properties were identified in the EDR report as "orphan sites". These are properties listed in environmental databases, but which EDR has been unable to locate with adequate precision to determine whether they are pertinent to the investigation at the Subject Property

10. Tier 1 Vapor Encroachment Screen

IPA has completed a Tier 1 Vapor Encroachment Screen of the Subject Property in accordance with ASTM Standard E 2600-15: Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions.

10.1. Purpose

The purpose of this Tier 1 Vapor Encroachment Screen (VES) is to identify, to the extent feasible pursuant to the procedures presented in the ASTM E 2600-15 standard guide, the potential for a Vapor Encroachment Condition (VEC) to exist at the Subject Property.

10.2. Methodology

IPA utilized for this assessment EDR's VEC App to accurately identify and document potential VEC sites within the Subject Property's Area of Concern (AOC). By using integrated data applications and state-of-the-art analytical tools, EDR's VEC App has been specifically designed to adhere to ASTM E 2600-15. EDR's VEC App performs an initial search of all ASTM E 2600-15 standard government record databases and EDR proprietary historical records related to former dry cleaners, gas stations, and manufactured gas plants within the 1/3 mile maximum distance defined in ASTM E 2600-15 for COC-contaminated sites.

10.3. Results

Subject Property: Based on review of environmental records searched by EDR for this Tier 1 VES, IPA concludes that the Subject Property is not listed as a site where the potential for a vapor encroachment condition exists.

Area of Concern (AOC):

- Electronic Precision Specialties, Inc, located approximately 650 feet northeast of the Subject Property at 537 – 541 Mercury Lane across Mercury Lane is identified on the PFAS ECHO database. The listing is related to the activities performed at the site, including "Fabricated Metal Product Manufacturing". No current violations were found under this address. No records or violations were identified at the site in the ECHO listings. Based on the current regulatory status, a vapor encroachment condition can be ruled out.

- Mercury Insurance, located adjacent to the south of the Subject Property at 555 Imperial Highway, is an office building identified on the RCRA NonGen / NLR, E-Manifest, UST, UST FINDER, CERS HAZ WASTE, CERS TANKS, CERS, HWTS and HAZNET databases. The Underground Storage Tank database identified one 3,000 gallon double wall steel underground storage tank containing diesel fuel installed in 2001. No current violations were found under this address. Based on the current regulatory status, a vapor encroachment condition can be ruled out.

- Dr. Squatch, located adjacent to the north of the Subject Property across Mercury Lane at 114 South Berry Street, is a commercial manufacturing building identified on the RCRA NonGen / NLR, E-Manifest and PFAS ECHO databases. The listing is related to the activities performed at the site, including "Chemical Manufacturing". This site is identified as a RCRA Non-Generator, the site does not presently generate hazardous waste. No current violations were found under this address. No records or violations were identified at the site in the ECHO listings. Based on the current regulatory status, a vapor encroachment condition can be ruled out.

- N C R, located adjacent to the north of the Subject Property across Mercury Lane at 114 South Berry Street, is a commercial manufacturing building identified on the RCRA Listings, CPS-SLIC, CERS HAZ WASTE, UST, HIST UST, Orange Co. Ind Site, EMI, HWTS and CERS databases. Two underground storage tanks, installed in 1977, were reported on site. The former underground storage tanks included one 1,500 gallon tank containing isopropyl alcohol and one 500 gallon tank containing paint thinner. The Orange County Industrial Site database identified the property as a Closed Status site (as of September 25, 2009) with the release of ink/solvent, perchloroethylene, ethylbenzene, toluene and xylene. No current violations were found under this address. Based on the current regulatory status, a vapor encroachment condition can be ruled out.

- Blaine Event Services, IDI Logistics, LLC and DGC, located adjacent to the north of the Subject Property across Mercury Lane at 114 South Berry Street, is a commercial manufacturing building identified on the RCRA NonGen / NLR and E-Manifest databases. This site is identified as a RCRA Non-Generator, the site does not presently generate hazardous waste. No current violations were found under this address. Based on the current regulatory status, a vapor encroachment condition can be ruled out.

- Recold and SPX Cooling Technologies, located adjacent to the east of the Subject Property at 550 Mercury Avenue, is a commercial industrial building identified on the RCRA – SQG, CERS HAZ WASTE, TRIS, FINDS, ECHO, HWTS, HAZNET, CERS and E MANIFEST databases. No current violations were found under this address. Based on the current regulatory status, a vapor encroachment condition can be ruled out..

- Thompson-Hayward Chem Co, Leffingwell and Pacific Plastics, Inc., located approximately adjacent to the east of the Subject Property at 550 Mercury Avenue, feet to the northwest of the Subject Property across Berry Street, is a commercial industrial building identified on the SEMS-ARCHIVE, RCRA-SQG, CERS HAZ WASTE, FINDS, ECHO, HWTS, HAZNET, NPDES, WDS, CIWQS, CERS, CPS-SLIC, ENVIROSTOR, HIST UST, EMI, RCRA – NonGen/NLR and E MANIFEST databases. No current violations were found under this address. Based on the current regulatory status, a vapor encroachment condition can be ruled out.

  Based on identified location of the former USTs, distance, depth to groundwater, remediation and regulatory closure, a vapor encroachment condition can be ruled out.

11. Adjacent Properties

Properties in the vicinity of the Subject Property include commercial development. The following properties adjacent to the Subject Property were observed:

North — The Subject Property is bordered to the north by Mercury Lane followed by a commercial office/manufacturing building (Dr. Squatch at 114 Berry Street).

East — The Subject Property is bordered to the east by a commercial industrial building (SPX Recold Inc. at 550 Mercury Lane).

South — The Subject Property is bordered to the south by a commercial office building (Mercury Insurance at 555 West Imperial Highway).

West — The Subject Property is bordered to the west by Berry Street followed by commercial industrial buildings (A vacant industrial building at 221 Berry Street and Yorba Linda Electric at 233 Berry Street).

Based on observations and available regulatory information, the adjacent property uses are not anticipated to adversely impact the environmental integrity of the Subject Property.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Integrated Property Analysis were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

APPENDIX C:
Questionnaires

KEY SITE MANAGER PRE-SURVEY QUESTIONNAIRE

Name of person completing questionnaire: Mr. Todd Cottle

Association with property: Designated Representative

Length of association with property: 1 Year

Date: July 7, 2025

Property Name: Vacant Land, Brea, CA

Directions: Please answer all questions to the best of your knowledge and in good faith. Mark the column corresponding to the appropriate response. Additional details necessary to explain any yes or unknown responses should be provided in the "Comments" column.
Note: *U/NR* indicates *"Unknown"* or *"No Response"*.

