Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Evaluation:

Eval General Type:	Case Development Inspection
Eval Date:	01-25-2001
Violations Found:	No
Eval Type:	Industrial Storm Water Enforcement Follow-up

LEFFINGWELL CHEMICAL PLANT, 111 SOUTH BERRY STREET, BREA, CA 92621 (Continued)

Eval Notes:	On January 25, 2001 Regional Board staff followed up a citizen complaint in regards to the above mentioned facility. Contact was first made with Charles McLary of Russell Co. Staff stopped to take pictures from the last storm event which occurred on the 24th of January. There was evidence of a PVC discharge in the storm swale (see photos). After the pictures were taken staff went to Pacific Plastic for a scheduled meeting. Contact was made Raphael Barhremand the CEO of the company, Dr. Anayat Raminfar and, Farhad the Maintenance Supervisor. Staff started the meeting by going over the prior discharges and all the visits that occurred over the last 6 months. Staff told Dr. Anayat Raminfar that the Regional Water Board is now considering further action against his company. Dr. Raminfar made clear all of the steps that his company has taken and is still taken to prevent unauthorized discharges from leaving the property. For example, they have retained an environmental consultant, they have filled all the necessary paper work necessary and, they have implemented several BMPs to prevent pollutants from coming in contact with storm water. Dr. Raminfar expressed that he wanted Regional Water Board staff to convey all measures that the company was taken to the Executive Officer. The following observations were made during the inspection of the facility; The facility was clean over all (see photos). The south side of the facility showed signs of PVC dust and water from the prior discharge (see photos). Pictures were also taken of the new BMPs that the facility was implementing currently. Dr. Raminfar wanted to set up a meeting with the Executive Officer immediately. Staff instructed Dr. Raminfar to wait till he received correspondence from this office.

Eval Program:	INDSTW
Eval Source:	SMARTS,
Eval General Type:	Case Development Inspection
Eval Date:	01-26-2001
Violations Found:	No
Eval Type:	Industrial Storm Water Enforcement Follow-up
Eval Notes:	On January 26, 2001. Regional Water Board staff went to Russell Co to gather water samples, pictures, and soil samples. Contact was made with Charles McLary the Plant Manager. Charles accompanied staff to the south side of the facility to take pictures. No contact was made with Pacific Plastic.
Eval Division:	Water Boards
Eval Program:	INDSTW
Eval Source:	SMARTS,
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	02-28-2013
Violations Found:	Yes
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Weather: warm and clear. Contact was unable to produce SWPPP. Facility is fitted with two vaults at the southwest corner. Contact no longer has manufacturer's information on them (Jensen Pre-cast) due to a fire years ago. Contact reports stormwater samples taken from inside of first rectangular vault; instructed them to sample at outlet of second cylindrical vault. First vault appears to be a settling vault with filter fabric separating three chambers. Cylindrical vault appears to be a simple settling chamber without filters or baffles. Both reported emptied and inspected 2x/year on a regular schedule. Last vault outlets into a swale after passing through another filter fabric at the fence; this fabric is torn and needs replacement and area in front needs to have dirt/debris removed. Found plastic powder spill prevention efforts ineffective at the rail car unloading area. Plastics overfill or spill out of cardboard totes in two instances. Yard is swept with a mechanical sweeper; has been broken for about a week with expected repair in another week. Pipe is being washed on site with wastewater discharged to ground.

Eval General Type:	Case Development Inspection

LEFFINGWELL CHEMICAL PLANT, 111 SOUTH BERRY STREET, BREA, CA 92621 (Continued)

Eval Date:	03-01-2013
Violations Found:	No
Eval Type:	Industrial Storm Water Enforcement Follow-up
Eval Notes:	Contact was able to produce the SWPPP; no date. Site plan does not show all drainage including the reported sewer drain inlet at N-side of facility. BMPs not being carried out per SWPPP: "any spillage will be swept up immediately" (p 14) from rail cars; compressor water to be poured into the sewer (p 15); perimeter fences to be lined with filter fabric for runoff/windblown pollution (p 16). Contact reports that vaults will be cleaned next week Tuesday. Contact provided additional documentation on functions of vaults and latest cleanout.
Eval Division:	Water Boards
Eval Program:	INDSTW
Eval Source:	SMARTS,
Eval General Type:	Case Development Inspection
Eval Date:	03-07-2013
Violations Found:	No
Eval Type:	Industrial Storm Water Enforcement Follow-up
Eval Notes:	This follow-up inspection occurred to investigate the principle of operation of the vaults at the SW corner and to confirm that a new sweeper was procured. The vaults were reported to be cleaned out, allowing inspection of the interior chambers. No hanging baffles were observed; only screened weirs were found with secondary overflow weirs that do not appear used. Overflow appears to occur around the sides of the vaults. Contact reported that the vaults were installed at the recommendation of the City. Further inspection of the regrind building roof found regrind powder piled up around the air cyclone. Cyclone is accessible using a cage on a forklift. New sweeper was observed in operation but staff are still getting used to using it; observed staff emptying it into a waste tote and spill a large portion onto the ground. Contact reports that rail cars are replaced every 3 days.

Violations Found:	No
Eval Type:	Industrial Storm Water Enforcement Follow-up
Eval Notes:	On August 28, 2000. Regional Water Board Staff responded to a citizen complaint against the above mentioned facility. A large amount of PVC dust and water was observed flowing south through the storm swale. The discharge occurred over the weekend of 26-27th of August(see photos). Regional Water Board staff made contact with Charlie McLary the Plant Manager of Russell Co. Charlie showed staff the pictures he had taken over the weekend and gave a quick explanation of what he observed. Staff took the pictures in to custody. Staff then made contact with the owner of Pacific Plastic Dr. Anayat Raminfar. Staff showed Dr. Anayat Raminfar the pictures that were taken over the weekend, and questioned him as to what happened. Dr. Raminfar stated that he was not a were of the problem. After review of the pictures, Dr. Raminfar and staff inspected the facility. Specifically, the south portion of the facility where the discharge occurred. Dr. Raminfar stated one of his employees had mistakenly emptied out the street sweeper in the back of the facility. Dr. Raminfar stated that he knew who it was and that he would " fire" this employee today. Staff stated that this type of discharge is unauthorized and needs to be stopped immediately. Dr. Raminfar stated that this would be the last time this would happen.

LEFFINGWELL CHEMICAL PLANT, 111 SOUTH BERRY STREET, BREA, CA 92621 (Continued)

Eval Notes:	On January 17, 2001, Regional Water Board staff responded to a citizen complaint against the above mentioned company. Contact was made with Charlie McLary the Plant Manager of Russell Co. Charlie produced photos from the last rain event which occurred over the weekend (Jan 11-12th). Charlie stated that during the last storm there was heavy flows of PVC dust and water coming from Pacific Plastic. Staff inspected the storm swale located on the south side of Pacific Plastic and, running south through Russell Co. there was evidence of PVC dust throughout the entire storm swale(see photos). Also, there was evidence that an employee from pacific Plastic placed a two by ten (2x10) board and propped up the fabric filter so that the water could flow faster thus making any BMPs ineffective. Staff took several pictures at this time. Regional water Board staff then went to Pacific to speak with Dr. Raminfar. Staff made contact with John Grajeda. John stated that no one was in at this time and that he expected the management to be in at around 10:30 a.m. Staff asked if John would accompany them to the back of the facility to inspect and take a few pictures. John said yes and led us to the south side of the facility. Upon inspection of the south side of the property there was evidence of PVC dust that had collected up against the fence and, also, evidence that the water had risen so high that it flowed west out of the facility's storm swale to the neighbors property located to the west of the facility. Staff instructed John to let Dr. Raminfar we stopped by and to call us in regards to the last discharge.

CERS Description:	Chemical Storage Facilities

Violations:

Site ID:	50107
Site Name:	MORAVEK BIOCHEMICALS INC
Violation Date:	07-08-2019
Citation:	22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description:	Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes:	Returned to compliance on 12/01/2019. OBSERVATION: Failure of the Owner/Operator to comply with one or more satellite accumulation requirements. The satellite waste containers stored inside the hood and on movable carts did not have the labels filled out completely. If containers are being emptied daily, please label "Empty daily" under the accumulation start date. the following information on the label: "Hazardous Waste", waste (name), hazard property (Eg: toxic, flammable, corrosive, reactive etc.), physical state (solid, liquid), accumulation start date, and the business address. CORRECTIVE ACTION: Ensure that all hazardous wastes being accumulated pursuant to satellite accumulation meet all applicable requirements and submit documentation of compliance to the CUPA. {Describe specific corrections as needed}

Eval Notes:	The following material was observed in amounts that meet or exceed the minimum volumes required for disclosure: - Liquid Nitrogen - N2 Gas - Helium - Hydrogen - Argon - Flammable liquid waste - Tritium - C-14 The HMBP was electronically available. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) on CERS within 30 days of the change. Please contact Shruthi Sill at ssill@ochca.com with regards to any questions.

Eval Notes:	On site to conduct a routine Hazardous Materials Disclosure and Business Emergency Plan inspection. Met with Kurtis Dunbar of Moravek. Consent was provided to enter and conduct inspection activities. The HazMat Inventory and Emergency Plan (HMBEP) has been submitted into the CERS Database on 6/29/2022. The 2022 HMBEP has been approved. Please submit your HMBEP for 2023 by March 1, 2023. The following were verified: - Chemical Disclosure at the facility; - Contingency plan/BEP; - Training program; and, - Facility Map. Please note that if the facility decides to discontinue any of the above chemicals, proper disposal or removal of chemicals is required and maintenance of disposal records will be verified. Within 30 days of removal, contact this agency to verify that the hazardous material is no longer stored on site and remove it from the facility's listed disclosable chemicals.

Eval Notes:	On-site for a follow up inspection. Met with Paul Moravek and Corey Duvall and discussed the HMBP disclosure as it relates to the low level radioactive materials used on-site. There are two radioactive isotopes used on-site in the chemical marking process: 1) Carbon 14 a solid in the form of Barium Carbonate (40 curries on-site) 2) Tritium in the form of Uranium Tritide (5 kilo Curries on-site). These ar both low level beta emitters in unsealed containers. Abate violation U102 from the previous inspection reports. Both of these hazardous materials and the other radioactive materials are included on the latest E Submit disclosure that has not yet been reviewed by OCHCA.

Eval Notes:	On-site for a routine hazardous waste inspection. Met with Corey Duvall and Paul Moravek this date and obtained consent to conduct the inspection. Hazardous Waste receipts made available and reviewed. Discussed the three (3) manifests for the scintilaiton fluid used within the last year: 10/13/13-6,250 pounds 04/25/13-5,000pounds 02/20/14-3,125 pounds The waste is generated daily. If the total generated over the last ten months is calculated and divided by 10, the facility is generating 1,437.5 pounds of this RCRA waste stream per month. The solid waste is disposed of as a radioactive waste, and NOT on a Uniform Hazardous Waste Manifest. It does not appear that the facility is a RCRA LQG. Discussed the need to complete the labels on the bench top accumulation jars. See violation W010 above. This is the SECOND consecutive inspection where the jars have not been labeled correctly. Hazardous waste containers need to be kept closed unless waste is [Truncated]

Eval Notes:	On site to conduct a routine hazardous waste inspection. The hazardous waste found here: - Flammable Liquid (laboratory waste with less than 0.05 micro curries) All containers of hazardous waste were covered, but were not labeled properly. The site stores low-level radioactive waste, and it was labeled as solid hazardous waste. Informed Ms. Do to correctly label more than ten waste 55 gallons drums with the correct radioactive waste labels per NRC as they exempt under hazardous waste. Manifests were available and was reviewed, and waste was being picked up by Thomas & Gray Associates. According to Ms. Do, monthly inspections are being performed. Annual Training is being conducted (May 2019 and Aug 2018). Necessary Emergency Response information was posted at the entrance to the facility. The dumpster at the back was checked and there was no hazardous waste. Please contact Shruthi Sill at ssill@ochca.com with regards to any questions. [Truncated]

Eval Notes:	On-site for a routine CalARP inspection. Met with President Tom Olszewski of Electronic Precision Specialties and Henry Montoya. Also present was Emily Minson, Justin Bechara, Brandon Aprahamian, and Shruthi Sill of OCHCA. Consent was provided to enter and conduct inspection activities. The facility is regulated under CalARP Program Level 1 requirements for Potassium Cyanide (KCN). The facility maintains (1) processes that has a maximum quantity of 124 pounds. KCN in storage is kept under 100 pounds. The following were observed: -- RMP Certification: The RMP was recertified by Tom Olszewski on 8/26/2016. -- The Executive Summary was reviewed and is complete. -- The worst-case release scenario was reviewed and appears adequate. Required analysis parameters were used. Cameo ALOHA model was used. EMERGENCY RESPONSE PROGRAM: -- Emergency Action Plan (EAP): This is not an emergency responding facility. The facility has an EAP. The facility has [Truncated]

Eval Notes:	On-site for a CalARP routine inspection. Met with EHS Henry Montoya of Electronic Precision Specialist Inc. Consent was provided to enter and conduct CalARP inspection activities. This facility is regulated under CalARP Program Level 1 requirements for Potassium Cyanide. The facility has five process tanks that contain KCN (A-01, A-02, A-04, A05, A-07). The total quantity of KCN was calculated to be 298 pounds as verified by the chemists. The largest tank (A-05) was modeled for the worst case scenario as it contains 117 pounds of KCN. The following observations were made on this date: 1. CalARP Registration: The registration was included in the RMP. 2. The program level 1 RMP was certified on 8/26/2021. 3. Executive Summary: The executive summary was reviewed. All elements were included in the executive summary. Please note that the RMP did not include the aggregate quantity of KCN. Please list the correct maximum inventory (298 pounds) 4. Due to the facility utilizing Cyanide, plea

Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	INSPECTOR COMMENTS: On-site for a routine hazardous materials inspection. Hazardous materials training is done in conjunction with the hazardous waste, tiered permitting and CalARP training. Documents are on-site. Toured the facility with Tom Olszewski with the chemical inventory and the site annotated map that was submitted via the CERS portal. The map and CERS inventory did not appear to match the inventory and layout at the facility. Please make the following corrections: 1) The Common name on the inventory sheets should match the names on the drums and tanks. This will allow emergency responders to accurately identify hazards at your facility. 2) Correct the MAP in reference to plating tanks 3) Correct the map to indicate the hazardous waste storage area(s).

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

U.S. DOT Hazardous Indicator:	Y
U.S. DOT ID Number:	UN1993
U.S. DOT Description:	Rq Un1993, Waste Flammable Liquid, N.O.S. (Acetonitrile, Methanol), 3, Ii (D001, F003)
Non-Hazardous Waste Description:	Not Reported
Number of Containers:	3
Container Type Code:	DM
Container Type Description:	Metal drums, barrels, kegs
Waste Quantity:	1875
Quantity Unit of Measure Code:	P
Quantity Unit of Measure Description:	Pounds
Waste Quantity, in Tons:	0.9375
Acute Waste Quantity, in Tons:	0
Non-Acute Waste Quantity, in Tons:	0.9375
Waste Quantity, in Kilograms:	850.34064
Acute Waste Quantity, in Kilograms:	0
Non-Acute Waste Quantity, in Kilorgrams:	850.34064
Management Method Code:	H129
Management Method Description:	OTHER TREATMENT
Waste Residue Indicator:	N
Quantity Discrepancy Indicator:	N
Waste Type Discrepancy Indicator:	N
Waste Density:	Not Reported
Waste Density Unit of Measure Code:	Not Reported
Waste Density Unit of Measure Description:	Not Reported
Form Code:	Not Reported
Form Code Description:	Not Reported
Source Code:	Not Reported
Source Code Description:	Not Reported
Waste Minimization Code:	Not Reported
Waste Minimization Code Description:	Not Reported
Consent Number:	Not Reported
EPA Waste Indicator:	Y
Federal Waste Codes:	D001, F003
Quantity Haz Kg:	850.34064
Quantity Haz Tons:	0.9375
Quantity Non Haz Kg:	0
Quantity Non Haz Tons:	0
State Waste Codes:	CA-214, TX-OUTS203H

Evaluation:

Eval General Type:	Other/Unknown

OCSAY PRECISION TOOL CO INC, 517 MERCURY LN, BREA, CA 92821 (Continued)

Eval Date:	10-28-2013
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Reviewed the disclosure this date. The disclosure was declined this date. 1) Emergency Response Plan: Complete the second box in section f. The hazardous material and hazardous waste areas will need to be inspected after an earthquake. 2) Enter the ANNUAL WASTE AMOUNT in Section IV for the waste oil Abate violation U101 and U111 from the previous inspection reports.
Eval Division:	Orange County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS,
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	03-21-2022
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct a routine Hazardous Materials Disclosure and Business Emergency Plan inspection. Met with Stefan Ocsay of Ocsay Precision Tool. Consent was provided to enter and conduct inspection activities. The HMBEP was submitted into the CERS Database on this date and has been accepted. The following were observed/verified: - Chemical Inventory at the facility; - Contingency plan/BEP; - Training program; and, - Facility Map. Please note that if the facility decides to discontinue any of the above chemicals, proper disposal or removal of chemicals is required and maintenance of disposal records will be verified. Within 30 days of removal, contact this agency to verify that the hazardous material is no longer stored on site and remove it from the facility's listed disclosable chemicals.
Eval Division:	Orange County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS,
Eval General Type:	Other/Unknown
Eval Date:	05-26-2015
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	INSPECTIOR COMMENTS: Spoke to Stefan Ocsay this date. The facility has not submitted an annual certification since 2013. Discussed the need complete the disclosure.
Eval Division:	Orange County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS,
Eval General Type:	Other/Unknown
Eval Date:	06-17-2015
Violations Found:	No
Eval Type:	Other, not routine, done by local agency

Eval Division:	Orange County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS,
Eval General Type:	Other/Unknown
Eval Date:	06-21-2016
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	INSPECTOR COMMENTS: On-site for a follow up inspection. Met with Stefan Ocsay and discussed the open violations. All the waste observed in the previous inspection was disposed of on 03/03/16. Receipts and manifests were reviewed this date. Violations I400, I617 and I663 have been abated. Discussed the proper labeling of hazardous waste containers.
Eval Division:	Orange County Environmental Health
Eval Program:	HW
Eval Source:	CERS,

OCSAY PRECISION TOOL CO INC, 517 MERCURY LN, BREA, CA 92821 (Continued)

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	03-03-2016
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	INSPECTOR COMMENTS: On-site for routine inspection. Met with Stefan and Lydia Ocsay and obtained consent. Hazardous Waste receipts made available and reviewed. No HW containers on-site. The waste oil is generated by gravity separation from the aluminum chips. Four (4) open, unlabeled drums were observed outside. A photo was taken. See violations listed above. Discussed the possibility of rain this weekend with Stefan Ocsay. The oil in the drums could overflow and enter the storm drain system. The oil from the open drums needs to be containerized or disposed of within 24-hours. Facility has an OCHCA hazardous materials disclosure that contains information for the emergency coordinator. Inspected the trash/dumpster and it does not contain hazardous waste. The perimeter of the facility was also inspected; no signs of releases were noted.
Eval Division:	Orange County Environmental Health
Eval Program:	HW
Eval Source:	CERS,
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	03-21-2019
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	The following material was observed in amounts that meet or exceed the minimum volumes required for disclosure: - Coolant Reviewed BEP and the site map with the business. Assistance was provided with CERS submission. Emergency response equipment was present on-site. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) on CERS within 30 days of the change.
Eval Division:	Orange County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS,
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	03-21-2022
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct a routine hazardous waste inspection. Met with Stefan Ocsay of OCSAY Precision Tool Inc. Consent was provided to enter and conduct inspection activities. The following was observed on this date: -- Hazardous waste generated was properly stored and labeled. Please have your used oil hauled off immediately as the container was observed full. -- Waste manifests were available for review and were properly completed. -- Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility. The facility is in compliance.

OCSAY PRECISION TOOL CO INC, 517 MERCURY LN, BREA, CA 92821 (Continued)

Eval Type:	Routine done by local agency
Eval Notes:	INSPECTOR COMMENTS: On-site for a routine inspection. Met with Stefan and Lydia Ocsay and obtained consent. Verified the inventory and assisted in submitting the 2016 HMBEP disclosure via the E Submit Portal. Discussed the need to document the annual training on the HMBEP. The owners are the only employees of the business and have knowledge of the BEP.
Eval Division:	Orange County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS,
Eval General Type:	Other/Unknown
Eval Date:	03-04-2016
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Reviewed and accepted the 2016 HMBEP disclosure
Eval Division:	Orange County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS,
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	03-21-2019
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	The site currently has two employees. The site did not have any hazardous waste on-site during this inspection. Manifests were available for review and RAE-VAC was picking up the waste. The last manifest was from 2015. Walked the perimeter of the site, and there were no hazardous waste spills or discharges observed during this inspection. The common trash dumpster at the back of the shop was checked and there was no hazardous waste. Please contact Shruthi Sill at ssill@ochca.com with regards to any questions
Eval Division:	Orange County Environmental Health
Eval Program:	HW
Eval Source:	CERS,
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	06-10-2015
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	INSPECTOR COMMENTS: On-site for a routine inspection.. Met with Stefan Ocsay and assissted in correcting the E Submit disclosure, including the site diagram. The disclosure was submitted during the inspection. Verified the inventory and the site map. Discussed training. Training is completed in emergency response per the ISO 9001 standards. Discussed keeping documentation of these trainings.

Eval Date:	06-26-2023
Violations Found:	Yes
Eval Type:	Other, not routine, done by local agency
Eval Notes:	According to the CERS database, your business remains out of compliance with the annual certification requirement and a violation is being cited. Businesses are required to annually review and certify that their information in the California Electronic Reporting System (CERS) is complete, accurate and in compliance by March 1st. Your business was notified via email on 4/28/23 that your facility was out of compliance with this requirement. Please visit https://cers.calepa.ca.gov/ to access CERS and submit your completed HMBP forms.

Violations:

Site ID:	114220
Site Name:	ELECTRONIC PRECISION SPEC INC
Violation Date:	06-03-2014
Citation:	22 CCR 45 67450.11(d)(7)(E) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.11(d)(7)(E)
Violation Description:	Failure to maintain the following records at the facility for a minimum of three years from the last date of any activity and made available to authorized representatives of the Department, the CUPA, or the U.S. EPA upon request: 1) Written approval from the agency operating the POTW receiving the facility's discharges; 2) Written method documented in the waste analysis plan for ensuring that the concentration of total cyanide does not exceed 5000 milligrams per liter in the aqueous waste resulting from the mixing; and 3) Documentation that the residual solids generated by the treatment have been either: A) Sent offsite for metals recovery or reclamation; or B) Determined to be not amenable for recycling.
Violation Notes:	Returned to compliance on 10/07/2014. Please forward a new plan that includes all four units and an estimated date of closure to this agency within 60 days.
Violation Division:	Orange County Environmental Health
Violation Program:	PBR
Violation Source:	CERS,

Site ID:	114220
Site Name:	ELECTRONIC PRECISION SPEC INC
Violation Date:	07-22-2019
Citation:	22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 07/22/2019. Observed one 55gal container of waste metal plating wash with an open lid cap. Facility manager closed container during on site inspection. Violation corrected on site.
Violation Division:	Orange County Environmental Health
Violation Program:	HWLQG
Violation Source:	CERS,

Site ID:	114220
Site Name:	ELECTRONIC PRECISION SPEC INC
Violation Date:	08-09-2017
Citation:	22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description:	Failure to provide employees with hazardous waste training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility.
Violation Notes:	Returned to compliance on 09/08/2017. Only the hazardous waste operators are trained on hazardous waste management. Please make sure all employees working within this facility are adequately trained in hazardous waste management per 22 CCR 15 66265.16 based on their job title and job description. Complete a training program within 30 days. Each generator must maintain the following documents and records at the facility: a) The job title for each position at the facility related to hazardous waste management, and the name of each employee filling each job. b) A written job description for each job title mentioned above and must include the required skills, education, or other qualification, and duties of personnel assigned to each position.

ELECTRONIC PRECISION SPEC INC, 537 MERCURY LN, BREA, CA 92821 (Continued)

Site Name:	ELECTRONIC PRECISION SPEC INC
Violation Date:	08-09-2017
Citation:	22 CCR 15 66265.196 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.196
Violation Description:	Failure to immediately remove from service a tank system or secondary containment system from which there has been a leak, spill, is unfit for use and comply with applicable requirements.
Violation Notes:	Returned to compliance on 11/07/2017. The process floors had multiple spills that had not been cleaned up as part of regular maintenance. The silver cyanide area had crystals forming underneath the tanks. Per Mr. Olszewski the process floors are cleaned once a month. Any hazardous waste that is accumulated on the process floors must be removed by periodic floors maintenance with the use of shop vacuums or other units at the end of each work shift or within 24 hours of discovery. Please clean the hazardous waste on the process floors immediately and make sure a regular floor maintenance is implemented on site as well.

Violation Date:	07-22-2019
Citation:	22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description:	Failure to meet the following conditions of satellite accumulation regulations, Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator Total time hzardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with sections 66265.171, 66264.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes:	Returned to compliance on 08/30/2019. OBSERVATION: Observed five 5gal containers of various hazardous waste throughout facility. Accumulation dates on containers are from late 2018. Facility manager stated that the containers are emptied weekly and accumulation start date is not accurate. CORRECTIVE ACTIONS: Since containers are emptied frequently, facility will mark containers with " Empty Daily" for the accumulation start date and have the containers emptied daily into hazardous waste storage containers. Send documentation to the agency within 30 days.

Violation Date:	07-31-2018
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 04/25/2019. A drum containing the filters from the closed loop RO system labeled as "Silver Filters" were missing an accumulation start date on the label. The last pickup we could find in the waste manifests was on 3/20/2018. Please have this waste hauled immediately and provide a copy of the waste manifest to this agency. Please make sure you are completing all the required elements of the label to ensure waste is going out in less than 90 days.

Violation Description:	Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.

Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct the hazardous material recycling inspection. The facility recycles a quantity greater than 100 kg per month on-site. The hazardous waste is generated from the reverse osmosis system of the Silver Cyanide plating line and the rinse waters are re-used on-site. The facility claims the exemption under (c) (2). Silver cyanide is removed from the water through the reverse osmosis process and the evaporator unit. The water vapor from the evaporator goes back to the rinse water tank and maintains a zero discharge. The sludge that remains is shipped off-site as hazardous waste. The recyclable materials report (RMR) for 2018-2020 was uploaded on CERS. Approximately 735 gallons of water was recycled.

Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Violation I501 is still open and outstanding for seismic calculation. The Facility's representative, Ashley Rodriguez has notified this agency that a new consultant has been contacted to obtain a seismic calculation and re-certify the PE certification. The facility was provided with a 30 days extension and it has expired as of September 2020. Failure to the correct the violation will result in violation being elevated to Class 1, which will require formal enforcement by the OC CUPA. Please contact Shruthi Sill at ssill@ochca.com with regards to any questions.

Eval Notes:	On site for a routine Tiered Permitting inspection. Met with Erik Brown of Electronic Precision Specialists. Consent to inspect and take any necessary photos was provided. The facility has three treatment units: The evaporator units takes the metal bearing rinse waste, it is first pH adjusted and then evaporated. The cation regen (with low pH) metal bearing gets pH adjusted and goes into the evaporator. The drums are rinsed and then are also pH adjusted inside a batch tank and then evaporated. All evaporated waters are condensed and sent to the clarifierfor final pH adjust. The Anion regen (with high pH) from the ion exchange column goes through a pH adjustment and it passed through the clarifier as well as steam from the evaporator unit. The Reverse osmosis system used to recycle cyanide bearing waters is exempt from being subject to treatment. All cyanide sludge goes off as hazardous waste. A continuation inspection will be conducted to review the [Truncated]

Eval Notes:	INSPECTOR COMMENTS: On-site for a follow up inspection. Met with Hank Brown of the facility and Henry Montoya of CDMS. DIscussed the outstanding violations and deliverables to OCHCA: 1) PBR Closure plan that includes all units, including drum rinsing, and an expected date of closure. 2) Waste analysis plan that includes all units, including drum rinsing 3) Analytical records. Some of these records have been found and the facility is awaiting the rest to come back from the lab 4) Facility diagram that includes all units, including drum rinsing Discussed Unit EPSI-3 that has been excluded from PBR due to the recycling exemption. Diagrammed the unit with the assistance of the waste treatment tech and tried to determine a method to quantitatively determine the amount of waste being recycled.

Eval Notes:	On site to conduct the hazardous material recycling inspection. The facility recycles a quantity greater than 100 kg per month on-site. The hazardous waste is generated from the reverse osmosis system of the Silver Cyanide plating line and the rinse waters are re-used on-site. The facility claims the exemption under (c) (2). Per Tom, the president, the silver cyanide is removed from the water through the reverse osmosis process, concentrated using the heater and the water vapor from the heater goes back to the rinse water tank and maintains a zero discharge. The waste silver cyanide is shipped off-site as hazardous waste, but all the water is reused in this system. The recyclable materials report for 2018-2020 was maintained on site and about 735 gallons of water was recycled. The facility is only recycling water, and not treating the cyanide in this process. This system does not meet 22 CCR 67450.11 (d) for cyanide-containing aqueous waste treatment, as the [Truncated]

Eval Notes:	A TP PBR inspection were conducted while taking precautions for COVID19. The facility has five treatment units. The Anion regen (with high pH) from the ion exchange column goes through a pH adjustment and it passed through the clarifier. The evaporator units takes the metal bearing rinse waste, it is first pH adjusted and then evaporated. The cation regen (with low pH) metal bearing gets pH adjusted and goes into the evaporator. The drums are rinsed and then are also pH adjusted inside a batch tank and then evaporated. The ion exchange column is closed-loop and exempt from being subject to treatment. Financial assurance documents were submitted for 2020 and approved. The treatment units were identified. Inspection logs are being maintained on-site. The PE certification was updated to include seismic and it was renewed in Nov 2020. A waste analysis plan has been completed and maintained on site. Violation Date:	02-20-2020
Citation:	HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description:	Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 03/01/2020. OBSERVATION: The business failed to establish and implement a business plan when handling hazardous materials at or above the reportable threshold quantities. CORRECTIVE ACTION: Establish and implement a business plan for the facility. Submit documentation of correction to the unified program agency immediately.

Violation Date:	03-03-2017
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 03/22/2017. A 5 gallon waste toxic liquid container did not have a correct accumulation date, and the waste flammable container did not have the correct accumulation date per Mr. Hodgson. Please ensure to change the accumulation dates on the containers once the liquid was transferred from the satellite accumulation site to the main hazardous waste collection site. Please make sure all containers holding hazardous waste has the following information on the label: "Hazardous Waste", waste (name), hazard property (Eg: toxic, flammable, corrosive, reactive etc.), physical state (solid, liquid), accumulation start date, and the business address.

Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

AMERICAN REGENT INC, 536 VANGUARD WAY, BREA, CA 92821 (Continued)

Violation Notes:	Returned to compliance on 03/20/2020. Observation: A chemical safety training was conducted for the employees, but no evacuation training records were available for 2019. Failure to provide and maintain records of annual training and refreshers to employees about hazardous materials and emergency response plan is a violation of HSC 6.95 25505(a)(4). Corrective Action: Please provide specific evacuation training for this facility. The training sign in sheet should include: name, date, signature and type of training. Please provide training for the employees at this facility and submit training documentation (sign-in sheet) to this agency within 30 days.

Citation:	22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description:	Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated

AMERICAN REGENT INC, 536 VANGUARD WAY, BREA, CA 92821 (Continued)

Violation Notes:	Returned to compliance on 02/20/2020. OBSERVATION: The containers of Methanol from the HPLC machines and the containers of Methanol/Acetonitrile wastes (room 119) were missing start date and some were missing labels altogether. CORRECTIVE ACTION: Ensure that all hazardous wastes at satellite locations have hazardous waste labels and have the following information on the label: "Hazardous Waste", waste (name), hazard property (Eg: toxic, flammable, corrosive, reactive etc.), physical state (solid, liquid), accumulation start date, and the business address. Violation was noted for improper labeling, and were corrected.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	02-20-2020
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	The number of employees are 55. The hazardous waste found here includes: - Chloroform/methanol waste - Methanol/acetonitrile waste - Taxol (toxic) waste (solids) - Flammable solids (methanol debris) - Ethanol The rinsate from particle sizer machine are non-hazradous per Chemist on-site as the concentration of hazardous materials used on the machine are in nanograms. All containers of hazardous waste were covered. Manifest were available and were reviewed (North State Environmental). Emergency information was posted near the exit for all three labs. Facility had conducted HW training for their employees. Walked the perimeter of the site, and there were no hazardous waste spills or discharges observed during this inspection. The dumpster at the back of the facility was checked and there was no hazardous waste. Please contact Shruthi Sill at ssill@ochca.com with regards to any questions.

Eval Notes:	On site to conduct a routine Hazardous Materials Disclosure and Business Emergency Plan inspection. Met with Nichole Meeker of HBT Labs Inc. Consent was provided to enter and conduct inspection activities. The HMBEP has been submitted into the CERS Database on 3/9/2022. The 2022 HazMat Inventory and Emergency Plan was accepted. The following were verified: - Chemical Disclosure at the facility; - Contingency plan/BEP; - Training program; and, - Facility Map. Please note that if the facility decides to discontinue any of the above chemicals, proper disposal or removal of chemicals is required and maintenance of disposal records will be verified. Within 30 days of removal, contact this agency to verify that the hazardous material is no longer stored on site and remove it from the facility's listed disclosable chemicals.

Subject: Phase II Environmental Site Assessment For
SEC Berry Street and Mercury Lane,
Brea, California 92821
APN: 296-141-05
Lat: 33.91949, Long:-117.90640

INTRODUCTION

As requested by Mr. Knode, we have conducted a Limited Phase II ESA Soil Sampling for the property located at the southeast corner of the intersection of Berry Street and mercury Lane in the City of Brea, California 92821. The property is identified by its APN 296-141-05. The purpose of the Phase II ESA Limited Soil Sampling was to investigate areas of concern identified from the Phase I Environmental Site Assessment dated Monday, February 13, 2012 (project number 2012-005).

SITE HISTORY

The Subject Property has been used as an Palm Tree and various tree and plant species growing ground and storage lot since sometime between 1994 and 2003. Prior to 1994, the land appears to have been vacant land. From 1927 to sometime before 1968, the land was part of an orchard and small farm.

SITE DESCRIPTION

LOCATION AND LEGAL DESCRIPTION

The subject property is located at located at the southeast corner of the intersection of Berry Street and mercury Lane in the City of Brea, California 92821. The property is identified by its APN 296-141-05.

SITE AND VICINITY GENERAL CHARACTERISTICS

The subject property is located in the City of Brea approximately one thousand feet west of the intersection of Imperial Highway(90) and Brea Boulevard. The City of Brea is located south of the Puente Hills, North of the Santa Ana River, east of the Los Angeles Basin and west of the Chino Hills. The Brea Canyon is approximately 400 feet south east of the subject site. The Brea Canyon has been developed into a Concrete Wall Channel in this area.

DESCRIPTION OF IMPROVEMENTS ON PROPERTY

The subject property consist of a rectangular shape lot approximately 195 feet by 230 feet covering approximately 1.1 acres(**measured from inside the chain link fence*). The site is currently used as a Palm tree growing and storage lot.

CURRENT USES OF THE ADJOINING PROPERTIES

The properties to the west of subject site is Yorba Linda Electric Co. which is a electrical industrial company. South of the site is a Mercury Insurance Office Building. East of the site is SPX Recold Inc. manufacturing site. SPX Recold manufactures draft cooling towers at this site. Blaine Convention Service is categorized under Conference and Seminar Coordinators.

SURFICIAL MATERIAL

SOIL

Mantling the site is a thin thickness of residual soil that has developed since construction. The soil consists of light to medium brown, silty to clayey sand, containing some roots and organic debris. These materials were slightly moist and loose at the time of our investigation. These soil materials shall be considered as uncertified and are not suitable for support of future engineered fills and/or structural foundations.

ARTIFICIAL FILL (AF)

The subject site has been previously graded to create the level lot. This grading has resulted in the deposition of a thin veneer of fill material across most of the lot. This fill consists of medium brown, sandy clay to clayey sand, containing abundant rock fragments. These materials were moist and moderately dense at the time of our inspection.

ALLUVIUM (QAL)

The subject site is located in an area of thick alluvial deposits that have been accumulating since Pleistocene time. The alluvium consists of channel and flood plain deposits from the Brea Canyon. These materials consist of coarse to medium-grained sands, intercalated with abundant lenses of silts and clays. These deposits are moderately dense to dense and the moisture content varies seasonally.

TOPOGRAPHY

According to the most recent USGS Topographic maps covering the subject property and vicinity, the subject property is relatively level and lies at approximately 363 feet above mean sea-level. The regional topography slopes to the Southwest. The

According to EDR GEOCHECK the site is mapped as a Loam soils with a Hydrologic Group Classification of Class B. Class B is defined as soils with Moderate infiltration rates with Deep and moderately deep, moderately well and well drained soils with moderately coarse textures. The soils has a high corrosion potential versus uncoated steel. The average well depth within one quarter (0.25) miles of the site is approximately twenty eight feet(28' bgs) below ground surface and approximately thirty six feet(36' bgs) below ground surface at one half (0.50) miles from the site.

LIMITED SOIL SAMPLING

SAMPLING STRATEGY

This investigation is intended as a screening-level tool to determine whether pesticide related impacts to the subject property exist at the specific portions of the property discussed below.

The locations of the investigation included directly adjacent to the existing shed which has been removed, the above ground storage tank which has been removed, in the center of the subject site adjacent to the asphalt mound and abandoned cast iron pipe(8" dia.). From the five borings, a total of sixteen soil samples were collected at locations determined by on-site personnel.

HEALTH AND SAFETY

The entire site was marked with white marking paint and Underground Service Alert was contacted a minimum of 2 days prior to the start of work. The underground utility markings where reviewed prior to the start of any invasive work.

Prior to start of work, a brief "tailgate safety meeting" was conducted to inform the field crew of anticipated hazards and the emergency action plan for the site. On-site workers used Level D personal protective equipment.

SAMPLE LOCATIONS AND COLLECTION METHODS

Each area of concern was identified during the initial walk through. The four soil borehole areas are described below:

- Borehole B-1, the location of this borehole was located in the northeastern portion of the lot(close to the location of the old storage shed(had been removed from the Site.)
- Borehole B-2, the location of this borehole was located in the center of the eastern portion of the lot adjacent to the location of the aboveground tank(had been removed from the Site).
- Borehole B-3, the location of this borehole was located in the southern center of the lot.
- Borehole B-4, the location of this borehole was located along the western portion of the lot.
- Borehole B-5, the location of this borehole was located near the northwestern portion of the lot.

Boreholes were advanced by Geoprobe type rig to approximately 5-30 feet below ground surface (bgs). Sample collection depths were determined by screening the cuttings for visual indicators contaminants. The boreholes where logged under the supervision of a California Registered Geologist (Borelogs attached). The retrieved soil was described, select samples were collected in sterile, clean liner tubes, capped, and labeled. The selected samples were immediately placed on ice and transported under chain of custody to DHS-certified Enviro-Chem Inc. in Pomona, California. The sample locations are depicted on Plate 1.

The boreholes encountered a medium to dark brown sandy clay to silty clay in the upper seventeen feet of soil. Light brown to tan, very fine grained silty sand was encountered from seventeen feet to a depth of thirty feet in Boring B-2. Groundwater was encountered at approximately twenty nine and half feet below the ground surface in Boring B-2. Borehole logs are attached as Plates B-1 through B-5.

The selected samples were then analyzed for the following constituents of concern:

Table A. Analytical analysis for SEC Berry Street and Mercury Lane, Brea, California 92821

SAMPLE ID	ANALYSIS
B-1 @ 2'	Organochlorine Pesticides (OCP) & PCBs including DDT/DDE

B-3 @ 5'	Organochlorine Pesticides (OCP) & PCBs including DDT/DDE
B-4 @ 2'	Organochlorine Pesticides (OCP) & PCBs including DDT/DDE
B-5 @ 2'	Organochlorine Pesticides (OCP) & PCBs including DDT/DDE

SOIL LABORATORY RESULTS

The table below presents the laboratory results as reported by Enviro-Chem, Inc. Complete laboratory results are attached following this report. **OFFICE OF ENVIRONMENTAL HEALTH HAZARD ASSESMENT (OEHHA) Risk Assessment Soil Screening Numbers** and Standard of Industry Action Levels were used for comparison to the sample results. The Residential Screening Levels for Soil were used for comparison. Screening Levels provide a risk-based determination of environmental concerns on a potentially contaminated property. Note that the lab reports concentrations are in parts per million (mg/kg). See Tables 1, 2 and 3 for the OEHHA Soil Screening Numbers.

TABLE B. Soil Laboratory Results Versus OEHHA Soil Screening Levels.

CHEMICAL → **BORING ID** ↓	OCP *ORGANOCHLORINE PESTICIDES* ppm or mg/kg	DDT ppm or mg/kg	DDE ppm or mg/kg	DDD ppm or mg/kg

B-2 @ 2' (MG/KG)	ND	ND	ND	ND
B-2 @ 5' (MG/KG)	ND	ND	ND	ND
B-3 @ 2' (MG/KG)	ND	ND	ND	ND
B-3 @ 5' (MG/KG)	ND	ND	ND	ND
B-4 @ 2' (MG/KG)	ND	ND	ND	ND
B-5 @ 2' (MG/KG)	ND	ND	ND	ND
RB LEVELS (MG/KG)	Varies See Attached Tables 1-3	1.6	1.6	2.3

RB — *"California Human Health Screening Levels for Soil And Comparison To Other Potential Environmental Concerns" by California Regional Water Quality Control Board, Los Angeles Region 4, dated January 2005.*

* — *Gas, Diesel and Motor Oil - elevated levels - these are guidelines and not published Action levels.*

NA — *No screening levels available*

Bold results — *Levels above PRGs*

ND — *Non Detectable Levels.*

As shown in Table B, no chemicals of concern were detected in concentrations exceeding the standard of industry action levels.

OPINION

The Subject Property has been used as an Palm Tree and various tree and plant species growing ground and storage lot since sometime between 1994 and 2003. Prior to 1994, the land appears to have been vacant land. From 1927 to sometime before 1968, the land was part of an orchard and small farm.

The soil sample results indicate that no substantially significant authorized release has occurred on the property in the past in the locations sampled.

CONCLUSIONS AND RECOMMENDATIONS

Dynamic Earth Consultants, Inc. conducted a Limited Phase II ESA Soil Sampling Investigation and non detectable levels of OrganoChlorine Pesticides(OCP including DDT, DDD &DDE) were identified in the soil samples analyzed. This indicates that no substantially significant unauthorized releases of pesticide products have been released into the environment at the sampled locations.

Further environmental investigation is not recommended at this time for the subject property.

USER RELIANCE

This report was prepared for the exclusive use of Scott Knode and **MANLEY FANTICOLA HOLDINGS, INC.** No other person or entity is entitled to rely upon this report without the specific written authorization of Dynamic Earth Consultants, Inc. Such reliance is subject to the same limitations, terms, and conditions as the original contract with the client. Dynamic Earth Consultants, Inc. specifically disclaims any responsibility for any unauthorized use of this report.

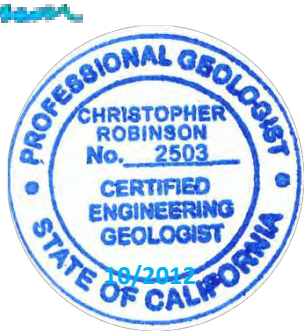
LIMITATIONS

Our professional services were performed, our findings obtained, and our conclusions proposed in accordance with generally accepted principles and practices. This warranty is in lieu of all other warranties either expressed or implied. Test findings and statements of professional opinion do not constitute a guarantee or warranty, expressed or implied.

Opinions provided herein apply to the currently available data, and existing and reasonably foreseeable conditions at the time of this investigation. They cannot apply to changes in site conditions of which this office is unaware or has not had the opportunity to evaluate. Soil samples are collected from a small "representative area of

soil", these samples are assumed to represent the chemical makeup of the general area, as such there may be variations in adjacent soils. To further reduce the clients liabilities, additional samples may be collected and analyzed to lower the possibility of generalizing the conditions and/or not locating an area of impacted soils at the site. Changes in conditions at the property may occur with time due to natural processes or works of man on the property or adjacent properties. Specifically, the property is still under active commercial use and chemicals may be released to the property between the date of the work conducted and the present day.

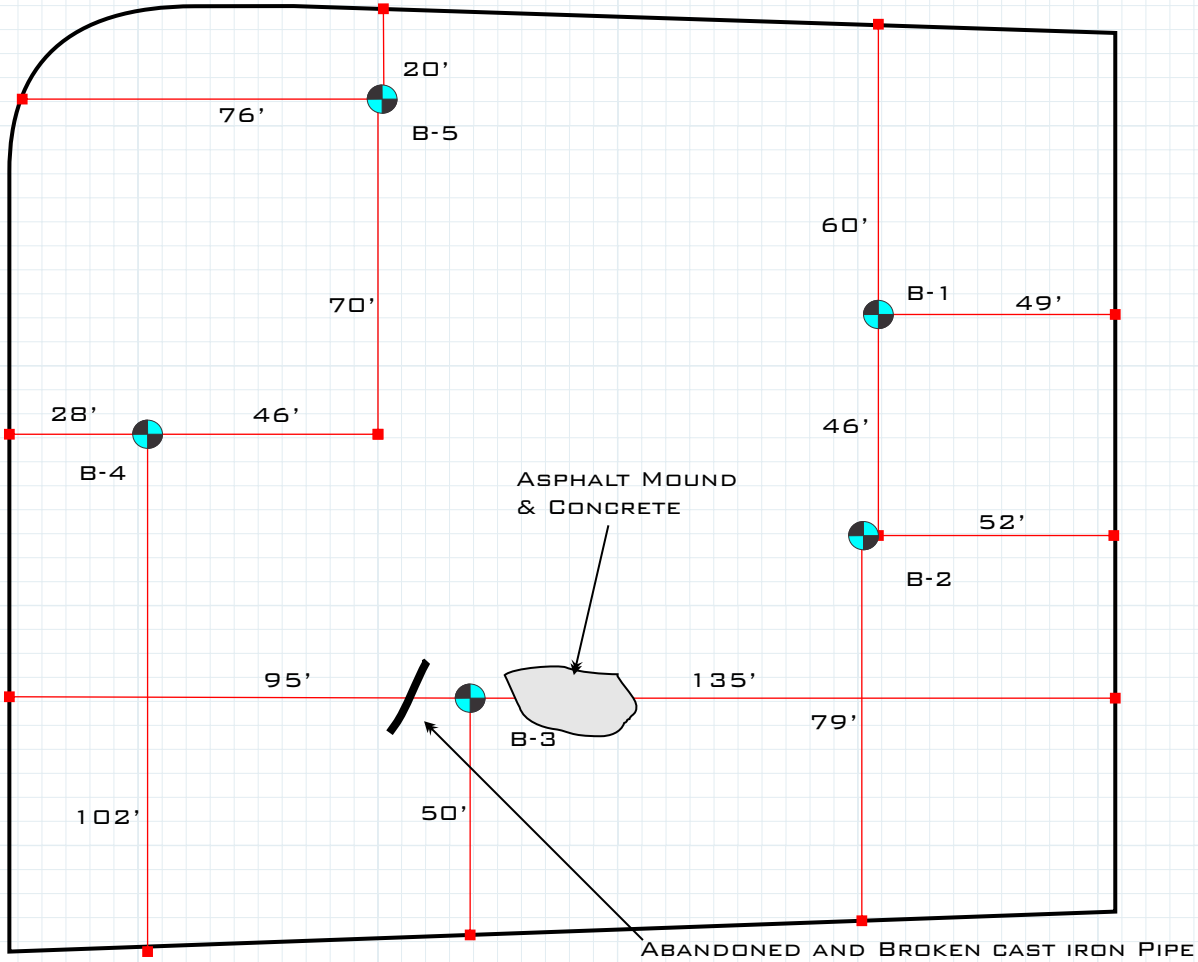
Changes in applicable standards may also occur as a result of legislation or broadening of knowledge. Accordingly, findings of this report may be invalidated, wholly or in part, by changes beyond our control.



PROFESSIONAL SIGNATURE

We declare that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

It has been a pleasure to be of service. If any questions arise, please contact our office.



Sincerely,

Christopher C. Robinson,
P.G. 8420, C.E.G. 2503

Nickel subsulfide[3]	0.38	(ca)	11000	(ca)
Perchlorate	**28**[5,6]	(nc)	**3500** [5,6]	(nc)
Selenium	380	(nc)	4800	(nc)
Silver and compounds	380	(nc)	4800	(nc)
Thallium and compounds	5	(nc)	63	(nc)
Vanadium and compounds	530	(nc)	6700	(nc)
Zinc	23000	(nc)	100000	(nc)

[1] (ca) denotes that the screening number is based on a carcinogenic potency factor, (nc) denotes that the screening number is based on a reference level in Table 3 for chronic toxic effects other than cancer, (max) denotes the screening number is based on the maximum concentration allowed, 100,000 mg/kg, and not toxicity.

[2] The screening numbers for arsenic are for contamination resulting from human activity. Concentrations of naturally occurring arsenic may be far above the screening number. When levels of arsenic at a site are a concern, the agency with authority over remediation decisions should be consulted.

[3] These metal salts are significantly (greater than 10-fold) more toxic than the values for the metals in general. If it is known that this chemical was used at the site, the screening number for this chemical should be used instead of the screening number for the metal and its compounds.

[4] Revised in 2009

[5] Added in 2010

[6] While these CHHSLs are considered safe for exposure to perchlorate in soil, the potential for significant groundwater contamination from soil contaminated with perchlorate at the CHHSLs levels may exist, since the PHG level for drinking water is 6 ppb or 6 µg/L.

N

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 7/20/2025 at 9:22 AM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

APPENDIX F:
Resumes

MICHAEL ATALLAH

President

Mr. Atallah has hands on experience in the real estate due diligence fields and has maintained excellence in his knowledge of construction, environmental and real estate properties in general.

Qualifications:

Over 25 years experience in preparing Physical Needs Assessments, Green Physical Needs Assessments, Phase I Environmental Site Assessments, Asbestos Consulting, Lead-Based Paint Consulting, Radon Consulting, ADA/Section 504 Consulting, Project Management, Construction Progress Monitoring and Probable Maximum Loss Assessments.

Professional Experience:

Integrated Property Analysis, Inc. **1999 - Current**

President

- Providing Physical (Capital) Needs Assessments, Green Physical Needs Assessments, Phase I Environmental Site Assessments, Asbestos Consulting, Lead-Based Paint Consulting, Radon Consulting, ADA/Section 504 Consulting, Project Management, Construction Progress Monitoring and Probable Maximum Loss Assessments.
- Coordinate field services and perform site assessments in accordance with, but not limited to, ASTM, HUD, USDA, TCAC, Fannie Mae, Freddie Mac, CALHFA and client guidelines.
- Quality control, including reviewing and editing of outgoing reports and draft contracts.
- Business Development to establish and maintain cooperative working relationships with clients.

Education & Licenses:

- California State University in Fullerton – Bachelor of Arts Degree in Business Administration with Concentrations in Real Estate and Finance
- LEED Accredited Professional
- Registered Environmental Property Assessor No. REPA 266318
- Certified Professional Radon Measurement Provider by the National Environmental Health Association No. NRPP ID#105517RT
- Certificate of Completion of EPA accredited AHERA Asbestos Abatement Contractors/Supervisors 40-hour course.

Project Name: Mercury Senior Affordable Apartments Project

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A biological assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2)(c)). For projects other than major construction activities, the Service suggests that a biological

evaluation similar to a biological assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a biological assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found at the Fish and Wildlife Service's Endangered Species Consultation website at:

https://www.fws.gov/service/esa-section-7-consultation

Migratory Birds: In addition to responsibilities to protect threatened and endangered species under the Endangered Species Act (ESA), there are additional responsibilities under the Migratory Bird Treaty Act (MBTA) and the Bald and Golden Eagle Protection Act (BGEPA) to protect native birds from project-related impacts. Any activity resulting in take of migratory birds, including eagles, is prohibited unless otherwise permitted by the U.S. Fish and Wildlife Service (50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)). For more information regarding these Acts, see https://www.fws.gov/program/migratory-bird-permit/what-we-do.

It is the responsibility of the project proponent to comply with these Acts by identifying potential impacts to migratory birds and eagles within applicable NEPA documents (when there is a federal nexus) or a Bird/Eagle Conservation Plan (when there is no federal nexus). Proponents should implement conservation measures to avoid or minimize the production of project-related stressors or minimize the exposure of birds and their resources to the project-related stressors. For more information on avian stressors and recommended conservation measures, see https://www.fws.gov/library/collections/threats-birds.