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
1A.	Is the Subject Property used for an industrial use?		X		
1B.	Are any adjoining properties used for an industrial use?		X		
2A.	To the best of your knowledge, has the Subject Property been used for an industrial use in the past?		X		
2B.	To the best of your knowledge, has any adjoining properties been used for an industrial use in the past?		X		
3A.	Is the Subject Property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?		X		
3B.	Is any adjoining property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?		X		
4A.	To the best of your knowledge, has the Subject Property been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?		X		
4B.	To the best of your knowledge, has any adjoining property been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?		X		

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
5A.	Are there currently any automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than five gallons in volume or fifty gallons in the aggregate, stored on or used at the Subject Property?		X		
5B.	To the best of your knowledge, have there been previously any automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than five gallons in volume or fifty gallons in the aggregate, stored on or used at the Subject Property?		X		
6A.	Are there currently any industrial drums (typically 55 gallon) or sacks of chemicals located on the Subject Property?		X		
6B.	To the best of your knowledge, have there been previously any industrial drums (typically 55 gallon) or sacks of chemicals located on the Subject Property?		X		
7A.	Are there currently any groundwater monitoring wells or other groundwater wells (i.e., potable drinking water wells) located on the Subject Property?		X		
7B.	To the best of your knowledge, have there been previously any groundwater monitoring wells or other groundwater wells (i.e., potable drinking water wells) located on the Subject Property?		X		
8A.	Has fill dirt been brought onto the Subject Property which originated from a contaminated site?		X		
8B.	Has fill dirt been brought onto the Subject Property which is of an unknown origin?		X		
9A.	Are there currently any pits, ponds or lagoons located on the Subject Property in connection with waste treatment or waste disposal?		X		
9B.	To the best of your knowledge, have there been previously any pits, ponds or lagoons located on the Subject Property in connection with waste treatment or waste disposal?		X		
10A.	Is there currently, any stained soil on the Subject Property?		X		
10B.	To the best of your knowledge, has there been previously any stained soil on the Subject Property?		X		
11A.	Are there currently any registered or unregistered storage tanks (above or underground) located on the Subject Property?		X		
11B.	To the best of your knowledge, have there been previously any registered or unregistered storage tanks (above or underground) located on the Subject Property?		X		

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
12A.	Are there currently any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the Subject Property or adjacent to any structure located on the Subject Property?		X		
12B.	To the best of your knowledge, have there been previously any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the Subject Property or adjacent to any structure located on the Subject Property?		X		
13A.	Are there currently any flooring, drains, or walls located at the Subject Property that are stained by substances other than water or are emitting foul odors?		X		
13B.	To the best of your knowledge, have there been previously any flooring, drains, or walls located at the Subject Property that are stained by substances other than water or are emitting foul odors?		X		
14A.	If the Subject Property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system?		X		
14B.	If the Subject Property is served by a private well or non-public water system, has the well been designated as contaminated by any government environmental/health agency?		X		
15A.	Have you been informed of the past existence of hazardous substances or petroleum products with respect to the Subject Property or any facility located on the Subject Property?		X

16A.	Are there any environmental liens or governmental notification relating to past or current violations of environmental laws with respect to the Subject Property or any facility located on the Subject Property?		X		
16B.	Have you been informed of the past existence of environmental violations with respect to the Subject Property or any facility located on the Subject Property?		X		
16C.	Are you aware of any pending, threatened, or past litigation relevant to hazardous substances of petroleum products in, on or from the property?		X		
16D.	Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?		X		

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
16E.	Are you aware of any notices from any governmental entity regarding any possible violation or environmental laws or possible liability relating to hazardous substances or petroleum products?		X		
17.	Have there been any environmental site assessments of the Subject Property that indicated the presence of hazardous substances or petroleum products on, or contamination of, the Subject Property or recommended further assessment of the Subject Property?		X		
18.	Does the Subject Property discharge waste water on or adjacent to the Subject Property, other than storm water, into a storm water sewer system?		X		
19.	Does the Subject Property discharge waste water on or adjacent to the Subject Property, other than storm water, or into a sanitary system?		X		
20.	Have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the Subject Property?		X		
21.	Is there a transformer, capacitor or any hydraulic equipment for which there are any records indicating the presence of PCBs?		X		
22.	Is there now or has there ever been any asbestos-containing materials (ACM), in any application, on the Subject Property?		X		
23.	Has there ever been any ACM testing conducted on the Subject Property?		X		
24.	Is there an asbestos Operations and Maintenance (O&M) program in place at the Subject Property?		X		
25.	Is there now or has there ever been any lead-based paint (LBP) applications on the Subject Property?		X		
26.	Has there ever been LBP testing conducted on the Subject Property?		X		
27.	Is there a Lead Paint Operations and Maintenance (O&M) Program in place at the Subject Property?		X		
28.	Has the water at the Subject Property ever been tested for lead?		X		
29.	Has Radon testing ever been conducted at the Subject Property?		X		
30.	Are there any other Operations and Maintenance (O&M) programs in place that we should be made aware of?		X		

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
31.	Is the Subject Property or any portion of the Subject Property located or involved in any environmentally sensitive areas (i.e., wetlands, coastal barrier resource areas, coastal barrier improvement act areas, flood plains, endangered species, etc.)?		X		
32.	Do you know or suspect that mold was or is present in the building(s) or HVAC system? - If "Yes", proceed to question #33. - If "No", skip question #33 and proceed to question #34.			X	
33.	Are there reliable procedures that specify the actions (i.e. operations and maintenance) to be taken to prevent and/or respond to mold or mold producing problems?			X	
34.	Is there a mold Operations and Maintenance (O&M) program in place at the Subject Property?			X	
35.	Is the HVAC system inspected at least annually?			X	
36.	Have identified HVAC problems been corrected in a timely manner?			X	
37.	Is there now, or has there ever been evidence of mold or mildew present at the building(s)? If so, when?			X	
38.	Is there now, or has there ever been any water damage in the building(s), whether from flooding, plumbing, roof leaks, or other sources? If so, when?			X	
39.	Has there ever been any sort of Indoor Air Quality (IAQ) or mold testing conducted in the building(s)?			X	

Summarize historical Subject Property use (when was the Subject Property developed with the current improvements, what modifications have taken place, what was the Subject Property used for prior to its current use)	Please refer to report

USER QUESTIONNAIRE

IPA has been retained to conduct a Phase I Environmental Site Assessment (ESA) of the following property. The Phase I ESA will involve site observations, interviews, and a review of available documentation. To ensure the success of the assessment, and in accordance with the ASTM 21 Scope of Work for this assessment, which documents certain User responsibilities, we are submitting this questionnaire to help you meet those responsibilities. Please complete this questionnaire and return via email or by fax to 949-756-8280 (within one business day of receipt).

		Date:	**July 7, 2025**
Name of person completing questionnaire:	**Mr. Todd Cottle**	**Company:**	**C&C Development**
Length of association with property:	**1 Year**	**Phone Number:**	**(714) 288-7600**
Property Name/Address:	**Vacant Land, SE Corner of Berry Street and Mercury Lane, Brea, California 92821**		
IPA Subject Number:	**0196-0084**		

Directions: Please answer all questions to the best of your knowledge and in good faith. Mark the column corresponding to the appropriate response. Additional details necessary to explain any yes or unknown responses should be provided in the "Comments" column.
Note: *U/NR* indicates *"Unknown"* or *"No Response"*, and *"N/A"* indicates not applicable.

	QUESTION	RESPONSE			COMMENTS
		Y	N	U/NR	
1	Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?		X		
2	Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?		X		
3	Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?		X		
4	Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?		X		
5	Are you aware of any Activity and Use Limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?		X		
6	As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	X			
7	Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?			X	

QUESTION			RESPONSE			COMMENTS
			Y	N	U/ NR	
8	Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user			X		
	8 (a)	Do you know the past uses of the property?		X		
	8 (b)	Do you know of specific chemicals that are present or once were present at the property?		X		
	8 (c)	Do you know of spills or other chemical releases that have taken place at the property?		X		
	8 (d)	Do you know of any environmental cleanups that have taken place at the property?		X		
9	As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?			X		

In addition, are you aware of any of the following documents, and if so, please forward copies of the document(s) to IPA at 380 South Melrose Drive, Suite 387, Vista, California 92081 (along with a copy of this form):

- ☒ **Helpful Documents to be forwarded to IPA:**
- ☐ Environmental site assessment reports (i.e., Phase I, Phase II, tank testing results, radon, lead paint, or asbestos testing, etc.)
- ☐ Environmental compliance audit reports; risk assessments; and recorded Activity and Use Limitations (AULs)
- ☐ Environmental permits (i.e., solid waste disposal, hazardous waste disposal, wastewater, NPDES, underground injection, etc.)
- ☐ Registrations for underground storage tanks (USTs) and aboveground storage tanks (ASTs)
- ☐ Registrations for underground injection systems
- ☐ Material safety data sheets
- ☐ Community right-to-know plan
- ☐ Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans, etc
- ☐ Reports regarding hydrogeological or geotechnical conditions on the property and surrounding area
- ☐ Notices/correspondence from any agency relating to past/current violations of environmental laws, or liens encumbering the property
- ☐ Hazardous waste generator notices or reports
- ☐ Other:

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/27/2025 has revealed that there are 4 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/02/2025 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/02/2025 has revealed that there are 17 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 01/21/2025 has revealed that there are 20 CA ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

CA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the CA SWF/LF list, as provided by EDR, has revealed that there is 1 CA SWF/LF site within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 6 CA UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/02/2025 has revealed that there are 44 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 03/24/2025 has revealed that there are

9 PFAS ECHO sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 8 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there are 27 E MANIFEST sites within approximately 0.25 miles of the target property.

CA DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the CA DRYCLEANERS list, as provided by EDR, has revealed that there are 2 CA DRYCLEANERS sites within approximately 0.25 miles of the target property.

Violation Date:	06-23-2020
Citation:	23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded

MERCURY INSURANCE INC (Continued) **S112918986**

	to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	Returned to compliance on 06/26/2020. Observation: The designated operator (DO) reports maintained on site are not complete. The reports have not been signed by the owner/operator after the DO monthly inspections have been completed from October 2018 to April 2019. Corrective Action: Please review the inspection report after the DO completes them and sign and acknowledge the upcoming DO reports. Please submit a copy of a complete DO report to this agency to abate the violation.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Consent to enter, inspect and take any necessary pictures was given by Facilities Manager, Robert Harrelson. He confirmed that the site has about 600 employees. The hazardous waste found here: - Flammable waste (Diesel contaminated water) = 5 gallons The hazardous waste container was closed and labeled properly. Manifests were available and were reviewed for 2014,2015 but 2016 was not available. The hazardous waste was being picked up by California Hazardous Environmental Services. Walked the perimeter of the site, and there were no hazardous waste spills or discharges observed during this inspection. Weekly inspections are performed by the Facility Manager if hazardous waste is present on-site for longer than a week. Per Mr. Harrelson, the hazardous waste (diesel contaminated test water) is usually picked up within a week of the UST testing. Emergency response sticker with the necessary [Truncated]

Eval Notes: On-site for a routine inspection. Met with Barbara Genung this date. This is a 3,000-gallon diesel tank connected to a back up generator. This is a suction system with a day tank. No line leak detectors installed. Monitoring panel located outside in the generator area. Compliance binder reviewed. UST permit and testing records are in the binder. Do training, inspections and notification are current. There is a flapper valve for overfill protection and two liquid sensors. A VR 208 in the sump and a VR 420 in the annular space. There is an outside annunciator that sounds when there is an alarm. The spill bucket is located inside the sump and was tested for 60 minutes this date. All the UST forms, financial responsibility and designated operator information have been submitted to the portal. The UST forms and monitoring plane were declined by OCHCA and sent back for corrections. The portal was accessed during the inspection, however the UST data [Truncated]

Eval Notes: On site to conduct a routine Hazardous Materials Disclosure and Business Emergency Plan inspection. Met with Facilities Manager Joel Blandon of Mercury Insurance. Consent was provided to enter and conduct inspection activities. The HazMat Inventory and Business Emergency Plan (HMBEP) has been submitted into the CERS Database for 2024. The 2024 HMBEP was accepted. The following were verified: - Chemical Disclosure at the facility; - Contingency plan/BEP; - Training program; and, - Facility Map. Please note that if the facility decides to discontinue any of the above chemicals, proper disposal or removal of chemicals is required and maintenance of disposal records will be verified. Within 30 days of removal, contact this agency to verify that the hazardous material is no longer stored on site and remove it from the facility's listed disclosable chemicals.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Violations:

Site ID:	413651
Site Name:	SPX Cooling Technologies, Inc. (Recold)
Violation Date:	12-09-2019
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes:	Returned to compliance on 01/21/2022. Observation: Hazardous waste training was only available for spill clean-ups, no hazardous waste management training was completed. Corrective action: Please make sure all employees working within this facility are adequately trained in hazardous waste management per 22 CCR 15 66265.16 based on their job title and job description. The training sign in sheet should include: name, date, signature and type of training. Please provide training for the employees at this facility and submit training documentation (sign-in sheet) to this agency within 30 days.