In addition to MBTA and BGEPA, Executive Order 13186: *Responsibilities of Federal Agencies to Protect Migratory Birds*, obligates all Federal agencies that engage in or authorize activities that might affect migratory birds, to minimize those effects and encourage conservation measures that will improve bird populations. Executive Order 13186 provides for the protection of both migratory birds and migratory bird habitat. For information regarding the implementation of Executive Order 13186, please visit https://www.fws.gov/partner/council-conservation-migratory-birds.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Code in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Attachment(s):

- Official Species List

OFFICIAL SPECIES LIST

This list is provided pursuant to Section 7 of the Endangered Species Act, and fulfills the requirement for Federal agencies to "request of the Secretary of the Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action".

This species list is provided by:

Carlsbad Fish And Wildlife Office

PROJECT SUMMARY

Project Code: 2026-0076533
Project Name: Mercury Senior Affordable Apartments Project
Project Type: Residential Construction
Project Description: The project involves the construction of a new 5-story, approximately 81,445-square-foot affordable housing development for seniors on an approximately 1.01-acre vacant site. The project would consist of a single “L”-shaped building containing 85 residential units, including 68 one-bedroom units and 17 two-bedroom units, one of which would be reserved for an on-site manager. Of the 84 units available for lease, 74 units would be income-restricted to households earning between 30% to 70% of the Area Median Income for Orange County, and 10 one-bedroom units would be designated as Permanent Supportive Housing units for individuals experiencing homelessness. The project would provide 63 parking spaces, including 24 tuck-under spaces and 39 surface spaces, with vehicular access from Mercury Lane at the northeastern corner of the site.

Project Location:

The approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/@33.919399150000004,-117.90634459816638,14z

Counties: Orange County, California

ENDANGERED SPECIES ACT SPECIES

There is a total of 7 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries[1], as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

ASD for Thermal Radiation for Buildings (ASDBPU)	7.01
ASD for Thermal Radiation for People (ASDPNPD)	
ASD for Thermal Radiation for Buildings (ASDBNPD)	

Storage Capacity: 99 pounds (acetone)→ 75,860 (at 20°C (68°F)).

Acceptable Separation Distance Assessment Tool

Is the container above ground?	**Yes:** ☑ **No:** ☐
Is the container under pressure?	**Yes:** ☐ **No:** ☑
Does the container hold a cryogenic liquified gas?	**Yes:** ☐ **No:** ☐
Is the container diked?	**Yes:** ☐ **No:** ☑
What is the volume (gal) of the container?	75860
What is the Diked Area Length (ft)?	
What is the Diked Area Width (ft)?	

Calculate Acceptable Separation Distance

Diked Area (sqft)	
ASD for Blast Over Pressure (ASDBOP)	
ASD for Thermal Radiation for People (ASDPPU)	1678.86
ASD for Thermal Radiation for Buildings (ASDBPU)	371.99
ASD for Thermal Radiation for People (ASDPNPD)	
ASD for Thermal Radiation for Buildings (ASDBNPD)	

Storage Capacity: 4,999 pounds (oil) → 714 gallons

Acceptable Separation Distance Assessment Tool

Is the container above ground?	**Yes:** ☑ **No:** ☐
Is the container under pressure?	**Yes:** ☐ **No:** ☑
Does the container hold a cryogenic liquified gas?	**Yes:** ☐ **No:** ☐
Is the container diked?	**Yes:** ☐ **No:** ☑
What is the volume (gal) of the container?	714
What is the Diked Area Length (ft)?	
What is the Diked Area Width (ft)?	
Calculate Acceptable Separation Distance	
Diked Area (sqft)	
ASD for Blast Over Pressure (ASDBOP)	
ASD for Thermal Radiation for People (ASDPPU)	240.35
ASD for Thermal Radiation for Buildings (ASDBPU)	43.03
ASD for Thermal Radiation for People (ASDPNPD)	
ASD for Thermal Radiation for Buildings (ASDBNPD)	

Storage Capacity: 99,999 pounds (olive oil) → 13,140 gallons

Acceptable Separation Distance Assessment Tool

Is the container above ground?	**Yes:** ☑ **No:** ☐
Is the container under pressure?	**Yes:** ☐ **No:** ☑
Does the container hold a cryogenic liquified gas?	**Yes:** ☐ **No:** ☐
Is the container diked?	**Yes:** ☐ **No:** ☑
What is the volume (gal) of the container?	13140
What is the Diked Area Length (ft)?	
What is the Diked Area Width (ft)?	
Calculate Acceptable Separation Distance	
Diked Area (sqft)	
ASD for Blast Over Pressure (ASDBOP)	
ASD for Thermal Radiation for People (ASDPPU)	808.74
ASD for Thermal Radiation for Buildings (ASDBPU)	165.40
ASD for Thermal Radiation for People (ASDPNPD)	
ASD for Thermal Radiation for Buildings (ASDBNPD)	

Storage Capacity: 11,999 pounds (anhydrous ammonia) → 2,329.90 gallons

Acceptable Separation Distance Assessment Tool

Is the container above ground?	**Yes:** ☑ **No:** ☐
Is the container under pressure?	**Yes:** ☐ **No:** ☑
Does the container hold a cryogenic liquified gas?	**Yes:** ☐ **No:** ☐
Is the container diked?	**Yes:** ☐ **No:** ☑

JUNE 2026

Regulatory Background

Executive Orders 11988 (Floodplain Management), 13690 (Federal Flood Risk Management Standard), and 14030 (Climate-Related Financial Risk) establish federal requirements for identifying flood risk, avoiding adverse impacts, and reducing potential harm associated with development in flood-prone areas. The U.S. Department of Housing and Urban Development (HUD) implements these requirements through 24 Code of Federal Regulations (CFR) Part 55, which defines the Federal Flood Risk Management Standard (FFRMS) floodplain and prescribes an 8-step decision-making process for HUD-assisted actions located within floodplains.

HUD defines the FFRMS floodplain using one of three approaches:

- The Climate-Informed Science Approach (CISA),
- The 0.2-Percent-Annual-Chance Floodplain Approach (0.2PFA), or
- The Freeboard Value Approach (FVA).

For non-critical actions, including residential housing and community facilities, the FFRMS floodplain corresponds to the 0.2-percent-annual-chance (500-year) floodplain, where mapped. The proposed Mercury Senior Affordable Apartments Project is classified as a non-critical action.

8-Step Process

The 8-step process was completed for the project and is described below.

Step 1: Determine Whether the Project is Located in a Floodplain

The project site is located within the Federal Flood Risk Management Standard (FFRMS) floodplain, as defined by the 0.2-percent-annual-chance floodplain (0.2PFA). The flood source affecting the site is the Brea Canyon Channel. Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps (FIRMs) identify the site as Zone X

(shaded), indicating the site lies outside the Special Flood Hazard Area (SFHA) but within the FFRMS floodplain. Accordingly, the 8-step floodplain management process applies.

Step 2: Publish Early Public Notice

An Early Notice and Public Review of a Proposed Activity in a Federal Flood Risk Management Standard Designated Floodplain was published on April 7, 2026, on OC Housing and Community Development's Public Notices webpage (https://www.ochcd.org/resources/public-notices). The notice informed the public of the proposed HUD-assisted action, its floodplain location, and the opportunity to submit comments, including suggestions for alternatives and mitigation measures.

Public comments were accepted through April 23, 2026. No comments were received during the public review period. The Early Notice is included in Appendix A to this report.

Step 3: Identify and Evaluate Practicable Alternatives

Consistent with HUD regulations, the County evaluated practicable alternatives to locating the project within the FFRMS floodplain, including the No Action Alternative, Alternative Sites, and Alternative Design or Density Options.

No Action Alternative

Under the No Action Alternative, the project would not be constructed and the site would remain vacant. This alternative would avoid any impact to the floodplain but would fail to meet the project's purpose and need to provide affordable senior housing and permanent supportive housing (PSH) in a region with a documented shortage of affordable units. The No Action Alternative would not contribute toward meeting local or regional housing goals, including the City of Brea's Regional Housing Needs Allocation (RHNA), and would not utilize available federal housing assistance. Therefore, this alternative is not practicable.

Alternative Sites Outside the FFRMS Floodplain

Alternative sites outside the FFRMS floodplain were considered; however, the availability of sites within the City of Brea and surrounding area that are (1) appropriately zoned or capable of entitlements for multifamily residential use, (2) of sufficient size to accommodate an 85-unit senior housing development, (3) served by existing infrastructure, and (4) financially feasible for affordable housing development is extremely limited. Many potentially buildable parcels are already developed, constrained by incompatible land uses, located farther from services and transit, or cost-prohibitive. No practicable alternative sites outside the FFRMS floodplain were identified.

Alternative Design or Configuration

Alternative site layouts and reduced densities were evaluated. The project is already designed as a compact infill development on a previously disturbed urban parcel. Shifting the building footprint would not avoid floodplain impacts because the entire site lies within the 500-year floodplain, and reducing density would undermine project feasibility without materially reducing floodplain effects. Accordingly, design alternatives were not practicable.

Step 4: Identify Potential Floodplain Impacts

The project site is located in a highly urbanized and previously disturbed environment. The floodplain at this location provides limited natural and beneficial functions, including minimal floodwater storage, conveyance, groundwater recharge, erosion control, and water quality benefits. The site does not support wetlands, riparian vegetation, native habitat, or other sensitive ecological resources. Floodplain processes are largely managed through engineered stormwater and drainage systems, and the site does not provide recreational, educational, scenic, or cultural floodplain values.

Step 5: Minimize, Mitigate, and Restore Impacts

The project will incorporate stormwater management, erosion control, and drainage measures consistent with applicable state and local requirements to minimize changes in runoff and flood risk. Development will occur on an infill parcel where floodplain functions are already constrained by existing urban infrastructure. These measures will minimize potential adverse impacts to the floodplain.

Based on the applicable Flood Insurance Study (FIS) flood profiles for the Brea Canyon Channel (FEMA 2009), the 500-year floodplain elevation in the project vicinity is 340.5 feet (see Appendix B). Topographic information obtained from the USGS National Map (USGS 2026) indicates that existing site elevations range from approximately 338.28 feet to 343.10 feet, with an average ground elevation of approximately 341.21 feet, placing portions of the site at or near the 500-year flood elevation.

HUD's floodplain management regulations require that new construction and substantial improvements for non-critical actions located within flood hazard areas be designed to minimize flood risk. Where 500-year flood elevation data are available, HUD requires that the lowest floor, including mechanical and utility systems, be elevated to or above the 500-year floodplain elevation.

Accordingly, **MM-FP-1** requires that the project be designed so that the lowest finished floor elevation is at or above 340.5 feet, corresponding to the 500-year (0.2-percent annual chance) floodplain elevation associated with the Brea Canyon Channel. Elevation of the structure to this level would reduce the potential for flood damage and ensure compliance with HUD's floodplain management requirements.

MM-FP-1: Floodplain Elevation Compliance. Prior to issuance of building permits, the applicant shall demonstrate that all new construction associated with the project is designed and constructed such that the lowest finished floor, including all mechanical, electrical, and plumbing systems, is elevated to at least 340.5 feet, corresponding to the 500-year (0.2-percent-annual-chance) floodplain elevation for the Brea Canyon Channel, as identified in the applicable Flood Insurance Study. Project design plans shall clearly document compliance with this elevation requirement. Implementation of this measure will reduce potential flood damage and ensure compliance with HUD floodplain management requirements under 24 CFR Part 55.

With incorporation of the required elevation standard, the proposed project would be consistent with 24 CFR Part 55 and would not expose people or property to increased flood risk nor result in adverse impacts to the floodplain.

Step 6: Reevaluate Alternatives After Mitigation

Following consideration of mitigation measures, no practicable alternatives exist that would avoid the floodplain while meeting the project's purpose and need. Given the limited floodplain functions at the site and the incorporation of impact-minimization measures, HUD's participation in the proposed action within the FFRMS floodplain is justified in accordance with applicable regulations.

Step 7: Publish Final Public Notice

A Final Notice and Public Explanation of a Proposed Activity in a Federal Flood Risk Management Standard Floodplain will be published on OC Housing and Community Development's Public Notices webpage explaining why the action must occur in the floodplain, summarizing alternatives considered, and identifying mitigation measures. The Final Notice will be published concurrently with the Finding of No Significant Impact (FONSI). The Final Notice is included in Appendix A to this report.

Step 8: Implement Action with Mitigation and Monitoring

The proposed project will proceed in compliance with 24 CFR Part 55 and applicable HUD floodplain management requirements. All identified minimization and mitigation measures will be implemented and maintained, and recommended flood insurance coverage will be carried for insurable structures, as applicable.

Appendix A

Early and Final Public Notices

Early Notice and Public Review of a Proposed
Activity in a Federal Flood Risk Management Standard Designated Floodplain

To: All interested Agencies, Groups and Individuals

This is to give notice that Orange County (OC) Housing and Community Development (County) has determined that the following proposed action under the Housing Choice Voucher Program (Project-Based Vouchers) is located in the Federal Flood Risk Management Standard (FFRMS) floodplain, and the County will be identifying and evaluating practicable alternatives to locating the action within the FFRMS floodplain and the potential impacts on the FFRMS floodplain from the proposed action, as required by Executive Order 11988, as amended by Executive Order 13690, and in accordance with HUD regulations at 24 CFR 55.20 in Subpart C Procedures for Making Determinations on Floodplain Management and Protection of Wetlands. The proposed project location is at the southeast corner of the intersection of Berry Street and Mercury Lane in the City of Brea, Orange County, California. The proposed Mercury Senior Affordable Apartments Project involves the construction of a new 5-story, approximately 81,445-square-foot affordable housing development for seniors on an approximately 1.01-acre vacant site. The project would consist of a single "L"-shaped building containing 85 residential units, including 68 one-bedroom units and 17 two-bedroom units, one of which would be reserved for an on-site manager. Of the 84 units available for lease, 74 units would be income-restricted to households earning between 30% to 70% of the Area Median Income for Orange County, and 10 one-bedroom units would be designated as Permanent Supportive Housing units for individuals experiencing homelessness. The project would provide 63 parking spaces, including 24 tuck-under spaces and 39 surface spaces, with vehicular access from Mercury Lane at the northeastern corner of the site. The extent of the FFRMS floodplain was determined using the 0.2-percent flood approach (500-year floodplain). The project site and surrounding area are located within the 500-year floodplain but are fully developed with urban infrastructure, including roads, utilities, and commercial and industrial buildings. Approximately 1.01 acres of the 500-year floodplain would be impacted by the project.

The existing natural and beneficial functions and intrinsic values of the floodplain that could be considered potentially affected are limited due to the site's highly urbanized and previously disturbed condition within the 500-year floodplain. The project site is surrounded by paved surfaces, buildings, roadways, and underground utilities, which substantially constrain natural floodplain processes. As a result, the floodplain on and adjacent to the site provides limited floodwater storage and conveyance, with stormwater runoff largely controlled through existing engineered drainage systems rather than natural overbank flooding processes. Although the project site is currently unpaved and the project would introduce new impervious surfaces, the affected area is limited, and implementation of stormwater management features would minimize changes to groundwater recharge and discharge. Erosion control and sediment retention functions are limited due to the previously disturbed condition of on-site soils, and water quality maintenance functions are minimal, as stormwater is managed primarily through municipal infrastructure rather than natural filtration. The site does not support wetlands, riparian vegetation, native habitat, or other ecologically sensitive resources.

Similarly, the intrinsic values of the floodplain at this location are limited. The site does not provide recreational, educational, or scientific value, as it is not accessible to the public for open space use and does not contain natural features of interpretive significance. There are no known historic, cultural, or archaeological resources associated with the floodplain portion of the site, and the area does not function as a scenic or cultural landscape.

Overall, due to the urbanized setting and disturbed condition of the site, the natural and beneficial functions of the floodplain (including floodwater storage and conveyance, groundwater recharge and discharge, erosion control, water quality maintenance, and habitat for flora and fauna), as well as its intrinsic values (such as recreational, educational, scientific, historic, and cultural values), are limited or diminished. The floodplain in this area primarily serves commercial and industrial purposes and does not provide significant ecological or hydrologic functions.

There are three primary purposes for this notice. First, people who may be affected by activities in the FFRMS floodplain and those who have an interest in the protection of the natural environment should be given an opportunity to express their concerns and provide information about these areas. Commenters are encouraged to offer alternative sites outside of the FFRMS floodplain, alternative methods to serve the same project purpose, and methods to minimize and mitigate project impacts on the floodplain. Second, an adequate public notice program can be an important public educational tool. The dissemination of information and request for public comment about the FFRMS floodplain can facilitate and enhance Federal efforts to reduce the risks and impacts associated with the occupancy and modification of these special areas. Third, as a matter of fairness, when the Federal government determines it will participate in actions taking place in the FFRMS floodplain, it must inform those who may be put at greater or continued risk.

Written comments must be received by the County at the following address on or before April 23, 2026: OC Housing and Community Development, 1501 East St. Andrew Place, Santa Ana, CA 92705 and (714) 480-2876, Attention: Frank Padilla, Community Development Compliance and Environmental Coordinator. A full description of the project may also be reviewed from 8:00 AM to 5:00 PM at the above address. Comments may also be submitted via email at francisco.padillajr@occr.ocgov.com.

Date: April 7, 2026

COMBINED PUBLIC NOTICE
NOTICE OF FINDING OF NO SIGNIFICANT IMPACT AND
NOTICE OF INTENT TO REQUEST RELEASE OF FUNDS AND
FINAL NOTICE AND PUBLIC EXPLANATION OF A PROPOSED ACTIVITY IN A
FEDERAL FLOOD RISK MANAGEMENT STANDARD DESIGNATED FLOODPLAIN

June 25, 2026

County of Orange
OC Housing and Community Development
1501 East St. Andrew Place, 1st Floor
Santa Ana, CA 92705
(714) 480-2918

These combined notices shall satisfy three separate but related procedural requirements for activities to be undertaken by the County of Orange, Orange County (OC) Housing and Community Development.

REQUEST FOR RELEASE OF FUNDS

On or about July 14, 2026, the County of Orange, OC Housing and Community Development will submit a request to the U.S. Department of Housing and Urban Development (HUD) for the release of eight Project-Based Vouchers ($3,582,720) as authorized under Title I of the Housing Opportunity Through Modernization Act of 2016 (HOTMA), as amended, to undertake a project known as the Mercury Senior Apartments for the purpose of providing affordable housing for seniors (aged 62 and older) located at the southeast corner of the intersection of Berry Street and Mercury Lane (Assessor's Parcel Number 296-141-05) in the City of Brea, Orange County, California.

The proposed project involves construction of a new five-story, approximately 81,445-square-foot affordable housing development for seniors on an approximately 1.01-acre vacant site. The project site is located within the Brea Core Specific Plan Area and would be rezoned from Industrial Commercial to Mixed Use (MU-50) to accommodate the proposed residential development. The project would consist of a single L-shaped building containing 85 residential units, including 68 one-bedroom units and 17 two-bedroom units. One two-bedroom unit would be reserved for an on-site property manager. Of the 84 units available for lease, 74 would be income-restricted to households earning between 30% and 70% of the Area Median Income for Orange County, and 10 one-bedroom units would be designated as Permanent Supportive Housing for individuals experiencing homelessness.

The ground floor would include tuck-under parking and building support and resident amenity spaces, such as a lobby and leasing office, community game room, fitness room, laundry room, mail room, bicycle storage room, maintenance and utility areas, storage, and a trash room, along with an outdoor patio area. A rooftop deck would be located on the fifth floor. Residential units would occupy floors two through five.

The project would provide a total of 63 parking spaces, including 24 tuck-under spaces and 39 surface spaces. Vehicular access would be provided via a driveway on Mercury Lane at the northeastern corner of the site.

FINAL NOTICE AND PUBLIC EXPLANATION OF A PROPOSED ACTIVITY IN A FLOODPLAIN

This is to give notice that the County of Orange, OC Housing and Community Development has conducted an evaluation as required by Executive Order 11988 and in accordance with HUD regulations at 24 CFR

55.20 in Subpart C Procedures for Making Determinations on Floodplain Management and Wetlands Protection. The proposed project is located in the Federal Flood Risk Management Standard (FFRMS) floodplain, as determined using the 0.2-percent-flood approach (500-year floodplain). Federal Emergency Management Agency Flood Insurance Rate Maps identify the site as Zone X (shaded). The flood source affecting the site is the Brea Canyon Channel. Floodplain functions at the site are limited due to its location in a fully urbanized area with existing engineered drainage infrastructure. Approximately 1.01 acres of the 500-year floodplain would be impacted by the project.

The County has considered the following alternatives and mitigation measures to minimize adverse impacts and to restore and preserve natural and beneficial functions and intrinsic values of the existing floodplain/wetland: the No Action Alternative, alternative sites outside the FFRMS floodplain, and alternative project designs. The No Action Alternative would fail to meet the critical need for affordable senior and supportive housing. Alternative sites outside the floodplain were determined to be impracticable due to land availability, zoning constraints, site size limitations, and financial feasibility. Alternative designs would not eliminate floodplain impacts because the entire site is located within the FFRMS floodplain. To minimize adverse impacts and preserve floodplain values, the project will incorporate stormwater management, drainage, and erosion control measures consistent with state and local requirements. Based on the applicable Flood Insurance Study flood profiles for the Brea Canyon Channel, the 500-year floodplain elevation in the project vicinity is 340.5 feet. The project will be designed so that the lowest finished floor, including critical building systems, is elevated at or above the 500-year floodplain elevation, thereby minimizing flood risk to structures and occupants. The project will also comply with all applicable local floodplain management and building code requirements.

The County has reevaluated alternatives to building in the FFRMS floodplain and has determined that it has no practicable alternative to FFRMS floodplain development. Environmental files documenting compliance with Executive Order 11988 and 24 CFR 55 are available for public inspection, review and copying upon request at the times and location delineated in the last paragraph of this notice for receipt of comments.

There are three primary purposes for this notice. First, people who may be affected by activities in the FFRMS floodplain and those who have an interest in the protection of the natural environment should be given an opportunity to express their concerns and provide information about these areas. Second, an adequate public notice program can be an important public educational tool. The dissemination of information and request for public comment about the FFRMS floodplain can facilitate and enhance Federal efforts to reduce the risks and impacts associated with the occupancy and modification of these special areas. Third, as a matter of fairness, when the Federal government determines it will participate in actions taking place in the FFRMS floodplain, it must inform those who may be put at greater or continued risk.

FINDING OF NO SIGNIFICANT IMPACT

The County has prepared an Environmental Assessment in accordance with the National Environmental Policy Act of 1969 (NEPA) and HUD environmental review regulations at 24 CFR Part 58. The County has determined that the project will have no significant impact on the human environment. Therefore, an Environmental Impact Statement under NEPA is not required.

PUBLIC REVIEW AND COMMENTS

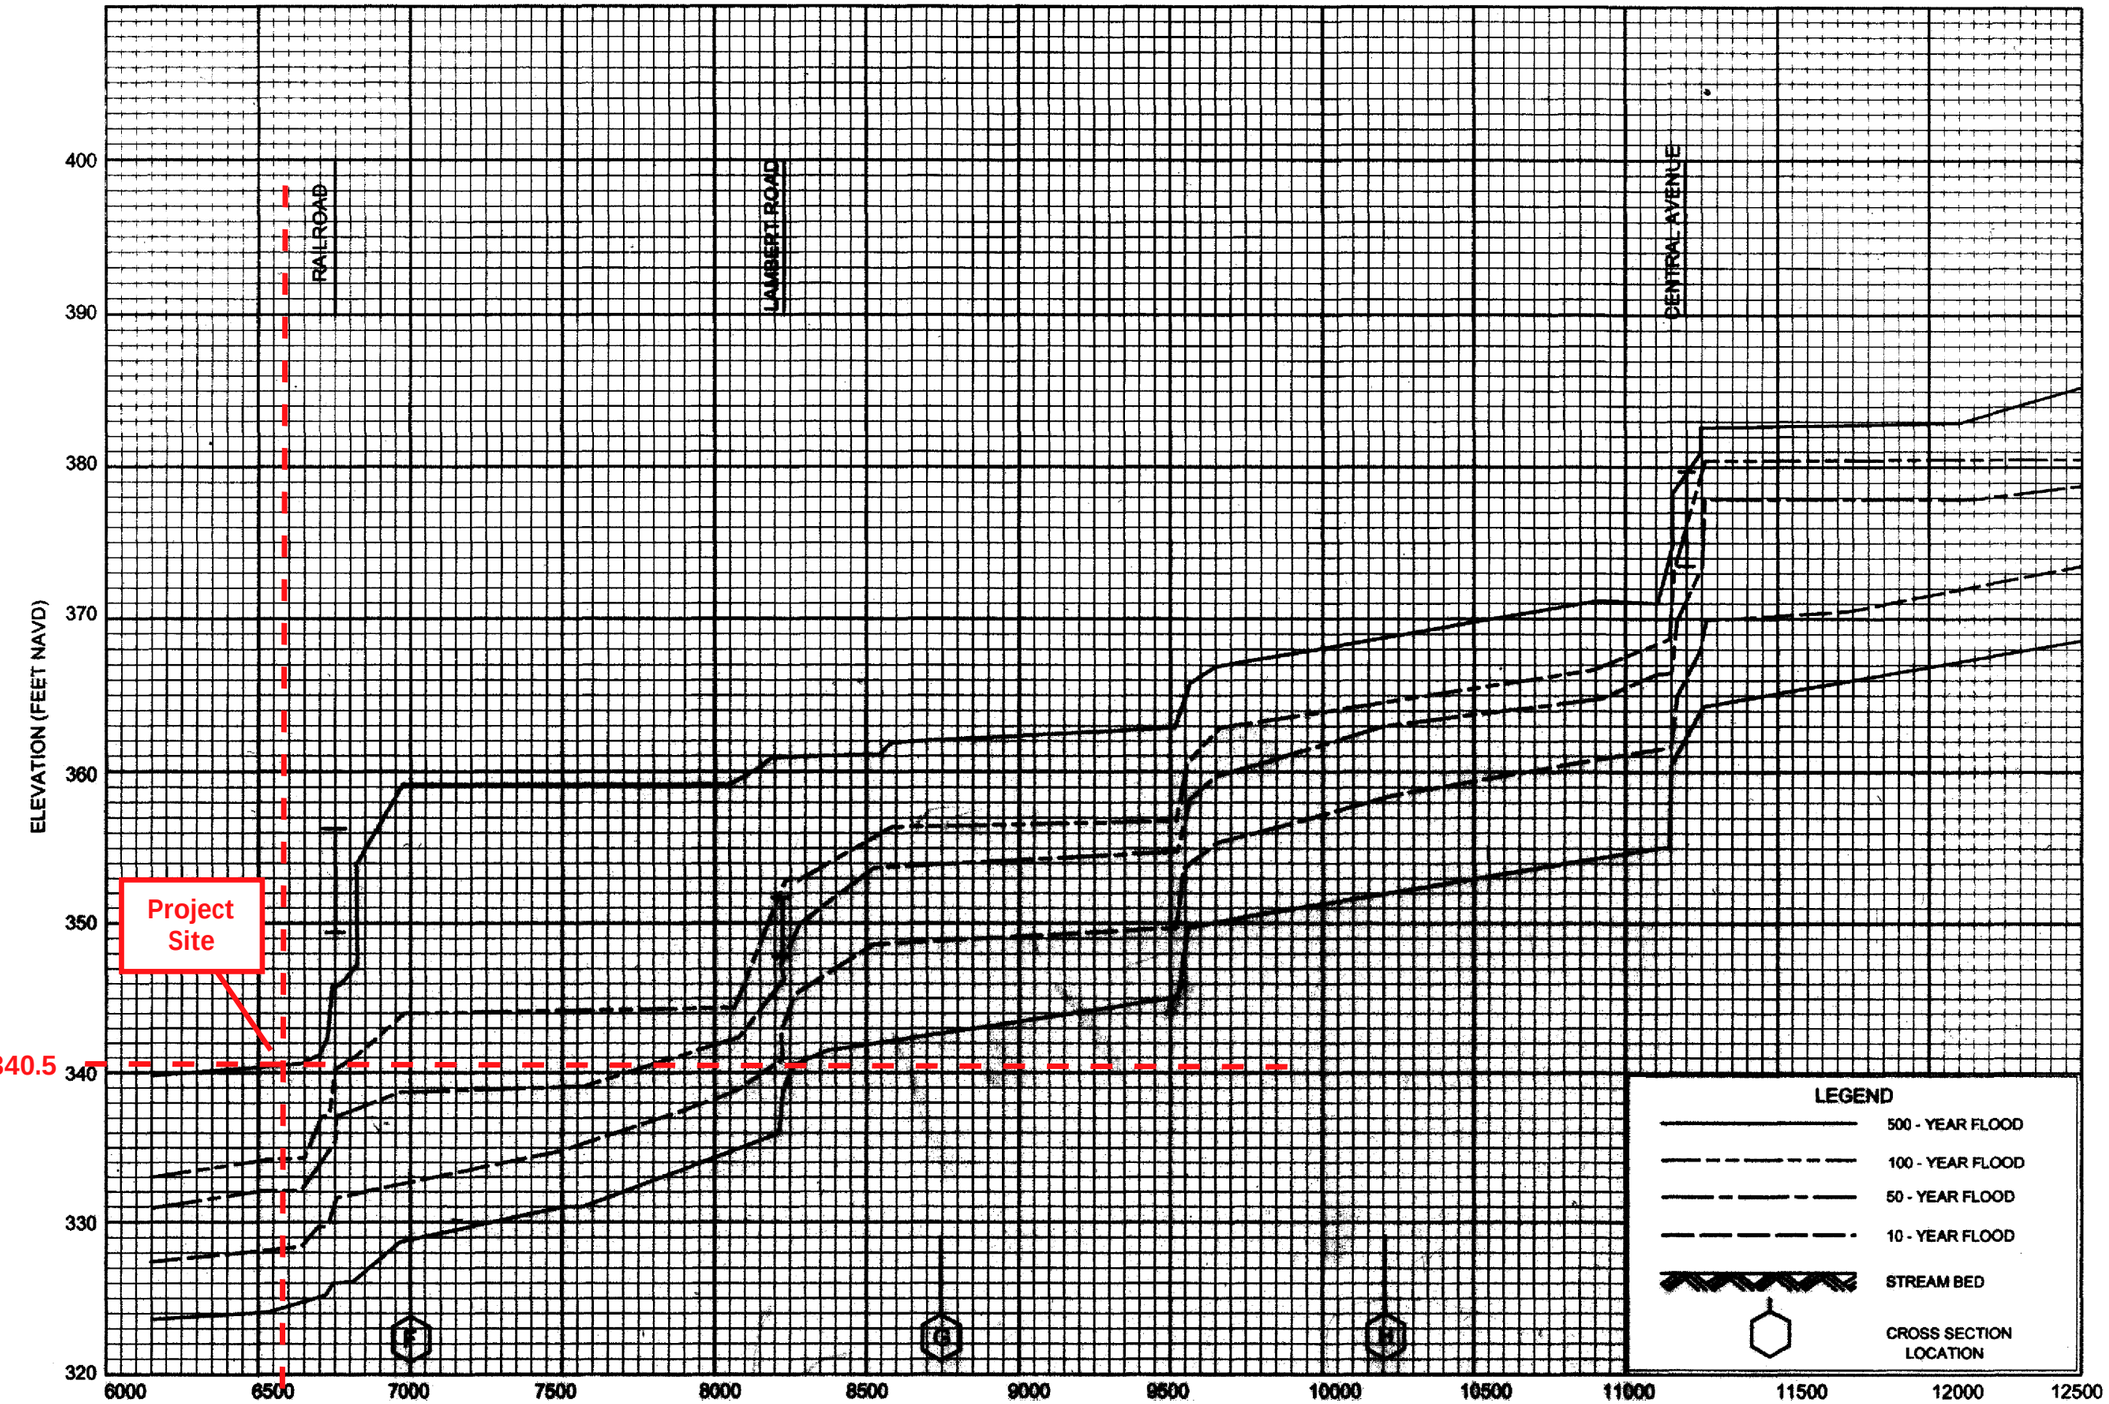
The Environmental Review Record (ERR) documents, including the draft Environmental Assessment with a full description of the project and Floodplain Management Determination documents, are available for public review at OC Housing and Community Development, 1501 East St. Andrew Place, 1st Floor, Santa Ana, CA

92705, during the hours of 8:00 AM to 5:00 PM on weekdays, and online at https://www.ochcd.org/resources/environmentals.

Written comments must be received by the County at the above address and/or (714) 480-2918, Attention: Ernest Hernandez, Compliance and Environmental Coordinator. Comments may also be submitted via email at Ernest.Hernandez@occr.ocgov.com. All comments received by 5:00 PM on July 13, 2026, will be considered by the County prior to submission of a request for release of funds to HUD. Comments should specify which Notice they are addressing.

ENVIRONMENTAL CERTIFICATION

The County of Orange, OC Housing and Community Development certifies to HUD that Julia Bidwell in her capacity as Director of OC Housing and Community Development consents to accept the jurisdiction of the Federal Courts if an action is brought to enforce responsibilities in relation to the environmental review process and that these responsibilities have been satisfied. HUD's approval of the certification satisfies its responsibilities under NEPA and related laws and authorities and allows OC Housing and Community Development to use Program funds.



OBJECTIONS TO RELEASE OF FUNDS

HUD will accept objections to its release of funds and the County's certification for a period of fifteen days following the anticipated submission date or its actual receipt of the request (whichever is later) only if they are on one of the following bases: (a) the certification was not executed by the Certifying Officer of OC Housing and Community Development; (b) the County has omitted a step or failed to make a decision or finding required by HUD regulations at 24 CFR Part 58; (c) the grant recipient or other participants in the development process have committed funds, incurred costs or undertaken activities not authorized by 24 CFR Part 58 before approval of a release of funds by HUD; or (d) another Federal agency acting pursuant to 40 CFR Part 1504 has submitted a written finding that the project is unsatisfactory from the standpoint of environmental quality. Objections must be prepared and submitted in accordance with the required procedures (24 CFR Part 58, Sec. 58.76) and shall be addressed to HUD's Los Angeles Office of Public Housing at 300 N. Los Angeles Street, Suite 4054, Los Angeles, CA 90012 or via email at HUDLOSANGELESOPH@hud.gov. Potential objectors should contact HUD's Los Angeles Field Office via email to verify the actual last day of the objection period.

Subject: Cultural Resources Constraints Analysis for the Mercury Brea Project, City of Brea, Orange County, California

Dear Frank Padilla:

This letter summarizes the known cultural resources constraints for the Mercury Senior Apartments (Project), located in the City of Brea, Orange County, California. Efforts include a review of information housed at the South Central Coastal Information Center (SCCIC) for the Project area of potential effects (Project APE) and surrounding one-mile radius, a review of historical aerial imagery and topographic maps, a review of the geomorphological context, Native American Heritage Commission (NAHC) Sacred Lands File (SLF) request, summary of Section 106 tribal consultation, and pedestrian survey of the Project APE. The discussion below includes a complete summary of these efforts, as well as the constraints relating to the presence of cultural resources and recommended next steps for the Project to meet best practice standards.

Project Location and Description

The Project is within Section 11 of Township 3 South and Range 10 West of the *La Habra, California* U.S Geological Survey (USGS) 7.5-minute Series Quadrangle Maps (Appendix A: Figure 1, Project Location). The Project is proposed on a single parcel, APN 296-141-05 and is bordered by Mercury Lane and light industrial businesses to the north, a commercial manufacturing facility to the east, large office buildings and their associated parking structures to the south and southeast, and South Berry Street and an office building to the west in the City of Brea, California. The Project APE consists of the area of direct physical effect for the Project, which is an approximately 1.01-acre project site of undeveloped land, previously used as agricultural farmland. (Appendix A: Figure 2, Project APE).

The Project involves the construction and operations of a 5-story, 83,850-square-foot, affordable housing development for seniors with tuck-under parking. The maximum depth of excavation for the project is seven feet below ground surface (bgs). The “L”-shaped development would consist of a single building containing 85 units, including 68 one-bedroom units (595-square-feet) and 17 two-bedroom units (800-square-feet). One two-bedroom unit would be reserved for an onsite manager. Of the 84 available rental units, 74 apartments, including 58 one-bedroom and 16 two-bedroom units, would be income-restricted to households earning between 30% to 80% of the Area Median Income (AMI) for Orange County, and 10 one-bedroom units would be Permanent Supportive Housing (PSH) units reserved for individuals experiencing homelessness.

The ground floor would contain amenity spaces and building support spaces, including a community game room, fitness room, laundry room, lobby and leasing office, mail room, bike room, outdoor patio space, maintenance room, utility closet, storage, and trash room. The residential units would be located on floors 2 through 5 and tuck-under parking would be provided. A rooftop deck would also be located on the fifth floor. A total of 63 parking spaces would be provided, including 24 tuck-under spaces and 39 spaces in a surface parking lot. Vehicle ingress and egress would be provided via a driveway on Mercury Lane at the northeastern corner of the site.

The building would feature a modern architectural design intended to complement the surrounding neighborhood. The project would be designed to create a prominent visual and functional landmark at the intersection of Berry Street/Mercury Lane. The façade of the proposed development utilizes a combination of materials and textures to create a contemporary appearance that connects it to the historical fabric of the area. The upper floors of the development would be articulated with a variety of window styles and balcony spaces, facilitating visual interest.

Regulatory Framework

The National Register of Historic Places

The National Register of Historic Places (NRHP) is the United States' official list of districts, sites, buildings, structures, and objects worthy of preservation. Overseen by the National Park Service (NPS), under the U.S. Department of the Interior, the NRHP was authorized under the NHPA, as amended. Its listings encompass all National Historic Landmarks, as well as historic areas administered by NPS.

NRHP guidelines for the evaluation of historic significance were developed to be flexible and to recognize the accomplishments of all who have made significant contributions to the nation's history and heritage. Its criteria are designed to guide state and local governments, federal agencies, and others in evaluating potential entries in the NRHP. For a property to be listed in or determined eligible for listing, it must be demonstrated to possess integrity and to meet at least one of the following criteria:

The quality of significance in American history, architecture, archaeology, engineering, and culture is present in districts, sites, buildings, structures, and objects that possess integrity of location, design, setting, materials, workmanship, feeling, and association, and:

A. That are associated with events that have made a significant contribution to the broad patterns of our history; or
B. That are associated with the lives of persons significant in our past; or
C. That embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
D. That have yielded, or may be likely to yield, information important in prehistory or history.

Integrity is defined in NRHP guidance, *How to Apply the National Register Criteria,* as "the ability of a property to convey its significance. To be listed in the NRHP, a property must not only be shown to be significant under the NRHP criteria, but it also must have integrity" (NPS 1990). NRHP guidance further asserts that certain property types are not considered eligible for listing in the NRHP, except under certain circumstances (NPS 1990):

> Ordinarily cemeteries, birthplaces, graves of historical figures, properties owned by religious institutions or used for religious purposes, structures that have been moved from their original locations, reconstructed historic buildings, properties primarily commemorative in nature, and properties that have achieved significance within the past 50 years shall not be considered eligible for the National Register. However, such properties *will qualify* if they are integral parts of districts that do meet the criteria or if they fall within the following categories:
>
> a. A religious property deriving primary significance from architectural or artistic distinction or historical importance; or
> b. A building or structure removed from its original location, but which is primarily significant for architectural value, or which is the surviving structure most importantly associated with a historic person or event; or
> c. A birthplace or grave of a historical figure of outstanding importance if there is no appropriate site or building associated with his or her productive life; or
> d. A cemetery that derives its primary importance from graves of persons of transcendent importance, from age, from distinctive design features, or from association with historic events; or
> e. A reconstructed building when accurately executed in a suitable environment and presented in a dignified manner as part of a restoration master plan, and when no other building or structure with the same association has survived; or
> f. A property primarily commemorative in intent if design, age, tradition, or symbolic value has invested it with its own exceptional significance; or
> g. A property achieving significance within the past 50 years if it is of exceptional importance.

A historic property is defined as "any prehistoric or historic district, site, building, structure, or object included in, or eligible for inclusion in, the NRHP maintained by the Secretary of the Interior. This term includes artifacts, records, and remains that are related to and located within such properties. The term includes properties of traditional religious and cultural importance to an Indian tribe or Native Hawaiian organization and that meet the NRHP criteria" (36 CFR Sections 800.16(i)(1)).

Effects on historic properties under Section 106 of the NHPA are defined in the assessment of adverse effects in 36 CFR Sections 800.5(a)(1):

> An adverse effect is found when an undertaking may alter, directly or indirectly, any of the characteristics of a historic property that qualify the property for inclusion in the National Register in a manner that would diminish the integrity of the property's location, design, setting, materials, workmanship, feeling, or association. Consideration shall be given to all qualifying characteristics of a historic property, including those that may have been identified subsequent to the original evaluation of the property's eligibility for the National Register. Adverse effects may include reasonably foreseeable effects caused by the undertaking that may occur later in time, be farther removed in distance or be cumulative.

Adverse effects on historic properties are clearly defined and include, but are not limited to (36 CFR 800.5 (a)(2)):

i. Physical destruction of or damage to all or part of the property;
ii. Alteration of a property, including restoration, rehabilitation, repair, maintenance, stabilization, hazardous material remediation and provision of handicapped access, that is not consistent with the

Secretary's Standards for the Treatment of Historic Properties (36 CFR Part 68) and applicable guidelines;

iii. Removal of the property from its historic location;

iv. Change of the character of the property's use or of physical features within the property's setting that contributes to its historic significance;

v. Introduction of visual, atmospheric or audible elements that diminish the integrity of the property's significant historic features;

vi. Neglect of a property which causes its deterioration, except where such neglect and deterioration are recognized qualities of a property of religious and cultural significance to an Indian tribe or Native Hawaiian organization; and

vii. Transfer, lease, or sale of property out of Federal ownership or control without adequate and legally enforceable restrictions or conditions to ensure long-term preservation of the property's historic significance.

To comply with Section 106, the criteria of adverse effect are applied to historic properties, if any exist in the APE, pursuant to 36 CFR Sections 800.5(a)(1). If no historic properties are identified in the APE, a finding of "no historic properties affected" will be made for the proposed project. If there are historic properties in the APE, application of the criteria of adverse effect will result in project-related findings of either "no adverse effect" or of "adverse effect," as described above. A finding of no adverse effect may be appropriate when the undertaking's effects do not meet the thresholds in criteria of adverse effect 36 CFR Sections 800.5(a)(1), in certain cases when the undertaking is modified to avoid or lessen effects, or if conditions were imposed to ensure review of rehabilitation plans for conformance with the *Secretary of the Interior's Standards for the Treatment of Historic Properties* (codified in 36 CFR Part 68).

If adverse effects findings were expected to result from the proposed project, mitigation would be required, as feasible, and resolution of those adverse effects by consultation may occur to avoid, minimize, or mitigate adverse effects on historic properties pursuant to 36 CFR Part 800.6(a).

Records Search Results

Dudek archaeologist Brenda Rogers conducted a records search of the California Historical Resources Information System (CHRIS) on January 13, 2026, at the SCCIC located on the campus of the California State University, Fullerton in Fullerton, California. The records search encompassed the Project APE and a one-mile search radius. The purpose of the records search is to identify any previously recorded cultural resources that are in or adjacent to the Project APE and to identify previous studies in the Project vicinity. In addition to a review of previously prepared site records and reports, the records search also included a review of historical maps of the Project APE, ethnographies, the NRHP, the California Register of Historical Resources (CRHR), the California Historic Property Data File, and the lists of California State Historical Landmarks, California Points of Historical Interest, and Archaeological Determinations of Eligibility. See Appendix B for the complete SCCIC records search results and associated documentation.

Previously Conducted Cultural Resources Studies

The SCCIC records search indicates that 31 previous cultural resources technical studies have been conducted within one mile of the Project APE between 1974 and 2012. Of the 31 previous studies, one is mapped as overlapping the Project APE. See Confidential Appendix B for the complete SCCIC records, search results and associated documentation.

Table 1. Previously Conducted Cultural Resources Studies Intersecting Project APE

Report No.	Date	Author	Title
Intersects the Project APE			
OR-00024	1974	Clewlow, William C. Jr.	Evaluation of the Archaeological Resources and Potential Impact of Proposed Improvement of the 30 Mg Central Reservoir and Pumping Station, and Industrial Area, City of Brea

OR-00024

Evaluation of the Archaeological Resources and Potential Impact of Proposed Improvement of the 30 Mg Central Reservoir and Pumping Station, and Industrial Area, City of Brea (Clewlow 1974) documents the results of an environmental impact study conducted on behalf of the City of Brea. The investigation consisted of a review of maps and archival material at the University of California, Los Angeles, pedestrian survey and subsurface testing. The area of study overlaps 100 percent of the Project APE. A shell scatter was encountered outside of the current Project APE; no cultural resources were observed within the current Project APE. Two test units were excavated to assess the resource, and it was determined to most likely be a historic-era trash scatter. The author stated that further development would not impact that resource but urged the developers to contact the UCLA Archaeological Survey if there were any inadvertent finds.

Previously Recorded Cultural Resources

The SCCIC records search indicates that three previously recorded cultural resources are located within one mile of the Project APE, none of which intersect the Project APE. Of the three resources within the one-mile radius, one is a historic-era resource (P-30-000796), the two others are a historic-era structure (P-30-150063) and a historic-era structure and associated urban open space (P-30-156178).

P-30-000796 was determined to be most likely marine shell used in agriculture (Brown 1979) and not eligible for the NHRP. P-30-150063 and P-30-156178, have been nominated for the NRHP but not yet been evaluated. See Appendix B for the complete SCCIC records search results, documentation, and California Department of Parks and Recreation 523 Site Forms (DPR site forms).

Table 2. Previously Recorded Cultural Resources within One Mile of Project APE

Primary Number	Trinomial	Resource Name (if applicable)	Age	Resource Type	Eligibility for NRHP	Recording Event
Outside Project APE						
P-30-000796	CA-ORA-000796	Shell scatter-site	Historic	Site, Other	Determined ineligible	1979 (Brown)
P-30-150063	---	Laurel School	Historic	Building	Nominated but not yet evaluated	2026 (Heumann, Leslie)
P-30-156178	---	Brea City Hall and Park	Historic	Building, Site	Nominated but not yet evaluated	1983 (Tom Combiths)

Historical Aerial Imagery and Topographic Map Review

In addition to the SCCIC records search, Dudek conducted an online review of historical aerial photographs (historic aerials) and historical topographic maps (historic topos) to better understand the development of the Project APE and surrounding areas over time. Historic aerials of the Project APE are available from 1927 to 2022, and historic topos of the Project APE are available from 1896 to 2022 (NETR 2026, UCSB 2026, USGS 2026).

The earliest available historic aerial imagery, dating to 1927, depicts the Project APE and surrounding area as agricultural orchards (UCSB 2026). An unimproved north–south road, now Berry Street, borders the western edge of the APE, and a structure was visible within the southwest corner of the parcel. No substantial changes are evident until 1965, when both the orchards and the structure were removed, and the area was converted to an undeveloped open field. The 1972 aerial imagery shows the APE remaining undeveloped, although industrial buildings had been constructed across Berry Street to the west. By 1980, Mercury Lane had been constructed north of the APE, with an industrial building located to the north and another to the east. By 1987, the eastern building had been expanded to the APE boundary, and an additional industrial building had been constructed to the south; however, the Project APE itself remained undeveloped. Aside from changes in vegetation, the condition of the APE has remained consistent since 1987 (NETR 2026a).

The earliest available topographic map, dated 1896, depicts the Project APE as undeveloped, with a drainage feature located to the east (NETR 2026b). The first notable change appears on the 1935 topographic map, which shows Berry Street to the west of the Project APE and a small structure situated within the southwest portion of the parcel. The 1942 map indicates that the land had transitioned to agricultural use as an orchard, and by 1950, additional structures had been constructed to the south, outside the Project APE. By 1965, no structures are depicted within or adjacent to the APE, although the land continues to be represented as orchard. By 1975, the Project APE remains undeveloped but is no longer depicted as orchard, and new structures are shown west of the site across Berry Street. The 1981 topographic map is the first to depict Mercury Lane, as well as a large structure north of the APE and a smaller structure to the east. Subsequent maps reflect continued development in the surrounding area; however, the Project APE itself remains undeveloped. No substantial changes to the APE are evident in the remaining maps from 2012 through 2022 (NETR 2026b; USGS 2026).

Overall, this review of historic aerial imagery and historic topo maps indicates the Project APE has been subject to past disturbances associated with the grading and plowing of agricultural use from 1927 to the late 1960s. Currently, the Project APE remains an undeveloped, empty lot.

Native American Heritage Commission Sacred Lands File

Dudek contacted the NAHC on December 29, 2025, and requested a review of their SLF for the Project APE (Appendix C, NAHC Sacred Lands File Results). The SLF consists of a database of known Native American resources. These resources may not be included in the SCCIC databases. The NAHC emailed a response letter on January 13, 2026, stating the results were negative. Additionally, the NAHC provided a list of traditionally culturally affiliated Native American tribal representatives who may have additional information related to cultural resources within the Project APE as part of this search (Appendix C).

Section 106 Tribal Consultation

Dudek assisted the County with mailing Section 106 Tribal Consultation request letters on March 10, 2026, to all the Native American group representatives included on the NAHC contact list (Appendix C). These letters attempted to notify the Native American group representatives of the Project and invite them to be a consulting party. Email notifications were also sent to ensure comprehensive outreach and that all parties received the invitation to participate in the consultation process. Two Tribes responded to the consultation invitation and requested consultation (all Tribal Consultation is included in Appendix C): Gabrieleño Band of Mission Indians - Kizh Nation (Kizh Nation) responded on March 20, 2026, and Gabrielino Tongva Indians of California (Gabrielino Tongva) responded on April 6, 2026. Kizh Nation indicated an interest in consulting but advised that it would not be available to meet until May 21. Gabrielino Tongva did not respond to multiple follow-up requests to schedule a consultation meeting. In order to avoid unreasonable delay to the environmental review process and meet project deadlines, the County is proceeding with the Section 106 review while keeping the consultation opportunity open. The County will continue to consider any information received from either Tribe should consultation occur at a later date. Consultation efforts were conducted in good faith and provided the Tribes a reasonable opportunity to participate. No historic properties were identified within the APE as a result of the consultation process to date.

Review of Geomorphological Context

According to the U.S. Department of Agriculture Natural Resources Conservation Services (USDA 2026), the Project APE consists of a Sorrento loam soil type (64.1 percent), with slopes ranging from 0 percent to 2 percent. This soil type is characterized by silty clay loams formed in alluvium derived from sedimentary rock is found in areas with elevations of 20 to 1100 feet above mean sea level (amsl). The remaining soils consist of Sorrento clay loam (35.9 percent), with slopes ranging from 2 percent to 9 percent. This soil type is characterized by clay loams formed in alluvial plains and fans and is found in areas with elevations of 20 to 2040 feet amsl (USDA 2026).

A review of the USGS mineral resources (USGS 2026) online spatial data for geology indicates that the Project APE is underlain by Quaternary alluvium and marine deposits from the Pleistocene and Holocene epochs. Late Pleistocene-era alluvial formations do have the potential to support the presence of buried archaeological resources. These soils are associated with the period of prehistoric human use, as well as representing ongoing

processes of development that have the potential to preserve cultural material in context, depending on area-specific topographical setting.

Pedestrian Survey

Dudek archaeologist David Alexander conducted a pedestrian survey of the Project APE on February 2, 2026. Standard archaeological procedures and techniques consistent with the Secretary of the Interior Standards for Archaeology and Historic Preservation were employed during the survey. When possible, 15-meter interval survey transects were conducted and oriented in cardinal direction. Where visible, the ground surface was examined for prehistoric artifacts (e.g., flaked stone tools, tool-making debris, stone milling tools, ceramics, fire-affected rock, imported marine shell), soil discoloration that might indicate the presence of a cultural midden, soil depressions, features indicative of the current or former presence of structures or buildings (e.g., standing exterior walls, post holes, foundations), and historic artifacts (e.g., metal, glass, ceramics, building materials). Ground disturbances such as rodent/reptile burrows, cut banks, and drainages were also visually inspected for exposed subsurface materials. All fieldwork was documented using Survey123 and an Apple iPad equipped with ESRI Field Maps. Location-specific photographs were taken using an iPad equipped with a twelve (12) mega-pixel (MP) 1080p resolution camera and georeferenced PDF maps of the Project APE. All field notes, photographs, and records related to the current study are on file at Dudek's Pasadena, California office.

The Project APE is an undeveloped lot covered with dense non-native grasses, with some exposed soils within unpaved pedestrian trails (less than 2 percent) (Appendix D, Exhibit 1). Ground visibility throughout the Project APE was poor (0 to 5 percent) and largely obscured by the dense vegetation. A small amount of native soil was observed consisting of light brown silty sand (Appendix D, Exhibit 2). No archaeological resources were identified during the pedestrian survey.