Violation Source:	CERS,

Site ID:	413651
Site Name:	SPX Cooling Technologies, Inc. (Recold)
Violation Date:	12-07-2016
Citation:	22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 01/03/2017. A drum of flammable waste paint from the aerosol punching drum was present on-site with an accumulation start date of 3/10/15. The manifest on-site was checked and the last time a flammable waste paint drum was shipped was on 3/5/15. Please ship off the waste paint drum immediately and send a copy of the manifest to the agency within 30 days.

Eval Date: 03-14-2023
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Materials Disclosure and Business Emergency Plan inspection. Met with Gerardo Traconis of SPX Cooling Technologies. Consent was provided to enter and conduct inspection activities. The HazMat Inventory and Emergency Plan (HMBEP) has been submitted into the CERS Database on 2/28/2023. The 2023 HMBEP has been approved. The following were verified: - Chemical Disclosure at the facility; - Contingency plan/BEP; - Training program; and, - Facility Map. Please note that if the facility decides to discontinue any of the above chemicals, proper disposal or removal of chemicals is required and maintenance of disposal records will be verified. Within 30 days of removal, contact this agency to verify that the hazardous material is no longer stored on site and remove it from the facility's listed disclosable chemicals.

SPX COOLING TECHNOLOGIES, INC. (RECOLD) (Continued) **S113176788**

Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: The HMBP disclosure was accepted on 07/16/13. Abate violation U102 from previous inspection reports.
Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-07-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous material and business plan inspection. Consent to enter, inspect and take pictures was given by the EHS specialist, Alysha Mckeen at 12:15pm. Walked the site with Ms. Mckeen and observed the hazardous material storage areas throughout the cooling system manufacturing warehouse and the following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - Argon - Liquefied oxygen - Acetylene - Hydraulic oil (inside machines) - Nitrogen gas - Liquid Nitrogen - Oxygen - Propane - CNG Business emergency plan was available on site. Emergency response equipment was present on-site and serviced. Annual Hazcomm training was completed for the employees training records were available for review. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount [Truncated]

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous material and business emergency plan inspection. Consent to enter, inspect and take any necessary pictures was given by the Plant Manager, Farzad Farahani at 2:02pm. Walked the site with Mr. Farahani and observed the hazardous material storage areas throughout the Plastic Pipe manufacturing warehouse and the following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - Argon = 300 CF - Cal Flo AF =110 gallons - Duratherm 600 - Mobil Cut 100 - Mobil Gear 600 - Oxygen - Flushing Fluid - Propane - Waste Oil - Polystyrene powder (rail cars and silos) The site manufactures large quantity of PVC pipe, and hence stores a lot of Polystyrene powder per Mr. Farahani. Business emergency plan was present on-site. Emergency response equipment was present onsite and serviced. Annual employee training is being conducted for Safety related issue but not hazardous [Truncated]

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Evaluation:
Eval General Type: Case Development Inspection
Eval Date: 01-25-2001
Violations Found: No
Eval Type: Industrial Storm Water Enforcement Follow-up
Eval Notes: On January 25, 2001 Regional Board staff followed up a citizen complaint in regards to the above mentioned facility. Contact was first made with Charles McLary of Russell Co. Staff stopped to take pictures from the last storm event which occurred on the 24th of January. There was evidence of a PVC discharge in the storm swale (see photos). After the pictures were taken staff went to Pacific Plastic for a scheduled meeting. Contact was made Raphael Barhremand the CEO of the company, Dr. Anayat Raminfar and, Farhad the Maintenance Supervisor. Staff started the meeting by going over the prior discharges and all the visits that occurred over the last 6 months. Staff told Dr. Anayat Raminfar that the Regional Water Board is now considering further action against his company. Dr. Raminfar made clear all of the steps that his company has taken and is still taken to prevent unauthorized discharges from leaving the property. For example, they have retained an environmental consultant, they have filled all the necessary paper work necessary and, they have implemented several BMPs to prevent pollutants from coming in contact with storm water. Dr. Raminfar expressed that he wanted Regional Water Board staff to convey all measures that the company was taken to the Executive Officer. The following observations were made during the inspection of the facility; The facility was clean over all (see photos). The south side of the facility showed signs of PVC dust and water from the prior discharge (see photos). Pictures were also taken of the new BMPs that the facility was implementing currently. Dr. Raminfar wanted to set up a meeting with the Executive Officer immediately. Staff instructed Dr. Raminfar to wait till he received correspondence from this office.

Eval General Type: Case Development Inspection
Eval Date: 01-26-2001
Violations Found: No
Eval Type: Industrial Storm Water Enforcement Follow-up
Eval Notes: On January 26, 2001. Regional Water Board staff went to Russell Co to gather water samples, pictures, and soil samples. Contact was made with Charles McLary the Plant Manager. Charles accompanied staff to the south side of the facility to take pictures. No contact was made with Pacific Plastic.
Eval Division: Water Boards
Eval Program: INDSTW

LEFFINGWELL CHEMICAL PLANT (Continued) **1000229401**

Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-28-2013
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: warm and clear. Contact was unable to produce SWPPP. Facility is fitted with two vaults at the southwest corner. Contact no longer has manufacturer's information on them (Jensen Pre-cast) due to a fire years ago. Contact reports stormwater samples taken from inside of first rectangular vault; instructed them to sample at outlet of second cylindrical vault. First vault appears to be a settling vault with filter fabric separating three chambers. Cylindrical vault appears to be a simple settling chamber without filters or baffles. Both reported emptied and inspected 2x/year on a regular schedule. Last vault outlets into a swale after passing through another filter fabric at the fence; this fabric is torn and needs replacement and area in front needs to have dirt/debris removed. Found plastic powder spill prevention efforts ineffective at the rail car unloading area. Plastics overfill or spill out of cardboard totes in two instances. Yard is swept with a mechanical sweeper; has been broken for about a week with expected repair in another week. Pipe is being washed on site with wastewater discharged to ground.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-03-2010
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Surface water flows to a clarifier at the southwest corner of the site.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Case Development Inspection
Eval Date: 03-01-2013
Violations Found: No
Eval Type: Industrial Storm Water Enforcement Follow-up
Eval Notes: Contact was able to produce the SWPPP; no date. Site plan does not show all drainage including the reported sewer drain inlet at N-side of facility. BMPs not being carried out per SWPPP: "any spillage will be swept up immediately" (p 14) from rail cars; compressor water to be poured into the sewer (p 15); perimeter fences to be lined with filter fabric for runoff/windblown pollution (p 16). Contact reports that vaults will be cleaned next week Tuesday. Contact provided additional documentation on functions of vaults and latest cleanout.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Case Development Inspection
Eval Date: 03-07-2013
Violations Found: No
Eval Type: Industrial Storm Water Enforcement Follow-up