Summary and Recommendations

Based on background research, the Project APE has experienced disturbances since at least 1927, which are attributed to its agricultural use. Since 1965 the Project APE has been undeveloped and no longer appeared to be agricultural land. No archaeological resources have been identified within the vicinity of the Project APE through the SCCIC records search or pedestrian survey. Results of the records search also indicate that the Project APE has been previously surveyed, and no cultural resources were observed. Analysis of historic aerials and topographic maps indicate there is a low potential for encountering intact subsurface archaeological deposits during Project implementation due to previous agricultural use. The geomorphic context indicates a potential to encounter intact cultural materials. However, based on the previous disturbances and maximum depth of excavations associated with current Project construction, that possibility is less than likely. No cultural resources will be impacted, and a finding of No Historic Properties Affected is recommended for the project.

The following recommendations are provided to meet National Environmental Policy Act (NEPA) and NHPA compliance and best practice standards, should the Project move forward at this location:

In the event that archaeological resources (sites, features, and artifacts) are exposed during construction activities involving ground disturbance for the proposed Project, all construction work occurring within 50 feet of the find shall immediately stop until a qualified archaeologist, meeting the Secretary of the Interior's Professional

Qualification Standards, can evaluate the significance of the find and determine whether additional study is warranted. This avoidance buffer may be adjusted following inspection of this area by that qualified specialist. Prehistoric archaeological deposits may be indicated by the presence of discolored or dark soil, fire-affected material, concentrations of fragmented or whole shell, burned or complete bone, non-local lithic materials, or characteristics observed to be atypical of the surrounding area. Common prehistoric artifacts may include modified or battered lithic materials; lithic or bone tools that appeared to have been used for chopping, drilling, or grinding; projectile points; fired clay ceramics or non-functional items; and other items. Historic-age deposits are often indicated by the presence of glass bottles and shards, ceramic material, building or domestic refuse, ferrous metal, or old features such as concrete foundations or privies. Depending upon the significance of the find under the NHPA. the archaeologist may simply record the find and allow work to continue. Feasible options for avoidance must also be considered. If the discovery proves significant under the NHPA, additional work, such as preparation of an archaeological treatment plan, testing, or data recovery may be warranted.

Should you have any questions relating to this report and its findings please contact Ryan J. Glenn at (626) 204-9840 or rglenn@dudek.com.

Re: Mercury Affordable Senior Apartments Project, Orange County

To Whom It May Concern:

As requested, a search of the Native American Heritage Commission (NAHC) Sacred Lands File (SLF) was completed based on information submitted for the above referenced project. The results were negative. Be aware that tribes do not always record their sacred sites in the SLF, nor are they required to do so. As such, an SLF search is not a substitute for consultation with all tribes that are traditionally and culturally affiliated with a project's geographic area.

Attached is a list of Native American tribes that are traditionally and culturally affiliated with the project's geographic area. Please contact all of the listed tribes as they may have information about sacred sites within the project area that is not listed with the NAHC.

If within two weeks of notification, a response has not been received, the Commission requests that you follow up with a telephone call or email to ensure that the project information was received.

If you receive notification of a change of address or phone number from a tribe, please inform the NAHC so that we can assure that our lists contain current information.

In addition to engaging in tribal consultation, you should consult the appropriate regional California Historical Research Information System (CHRIS) information center to determine whether it has information regarding the presence of recorded archaeological sites within the project area.

If you have any questions or need additional information, please contact me at Andrew.Green@nahc.ca.gov.

Sincerely,

Andrew Green

Andrew Salas, Chairperson
Gabrieleno Band of Mission Indians – Kizh Nation
P.O. Box 393
Covina, CA 91723

Dear Chairperson, Salas:

Re: The Mercury Senior Apartments Project Section 106 Consultation Notification Letter, Southeast Corner of Berry Street/Mercury Lane, Brea, CA, 92821

The County of Orange (County) is considering funding the project listed above with federal funds from the U.S. Department of Housing and Urban Development (HUD). Under HUD regulation 24 CFR 58.4, the County has assumed HUD's environmental review responsibilities for the project, including tribal consultation related to historic properties. Historic properties include archaeological sites, burial grounds, sacred landscapes or features, ceremonial areas, traditional cultural places and landscapes, plant and animal communities, and buildings and structures with significant tribal association.

The County is conducting a review of this project to comply with Section 106 of the National Historic Preservation Act and its implementing regulations 36 CFR Part 800. We would like to invite you to be a consulting party in this review to help identify historic properties in the project area of potential effects (APE) that may have religious and cultural significance to your tribe, and if such properties exist, to help assess how the project might affect them. If the project might have an adverse effect, we would like to discuss possible ways to avoid, minimize, or mitigate potential adverse effects.

The California Native American Heritage Commission was contacted on December 29, 2025, and a response, received on January 13, 2026, indicated that the project APE is negative for Native American cultural resources. A records search was conducted on January 13, 2026, at the South Central Coastal Information Center of the California Historic Resources Information System at California State University, Fullerton for the project APE and a surrounding

OC Housing & Community Development

1-mile buffer. The records search identified that the project site has been previously subjected to archaeological survey efforts documented in the sole technical study with spatial overlap on the defined APE. Thirty additional studies had been conducted outside the APE but within the 1-mile buffer. No previously recorded cultural resources were located within the APE, but two previously recorded built environment resources and one historic-era resource were located outside the APE but within the 1-mile buffer.

To meet project timeframes, if you would like to be a consulting party on this project, please let us know of your interest within 30 days. If you have any initial concerns with the impact of the project on religious or cultural properties, please note them in your response.

Enclosed are maps that show the project location and APE. The project is located at the southeast corner of the Berry Street and Mercury Lane intersection in the City of Brea, CA, 92821. The project is proposed on Assessor's Parcel Number 296-141-05 and is bounded by Mercury Lane to the north, office buildings to the east and south, and South Berry Street to the west in the City of Brea, California. The project site comprises undeveloped land characterized by exposed soils and limited vegetative cover, and it exhibits observable evidence of prior grading and ground disturbance There are no existing structures or paved surfaces within the APE.

The Project proposes to construct a 5-story, affordable housing development for seniors with tuck-under parking. The "L"-shaped development would consist of a single building containing 85 units, including 68 one-bedroom units and 17 two-bedroom units. One two-bedroom unit would be reserved for an onsite manager. Of the 84 available rental units, 74 apartments, including 58 one-bedroom and 16 two-bedroom units, would be income-restricted to households earning between 30 to 80 percent of the Area Median Income (AMI) for Orange County, and 10 one-bedroom units would be Permanent Supportive Housing (PSH) units reserved for individuals experiencing homelessness.

The ground floor would contain amenity spaces and building support spaces, including a community game room, fitness room, laundry room, lobby and leasing office, mail room, bike room, outdoor patio space, maintenance room, utility closet, storage, and trash room. The residential units would be located on floors 2 through 5 and tuck-under parking would be provided. A rooftop deck would also be located on the fifth floor. A total of 63 parking spaces would be provided, including 24 tuck-under spaces and 39 spaces in a surface parking lot. Vehicle ingress and egress would be provided via a driveway on Mercury Lane at the northeastern corner of the site.

The building would feature a modern architectural design intended to complement the surrounding neighborhood. The project would be designed to create a prominent visual and functional landmark at the intersection of Berry Street/Mercury Lane. The façade of the proposed development utilizes a combination of materials and textures to create a contemporary appearance that connects it to the historical fabric of the area. The upper floors of the development would be articulated with a variety of window styles and balcony spaces, facilitating visual interest.

Anthony Madrigal, Tribal Historic Preservation Officer
Cahuilla Band of Indians
52701 CA Highway 371
Anza, CA 92539

Dear Tribal Historic Preservation Officer, Madrigal:

Re: The Mercury Senior Apartments Project Section 106 Consultation Notification Letter, Southeast Corner of Berry Street/Mercury Lane, Brea, CA, 92821

The County of Orange (County) is considering funding the project listed above with federal funds from the U.S. Department of Housing and Urban Development (HUD). Under HUD regulation 24 CFR 58.4, the County has assumed HUD's environmental review responsibilities for the project, including tribal consultation related to historic properties. Historic properties include archaeological sites, burial grounds, sacred landscapes or features, ceremonial areas, traditional cultural places and landscapes, plant and animal communities, and buildings and structures with significant tribal association.

The County is conducting a review of this project to comply with Section 106 of the National Historic Preservation Act and its implementing regulations 36 CFR Part 800. We would like to invite you to be a consulting party in this review to help identify historic properties in the project area of potential effects (APE) that may have religious and cultural significance to your tribe, and if such properties exist, to help assess how the project might affect them. If the project might have an adverse effect, we would like to discuss possible ways to avoid, minimize, or mitigate potential adverse effects.

The California Native American Heritage Commission was contacted on December 29, 2025, and a response, received on January 13, 2026, indicated that the project APE is negative for Native American cultural resources. A records search was conducted on January 13, 2026, at the South Central Coastal Information Center of the California Historic Resources Information System at California State University, Fullerton for the project APE and a surrounding

1-mile buffer. The records search identified that the project site has been previously subjected to archaeological survey efforts documented in the sole technical study with spatial overlap on the defined APE. Thirty additional studies had been conducted outside the APE but within the 1-mile buffer. No previously recorded cultural resources were located within the APE, but two previously recorded built environment resources and one historic-era resource were located outside the APE but within the 1-mile buffer.

To meet project timeframes, if you would like to be a consulting party on this project, please let us know of your interest within 30 days. If you have any initial concerns with the impact of the project on religious or cultural properties, please note them in your response.

Enclosed are maps that show the project location and APE. The project is located at the southeast corner of the Berry Street and Mercury Lane intersection in the City of Brea, CA, 92821. The project is proposed on Assessor's Parcel Number 296-141-05 and is bounded by Mercury Lane to the north, office buildings to the east and south, and South Berry Street to the west in the City of Brea, California. The project site comprises undeveloped land characterized by exposed soils and limited vegetative cover, and it exhibits observable evidence of prior grading and ground disturbance There are no existing structures or paved surfaces within the APE.

The Project proposes to construct a 5-story, affordable housing development for seniors with tuck-under parking. The "L"-shaped development would consist of a single building containing 85 units, including 68 one-bedroom units and 17 two-bedroom units. One two-bedroom unit would be reserved for an onsite manager. Of the 84 available rental units, 74 apartments, including 58 one-bedroom and 16 two-bedroom units, would be income-restricted to households earning between 30 to 80 percent of the Area Median Income (AMI) for Orange County, and 10 one-bedroom units would be Permanent Supportive Housing (PSH) units reserved for individuals experiencing homelessness.

The ground floor would contain amenity spaces and building support spaces, including a community game room, fitness room, laundry room, lobby and leasing office, mail room, bike room, outdoor patio space, maintenance room, utility closet, storage, and trash room. The residential units would be located on floors 2 through 5 and tuck-under parking would be provided. A rooftop deck would also be located on the fifth floor. A total of 63 parking spaces would be provided, including 24 tuck-under spaces and 39 spaces in a surface parking lot. Vehicle ingress and egress would be provided via a driveway on Mercury Lane at the northeastern corner of the site.

The building would feature a modern architectural design intended to complement the surrounding neighborhood. The project would be designed to create a prominent visual and functional landmark at the intersection of Berry Street/Mercury Lane. The façade of the proposed development utilizes a combination of materials and textures to create a contemporary appearance that connects it to the historical fabric of the area. The upper floors of the development would be articulated with a variety of window styles and balcony spaces, facilitating visual interest.

Charles Alvarez, Chairperson
Gabrieleno-Tongva Tribe
23454 Vanowen Street
West Hills, CA 91307

Dear Chairperson, Alvarez:

Re: The Mercury Senior Apartments Project Section 106 Consultation Notification Letter, Southeast Corner of Berry Street/Mercury Lane, Brea, CA, 92821

The County of Orange (County) is considering funding the project listed above with federal funds from the U.S. Department of Housing and Urban Development (HUD). Under HUD regulation 24 CFR 58.4, the County has assumed HUD's environmental review responsibilities for the project, including tribal consultation related to historic properties. Historic properties include archaeological sites, burial grounds, sacred landscapes or features, ceremonial areas, traditional cultural places and landscapes, plant and animal communities, and buildings and structures with significant tribal association.

The County is conducting a review of this project to comply with Section 106 of the National Historic Preservation Act and its implementing regulations 36 CFR Part 800. We would like to invite you to be a consulting party in this review to help identify historic properties in the project area of potential effects (APE) that may have religious and cultural significance to your tribe, and if such properties exist, to help assess how the project might affect them. If the project might have an adverse effect, we would like to discuss possible ways to avoid, minimize, or mitigate potential adverse effects.

The California Native American Heritage Commission was contacted on December 29, 2025, and a response, received on January 13, 2026, indicated that the project APE is negative for Native American cultural resources. A records search was conducted on January 13, 2026, at the South Central Coastal Information Center of the California Historic Resources Information System at California State University, Fullerton for the project APE and a surrounding

OC Housing & Community Development

FAX: 714.480.2978

Docusign Envelope ID: ABC2FB78-DA01-4738-B43D-54EB92104711

1-mile buffer. The records search identified that the project site has been previously subjected to archaeological survey efforts documented in the sole technical study with spatial overlap on the defined APE. Thirty additional studies had been conducted outside the APE but within the 1-mile buffer. No previously recorded cultural resources were located within the APE, but two previously recorded built environment resources and one historic-era resource were located outside the APE but within the 1-mile buffer.

To meet project timeframes, if you would like to be a consulting party on this project, please let us know of your interest within 30 days. If you have any initial concerns with the impact of the project on religious or cultural properties, please note them in your response.

Enclosed are maps that show the project location and APE. The project is located at the southeast corner of the Berry Street and Mercury Lane intersection in the City of Brea, CA, 92821. The project is proposed on Assessor's Parcel Number 296-141-05 and is bounded by Mercury Lane to the north, office buildings to the east and south, and South Berry Street to the west in the City of Brea, California. The project site comprises undeveloped land characterized by exposed soils and limited vegetative cover, and it exhibits observable evidence of prior grading and ground disturbance There are no existing structures or paved surfaces within the APE.

The Project proposes to construct a 5-story, affordable housing development for seniors with tuck-under parking. The "L"-shaped development would consist of a single building containing 85 units, including 68 one-bedroom units and 17 two-bedroom units. One two-bedroom unit would be reserved for an onsite manager. Of the 84 available rental units, 74 apartments, including 58 one-bedroom and 16 two-bedroom units, would be income-restricted to households earning between 30 to 80 percent of the Area Median Income (AMI) for Orange County, and 10 one-bedroom units would be Permanent Supportive Housing (PSH) units reserved for individuals experiencing homelessness.

The ground floor would contain amenity spaces and building support spaces, including a community game room, fitness room, laundry room, lobby and leasing office, mail room, bike room, outdoor patio space, maintenance room, utility closet, storage, and trash room. The residential units would be located on floors 2 through 5 and tuck-under parking would be provided. A rooftop deck would also be located on the fifth floor. A total of 63 parking spaces would be provided, including 24 tuck-under spaces and 39 spaces in a surface parking lot. Vehicle ingress and egress would be provided via a driveway on Mercury Lane at the northeastern corner of the site.

The building would feature a modern architectural design intended to complement the surrounding neighborhood. The project would be designed to create a prominent visual and functional landmark at the intersection of Berry Street/Mercury Lane. The façade of the proposed development utilizes a combination of materials and textures to create a contemporary appearance that connects it to the historical fabric of the area. The upper floors of the development would be articulated with a variety of window styles and balcony spaces, facilitating visual interest.

Erica Schenk, Chairperson
Cahuilla Band of Indians
52701 CA Highway 371
Anza, CA 92539

Dear Chairperson, Schenk:

Re: The Mercury Senior Apartments Project Section 106 Consultation Notification Letter, Southeast Corner of Berry Street/Mercury Lane, Brea, CA, 92821

The County of Orange (County) is considering funding the project listed above with federal funds from the U.S. Department of Housing and Urban Development (HUD). Under HUD regulation 24 CFR 58.4, the County has assumed HUD's environmental review responsibilities for the project, including tribal consultation related to historic properties. Historic properties include archaeological sites, burial grounds, sacred landscapes or features, ceremonial areas, traditional cultural places and landscapes, plant and animal communities, and buildings and structures with significant tribal association.

The County is conducting a review of this project to comply with Section 106 of the National Historic Preservation Act and its implementing regulations 36 CFR Part 800. We would like to invite you to be a consulting party in this review to help identify historic properties in the project area of potential effects (APE) that may have religious and cultural significance to your tribe, and if such properties exist, to help assess how the project might affect them. If the project might have an adverse effect, we would like to discuss possible ways to avoid, minimize, or mitigate potential adverse effects.

The California Native American Heritage Commission was contacted on December 29, 2025, and a response, received on January 13, 2026, indicated that the project APE is negative for Native American cultural resources. A records search was conducted on January 13, 2026, at the South Central Coastal Information Center of the California Historic Resources Information System at California State University, Fullerton for the project APE and a surrounding

OC Housing & Community Development

1501 E. ST. ANDREW PLACE, 1ST FLOOR
SANTA ANA, CA 92705

Docusign Envelope ID: CD707009-F828-4AF3-8963-76A52EA74105

1-mile buffer. The records search identified that the project site has been previously subjected to archaeological survey efforts documented in the sole technical study with spatial overlap on the defined APE. Thirty additional studies had been conducted outside the APE but within the 1-mile buffer. No previously recorded cultural resources were located within the APE, but two previously recorded built environment resources and one historic-era resource were located outside the APE but within the 1-mile buffer.

To meet project timeframes, if you would like to be a consulting party on this project, please let us know of your interest within 30 days. If you have any initial concerns with the impact of the project on religious or cultural properties, please note them in your response.

Enclosed are maps that show the project location and APE. The project is located at the southeast corner of the Berry Street and Mercury Lane intersection in the City of Brea, CA, 92821. The project is proposed on Assessor's Parcel Number 296-141-05 and is bounded by Mercury Lane to the north, office buildings to the east and south, and South Berry Street to the west in the City of Brea, California. The project site comprises undeveloped land characterized by exposed soils and limited vegetative cover, and it exhibits observable evidence of prior grading and ground disturbance There are no existing structures or paved surfaces within the APE.

The Project proposes to construct a 5-story, affordable housing development for seniors with tuck-under parking. The "L"-shaped development would consist of a single building containing 85 units, including 68 one-bedroom units and 17 two-bedroom units. One two-bedroom unit would be reserved for an onsite manager. Of the 84 available rental units, 74 apartments, including 58 one-bedroom and 16 two-bedroom units, would be income-restricted to households earning between 30 to 80 percent of the Area Median Income (AMI) for Orange County, and 10 one-bedroom units would be Permanent Supportive Housing (PSH) units reserved for individuals experiencing homelessness.

The ground floor would contain amenity spaces and building support spaces, including a community game room, fitness room, laundry room, lobby and leasing office, mail room, bike room, outdoor patio space, maintenance room, utility closet, storage, and trash room. The residential units would be located on floors 2 through 5 and tuck-under parking would be provided. A rooftop deck would also be located on the fifth floor. A total of 63 parking spaces would be provided, including 24 tuck-under spaces and 39 spaces in a surface parking lot. Vehicle ingress and egress would be provided via a driveway on Mercury Lane at the northeastern corner of the site.

The building would feature a modern architectural design intended to complement the surrounding neighborhood. The project would be designed to create a prominent visual and functional landmark at the intersection of Berry Street/Mercury Lane. The façade of the proposed development utilizes a combination of materials and textures to create a contemporary appearance that connects it to the historical fabric of the area. The upper floors of the development would be articulated with a variety of window styles and balcony spaces, facilitating visual interest.

Heidi Lucero, THPO/MLD
Juaneno Band of Mission Indians Acjachemen Nation 84A
31411-A La Mantanza Street
San Juan Capistrano, CA 92675

Dear THPO/MLD, Lucero:

Re: The Mercury Senior Apartments Project Section 106 Consultation Notification Letter, Southeast Corner of Berry Street/Mercury Lane, Brea, CA, 92821

The County of Orange (County) is considering funding the project listed above with federal funds from the U.S. Department of Housing and Urban Development (HUD). Under HUD regulation 24 CFR 58.4, the County has assumed HUD's environmental review responsibilities for the project, including tribal consultation related to historic properties. Historic properties include archaeological sites, burial grounds, sacred landscapes or features, ceremonial areas, traditional cultural places and landscapes, plant and animal communities, and buildings and structures with significant tribal association.

The County is conducting a review of this project to comply with Section 106 of the National Historic Preservation Act and its implementing regulations 36 CFR Part 800. We would like to invite you to be a consulting party in this review to help identify historic properties in the project area of potential effects (APE) that may have religious and cultural significance to your tribe, and if such properties exist, to help assess how the project might affect them. If the project might have an adverse effect, we would like to discuss possible ways to avoid, minimize, or mitigate potential adverse effects.

The California Native American Heritage Commission was contacted on December 29, 2025, and a response, received on January 13, 2026, indicated that the project APE is negative for Native American cultural resources. A records search was conducted on January 13, 2026, at the South Central Coastal Information Center of the California Historic Resources Information System at California State University, Fullerton for the project APE and a surrounding

Lena Broderick, Executive Assistant to Tribal Chairman
Morongo Band of Mission Indians
12700 Pumarra Road
Banning, CA 92220

Dear Executive Assistant to Tribal Chairman, Broderick:

Re: The Mercury Senior Apartments Project Section 106 Consultation Notification Letter, Southeast Corner of Berry Street/Mercury Lane, Brea, CA, 92821

The County of Orange (County) is considering funding the project listed above with federal funds from the U.S. Department of Housing and Urban Development (HUD). Under HUD regulation 24 CFR 58.4, the County has assumed HUD's environmental review responsibilities for the project, including tribal consultation related to historic properties. Historic properties include archaeological sites, burial grounds, sacred landscapes or features, ceremonial areas, traditional cultural places and landscapes, plant and animal communities, and buildings and structures with significant tribal association.

The County is conducting a review of this project to comply with Section 106 of the National Historic Preservation Act and its implementing regulations 36 CFR Part 800. We would like to invite you to be a consulting party in this review to help identify historic properties in the project area of potential effects (APE) that may have religious and cultural significance to your tribe, and if such properties exist, to help assess how the project might affect them. If the project might have an adverse effect, we would like to discuss possible ways to avoid, minimize, or mitigate potential adverse effects.

The California Native American Heritage Commission was contacted on December 29, 2025, and a response, received on January 13, 2026, indicated that the project APE is negative for Native American cultural resources. A records search was conducted on January 13, 2026, at the South Central Coastal Information Center of the California Historic Resources Information System at California State University, Fullerton for the project APE and a surrounding

OC Housing & Community Development

1501 E. ST. ANDREW PLACE, 1ST FLOOR
SANTA ANA, CA 92705
PHONE: 714.480.2991
FAX: 714.480.2978

Docusign Envelope ID: D7C21CDB-5C3D-43D0-A340-2059D3DE483F

1-mile buffer. The records search identified that the project site has been previously subjected to archaeological survey efforts documented in the sole technical study with spatial overlap on the defined APE. Thirty additional studies had been conducted outside the APE but within the 1-mile buffer. No previously recorded cultural resources were located within the APE, but two previously recorded built environment resources and one historic-era resource were located outside the APE but within the 1-mile buffer.

To meet project timeframes, if you would like to be a consulting party on this project, please let us know of your interest within 30 days. If you have any initial concerns with the impact of the project on religious or cultural properties, please note them in your response.

Enclosed are maps that show the project location and APE. The project is located at the southeast corner of the Berry Street and Mercury Lane intersection in the City of Brea, CA, 92821. The project is proposed on Assessor's Parcel Number 296-141-05 and is bounded by Mercury Lane to the north, office buildings to the east and south, and South Berry Street to the west in the City of Brea, California. The project site comprises undeveloped land characterized by exposed soils and limited vegetative cover, and it exhibits observable evidence of prior grading and ground disturbance There are no existing structures or paved surfaces within the APE.

The Project proposes to construct a 5-story, affordable housing development for seniors with tuck-under parking. The "L"-shaped development would consist of a single building containing 85 units, including 68 one-bedroom units and 17 two-bedroom units. One two-bedroom unit would be reserved for an onsite manager. Of the 84 available rental units, 74 apartments, including 58 one-bedroom and 16 two-bedroom units, would be income-restricted to households earning between 30 to 80 percent of the Area Median Income (AMI) for Orange County, and 10 one-bedroom units would be Permanent Supportive Housing (PSH) units reserved for individuals experiencing homelessness.

The ground floor would contain amenity spaces and building support spaces, including a community game room, fitness room, laundry room, lobby and leasing office, mail room, bike room, outdoor patio space, maintenance room, utility closet, storage, and trash room. The residential units would be located on floors 2 through 5 and tuck-under parking would be provided. A rooftop deck would also be located on the fifth floor. A total of 63 parking spaces would be provided, including 24 tuck-under spaces and 39 spaces in a surface parking lot. Vehicle ingress and egress would be provided via a driveway on Mercury Lane at the northeastern corner of the site.

The building would feature a modern architectural design intended to complement the surrounding neighborhood. The project would be designed to create a prominent visual and functional landmark at the intersection of Berry Street/Mercury Lane. The façade of the proposed development utilizes a combination of materials and textures to create a contemporary appearance that connects it to the historical fabric of the area. The upper floors of the development would be articulated with a variety of window styles and balcony spaces, facilitating visual interest.

1-mile buffer. The records search identified that the project site has been previously subjected to archaeological survey efforts documented in the sole technical study with spatial overlap on the defined APE. Thirty additional studies had been conducted outside the APE but within the 1-mile buffer. No previously recorded cultural resources were located within the APE, but two previously recorded built environment resources and one historic-era resource were located outside the APE but within the 1-mile buffer.

To meet project timeframes, if you would like to be a consulting party on this project, please let us know of your interest within 30 days. If you have any initial concerns with the impact of the project on religious or cultural properties, please note them in your response.

Enclosed are maps that show the project location and APE. The project is located at the southeast corner of the Berry Street and Mercury Lane intersection in the City of Brea, CA, 92821. The project is proposed on Assessor's Parcel Number 296-141-05 and is bounded by Mercury Lane to the north, office buildings to the east and south, and South Berry Street to the west in the City of Brea, California. The project site comprises undeveloped land characterized by exposed soils and limited vegetative cover, and it exhibits observable evidence of prior grading and ground disturbance There are no existing structures or paved surfaces within the APE.

The Project proposes to construct a 5-story, affordable housing development for seniors with tuck-under parking. The "L"-shaped development would consist of a single building containing 85 units, including 68 one-bedroom units and 17 two-bedroom units. One two-bedroom unit would be reserved for an onsite manager. Of the 84 available rental units, 74 apartments, including 58 one-bedroom and 16 two-bedroom units, would be income-restricted to households earning between 30 to 80 percent of the Area Median Income (AMI) for Orange County, and 10 one-bedroom units would be Permanent Supportive Housing (PSH) units reserved for individuals experiencing homelessness.

The ground floor would contain amenity spaces and building support spaces, including a community game room, fitness room, laundry room, lobby and leasing office, mail room, bike room, outdoor patio space, maintenance room, utility closet, storage, and trash room. The residential units would be located on floors 2 through 5 and tuck-under parking would be provided. A rooftop deck would also be located on the fifth floor. A total of 63 parking spaces would be provided, including 24 tuck-under spaces and 39 spaces in a surface parking lot. Vehicle ingress and egress would be provided via a driveway on Mercury Lane at the northeastern corner of the site.

The building would feature a modern architectural design intended to complement the surrounding neighborhood. The project would be designed to create a prominent visual and functional landmark at the intersection of Berry Street/Mercury Lane. The façade of the proposed development utilizes a combination of materials and textures to create a contemporary appearance that connects it to the historical fabric of the area. The upper floors of the development would be articulated with a variety of window styles and balcony spaces, facilitating visual interest.

Sandonne Goad, Chairperson
Gabrieleno/Tongva Nation
13191 Crossroads Parkway North, Suite 375
City of Industry, CA 91746

Dear Chairperson, Goad:

Re: The Mercury Senior Apartments Project Section 106 Consultation Notification Letter, Southeast Corner of Berry Street/Mercury Lane, Brea, CA, 92821

The County of Orange (County) is considering funding the project listed above with federal funds from the U.S. Department of Housing and Urban Development (HUD). Under HUD regulation 24 CFR 58.4, the County has assumed HUD's environmental review responsibilities for the project, including tribal consultation related to historic properties. Historic properties include archaeological sites, burial grounds, sacred landscapes or features, ceremonial areas, traditional cultural places and landscapes, plant and animal communities, and buildings and structures with significant tribal association.

The County is conducting a review of this project to comply with Section 106 of the National Historic Preservation Act and its implementing regulations 36 CFR Part 800. We would like to invite you to be a consulting party in this review to help identify historic properties in the project area of potential effects (APE) that may have religious and cultural significance to your tribe, and if such properties exist, to help assess how the project might affect them. If the project might have an adverse effect, we would like to discuss possible ways to avoid, minimize, or mitigate potential adverse effects.

The California Native American Heritage Commission was contacted on December 29, 2025, and a response, received on January 13, 2026, indicated that the project APE is negative for Native American cultural resources. A records search was conducted on January 13, 2026, at the South Central Coastal Information Center of the California Historic Resources Information System at California State University, Fullerton for the project APE and a surrounding

1-mile buffer. The records search identified that the project site has been previously subjected to archaeological survey efforts documented in the sole technical study with spatial overlap on the defined APE. Thirty additional studies had been conducted outside the APE but within the 1-mile buffer. No previously recorded cultural resources were located within the APE, but two previously recorded built environment resources and one historic-era resource were located outside the APE but within the 1-mile buffer.

To meet project timeframes, if you would like to be a consulting party on this project, please let us know of your interest within 30 days. If you have any initial concerns with the impact of the project on religious or cultural properties, please note them in your response.

Enclosed are maps that show the project location and APE. The project is located at the southeast corner of the Berry Street and Mercury Lane intersection in the City of Brea, CA, 92821. The project is proposed on Assessor's Parcel Number 296-141-05 and is bounded by Mercury Lane to the north, office buildings to the east and south, and South Berry Street to the west in the City of Brea, California. The project site comprises undeveloped land characterized by exposed soils and limited vegetative cover, and it exhibits observable evidence of prior grading and ground disturbance There are no existing structures or paved surfaces within the APE.

The Project proposes to construct a 5-story, affordable housing development for seniors with tuck-under parking. The "L"-shaped development would consist of a single building containing 85 units, including 68 one-bedroom units and 17 two-bedroom units. One two-bedroom unit would be reserved for an onsite manager. Of the 84 available rental units, 74 apartments, including 58 one-bedroom and 16 two-bedroom units, would be income-restricted to households earning between 30 to 80 percent of the Area Median Income (AMI) for Orange County, and 10 one-bedroom units would be Permanent Supportive Housing (PSH) units reserved for individuals experiencing homelessness.

The ground floor would contain amenity spaces and building support spaces, including a community game room, fitness room, laundry room, lobby and leasing office, mail room, bike room, outdoor patio space, maintenance room, utility closet, storage, and trash room. The residential units would be located on floors 2 through 5 and tuck-under parking would be provided. A rooftop deck would also be located on the fifth floor. A total of 63 parking spaces would be provided, including 24 tuck-under spaces and 39 spaces in a surface parking lot. Vehicle ingress and egress would be provided via a driveway on Mercury Lane at the northeastern corner of the site.

The building would feature a modern architectural design intended to complement the surrounding neighborhood. The project would be designed to create a prominent visual and functional landmark at the intersection of Berry Street/Mercury Lane. The façade of the proposed development utilizes a combination of materials and textures to create a contemporary appearance that connects it to the historical fabric of the area. The upper floors of the development would be articulated with a variety of window styles and balcony spaces, facilitating visual interest.

GABRIELEÑO BAND OF MISSION INDIANS - KIZH NATION
Historically known as The San Gabriel Band of Mission Indians recognized by the State of California as the aboriginal tribe of the Los Angeles basin

Friday, March 20, 2026

Subject: Formal Request for Government-to-Government Consultation – Southeast Corner of Berry St/Mercury Lane, Brea, CA

Dear Frank Padilla,

On behalf of the Gabrieleño Band of Mission Indians Kizh Nation, I am formally requesting government-to-government consultation with the County of Orange pursuant to Section 106 of the National Historic Preservation Act (NHPA), 36 CFR Part 800. Our Tribe has *ancestral* and cultural ties to the area affected by the proposed Southeast Corner of Berry St/Mercury Lane, Brea, CA Project**,** and we seek to engage in meaningful consultation to ensure the proper identification, protection, and preservation of Tribal Cultural Resources (TCRs), sacred sites, and traditional cultural properties (TCPs) within our traditional territory.

As required under Section 106, federal agencies must consult with Tribes when a federally funded, licensed, or permitted project has the potential to affect historic properties of religious or cultural significance to Tribes. We request the opportunity to consult regarding:

1. A full project description, including anticipated ground-disturbing activities.
2. Copies of cultural resource assessments, environmental studies, and prior archaeological reports conducted in the project area.
3. A meeting to initiate formal consultation within the required timeframe to discuss potential impacts and mitigation measures.

Please confirm receipt of this request and provide available dates to initiate consultation. For scheduling or further discussion, I can be reached at admin@gabrielenoindians.org or 1(844)- 390-0787. We appreciate your cooperation and look forward to engaging in this important consultation process.

Best regards,

Hereditary Chief Andrew Salas

Andrew Salas, Chairman | Nadine Salas, Vice-Chairman | Dr. Christina Swindall Martinez, Secretary
Mike Jesus Lemos, Treasurer I | Samantha Lemos, Treasurer II | Richard Gradias, Chairman of the council of Elders

Good afternoon,
We are in receipt of your project and we do have concerns regarding it's proximity to a known village.

We would like to consult,
Christina

Dear Christina Conley,

The County of Orange (County) is considering funding the project listed above with federal funds from the U.S. Department of Housing and Urban Development (HUD). Under HUD regulation 24 CFR 58.4, the County has assumed HUD's environmental review responsibilities for the project, including tribal consultation related to historic properties. Historic properties include archaeological sites, burial grounds, sacred landscapes or features, ceremonial areas, traditional cultural places and landscapes, plant and animal communities, and buildings and structures with significant tribal association.

The County is conducting a review of this project to comply with Section 106 of the National Historic Preservation Act and its implementing regulations 36 CFR Part 800. We would like to invite you to be a consulting party in this review to help identify historic properties in the project area of potential effects (APE) that may have religious and cultural significance to your tribe, and if such properties exist, to help assess how the project might affect them. If the project might have an adverse effect, we would like to discuss possible ways to avoid, minimize, or mitigate potential adverse effects.

The California Native American Heritage Commission was contacted on December 29, 2025, and a response, received on January 13, 2026, indicated that the project APE is negative for Native American cultural resources. A records search was conducted on January 13, 2026, at the South Central Coastal Information Center of the California Historic Resources Information System at California State University, Fullerton for the project APE and a surrounding1-mile buffer. The records search identified that the project site has been previously subjected to archaeological survey efforts documented in the sole technical study with spatial overlap on the defined APE. Thirty additional studies had been conducted outside the APE but within the 1-mile buffer. No previously recorded cultural resources were located within the APE, but two previously recorded built environment resources and one historic-era resource were located outside the APE but within the 1-mile buffer.

To meet project timeframes, if you would like to be a consulting party on this project,

please let us know of your interest within 30 days. If you have any initial concerns with the impact of the project on religious or cultural properties, please note them in your response.

Enclosed are maps that show the project location and APE. The project is located at the southeast corner of the Berry Street and Mercury Lane intersection in the City of Brea, CA, 92821. The project is proposed on Assessor's Parcel Number 296-141-05 and is bounded by Mercury Lane to the north, office buildings to the east and south, and South Berry Street to the west in the City of Brea, California. The project site comprises undeveloped land characterized by exposed soils and limited vegetative cover, and it exhibits observable evidence of prior grading and ground disturbance There are no existing structures or paved surfaces within the APE.

The Project proposes to construct a 5-story, affordable housing development for seniors with tuck-under parking. The "L"-shaped development would consist of a single building containing 85 units, including 68 one-bedroom units and 17 two-bedroom units. One two-bedroom unit would be reserved for an onsite manager. Of the 84 available rental units, 74 apartments, including 58 one-bedroom and 16 two-bedroom units, would be income-restricted to households earning between 30 to 80 percent of the Area Median Income (AMI) for Orange County, and 10 one-bedroom units would be Permanent Supportive Housing (PSH) units reserved for individuals experiencing homelessness.

The ground floor would contain amenity spaces and building support spaces, including a community game room, fitness room, laundry room, lobby and leasing office, mail room, bike room, outdoor patio space, maintenance room, utility closet, storage, and trash room. The residential units would be located on floors 2 through 5 and tuck-under parking would be provided. A rooftop deck would also be located on the fifth floor. A total of 63 parking spaces would be provided, including 24 tuck-under spaces and 39 spaces in a surface parking lot. Vehicle ingress and egress would be provided via a driveway on Mercury Lane at the northeastern corner of the site.

The building would feature a modern architectural design intended to complement the surrounding neighborhood. The project would be designed to create a prominent visual and functional landmark at the intersection of Berry Street/Mercury Lane. The façade of the proposed development utilizes a combination of materials and textures to create a contemporary appearance that connects it to the historical fabric of the area. The upper floors of the development would be articulated with a variety of window styles and balcony spaces, facilitating visual interest.

More information on the Section 106 review process is available at: http://www.onecpd.info/environmental-review/historic-preservation/.

HUD's process for tribal consultation under Section 106 is described in a Notice available at: https://www.onecpd.info/resource/2448/notice-cpd-12-006-tribal-consultation-under-24-cfr-part-58.

If you do not wish to consult on this project, please inform us. If you do wish to consult, please include the name and contact information for the tribe's principal representative in the consultation in your reply. Thank you very much. We value your assistance and look forward to consulting further if there are historic properties of religious and cultural significance to your tribe that may be affected by this project.

Respectfully yours,

Primary Report Authors: This report was prepared by Architectural Historian Katie Ahmanson, MHC, who meets the Secretary of the Interior's Professional Qualification Standards in architectural history.

Report Contributions: The report was also prepared with contributions from Architectural Historian Andrea Dumovich Heywood, MHC, who conducted the field survey and evaluations of significance. Senior Architectural Historian Patricia Ambacher, MA, contributed to the report and provided a senior-level review. Both Andrea Dumovich Heywood and Patricia Ambacher meet the Secretary of the Interior's Professional Qualifications Standards for architectural history and history.

Team Support: Kristin Arakawa, GIS Analyst, managed the geographic information system data and created the figures in the report.

Intended Use: This report is intended for the client's and its representatives' exclusive use. Based on the results of Dudek's investigation, it contains professional conclusions and recommendations concerning the potential for project-related impacts to cultural resources. It should not be considered to constitute project clearance with regard to the treatment of cultural resources or permission to proceed with the project described in lieu of review by the appropriate reviewing or permitting agency. This report should be submitted to the appropriate federal, state, and local review agencies for their comments prior to the commencement of the Project.

INTENTIONALLY LEFT BLANK

Executive Summary

Orange County Housing and Community Development retained Dudek to prepare a built environment inventory and evaluation report for the proposed Mercury Affordable Senior Apartments Project (Project) in Orange County, California. The proposed Project site consists of an approximately 1.01-acre undeveloped parcel at the southeast corner of the intersection of South Berry Street and Mercury Lane in Brea, California (Figure 1, Project Location). The Project would involve construction of a new 85-unit affordable rental apartment complex for seniors. The units would be provided in a 5-story, 83,850-square-foot, "L"-shaped building with tuck-under parking. The ground floor would contain amenity spaces and building support spaces, including a community game room, fitness room, laundry room, lobby and leasing office, mail room, bike room, outdoor patio space, maintenance room, utility closet, storage room, and trash room. The residential units would be located on floors 2 through 5 and would comprise 68 one-bedroom and 17 two-bedroom units. A rooftop deck would also be located on the fifth floor. A total of 63 parking spaces would be provided, including 24 tuck-under spaces and 39 spaces in a surface parking lot. Vehicle entrance and exit would be provided via a driveway on Mercury Lane at the northeast corner of the site.

Pursuant to the California Environmental Quality Act, an environmental impact report was prepared in 2019 for a previously proposed project at the Project site, referred to as the Mercury Lane Residential Project. However, a built environment inventory and evaluation report was never completed. At this time, an updated analysis is required for the currently proposed Project. The Project is being considered for federal funds administered by the U.S. Department of Housing and Community Development and is therefore subject to compliance with the National Environmental Policy Act and other related federal and state environmental laws through the Department of Housing and Development's environmental review procedures at 24 Code of Federal Regulations Part 58. The County of Orange is the Responsible Entity. The purpose of this report is to determine if the Project would adversely affect historic properties pursuant to Section 106 of the National Historic Preservation Act (Section 106).

The preparation of this report included defining the area of potential effects (APE), a review of the records from the California Historical Resources Information System, an intensive-level survey of the APE for built environment resources of historic age (built in or before 1981), building development and archival research, the development of appropriate historical contexts, and recordation and evaluation of five properties using the evaluation criteria for the National Register of Historic Places (NRHP).

Map IDs 1, 2, 3, 4, and 5 are recommended not eligible for the NRHP because they do not meet the evaluation criteria due to a lack of significant associations and architectural merit. The recommended California Historical Resource Status Code for the properties is 6Z. None of the five properties should be considered historic properties under Section 106.

The Section 106 finding for the proposed Project is No Historic Properties Affected.

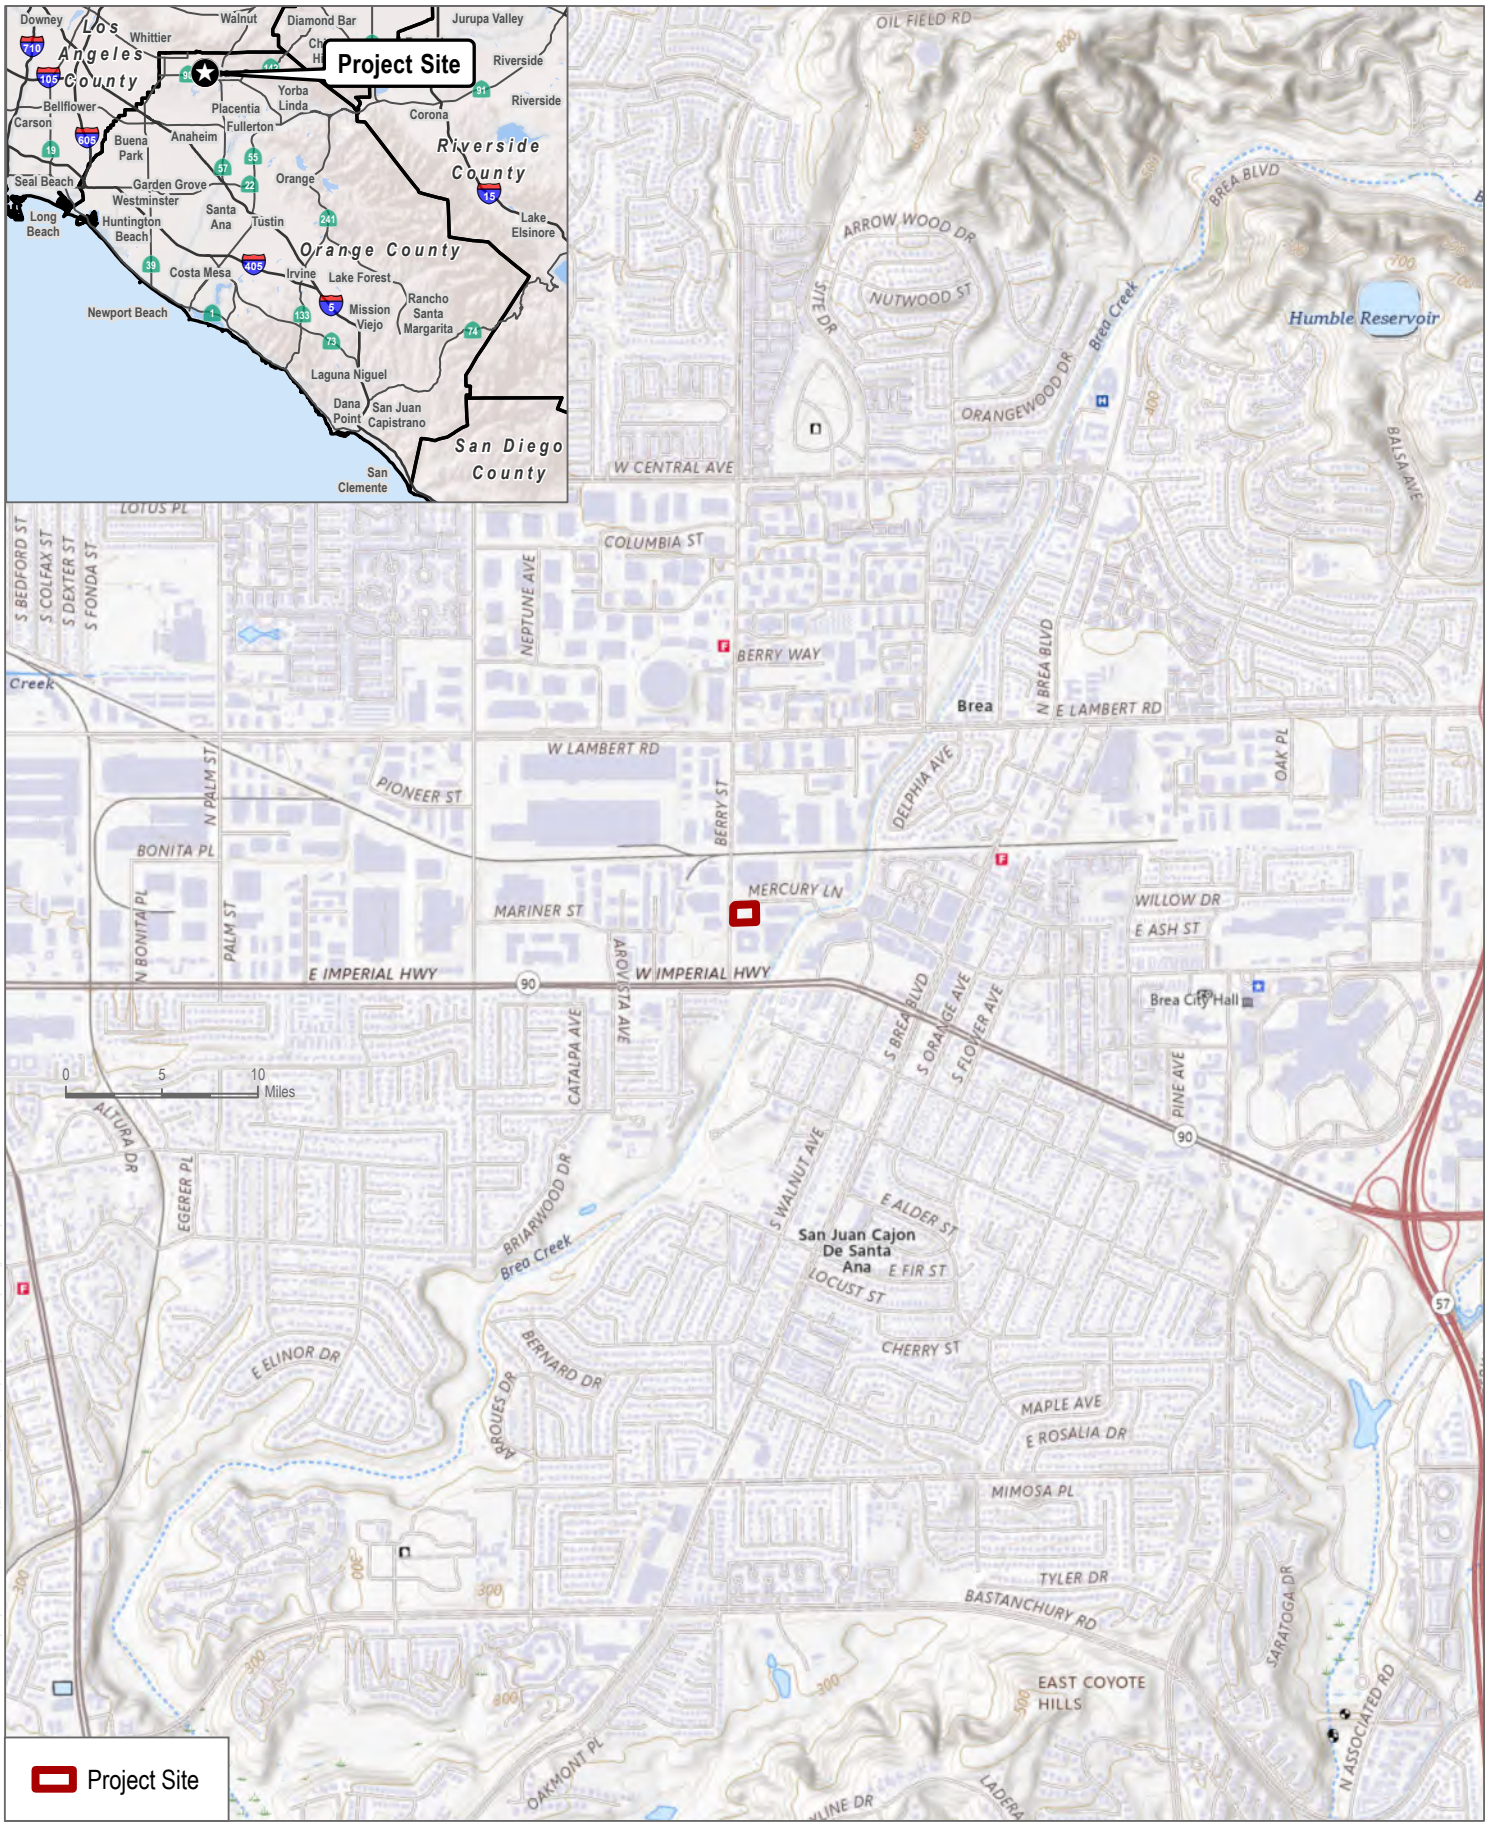
1 Introduction

This report documents the identification and evaluation of built environment cultural resources within or adjacent to the proposed Mercury Affordable Senior Apartments Project (Project) to comply with Section 106 of the National Register of Historic Place (Section 106). This report includes the following components: (1) Project overview and the regulatory context; (2) background research, including a California Historical Resources Information System (CHRIS) records search summary, a review of historical sources, and survey methodology; (3) historic contexts for the Project area; (4) the results of the survey and evaluations; (5) findings; (6) conclusions and recommendations; and (7) references cited.

1.1 Project Location

The Project is within Section 10 of Township 3 South and Range 10 West of the La Habra, California U.S Geological Survey 7.5-minute Series Quadrangle Map (Figure 1, Project Location). The Project is located at an undeveloped 1.01-acre site at the southeast corner of the intersection of South Berry Street and Mercury Lane in the City of Brea, California (City or Brea).

The Project site is in a commercial and industrial area just west of the mixed-use development known as Brea Downtown. Surrounding land uses include a mix of light and general industrial operations, commercial offices, and manufacturing facilities. To the south and southeast are large office buildings and associated parking structures. To the east is a commercial manufacturing facility. North of the site, across Mercury Lane, are additional light industrial businesses, including manufacturers and product distributors. To the northeast is a business complex with a variety of retail and industrial tenants. To the northwest, across South Berry Street, are additional industrial and commercial service providers. A railroad spur is located approximately 0.1 miles north of the site, although this segment is no longer active. Freight activity is minimal and limited to occasional deliveries to nearby businesses. The site is connected to the nearby downtown area via the Mercury Lane Bridge, which spans the Brea Canyon Channel and trail system. This bridge links the site to public parking and pedestrian pathways, with downtown amenities located approximately 580 feet away.



1.2 Project Description

The Project would involve the construction of a 5-story, 83,850-square-foot, affordable housing development for seniors with tuck-under parking. The “L”-shaped development would consist of a single building containing 85 units, including 68 one-bedroom units (each unit = 595 square feet) and 17 two-bedroom units (each unit = 800 square feet). One two-bedroom unit would be reserved for an on-site manager. Of the 84 available rental units, 74 apartments, including 58 one-bedroom and 16 two-bedroom units, would be income-restricted to households earning between 30% to 80% of the area median income for Orange County, and 10 one-bedroom units would be permanent supportive housing units reserved for individuals experiencing homelessness.

The ground floor would contain amenity spaces and building support spaces, including a community game room, fitness room, laundry room, lobby and leasing office, mail room, bike room, outdoor patio space, maintenance room, utility closet, storage room, and trash room. The residential units would be located on floors 2 through 5, and tuck-under parking would be provided. A rooftop deck would also be located on the fifth floor. A total of 63 parking

spaces would be provided, including 24 tuck-under spaces and 39 spaces in a surface parking lot. Vehicle entrance and exit would be provided via a driveway on Mercury Lane at the northeast corner of the site.