LEFFINGWELL CHEMICAL PLANT (Continued) **1000229401**

Eval Notes: This follow-up inspection occurred to investigate the principle of operation of the vaults at the SW corner and to confirm that a new sweeper was procured. The vaults were reported to be cleaned out, allowing inspection of the interior chambers. No hanging baffles were observed; only screened weirs were found with secondary overflow weirs that do not appear used. Overflow appears to occur around the sides of the vaults. Contact reported that the vaults were installed at the recommendation of the City. Further inspection of the regrind building roof found regrind powder piled up around the air cyclone. Cyclone is accessible using a cage on a forklift. New sweeper was observed in operation but staff are still getting used to using it; observed staff emptying it into a waste tote and spill a large portion onto the ground. Contact reports that rail cars are replaced every 3 days.

Eval General Type: Case Development Inspection
Eval Date: 08-26-2000
Violations Found: No
Eval Type: Industrial Storm Water Enforcement Follow-up
Eval Notes: On August 28, 2000. Regional Water Board Staff responded to a citizen complaint against the above mentioned facility. A large amount of PVC dust and water was observed flowing south through the storm swale. The discharge occurred over the weekend of 26-27th of August(see photos). Regional Water Board staff made contact with Charlie McLary the Plant Manager of Russell Co. Charlie showed staff the pictures he had taken over the weekend and gave a quick explanation of what he observed. Staff took the pictures in to custody. Staff then made contact with the owner of Pacific Plastic Dr. Anayat Raminfar. Staff showed Dr. Anayat Raminfar the pictures that were taken over the weekend, and questioned him as to what happened. Dr. Raminfar stated that he was not a were of the problem. After review of the pictures, Dr. Raminfar and staff inspected the facility. Specifically, the south portion of the facility where the discharge occurred. Dr. Raminfar stated one of his employees had mistakenly emptied out the street sweeper in the back of the facility. Dr. Raminfar stated that he knew who it was and that he would " fire" this employee today. Staff stated that this type of discharge is unauthorized and needs to be stopped immediately. Dr. Raminfar stated that this would be the last time this would happen.

Violations Found: No
Eval Type: Industrial Storm Water Enforcement Follow-up
Eval Notes: On January 17, 2001, Regional Water Board staff responded to a citizen complaint against the above mentioned company. Contact was made with Charlie McLary the Plant Manager of Russell Co. Charlie produced photos from the last rain event which occurred over the weekend (Jan 11-12th). Charlie stated that during the last storm there was heavy flows of PVC dust and water coming from Pacific Plastic. Staff inspected the storm swale located on the south side of Pacific Plastic and, running south through Russell Co. there was evidence of PVC dust throughout the entire storm swale(see photos). Also, there was

LEFFINGWELL CHEMICAL PLANT (Continued) **1000229401**

evidence that an employee from pacific Plastic placed a two by ten (2x10) board and propped up the fabric filter so that the water could flow faster thus making any BMPs ineffective. Staff took several pictures at this time. Regional water Board staff then went to Pacific to speak with Dr. Raminfar. Staff made contact with John Grajeda. John stated that no one was in at this time and that he expected the management to be in at around 10:30 a.m. Staff asked if John would accompany them to the back of the facility to inspect and take a few pictures. John said yes and led us to the south side of the facility. Upon inspection of the south side of the property there was evidence of PVC dust that had collected up against the fence and, also, evidence that the water had risen so high that it flowed west out of the facility's storm swale to the neighbors property located to the west of the facility. Staff instructed John to let Dr. Raminfar we stopped by and to call us in regards to the last discharge.

CERS:
Name: PACIFIC PLASTICS INC
Address: 221 S BERRY ST
City,State,Zip: BREA, CA 92821
Site ID: 699853
CERS ID: 10565809
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 699853
Site Name: Pacific Plastics inc
Violation Date: 09-25-2019
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

HILL PHOENIX (Continued) **S113157356**

Violation Notes:	Returned to compliance on 02/25/2022. Observation: No annual HMBP training records were available for review. Failure to provide and maintain records of annual training and refreshers to employees about hazardous materials and emergency response plan is a violation of HSC 6.95 25505(a)(4). Corrective Action: Please provide training for the employees at this facility and submit training documentation to this agency within 30 days. The training sign in sheet should include: name, date, signature and type of training.
Violation Division:	Orange County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS,
Site ID:	699853
Site Name:	Pacific Plastics inc
Violation Date:	01-29-2014
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 01/29/2014. One (1) drum of waste oil was observed to be not labeled. The drum was labeled during the inspection and the violation was abated during the inspection.

Eval Notes: On site to conduct a routine Hazardous Materials Disclosure and Business Emergency Plan inspection. Met with Farzad Farhani and Richard Pasek of Pacific Plastics. Consent was provided to enter and conduct inspection activities. The HazMat Inventory and Emergency Plan (HMBEP) has been submitted into the CERS Database in June 2023. The CERS HMBEP must be submitted annually. The 2023 HMBEP was not accepted. The following chemicals was verified for this location: - Facility information - Contingency plan/BEP; - Training program; and, - Facility Map. Please correct the CERS information for the chemicals above threshold at the 221 address. Please note that if the facility decides to discontinue any of the above chemicals, proper disposal or removal of chemicals is required and maintenance of disposal records will be verified. Within 30 days of removal, contact this agency to verify that the hazardous material is no longer stored on site and remove it from the facility’s listed disclo

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Registry ID: 110071790074

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste

NORTHWEST PIPE COMPANY (Continued) **1025882288**

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

AMERICAN PROTECTIVE COATING *D (Continued) **1000367603**

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: U123
Waste Description: Formic Acid (C,T)

Waste Code: U223
Waste Description: Benzene, 1,3-Diisocyanatomethyl- (R,T) (Or) Toluene Diisocyanate (R,T)

Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS:
Name: MORAVEK BIOCHEMICALS INC
Address: 577 MERCURY LN
City,State,Zip: BREA, CA 92821
Site ID: 50107
CERS ID: 10153285
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 50107
Site Name: MORAVEK BIOCHEMICALS INC
Violation Date: 07-08-2019
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes: Returned to compliance on 12/01/2019. OBSERVATION: Failure of the Owner/Operator to comply with one or more satellite accumulation requirements. The satellite waste containers stored inside the hood and on movable carts did not have the labels filled out completely. If containers are being emptied daily, please label "Empty daily" under the accumulation start date. the following information on the label: "Hazardous Waste", waste (name), hazard property (Eg: toxic, flammable, corrosive, reactive etc.), physical state (solid, liquid), accumulation start date, and the business address. CORRECTIVE ACTION: Ensure that all hazardous wastes being accumulated pursuant to satellite accumulation meet all applicable requirements and submit documentation of compliance to the CUPA. {Describe specific corrections as needed}

Eval Notes: On-site for a follow up inspection. Met with Paul Moravek and Corey Duvall and discussed the HMBP disclosure as it relates to the low level radioactive materials used on-site. There are two radioactive isotopes used on-site in the chemical marking process: 1) Carbon 14 a solid in the form of Barium Carbonate (40 curries on-site) 2) Tritium in the form of Uranium Tritide (5 kilo Curries on-site). These ar both low level beta emitters in unsealed containers. Abate violation U102 from the previous inspection reports. Both of these hazardous materials and the other radioactive materials are included on the latest E Submit disclosure that has not yet been reviewed by OCHCA.

Eval Type: Routine done by local agency
Eval Notes: On-site for a routine hazardous waste inspection. Met with Corey Duvall and Paul Moravek this date and obtained consent to conduct the inspection. Hazardous Waste receipts made available and reviewed. Discussed the three (3) manifests for the scintilaiton fluid used within the last year: 10/13/13-6,250 pounds 04/25/13-5,000pounds 02/20/14-3,125 pounds The waste is generated daily. If the total generated over the last ten months is calculated and divided by 10, the facility is generating 1,437.5 pounds of this RCRA waste stream per month. The solid waste is disposed of as a radioactive waste, and NOT on a Uniform Hazardous Waste Manifest. It does not appear that the facility is a RCRA LQG. Discussed the need to complete the labels on the bench top accumulation jars. See violation W010 above. This is the SECOND consecutive inspection where the jars have not been labeled correctly. Hazardous waste containers need to be kept closed unless waste is [Truncated]

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: Returned to compliance on 05/30/2015.
Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 380619
Site Name: ELECTRONIC PRECISION SPECIALTIES, INC
Violation Date: 05-11-2016
Citation: 19 CCR 4.5 2745.10(b) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2745.10(b)
Violation Description: Failure to revise, update, and submit the Risk Management Plan to the Administering Agency as follows: 1. At least once every five years from the date of its initial submission or most recent update required by section 2745.10(b)(2) through (7); 2. No later than three years after a newly regulated substance is first listed by the California Emergency Management Agency; 3. No later than the date on which on which a new regulated substance is first present in an already covered process above a threshold quantity; 4. No later than the date on which a regulated substance is first present above a threshold quantity in a new process; 5. Within six months of a change that requires a revised process hazard analysis or hazard Review. 6. Within six months of a change that requires a revised offsite consequence analysis as provided in section 2750.7; 7. Within six months of a change that alters the program level that applied to any covered process.
Violation Notes: Returned to compliance on 08/29/2016. The updated RMP was due by July 15, 2015 and has not been completed or submitted to OCHCA for review. Please complete within 60 days.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D011
Waste Description: Silver

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F007
Waste Description: Spent Cyanide Plating Bath Solutions From Electroplating Operations.

Waste Code: F008
Waste Description: Plating Bath Residues From The Bottom Of Plating Baths From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: F009

ELECTRONIC PRECISION (Continued) **1000181740**

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

CERS HAZ WASTE:
Name: OCSAY PRECISION TOOL CO INC
Address: 517 MERCURY LN
City,State,Zip: BREA, CA 92821
Site ID: 705509
CERS ID: 10937530
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 705509
Site Name: OCSAY PRECISION TOOL CO INC
Violation Date: 03-21-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 03/21/2019. The CERS submission was not submitted since 2016. An annual was completed and submitted today with updated contact information and emergency response information.
Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 705509
Site Name: OCSAY PRECISION TOOL CO INC
Violation Date: 03-03-2016
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 06/22/2016. There are four (4) 55-gallon containers of oil, waster and metal chips that are not being closed properly. This hazardous wastes either needs rto be disposed of properly within 24-hours or transferred into closed, labeled, containers. There is a possibility of rain this weekend and a release of this material to the storm drains needs to be avoided.

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 10-28-2013

OCSAY PRECISION TOOL CO INC (Continued) **S131459643**

Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Reviewed the disclosure this date. The disclosure was declined this date. 1) Emergency Response Plan: Complete the second box in section f. The hazardous material and hazardous waste areas will need to be inspected after an earthquake. 2) Enter the ANNUAL WASTE AMOUNT in Section IV for the waste oil Abate violation U101 and U111 from the previous inspection reports.
Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-21-2022
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Materials Disclosure and Business Emergency Plan inspection. Met with Stefan Ocsay of Ocsay Precision Tool. Consent was provided to enter and conduct inspection activities. The HMBEP was submitted into the CERS Database on this date and has been accepted. The following were observed/verified: - Chemical Inventory at the facility; - Contingency plan/BEP; - Training program; and, - Facility Map. Please note that if the facility decides to discontinue any of the above chemicals, proper disposal or removal of chemicals is required and maintenance of disposal records will be verified. Within 30 days of removal, contact this agency to verify that the hazardous material is no longer stored on site and remove it from the facility's listed disclosable chemicals.

OCSAY PRECISION TOOL CO INC (Continued) **S131459643**

Eval Notes: INSPECTOR COMMENTS: On-site for a follow up inspection. Met with Stefan Ocsay and discussed the open violations. All the waste observed in the previous inspection was disposed of on 03/03/16. Receipts and manifests were reviewed this date. Violations I400, I617 and I663 have been abated. Discussed the proper labeling of hazardous waste containers.
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-03-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS: On-site for routine inspection. Met with Stefan and Lydia Ocsay and obtained consent. Hazardous Waste receipts made available and reviewed. No HW containers on-site. The waste oil is generated by gravity separation from the aluminum chips. Four (4) open, unlabeled drums were observed outside. A photo was taken. See violations listed above. Discussed the possibility of rain this weekend with Stefan Ocsay. The oil in the drums could overflow and enter the storm drain system. The oil from the open drums needs to be containerized or disposed of within 24-hours. Facility has an OCHCA hazardous materials disclosure that contains information for the emergency coordinator. Inspected the trash/dumpster and it does not contain hazardous waste. The perimeter of the facility was also inspected; no signs of releases were noted.
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-21-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: The following material was observed in amounts that meet or exceed the minimum volumes required for disclosure: - Coolant Reviewed BEP and the site map with the business. Assistance was provided with CERS submission. Emergency response equipment was present on-site. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) on CERS within 30 days of the change.
Eval Division: Orange County Environmental Health

Eval Notes: According to the CERS database, your business remains out of compliance with the annual certification requirement and a violation is being cited. Businesses are required to annually review and certify that their information in the California Electronic Reporting System (CERS) is complete, accurate and in compliance by March 1st. Your business was notified via email on 4/28/23 that your facility was out of compliance with this requirement. Please visit https://cers.calepa.ca.gov/ to access CERS and submit your completed HMBP forms.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:

Site ID:	114220
Site Name:	ELECTRONIC PRECISION SPEC INC
Violation Date:	06-03-2014
Citation:	22 CCR 45 67450.11(d)(7)(E) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.11(d)(7)(E)
Violation Description:	Failure to maintain the following records at the facility for a minimum of three years from the last date of any activity and made available to authorized representatives of the Department, the CUPA, or the U.S. EPA upon request: 1) Written approval from the agency operating the POTW receiving the facility's discharges; 2) Written method documented in the waste analysis plan for ensuring that the concentration of total cyanide does not exceed 5000 milligrams per liter in the aqueous waste resulting from the mixing; and 3) Documentation that the residual solids generated by the treatment have been either: A) Sent offsite for metals recovery or reclamation; or B) Determined to be not amenable for recycling.
Violation Notes:	Returned to compliance on 10/07/2014. Please forward a new plan that includes all four units and an estimated date of closure to this agency within 60 days.

Violation Date:	08-09-2017
Citation:	22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description:	Failure to provide employees with hazardous waste training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility.
Violation Notes:	Returned to compliance on 09/08/2017. Only the hazardous waste operators are trained on hazardous waste management. Please make sure all employees working within this facility are adequately trained in hazardous waste management per 22 CCR 15 66265.16 based on their job title and job description. Complete a training program within 30 days. Each generator must maintain the following documents and records at the facility: a) The job title for each position at the facility related to hazardous waste management, and the name of each employee filling each job. b) A written job description for each job title mentioned above and must include the required skills, education, or other qualification, and duties of personnel assigned to each position.

Citation:	22 CCR 15 66265.196 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.196
Violation Description:	Failure to immediately remove from service a tank system or secondary containment system from which there has been a leak, spill, is unfit for use and comply with applicable requirements.
Violation Notes:	Returned to compliance on 11/07/2017. The process floors had multiple spills that had not been cleaned up as part of regular maintenance. The silver cyanide area had crystals forming underneath the tanks. Per Mr. Olszewski the process floors are cleaned once a month. Any hazardous waste that is accumulated on the process floors must be removed by periodic floors maintenance with the use of shop vacuums or other units at the end of each work shift or within 24 hours of discovery. Please clean the hazardous waste on the process floors immediately and make sure a regular floor maintenance is implemented on site as well.

Citation:	22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description:	Failure to meet the following conditions of satellite accumulation regulations, Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator Total time hzardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with sections 66265.171, 66264.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes:	Returned to compliance on 08/30/2019. OBSERVATION: Observed five 5gal containers of various hazardous waste throughout facility. Accumulation dates on containers are from late 2018. Facility manager stated that the containers are emptied weekly and accumulation start date is not accurate. CORRECTIVE ACTIONS: Since containers are emptied frequently, facility will mark containers with " Empty Daily" for the accumulation start date and have the containers emptied daily into hazardous waste storage containers. Send documentation to the agency within 30 days.

required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.

Violation Notes: Returned to compliance on 10/17/2014. Please forward the analytical results to this agency within 60 days.

Eval Date: 01-10-2022
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct the hazardous material recycling inspection. The facility recycles a quantity greater than 100 kg per month on-site. The hazardous waste is generated from the reverse osmosis system of the Silver Cyanide plating line and the rinse waters are re-used on-site. The facility claims the exemption under (c) (2). Silver cyanide is removed from the water through the reverse osmosis process and the evaporator unit. The water vapor from the evaporator goes back to the rinse water tank and maintains a zero discharge. The sludge that remains is shipped off-site as hazardous waste. The recyclable materials report (RMR) for 2018-2020 was uploaded on CERS. Approximately 735 gallons of water was recycled.

Eval Notes: Please be advised that this Agency has reviewed and approved the closure costs for the PBR Treatment Units. The salvage value of the assets has not been changed from the value reported in 2012. The salvage value of your assets must be reviewed on an annual basis to be sure that depreciation and changes made to your inventory of equipment are reflected in the salvage value estimate. If you believe that your salvage value has remained the same since 2012, be sure to maintain documentation reflecting your estimated salvage value.

Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Inspector Comments: Please be advised that this Agency has reviewed the Tiered Permitting Financial Assurance Self Certification for this facility. The 2015 Adjusted Closure Cost Estimate (CCE) was not properly calculated. Calculations shown on the Closure Cost Estimate Adjustment Updates for 2013 through 2015 are not correct since the inflation factor is applied to the CCE salvage value for each year since 2013. In addition, 2013 CCE and 2014 CCE listed in the table, are not the amounts submitted or approved by this agency. In order to correct the errors, you would need to make the following calculations: 2012 closure cost estimate = $11,681.18 - $2,700.00 (salvage value) =- $8,981.18 (adj. closure cost estimate) 2013 = $11,681.18 x 1.024 (2013 inflation factor) = $11,961.53- $2,700.00 (salvage value) = $9,621.53. 2014 = $11,961.53 x 1.014 (2014 inflation factor) = $12,129.00- $2700.00 (salvage value) = $9,429.00. 2015 = $12,129.00 x 1.016 (2015 inflation [Truncated]

ELECTRONIC PRECISION SPEC INC (Continued) **S113003786**

Consent to enter, inspect and take any necessary pictures was given by the President, Tom Olszewski. The facility recycles a quantity greater than 100 kg per month on-site. The hazardous waste is generated from the reverse osmosis system of the Silver Cyanide plating line and the rinse waters are re-used on-site. A Recyclables Materials report was submitted on CERS on 8/6/2016. Please contact Shruthi Sill at ssill@ochca.com with regards to any questions.