The building would feature a modern architectural design intended to complement the surrounding neighborhood. The Project would be designed to create a prominent visual and functional landmark at the intersection of South Berry Street/Mercury Lane. The façade of the proposed development uses a combination of materials and textures to create a contemporary appearance that connects it to the existing fabric of adjacent buildings. The upper floors of the development would be articulated with a variety of window styles and balcony spaces, facilitating visual interest.

1.3 Regulatory Setting

The following sections provide a brief overview of the federal regulatory framework in which historic properties are identified and evaluated.

1.3.1 Federal

National Register of Historic Places

The National Register of Historic Places (NRHP) is the United States' official list of districts, sites, buildings, structures, and objects worthy of preservation. Overseen by the National Park Service, under the U.S. Department of the Interior, the NRHP was authorized under the National Register of Historic Places, as amended. Its listings encompass all National Historic Landmarks, as well as historic areas administered by the National Park Service.

The NRHP criteria for evaluation (36 Code of Federal Regulations [CFR] Section 60.4) considers the quality of significance in American history, architecture, archaeology, engineering, and culture present in districts, sites, buildings, structures, and objects that meet one of the following criteria:

A. Are associated with events that have made a significant contribution to the broad patterns of our history; or
B. Are associated with the lives of persons significant in our past; or
C. Embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
D. Have yielded or may be likely to yield, information important in prehistory or history.

To be listed in the NRHP, a property must not only be shown to be significant under one of the NRHP criteria, but it also must have integrity. Integrity is the ability of a property to convey its significance. Because the concept of integrity is based on significance, the assessment of a property's integrity can only proceed after its significance has been fully established. The assessment of integrity requires consideration under the following seven aspects: location, design, materials, workmanship, setting, feeling, and association. To retain integrity, a property will always possess several, and generally most, of these aspects (NPS 1997:44).

Certain properties are not typically considered for listing in the NRHP: religious properties, moved properties, birthplaces and graves, cemeteries, reconstructed properties, commemorative properties, and properties achieving significance within the past 50 years. These properties may be eligible for listing in the NRHP if the property meets one of the four criteria listed above and if the property also meets the appropriate Criteria Consideration.

Section 106 of the National Historic Preservation Act

Section 106 requires federal agencies to take into account the effects of their undertakings on historic properties. The Section 106 process consists of four principal steps: (1) initiation of the Section 106 process, which includes identifying and initiating consultation with Native American tribes, local governments, and other interested parties;

(2) identification of historic properties; (3) assessment of adverse effects; and (4) delineation of stipulations to resolve adverse effects in an agreement document.

A historic property is defined as "any prehistoric or historic district, site, building, structure, or object included in, or eligible for inclusion in, the NRHP maintained by the Secretary of the Interior. This term includes artifacts, records, and remains that are related to and located within such properties. The term includes properties of traditional religious and cultural importance to an Indian tribe or Native Hawaiian organization and that meet the NRHP criteria" (36 CFR Sections 800.16[i][1]).

Effects on historic properties under Section 106 are defined in the assessment of adverse effects in 36 CFR Sections 800.5(a)(1):

> An adverse effect is found when an undertaking may alter, directly or indirectly, any of the characteristics of a historic property that qualify the property for inclusion in the National Register [NRHP] in a manner that would diminish the integrity of the property's location, design, setting, materials, workmanship, feeling, or association. Consideration shall be given to all qualifying characteristics of a historic property, including those that may have been identified subsequent to the original evaluation of the property's eligibility for the National Register [NRHP]. Adverse effects may include reasonably foreseeable effects caused by the undertaking that may occur later in time, be farther removed in distance or be cumulative.

Adverse effects on historic properties are clearly defined and include but are not limited to (36 CFR 800.5 [a][2]):

I. Physical destruction of or damage to all or part of the property;
II. Alteration of a property, including restoration, rehabilitation, repair, maintenance, stabilization, hazardous material remediation and provision of handicapped access, that is not consistent with the Secretary's Standards for the Treatment of Historic Properties (36 CFR Part 68) and applicable guidelines;
III. Removal of the property from its historic location;
IV. Change of the character of the property's use or of physical features within the property's setting that contributes to its historic significance;
V. Introduction of visual, atmospheric or audible elements that diminish the integrity of the property's significant historic features;
VI. Neglect of a property which causes its deterioration, except where such neglect and deterioration are recognized qualities of a property of religious and cultural significance to an Indian tribe or Native Hawaiian organization; and
VII. Transfer, lease, or sale of property out of Federal ownership or control without adequate and legally enforceable restrictions or conditions to ensure long-term preservation of the property's historic significance.

To comply with Section 106, the criteria of adverse effect are applied to historic properties, if any exist in the area of potential effects (APE), pursuant to 36 CFR Sections 800.5(a)(1). If no historic properties are identified in the APE, a finding of "no historic properties affected" will be made for the proposed project. If there are historic properties in the APE, application of the criteria of adverse effect will result in project-related findings of either "no

adverse effect" or "adverse effect," as described above. A finding of no adverse effect may be appropriate when the undertaking's effects do not meet the thresholds in the criteria of adverse effect, in certain cases when the undertaking is modified to avoid or lessen effects, or if conditions were imposed to ensure review of rehabilitation plans for conformance with the Secretary of the Interior's Standards for the Treatment of Historic Properties (codified in 36 CFR Part 68).

If adverse effects findings were expected to result from the proposed project, mitigation would be required, as feasible, and resolution of those adverse effects by consultation may occur to avoid, minimize, or mitigate adverse effects on historic properties pursuant to 36 CFR Part 800.6(a).

1.4 Area of Potential Effects

The APE encompasses the geographic areas where the Project may directly or indirectly cause alterations in the character or use of historic properties. Delineation of the APE for built environment resources (indirect APE) considered the proposed Project activities in conjunction with historic-era built resources 45 years of age or older (those built in or prior to 1981) that may sustain impacts due to the construction or operation of the Project (Figure 2, Area of Potential Effects for Built Environment Resources). The APE considered areas of indirect physical effect that encompass five adjacent historic-age properties that face the Project site. The other two adjacent parcels at 555 West Imperial Highway (Assessor's Parcel Number [APN] 296-143-04) (1982) and 591 West Imperial Highway (APN 296-143-04) (circa [ca.] 2009) were not included in the APE because they are not of historic age. Table 1 below provides a list of the five properties located within the APE for built environment resources.

Table 1. Properties Located within the Area of Potential Effects

2 Literature Review, Background Research, and Methods

This section provides the results of the CHRIS records search conducted at the South Central Coastal Information Center (SCCIC), a summary of archival research methods and additional records reviewed, and the field survey methodology used to document built environment resources in the APE.

2.1 California Historical Resources Information System Records Search

On January 13, 2026, Dudek Archaeologist Brenda Rogers conducted a records search of the CHRIS at the SCCIC. The records search encompassed the Project APE and a 1.0-mile search radius. The purpose of the records search was to identify any previously recorded cultural resources in or adjacent to the Project APE and to identify previous studies in the Project vicinity. In addition to a review of previously prepared site records and reports, the records search included a review of historical maps of the Project APE, ethnographies, and the lists for the NRHP, California Register of Historical Resources (CRHR), California Historic Property Data File, California State Historical Landmarks, California Points of Historical Interest, and Archaeological Determinations of Eligibility.

Dudek architectural historians reviewed the SCCIC records to determine whether the implementation of the proposed Project would have the potential to impact any known or unknown built environment cultural resources. The results identified no previous cultural resources studies or previously recorded built environment resources in the APE. For the full results of the records search, including archaeological resource studies, see Dudek's 2026 Cultural Resources Constraints Analysis for the Mercury Brea Project, City of Brea, Orange County, California.

2.2 Additional Records Reviewed

The following sources provide additional information regarding the potential of built environment resources located within the indirect APE. This information was used to understand the history of the area and how the landscape has changed and developed over time.

2.2.1 Built Environment Resource Directory

The California Office of Historic Preservation (OHP) maintains the Built Environment Resource Directory (BERD), an inventory of built environment cultural resources processed through OHP's office. A February 9, 2026, search of the BERD for Orange County showed that none of the properties in the APE were listed.

2.2.2 Calisphere

Calisphere provides access to 2,000 collections contributed by more than 300 cultural heritage organizations in California, including universities, libraries, archives, museums, and historical societies. Dudek searched for subject properties' addresses and other keywords on Calisphere on February 9, 2026. The search did not result in relevant information pertaining to the Project area.

2.2.3 Online Archive of California

The Online Archive of California (OAC) provides free public access to detailed descriptions of primary resource collections maintained by more than 300 contributing institutions, including libraries, special collections, archives, historical societies, and museums throughout California, as well as collections maintained by the 10 University of California campuses. Dudek searched the OAC on February 9, 2026, and did not identify any relevant materials.

2.2.4 Orange County Assessor

Dudek searched the Orange County Assessor's online database for the subject properties on February 9, 2026. This data was used to properly identify information for the properties in the APE and identify property characteristics.

2.2.5 Orange County Land Insights

Dudek searched Orange County Land Insights, a geospatial service of the County of Orange, to review property information from the Orange County Public Works database for the subject properties on February 9, 2026. This data was used to date the subject properties (OCLI 2026).

2.2.6 Orange County Historical Society

Dudek reviewed the Orange County Historical Society's historic context statement. This information was used to prepare Section 3, Historic Context, and the statements of significance for historic-age properties documented on California Department of Parks and Recreation (DPR) 523 form sets.

2.2.7 City of Brea Clerk's Office

Dudek submitted a public records request to the city clerk for all building permits associated with Map IDs 1–4 on February 11, 2026, and another public records request for all building permits associated with Map ID 5 on February 19, 2026. The City responded to the first public records request on February 19, 2026, and sent Dudek digital building permits for Map IDs 1–4. The City responded to the second public request on February 24, 2026, and sent Dudek digital building permits for Map ID 5. Dudek reviewed all available permits in the preparation of the DPR 523 form sets for each subject property (Map IDs 1–5) in Appendix B, DPR Forms.

2.2.8 City of Brea Historic Resource Register

As part of the background research for this study, Dudek reviewed the City's Historic Resource Register. The inventory includes a list of properties and districts throughout Brea that have been determined significant according to the City's criteria for listing as a local landmark. The subject properties were not included in the City's inventory.

2.2.9 Historical Aerials

A review of historical aerial photographs was conducted as part of the archival research effort for the proposed Project. The aerial photographs provided a general idea of growth in the Project area and on the subject properties.

The aerials date to the years 1927, 1928, 1934, 1938, 1953, 1960, 1963, 1965, 1972, 1980, 1987, 1992-2000, 2003–2005, 2009, 2010, 2012, 2014, 2016, 2018, 2020, and 2022 (UCSB 2026; NETR 2026a).

2.2.10 Historical Maps

U.S. Geological Survey topographic maps were examined to determine the growth in the area and how the properties developed over time. The maps date to the years 1896, 1899, 1901, 1906, 1912, 1922, 1927, 1932, 1935, 1941, 1944, 1952, 1955, 1961, 1965, 1969, 1975, 1977, 1982, 2012, 2015, 2018, 2020, and 2022 (NETR 2026b).

2.2.11 Historical Newspapers

Dudek reviewed historical newspapers from Newspapers.com covering Brea, Orange County, and the Southern California area to understand the development of Brea, the surrounding area, and the subject properties. These articles were used in the preparation of Section 3, Historic Context, and Section 4, Results of Identification and Evaluation Efforts.

2.3 Interested Party Correspondence

On February 16, 2026, Dudek sent an outreach letter and figure depicting the Project APE to the Orange County Historical Society, the Brea Museum & Historical Society, and Preserve Orange County. The letter provided a brief description of the proposed Project and requested information about cultural resources in or near the APE. On February 21, 2026, Dudek received a response from Linda Shay, PhD, of the Brea Museum & Historical Society, stating that they were not aware of any historical or cultural resources in the area. As of the date of this report, no other responses were received. Copies of the interested party correspondence are in Appendix A.

2.4 Field Survey

Dudek Architectural Historian Andrea Dumovich Heywood, MHC, conducted an intensive-level survey of the APE on February 11, 2026. The survey entailed documenting the exteriors of each property constructed in or before 1981 (45 years) with notes and photographs, specifically noting character-defining features, spatial relationships, observed alterations, and examining any historic landscape features on the properties.

INTENTIONALLY LEFT BLANK

3 Historic Context

This context provides an overview of the historic themes and architectural styles documented as part of this study.

3.1 Historical Overview of Orange County

The present-day territory of Orange County was established in 1769, about 35 miles southeast of Los Angeles. Initially, the area was inhabited by the Juaneño and Gabrielino bands of Native Americans, who dominated the area until the arrival of the Spanish. During the Spanish period in the 1770s, the area encompassed ranch lands surrounding Mission San Gabriel, in present-day Los Angeles County, and Mission San Juan Capistrano, which were used for grazing cattle, horses, and sheep. Members of the local tribes were gathered from the surrounding area and required to build the mission structure and work on the ranches to cultivate crops. In 1810, José Antonio Yorba and Juan Pablo Peralta were formally granted land south and east of the Santa Ana River that became known as Rancho Santiago de Santa Ana (OCHS 2025).

In 1822, the political situation changed, as Mexico won its independence from Spain, and the Orange County area became part of the Mexican Republic. Rancho Santiago de Santa Ana was subdivided into 44,000 acres of land grants for Mexican citizens to occupy and improve. By 1846, most of the land within present-day Orange County comprised ranches, and cattle ranching was the foundation of the local economy. By 1848, the United States had assumed formal control of California with the signing of the Treaty of Guadalupe-Hidalgo, and Anglo culture and society had been introduced to the region. After the discovery of gold in 1848, a massive influx of fortune seekers steadily flooded into California. When California became a state in 1850, Los Angeles County encompassed the present-day Orange County boundary. The sudden influx of new settlers spurred the growth of the local cattle industry until a series of droughts, floods, and diseases began to deplete the environmental resources needed for ranching. As a result, many of the ranches were sold to American settlers and developers during the late 1860s, along with the existing towns of Anaheim, Santa Ana, Tustin, Orange, Westminster, and Garden Grove, which had been founded during this period (OCHS 2025).

Agriculture emerged as a prosperous industry that benefited from the fertile soil and temperate climate in the region. The principal crops in Orange County consisted of wine and raisin grapes, wheat, barley, and corn. After the development of new irrigation systems in the 1870s, more orchards were planted in the area, including walnut, apricot, and orange. Additionally, the Southern Pacific Railroad (SPRR) built the first local railroad through the area in 1875, from Los Angeles to Anaheim, which was extended to Santa Ana in the following 2 years. The SPRR and the Santa Fe Railroad (SFRR), which arrived in 1885, aided in population growth and the transportation of local produce. The railroads continued to facilitate the expansion of the agricultural industry through the early twentieth century. Additionally, the SPRR and SFRR enabled speculative real estate development to intensify in the 1880s, as a wave of settlers arrived by train to Orange County and the greater Southern California region. Although several boomtowns ultimately dissolved, towns such as Fullerton, El Toro (present-day Lake Forest), and Buena Park remained (OCHS 2025).

Orange County was established on August 1, 1889, following a vote by residents of Anaheim and the surrounding area to divide Los Angeles County. Initially, the proposed boundary between Los Angeles and Orange Counties was the San Gabriel River, but the boundary was later moved south along Coyote Creek. Although northern cities such as Anaheim voted against this measure because they wanted to be located toward the center of the new

county, it passed with overwhelming support from the rest of the area, and Santa Ana was chosen as the county seat in 1889 (OCHS 2025).

By the 1930s, Orange County produced a sixth of the nation's Valencia orange crop, and the citrus industry continued to dominate the area's economy throughout the early twentieth century until the end of World War II. During the 1950s, the area's sparsely populated agricultural landscape rapidly transformed into a residential area. Orange County continued to develop during the post–World War II years, as a population boom in the Los Angeles area turned the region into a megalopolis. Automobile-oriented development increased access to the once rural area, and the development of the Santa Ana Freeway (Interstate 5) in the 1950s further bolstered the Orange County's growth. By 1963, Buena Park, Costa Mesa, La Palma, Garden Grove, Cypress, Westminster, Fountain Valley, Los Alamitos, San Juan Capistrano, and Villa Park were all incorporated cities within Orange County, and the County's population reached over 1 million residents. Planned communities in South Orange County were developed in the 1960s, including Irvine, Mission Viejo, Laguna Niguel, Aliso Viejo, Rancho Santa Margarita, and Ladera Ranch. The 1970s were a period of slower growth and development than the previous decades. Disneyland was established in 1955, becoming an international tourist destination, and Orange County's economy was dominated by tourism during this period. Additionally, the manufacturing and services industries expanded after World War II–era aerospace firms continued to grow in the area. Today, Orange County is primarily composed of residential properties and has over 3 million residents and 34 incorporated cities (OCHS 2025).

3.2 Historical Overview of Brea

Brea is located in Orange County and is named after the Spanish word for tar, which the foothills to the north were known to produce. During the Spanish period in the 1770s, the area was part of the lands under the jurisdiction of Rancho San Juan Cajon de Santa Ana. After Mexico won its independence from Spain in 1822 and the former mission system land was divided into private land grants, the land comprising present-day Brea was granted to Juan Pacifico Ontiveras by Governor Juan B. Alvarado in 1837 and was primarily used for cattle ranching (OCHS 2025; Robinson 1955:1, 15; City of Brea 2017:1). By 1848, America had assumed formal control of California with the Treaty of Guadalupe-Hidalgo and introduced Anglo culture and society. Ontiveras moved to Santa Barbara in 1850, and the ranch was divided and sold under the ranchero system (OCHS 2025; Robinson 1955:15). The area of present-day Brea was purchased by Abel Stearns in 1863. After a drought in 1868, Stearns sold cattle land but did not divide the area that would become Brea. Instead, the area was leased for sheep pasture. Wool became a staple in the local economy and was sold to eastern textile factories (City of Brea 2017:1). However, in 1894 Union Oil Company developed oil wells in the hills on 1,200 acres of land and found success by 1898, beginning an oil boom in the area. In response to the growth of the oil industry in the area, the Atchison, Topeka and Santa Fe Railway Company constructed the Olinda Branch from Fullerton to the oil fields in Brea in 1899. The Olinda Branch provided a fast new transit option for oil production in the area and opened access to oil industries throughout Southern California. Additionally, Pacific Electric had created a railway through Brea by 1911 for both passenger and freight business, to support the growth of the area (White 2010:5–6). During the 1910s, the area developed with small businesses and industries that supported oil production and became known as the Town of Brea. Historical topographic maps of the area show that Brea Boulevard, between present-day Imperial Highway to the north and Bastanchury Road to the south, was developed as a commercial and civic corridor (NETR 2026b). On February 23, 1917, the City was incorporated with a population of 752 residents (City of Brea 2026:1).

Development of Brea continued during the next three decades with the growth of the oil industry. By 1920, the City focused on improving its infrastructure, including its water system, streetlights, roads, and traffic signals. The

introduction of automobiles during this period facilitated the residential growth of the area by providing access to surrounding cities and industries. The Union Oil Company developed several residential neighborhoods near the city center to encourage residential settlement. Civic development followed, with the establishment of the Brea Olinda Unified School District and the first Orange County library branch (City of Brea 2017:3). Historical aerial photographs of the area show that, as oil production decreased in the 1940s, the citrus industry emerged as an economic leader. Access to nearby packing houses promoted the growth of the local citrus industry. Although residential development occurred around the city center, much of the surrounding land was used for oil production and agriculture until the late 1940s (City of Brea 2017:3; UCSB 2026).

After the end of World War II in 1945, a massive wave of migration and a building boom occurred throughout California and Orange County. In Brea, neighborhoods replaced sprawling ranches and orchards to accommodate the need for housing, and new businesses replaced the agricultural industry (City of Brea 2017:3). Residential and commercial development in the area continued into the 1950s and through the 1980s, and industrial development began primarily in the 1960s, with Brea appearing to be fully developed by the early 1990s (NETR 2026a). Development of the Orange Freeway (State Route 57) in the 1970s resulted in the growth of industrial parks and retail areas along major transit corridors in the 1970s and 1980s. The construction of the Brea Mall in 1977 and the Civic and Cultural Center in 1980 established Brea as an economic center. In the 1990s, the City initiated efforts to revitalize its downtown area. This process included community outreach, the relocation of historic homes, and the demolition of multiple blocks north of the intersection of Imperial Highway and Brea Boulevard. Public input allowed the City to plan around the needs of the community to provide essential amenities. As a result, the new downtown became a central entertainment and commercial destination (City of Brea 2017:4). Presently, Brea has a population of about 47,337 residents. The economy primarily comprises health care and social assistance professionals, manufacturing industries, and educational services (Data USA 2026).

3.3 Relevant Architectural Styles and Property Types

3.3.1 International Style (ca. 1925–Present)

The International style came to the United States in the 1930s after gaining popularity in Germany, Holland, and France through architects such as Walter Gropius and Ludwig Mies van der Rohe. The style spread in part because of Henry-Russell Hitchcock and Philip Johnson's 1932 book, titled The International Style: Architecture Since 1922, originally produced as the catalog for the New York Museum of Modern Art's exhibition showcasing the style. In their book, Hitchcock and Johnson introduced the term International and identified its three architectural principles as volume, regularity, and avoiding the application of ornament. These three principles are the baseline for the American International style (SFPD 2011:168; McAlester 2019:616–621).

The main difference between International style buildings and their predecessors was that International style buildings did not use exterior solid masonry for support. Instead, they often depended on a metal interior skeleton and used the curtain wall concept to clad walls in glass. This dependency on the metal frame resulted in windows hung in repeating patterns, which brought a further level of order to these already stripped-down buildings. Mies's designs specifically focused on perfection through mathematics, generating rectangular curtain wall designs displaying strong roots in the philosophy of the Bauhaus. This movement incorporated simple and precise designs and used mass-produced materials such as concrete, steel, and glass, paired with functionality in design (SFPD 2011: 168; McAlester 2019: 616–621).

The International style remained popular after World War II and through the 1970s, as the clean and geometric characteristics of the style provided efficient construction for large buildings. Over time architects began to diverge from the formulaic constraints inherent in the International style by including asymmetrical features such as cantilevered projections, although the style's easily replicable forms, materials, and minimal ornamentation continued to make it a popular choice for utilitarian and corporate buildings. In the 1960s, the style became the dominant style for skyscrapers, emphasizing volume over mass through the use of lightweight, mass-produced materials. By the 1970s, it was the most common style for corporate offices, with aspects of the style still being applied today (Hitchcock and Johnson 1995:33–37; Britannica 2020; McAlester 2019:620).

Characteristics of the International style:

- Vertical box
- Often set on "pilotis" or stilts, giving the appearance of floating
- Asymmetry
- Windows and wall surfaces on the same plane, providing the look of a taut skin
- Tinted and/or mirrored glass
- Repeating pattern of fenestration
- Flat roof structure, often with cantilevered projections
- Little decoration or ornamentation
- Open interior spaces
- Smooth wall surfaces, usually clad with stucco
- Large concrete expanses
- Use of modern materials such as metal windows, concrete, and steel

3.3.2 Mid-Century Modern (1945–1976)

Mid-Century Modern style reflected the International and Bauhaus styles popular in Europe in the early twentieth century. This style and its designers (e.g., Mies Van der Rohe and Gropius) were disrupted by World War II and moved to the United States. During World War II, the United States established itself as a burgeoning manufacturing and industrial leader, with incredible demand for modern buildings to reflect modern products. As a result, many industrial buildings were often "decorated boxes"—plain buildings with applied ornament that suited the era, to appear more modern without detracting from the importance of the activity inside the building. Following World War II, the United States had a focus on forward thinking, which sparked architectural movements like Mid-Century Modernism. Practitioners of the style were focused on the most cutting-edge materials and techniques. Architects throughout Southern California implemented design aesthetics made famous by early Modernists like Richard Neutra and Frank Lloyd Wright, who created a variety of modern architectural forms. Like other buildings of this era, Mid-Century Modern buildings had to be quickly assembled and use modern materials that could be mass produced. Both residences and offices designed in this style expressed their structure and materials, displayed large expanses of glass, and had an open interior plan (McAlester 2019:630–646; Morgan 2004).

Character-defining features include (McAlester 2019:630–646; Morgan 2004):

- One to two stories in height

- Low, boxy, horizontal proportions
- Simple geometric forms with a lack of exterior decoration
- Flat roofed without coping at roof line; flat roofs hidden behind parapets or cantilevered canopies
- Expressed post-and-beam construction in wood or steel
- Flat exterior walls with smooth sheathing, typically displaying whites, buffs, and pale pastel colors
- Mass-produced materials
- Simple windows (metal or wood) flush-mounted and clerestory
- Industrially plain doors
- Large window groupings

3.3.3 Manufacturing Building Typology (1887–1980)

Manufacturing during the late nineteenth century slowly increased along with the growth of Southern California as settlers moved to the region. Early industries often consisted of small-scale operations, such as flour mills and carpentry shops, and grew along with the needs of the increasing population. During the twentieth century, manufacturing embraced technological advancements that opened new markets for consumers, including electricity, automobiles, refrigeration, film, and aviation. Railroads facilitated the transportation of products across the state and nation, and by the 1910s, the Port of Los Angeles provided access to international markets. By 1929, California was ranked as the fifth-largest manufacturing industry in the nation after Michigan, Pennsylvania, Missouri, and Ohio, with Los Angeles leading the state's production and output. The fast growth of the population, availability of raw materials, and access to wider markets saw the increased development of manufacturing industries throughout Southern California (City of Los Angeles 2018:118).

Consumer culture drove the expansion of manufacturing industries, and creators of household items emerged as prominent manufacturers. The post–World War II era produced a variety of manufactured items using the increased power created from advancements in electricity production, such as hydroelectric production and diesel-burning generators. Industrial buildings were often purpose-built, utilitarian buildings designed in the styles popular during their construction. They were commonly one story in height with a large plan encompassing versatile open spaces used as workshops. Manufacturers of similar products were often located in the same area, with their brand names displayed on the exterior of the facility (City of Los Angeles 2018:119).

Character-defining features of manufacturing buildings include (City of Los Angeles 2018:121):

- One or more related utilitarian buildings
- May possess branding or company logos on the building exterior
- May retain distinctive equipment or building elements that reflect a particular kind of manufacturing process
- May have programmatic elements on the façade that denote what was manufactured at the plant
- Often designed in prevalent architectural styles of the period

4 Results of Identification and Evaluation Efforts

This section provides a summary of the survey results.