Eval Notes: On site to conduct the hazardous material recycling inspection. The facility recycles a quantity greater than 100 kg per month on-site. The hazardous waste is generated from the reverse osmosis system of the Silver Cyanide plating line and the rinse waters are re-used on-site. The facility claims the exemption under (c) (2). Per Tom, the president, the silver cyanide is removed from the water through the reverse osmosis process, concentrated using the heater and the water vapor from the heater goes back to the rinse water tank and maintains a zero discharge. The waste silver cyanide is shipped off-site as hazardous waste, but all the water is reused in this system. The recyclable materials report for 2018-2020 was maintained on site and about 735 gallons of water was recycled. The facility is only recycling water, and not treating the cyanide in this process. This system does not meet 22 CCR 67450.11 (d) for cyanide-containing aqueous waste treatment, as the [Truncated]

Eval Notes: A TP PBR inspection were conducted while taking precautions for COVID19. The facility has five treatment units. The Anion regen (with high pH) from the ion exchange column goes through a pH adjustment and it passed through the clarifier. The evaporator units takes the metal bearing rinse waste, it is first pH adjusted and then evaporated. The cation regen (with low pH) metal bearing gets pH adjusted and goes into the evaporator. The drums are rinsed and then are also pH adjusted inside a batch tank and then evaporated. The ion exchange column is closed-loop and exempt from being subject to treatment. Financial assurance documents were submitted for 2020 and approved. The treatment units were identified. Inspection logs are being maintained on-site. The PE certification was updated to include seismic and it was renewed in Nov 2020. A waste analysis plan has been completed and maintained on site. CERS HAZ WASTE:

Name:	RITE AID #5732
Address:	405 W IMPERIAL HWY
City,State,Zip:	BREA, CA 92821
Site ID:	148091
CERS ID:	10442041
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	148091
Site Name:	Rite Aid #5732
Violation Date:	02-20-2014
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes:	Returned to compliance on 03/31/2014. The TSDF signed off copies of manifests 005139307 FLE (12/27/13), 006270311 FLE (12/24/13), 005139078 (09/26/13), 005805419 (07/17/13) and 005804830 (04/22/13) could not be located during the inspection. Please obtain a copy for your records and send a copy to this agency along with the signed completed CRC within 30 days.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection

RITE AID #5732 (Continued) **S113803603**

Eval Date: 01-11-2022
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Met with Jon Slagle of Rite Aid. Consent was provided to enter and conduct inspection activities. The following was observed on this date: -- Hazardous waste generated was properly stored and labeled in plastic bins. -- Waste manifests were available for review and were properly completed. -- Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility. The facility is in compliance.
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 04-07-2014
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Received two (2) signed inspection reports for the file.
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 04-21-2015
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: INSPECTOR COMMENTS: The quantities reported in CERS does not exceed the regulatory threshold for reporting to OCHCA (Orange County). OCHCA does not require facilities to report hazardous waste in any amount generated. The facility information was reviewed and accepted this date.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-13-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Consent to enter, inspect and take any necessary photos was given by the Supervisor, Desiree Villalobos. Ms.Villalobos confirmed that there

RITE AID #5732 (Continued) **S113803603**

were 20 employees present at the site. The hazardous waste found here: - Flammable waste - Toxic Waste - Corrosive Alkaline Waste (Cleaners and detergents) - Pharmaceutical waste (Empty Warfarin bottles) All containers of hazardous waste were covered and labeled properly. Manifests were available and were reviewed and waste is being picked up by Stericycle and LDR forms are maintained on-site. Walked the perimeter of the site, and there were no hazardous waste spills or discharges observed during this inspection. Emergency response information was posted inside the employee office area and inside the warehouse. The locked dumpster outside the shop was checked and no hazardous waste was observed. The weekly inspections are done by the PAC and the [Truncated]

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Citation:	22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description:	Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes:	Returned to compliance on 07/30/2020. No hazardous waste training records were available for review. Please conduct employee training on an annual basis for hazardous waste management procedures and emergency response training relevant to the positions in which they are employed.

Violation Date:	09-16-2019
Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 07/17/2020. Observation: No annual HMBP training records were available for review. Failure to provide and maintain records of annual training and refreshers to employees about hazardous materials and emergency response plan is a violation of HSC 6.95 25505(a)(4). Corrective Action: Please provide training for the employees at this facility and submit training documentation to this agency within 30 days. The training sign in sheet should include: name, date, signature and type of training.

CERS HAZ WASTE:

Name:	CONCEPT III
Address:	285 VIKING AVE
City,State,Zip:	BREA, CA 92821
Site ID:	412869
CERS ID:	10716982
CERS Description:	Hazardous Waste Generator

Evaluation:

Eval General Type:	Other/Unknown
Eval Date:	06-08-2015
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	INSPECTOR COMMENTS: On-site for a follow inspection. Met with Ron William Chang. Verified the chemical inventory and the site map.

CONCEPT III (Continued) **S106827030**

Assisted in completing the HMBP disclosure via the E Submit Portal. The disclsure was submitted for review during the inspeciton.
Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-27-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous material and business plan inspection. Consent to enter, inspect and take any necessary pictures was given by the owner, William Chang. Walked the site with Mr. Chang and observed the hazardous material storage areas throughout the Auto Repair Shop and the following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - Used Oil = 55 gallons Business emergency plan was updated during this inspection. Assisted Mr. Chang with new CERS submission and CERS account update. Emergency response equipment was present on-site and serviced. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change. Please contact Shruthi Sill at [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-16-2014
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Concept III 285 Viking Ave Brea, CA 92821 On-site for routine inspection. Met with Will Chang this date and obtained consent to conduct the inspection. No Hazardous Waste has been disposed of via a registered hauler to this point. The used oil and oil filters were being taken to a used oil collection center. This facility has now obtained drums and an EPA ID number. HW containers properly labeled. Emergency numbers posted during the inspection by the operator. The perimeter of the facility was also inspected; no signs of releases were noted.

Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: INSPECTOR COMMENTS: On-site for a follow up inspection. Met with William Changand obtained consent. Assisted in submitting the 2016 HMBP disclosure via the E Submit data base.
Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-27-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Consent to enter, inspect and take any necessary pictures was given by the owner, William Chang. Per Mr. Chang there are no employees. He gets students from Cal State Fullerton for automotive internships. The hazardous waste found here: - Used Oil = 55 gallons - Used drained oil filters = 15 items. - Waste Antifreeze = 30 gallons The hazardous waste was closed and labeled properly. Manifests were available and were reviewed, and the hazardous waste was being picked up by Safety Kleen. Walked the perimeter of the site, and there were no hazardous waste spills or discharges observed during this inspection. Weekly

CONCEPT III (Continued) **S106827030**

inspections are performed by Mr. Chang. Emergency response sticker with the necessary information was posted near the entrance to the warehouse of the facility. The two dumpsters at back were checked and there was no hazardous waste observed during the inspection. Please [Truncated]

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.