4.1 Survey Results

Five resources over 45 years of age at the time of survey were recorded and evaluated for historical significance. These resources are summarized below in Table 2. The five resources are described and evaluated below and are documented in detail on DPR 523 forms (located in Appendix B), which include historical significance evaluations for the CRHR and the City's Historic Resources Register.

Table 2. Properties Recorded in the Area of Potential Effects

Map ID	APN	Address	Year built	Property Type
1	296-101-01	111 South Berry Street	1967	Industrial
2	296-101-02	221 South Berry Street	1971	Industrial
3	296-101-04	233 South Berry Street	ca. 1971	Industrial
4	296-141-01	114 South Berry Street	ca. 1977	Industrial
5	296-141-12	550 Mercury Lane	ca. 1980	Industrial

Notes: APN = Assessor's Parcel Number; ca. = circa.

4.1.1 Map ID 1: 111 South Berry Street

Description

The subject property is a one-story, utilitarian manufacturing building, primarily rectangular in plan, that features elements of the Mid-Century Modern style (Photograph 1). It is sited on the west side of South Berry Street between West Lambert Road to the north and Imperial Highway to the south. The building is separated by function, with a small single-story office space volume along the southeast corner of the primary (east) elevation, and the manufacturing and warehouse functions occupying the remainder of the larger double-height volume along the rear (west) of the office space. The office space is clad with brick-veneer panels between metal-frame opaque glass panels and has a flat roof featuring metal coping and a parapet. The manufacturing volume is clad with smooth painted stucco and is topped by a flat roof with metal coping and a parapet. The main entrance to the office volume consists of a metal-frame, fully glazed, mirror glass storefront door recessed beneath a flat roof supported by a brick-veneer panel (Photograph 2). Fenestration on the office volume includes metal-sash fixed tinted windows. The manufacturing volume contains an extending rectangular tower with a vent on the roof, and fenestration includes a corrugated-metal roll-up industrial door (Photograph 3).

The building's office volume is a very modest example of the Mid-Century Modern style, with elements including its one-story height; low, boxy, horizontal proportions; simple geometric form with lack of exterior decoration; flat roofs; mass-produced materials; simple windows; and industrially plain doors. The building is set back from the street, with an asphalt-paved parking lot surrounding the south, primary (east), and a portion of the north elevation, and

an asphalt-paved service yard enclosed by a metal gate to the rear (west) of the building. Landscaping includes trees and small plantings in concrete planters along the parking lots. The historic property boundary is limited to the property's APN (296-101-01). The property is in good condition.

Evaluation

Under NRHP Criterion A, archival research did not find that 111 South Berry Street possesses a direct and important association with any events or pattern of events significant in local, state, or national history. The subject property was constructed in 1967 as a chemical manufacturing plant for Leffingwell Chemical Company, during a period of increased industrial development in Brea. After the decline of the oil and citrus industries in the area during the postwar period, residential, commercial, and industrial construction rapidly increased in the area. After the construction of the Orange Freeway in the 1970s, industrial and commercial development occurred along major transit corridors in the 1970s and 1980s. The subject property was thus constructed during the early years of Brea's industrial growth before the development of the Orange Freeway. However, National Register Bulletin: How to Apply the National Register Criteria for Evaluation states that "mere association with historic events or trends is not enough, in and of itself, to qualify under Criterion A: the property's specific association must be considered important as well" (NPS 1997:12). Although the subject property was part of this initial burst of industrial development in Brea during the 1960s, there is no indication that the construction of this specific building is associated with a pivotal movement in the history of the neighborhood or of Brea. It was neither the first nor the last of its type and was merely following a continuous pattern of industrial development that continued through the twentieth century. Additionally, research uncovered no information that the subject property is associated with manufacturing contributions that made a significant contribution to the broad patterns of history, as Leffingwell Chemical Company is not known to have contributed to the broad patterns of history in any way. Therefore, the subject property does not meet NRHP Criterion A and is recommended not eligible.

Under NRHP Criterion B, 111 South Berry Street lacks a significant association with the productive life of any person important in local, state, or national history. Research did not identify information that would indicate the subject property has an association with members of Leffingwell Chemical Company, Pace International, or Pacific Plastics Inc. that would rise to the threshold of significance required for eligibility. Archival research uncovered no person directly associated with the subject property or anyone known to have had direct involvement in the operation of the subject property. Development of the subject property was essentially a corporate undertaking representing the collective decisions of company leaders, rather than the distinctive contributions of any single individual. Due to a lack of identified significant associations with any persons important in our past, the subject property is recommended not eligible under NRHP Criterion B.

Under NRHP Criterion C, 111 South Berry Street does not embody the distinctive characteristics of a type, period, or method of construction that would represent a significant and distinguishable entity. The subject property is a utilitarian manufacturing building constructed in 1967 that displays elements of the Mid-Century Modern style on the office volume (e.g., its one-story height; low, boxy, horizontal proportions; simple geometric form with a lack of exterior decoration; flat roofs; mass-produced materials; simple windows; and industrially plain doors). Due to its geometric form, mass-produced materials, and minimal ornamentation, Mid-Century Modern design elements were commonly applied to modest utilitarian industrial buildings in the 1960s and 1970s. As an undistinguished example of the style, the subject property represents one of many such industrial buildings constructed in Brea and Orange County in the 1960s and 1970s, as well as in the larger region.

Additionally, the subject property does not appear to represent the work of a master architect or contractor. According to the original building permit for the property, the building was designed by architect Ray W. Johnson and constructed by contractor Secrest Construction Company. Johnson worked on industrial properties throughout Orange County from the 1950s to 1970s. None of the industrial buildings designed by Johnson appear to be

designated as historical resources either locally, statewide, or nationally. Not enough about Johnson's work is known to establish a context for the subject property. There is no indication that the subject property is notable within his body of work. However, because it is a common, purpose-built, industrial property type and style, it is unlikely that it would be considered notable within his body of work. Likewise, archival research failed to reveal any substantial information about Secrest Construction Company to indicate it is a notable construction company in Orange County. Furthermore, because it is a common, purpose-built building, this combined office and manufacturing building does not possess high artistic values and is not the product of an architect or builder attempting to articulate the design principles or aesthetics of a formal architectural style or substyle. The property appears to have been constructed through already well-documented and common construction techniques and methods and does not appear to possess high artistic values by articulating a particular concept of design to the extent that it expresses an aesthetic ideal. It does not contribute to the significance of a potential or existing historic district. Overall, the property lacks sufficient design and construction value to meet NRHP Criterion C and is recommended not eligible under this criterion.

Under NRHP Criterion D, the subject property is not significant as a source, or likely source, of important historical information, nor does it appear likely to yield important information about historical construction methods, materials, or technologies. This technology is well understood through contemporary trade journals and scientific monographs. As such, the subject property lacks significance under NRHP Criterion D.

Integrity Assessment

Integrity is the ability of a property to convey its significance. Because the concept of integrity is based on significance, the assessment of a property's integrity can only proceed after its significance has been fully established. Because the subject property lacks sufficient significance, an integrity analysis was considered immaterial for 111 South Berry Street.

4.1.2 Map ID 2: 221 South Berry Street

Description

The subject property is a one-story, double-height, manufacturing building, primarily rectangular in plan, that features the International style with elements of Mid-Century Modern style (Photograph 4). It is sited on the west side of the intersection of South Berry Street and Mercury Lane, between West Lambert Road to the north and Imperial Highway to the south. The stucco-clad building features smooth stucco-clad panels with minimal design, including rounded corners, on the primary (east) elevation, and is topped by a flat roof with a parapet. A recessed main entrance centered on the primary (east) elevation contains a metal-frame, fully glazed, tinted-glass storefront door surrounded by metal-sash fixed windows (Photograph 5). No other fenestration was visible from the public right-of-way during the property survey. Only the primary (east) elevation and partial views of the north and south elevations were visible. The building displays character-defining features of the International style, including its vertical box form, tinted glass, repeating pattern of fenestration, flat roof, little decoration, stucco cladding, large concrete expanses, and use of modern materials. Likewise, it exhibits elements of the Mid-Century Modern style, such as its low and boxy horizontal proportions, expressed post-and-beam construction, and symmetry. The building is set back from the street with an asphalt-paved parking lot surrounding the primary (east) and north elevations. A driveway along the southern boundary of the property leads to the rear service yard along the rear (west) elevation. Chain-link fencing encases the northern, southern, and western borders of the property (Photograph 6).

Landscaping includes a grass lawn, a hedge, and trees along the parking lot fronting the primary (east) elevation. The historic property boundary is limited to the property's APN (296-101-02). The property is in good condition.

Evaluation

Under NRHP Criterion A, archival research did not find that 221 South Berry Street possesses a direct and important association with any events or pattern of events significant in local, state, or national history. The subject property was constructed in 1971 as an air conditioning and refrigeration products manufacturer during a period of increased industrial development in Brea. After the decline of the oil and citrus industries in the area during the postwar period, residential, commercial, and industrial construction rapidly increased. Construction of the Orange Freeway in the 1970s resulted in an increase in industrial and commercial development along major transit corridors throughout the 1980s. Although the subject property has an association with the industrial development of the area, it did not contribute in any significant way to that pattern of development. The subject property is representative of an industrial property constructed during the early 1970s. It was neither the first nor the last of its type and was merely following a continuous pattern of industrial development that continued through the twentieth century.

The subject property was constructed in 1971 as the West Coast headquarters for Russell Coil Company (Russell), which occupied it until about 2010. The company was founded in 1946 by Lewis Russell and appears to have been an innovative company within the refrigeration manufacturing industry (Russell 2026). However, there is no indication that the subject property is particularly significant within this industry, either regionally or nationwide. It was not the company's first facility nor its last. The first facility was located in Santa Fe Springs, California, and the company opened a manufacturing facility in Yuma, Arizona, in 1985, where it began operating its headquarters after leaving the subject property. Most of Russell's achievements in the refrigeration industry, such as its awards for product design between 2016 and 2021, took place after it departed from the subject property (Russell 2026). The subject property is not known to be directly associated with any events that have made a significant contribution to the history of Russell, Brea, California, or the United States. Therefore, the subject property does not meet NRHP Criterion A and is recommended not eligible.

Under NRHP Criterion B, 221 South Berry Street lacks a significant association with the productive life of any person important in local, state, or national history. Research did not identify information that would indicate the subject property has an association with members of Russell, Hill Phoenix Inc., or Pacific Plastics Inc. that would rise to the threshold of significance required for eligibility. Although executive vice president of Russell, Steve Balogh, was appointed the head of the subject property, he is not known to have had a direct involvement in the construction or operation of the subject property. Archival research uncovered no person directly associated with the subject property or anyone known to have had direct involvement in the construction or operation of the subject property. Development of the subject property was essentially a corporate undertaking representing the collective decisions of the company's leadership, rather than the distinctive contributions of any single individual. Due to a lack of identified significant associations with any persons important in our past, the subject property is recommended not eligible under NRHP Criterion B.

Under NRHP Criterion C, 221 South Berry Street does not embody the distinctive characteristics of a type, period, or method of construction that would represent a significant and distinguishable entity. The subject property is a modest and architecturally undistinguished example of a manufacturing building constructed in 1971 that displays the International style (e.g., its vertical box form, tinted glass, repeating pattern of fenestration, flat roof, little decoration, stucco cladding, large concrete expanses, and use of modern materials) with elements of the Mid-Century Modern style (e.g., its low and boxy horizontal proportions, expressed post-and-beam construction, and symmetry). Due to their geometric form, mass-produced materials, and minimal ornamentation, International style and Mid-Century Modern design elements were commonly applied to modest utilitarian industrial buildings in the 1960s and 1970s. As an undistinguished example of postwar modern design, the subject property represents one of many such industrial buildings constructed in Brea and Orange County in the 1970s.

The subject property was designed by Building Concepts Inc. and built by Don Koll Company Inc., both of which were both based in Irvine, California (AB 1972:32). Building Concepts Inc. primarily built industrial facilities and office complexes throughout Southern California, and often partnered with Don Koll Company Inc (AB 1971a:29; AB 1971b). By 1972, Don Koll Company Inc. had developed over 5 million square feet of industrial facilities and had become known for its industrial park projects. The subject property was built in 1971, before the development firm gained recognition from the White House as a leader in the real estate industry in 1977 (Koll 2026). Although Don Knoll Company Inc. achieved success as industrial real estate developers, research failed to reveal information demonstrating that the firm gained historical significance due to its association with the subject property. Likewise, there are other examples of Don Koll Company Inc.'s designs that appear to better represent the firm's work, including the John Wayne Airport (1964) and the Airport Business Center in Irvine (1968) (Koll 2026). The subject property is a common, purpose-built manufacturing building that does not possess high artistic values and appears to have been constructed through already well-documented and common construction techniques and methods. Nationwide Constructors Corporation built the tilt-up construction of the building with sculpted concrete, a technique often used for simple warehouses and industrial properties through the 1960s and 1970s (AB 1972:32). Additionally, the subject property does not contribute to the significance of a potential or existing historic district. Overall, the property lacks sufficient design and construction value to meet NRHP Criterion C and is recommended not eligible under this criterion.

Under NRHP Criterion D, the subject property is not significant as a source, or likely source, of important historical information, nor does it appear likely to yield important information about historic construction methods, materials, or technologies. This technology is well understood through contemporary trade journals and scientific monographs. As such, the subject property lacks significance under NRHP Criterion D.

Integrity Assessment

Integrity is the ability of a property to convey its significance. Because the concept of integrity is based on significance, the assessment of a property's integrity can only proceed after its significance has been fully established. Because the subject property lacks sufficient significance to meet any of the criteria for listing, an integrity analysis was considered immaterial for 221 South Berry Street.

4.1.3 Map ID 3: 233 South Berry Street

Description

The subject property is a one-story, utilitarian building, primarily rectangular in plan, that features elements of the Mid-Century Modern style (Photograph 7). It is sited on the west side of South Berry Street between West Lambert Road to the north and Imperial Highway to the south. The building is separated by function, with a small single-story administration volume along the primary (east) elevation and warehouse functions occupying the remainder of the larger double-height volume along the rear (west) of the administration space. The primary (east) elevation features a single-story stone-veneer-clad administration volume organized off-center to the south (Photograph 8). A set of partially glazed metal doors is recessed on the primary (east) elevation of the administration volume's main entrance beneath a wood-clad overhang displaying "Yorba Linda Electric, Inc." and accessed by either a concrete ramp or concrete steps with metal support rails. Two sets of full-length metal-sash fixed windows are located on the north and south corners of the primary (east) elevation of the main entrance. The warehouse volume is stucco clad and topped by a flat roof with a parapet. Fenestration on the warehouse volume includes a corrugated-metal roll-up industrial door on the primary (east), north, and south elevations (Photograph 9). The administration volume is a very modest example of the Mid-Century Modern style, with elements including its one-story height; low, boxy, horizontal proportions; simple geometric form with a lack of exterior decoration; flat roof; mass-produced materials; simple windows; and industrially plain doors. The building is set back from the street, with an asphalt-paved parking lot surrounding the primary (east) elevation and an asphalt-paved service yard enclosed by a metal gate along the north, south, and rear (west) elevations. Landscaping includes trees and small plantings in concrete planters along the edge of the parking lot. The historic property boundary is limited to the property's APN (296-101-04). The property is in good condition.

Evaluation

Under NRHP Criterion A, archival research did not find that 233 South Berry Street possesses a direct and important association with any events or pattern of events significant in local, state, or national history. The subject property was constructed in ca. 1971. Although the original occupant is unknown, it was likely developed as an industrial property, given the building's utilitarian design and current use. It was constructed during a period of increased industrial development in Brea in the 1970s. After the decline of the oil and citrus industries in the area during the post–World War II period, residential, commercial, and industrial construction rapidly increased in the area. Construction of the Orange Freeway in the 1970s resulted in an increase in industrial and commercial development along major transit corridors through the 1980s. Although the subject property has an association with the development of the area, it did not contribute in any significant way to that pattern of development. The subject property is a typical example of a utility building constructed during the early 1970s to serve the region's growing population. Post–World War II growth was an important trend both regionally and in California; however, this property did not contribute in any significant way to this pattern of development. It is also not known to be directly associated with events that have made a significant contribution to the history of Brea, Orange County, California, or the nation. Research also did not identify a significant historical event that occurred on the property. Therefore, the subject property does not meet NRHP Criterion A and is recommended not eligible.

Under NRHP Criterion B, 233 South Berry Street lacks a significant association with the productive life of any person important in local, state, or national history. Research did not identify information that would indicate the subject property has an association with members of Yorba Linda Electric Inc. that would rise to the threshold of significance required for eligibility. Archival research uncovered no person directly associated with the subject property or anyone known to have had direct involvement in the operation of the subject property. Due to a lack of identified significant

associations with any persons important in our past, the subject property is recommended not eligible under NRHP Criterion B.

Under NRHP Criterion C, 233 South Berry Street does not embody the distinctive characteristics of a type, period, or method of construction that would represent a significant and distinguishable entity. The subject property is a modest and architecturally undistinguished example of a utilitarian building constructed ca. 1971 that displays elements of the Mid-Century Modern style (e.g., its one-story height; low, boxy, horizontal proportions; simple geometric form with a lack of exterior decoration; flat roof; mass-produced materials; simple windows; and industrially plain doors). Due to its geometric form, mass-produced materials, and minimal ornamentation, Mid-Century Modern design elements were commonly applied to modest utilitarian industrial buildings in the 1970s. As an undistinguished example of the style, the subject property represents one of many such industrial buildings constructed in Brea and Orange County in the 1970s. Archival research did not identify an architect, designer, or builder. However, because it is a common, purpose-built building, this building does not possess high artistic values and is not the product of an architect or builder attempting to articulate the design principles or aesthetics of a formal architectural style or substyle. The property appears to have been constructed through already well-documented and common construction techniques and methods, and it does not appear to possess high artistic values by articulating a particular concept of design to the extent that it expresses an aesthetic ideal. It does not contribute to the significance of a potential or existing historic district. Overall, the property lacks sufficient design and construction value to meet NRHP Criterion C and is recommended not eligible under this criterion.

Under NRHP Criterion D, the subject property is not significant as a source, or likely source, of important historical information, nor does it appear likely to yield important information about historical construction methods, materials, or technologies. This technology is well understood through contemporary trade journals and scientific monographs. As such, the subject property lacks significance under NRHP Criterion D.

Integrity Assessment

Integrity is the ability of a property to convey its significance. Because the concept of integrity is based on significance, the assessment of a property's integrity can only proceed after its significance has been fully established. Because the subject property lacks sufficient significance, an integrity analysis was considered immaterial for 233 South Berry Street.

4.1.4 Map ID 4: 114 South Berry Street

Description

The subject property is a one-story, double-height, utilitarian manufacturing building, primarily rectangular in plan, that features elements of the International style (Photograph 10). It is sited on the east side of Berry Street between West Lambert Road to the north and Mercury Lane to the south. The building is separated by function, with an office space volume along the northwest corner of the primary (west) elevation, and the manufacturing and warehouse functions occupying the larger volume along the rear (east) of the office space. The office space is clad with smooth stucco and topped by a flat roof with a parapet. It features recessed fenestration beneath a tiered overhang, including a set of fully glazed storefront doors and metal-sash fixed windows on the primary (west) elevation and metal-sash fixed windows on the north and south elevations (Photograph 11). The office volume is a very modest example of the International style, displaying elements including asymmetry, repeating fenestration, a flat roof with

cantilevered projections, little ornamentation, stucco cladding, and large concrete expanses. Cladding on the manufacturing volume is a combination of stucco panels along the bottom third and concrete panels sculpted with vertical lines along the top three-quarters of the northwest and southwest corner of the building, and stucco cladding on the rest of the building. Likewise, it is topped by a flat roof with a parapet. Fenestration on the manufacturing volume includes a set of metal doors on the south elevation that are accessed by a concrete ramp with metal support rails, and corrugated-metal roll-up industrial doors on the rear (east) elevation (Photograph 12). The building is set back from the street, with an asphalt-paved parking lot surrounding the south elevation and an asphalt-paved service yard enclosed by a concrete masonry unit wall along the rear (east) of the building. Landscaping includes trees, grass lawns, and small plantings along the primary (west) elevation and south parking lot. The historic property boundary is limited to the property's APN (296-141-01). The property is in good condition.

Evaluation

Under NRHP Criterion A, archival research did not find that 114 South Berry Street possesses a direct and important association with any events or pattern of events significant in local, state, or national history. The subject property was constructed ca. 1977. Although the original occupant is unknown, it was likely developed as an industrial/manufacturing property, given the building's utilitarian design and current use. It was constructed during a period of increased industrial development in Brea in the late 1970s. After the decline of the oil and citrus industries in the area during the post-World War II period, residential, commercial, and industrial construction rapidly increased. Construction of the Orange Freeway in the 1970s resulted in an increase in industrial and commercial development along major transit corridors through the 1980s. Although the subject property has an association with the industrial development of the area, it did not contribute in any significant way to that pattern of development. The subject property is representative of a typical industrial property following a pattern of industrial development that continued through the twentieth century. There is no indication that the construction of this specific building is associated with a pivotal movement in the history of the neighborhood or Brea. Therefore, the subject property does not meet NRHP Criterion A and is recommended not eligible.

Under NRHP Criterion B, 114 South Berry Street lacks a significant association with the productive life of any person important in local, state, or national history. Archival research uncovered no person directly associated with the subject property or anyone known to have had direct involvement in the planning or operation of the subject property. Two occupants and two owners were identified between 2011 and 2026, including Blaine Convention Services (2011–2020), IDI Logistics (2021–2022), TAPB Properties LLC (2023–2024), and Dr. Squatch (2022-2026). Due to the lack of additional information, it is unlikely that these owners and occupants achieved individual significance within the history of Brea, Orange County, California, or the nation. Likewise, the majority of these owners and occupants were short term, so the length and nature of their associations with the property do not warrant listing. Because of a lack of identified significant associations with any persons important in our past, the subject property is recommended not eligible under NRHP Criterion B.

Under NRHP Criterion C, 114 South Berry Street does not embody the distinctive characteristics of a type, period, or method of construction that would represent a significant and distinguishable entity. The subject property is a modest and architecturally undistinguished example of a utilitarian manufacturing building constructed ca. 1977 that displays elements of the International style (e.g., its asymmetry, repeating fenestration, flat roof with cantilevered projections, little ornamentation, stucco cladding, and large concrete expanses). Due to its geometric form, mass-produced materials, and minimal ornamentation, International style design elements were commonly applied to modest utilitarian industrial buildings in the 1970s. As an undistinguished example of the style, the subject property represents one of many such industrial buildings constructed in Brea and Orange County in the 1970s. Archival research did not identify an architect, designer, or builder. However, because it is a common, purpose-built building, this combined office and manufacturing building does not possess high artistic values and is not the product of an architect or builder attempting to articulate the design principles or aesthetics of a formal architectural style or substyle. The property appears to have been constructed through already well-documented and common construction techniques and methods and does not appear to possess high artistic values by articulating a particular concept of design to the extent that it expresses an aesthetic ideal. It does not contribute to the significance of a potential or existing historic district. Overall, the property lacks sufficient design and construction value to meet NRHP Criterion C and is recommended not eligible under this criterion.

Under NRHP Criterion D, the subject property is not significant as a source, or likely source, of important historical information, nor does it appear likely to yield important information about historical construction methods, materials, or technologies. This technology is well understood through contemporary trade journals and scientific monographs. As such, the subject property lacks significance under NRHP Criterion D.

Integrity Assessment

Integrity is the ability of a property to convey its significance. Because the concept of integrity is based on significance, the assessment of a property's integrity can only proceed after its significance has been fully established. Because the subject property lacks sufficient significance, an integrity analysis was considered immaterial for 114 South Berry Street.

4.1.5 Map ID 5: 550 Mercury Lane

Description

The subject property at 550 Mercury Lane is a one-story, double-height utilitarian manufacturing building with a rectangular plan sited on the south side of Mercury Lane between South Berry Street to the west and the Brea Canyon Channel to the east (Photograph 13). The building is a tilt-up concrete building, mostly clad in smooth concrete with minimal scored vertical lines, with a flat roof and a slight parapet that wraps around the entire roof (Photograph 14). In 1984, a 140-foot by 112-foot addition was added to the west elevation of the building. The building's main entrance is located on the primary (north) elevation, situated toward the building's northeast corner. The main entrance is recessed behind the main concrete exterior, set back behind two narrow support columns clad in smooth concrete. The entrance area contains the majority of the building's fenestration, which is composed of a band of fixed, metal-frame windows that flank a single, fully glazed main entrance pedestrian door. T1-11 siding flanks the main entrance fenestration and spans its length above. The remaining elevations at the south, east, and west serve manufacturing functions, with loading bays, vehicular metal roll-down doors, and limited fenestration (Photograph 15).

The building is set back from the street, with its rear (south) elevation slightly below grade from Mercury Lane. An asphalt-paved parking lot enclosed by a metal fence and gate resides to the east. A concrete-paved service yard to the west and rear (south) of the building is accessed by a downward-sloping concrete driveway to the west of the building. Landscaping includes a strip of lawn with some trees and shrubs in front of the main entrance at the building's primary (north) elevation. Additional trees are planted along the parcel's north and west elevations. The historic property boundary is limited to the property's APN (296-141-12). The property is in good condition.

Photograph 14. View of the north and west elevations, looking southeast. Photograph taken 2/11/2026.

Source: Dudek, IMG_605

Photograph 15. View of the west elevation, looking southwest. Photograph taken 2/11/2026.

Source: Dudek, IMG_609

Evaluation

Under NRHP Criterion A, archival research did not find that 550 Mercury Lane possesses a direct and important association with any events or pattern of events significant in local, state, or national history. The subject property was constructed in ca. 1980. Although the original occupant is unknown, the subject property was likely developed as an industrial/manufacturing property for Recold, given the building's utilitarian design and current use and that Recold is the current occupant and has occupied the building since at least 1982. It was constructed during a period of increased industrial development in Brea. After the decline of the oil and citrus industries in the area during the post-World War II period, residential, commercial, and industrial construction rapidly increased in the area. After the construction of the Orange Freeway in the 1970s, industrial and commercial development occurred along major transit corridors in the 1970s and 1980s. Although the subject property has an association with the industrial development of the area, it did not contribute in any significant way to that pattern of development. The subject property is representative of a typical industrial property constructed during the early 1980s. It was neither the first nor the last of its type and was merely following a pattern of industrial development that continued through the twentieth century. There is no indication that the construction of this specific building is associated with a pivotal movement in the history of the neighborhood or Brea. Additionally, although the building was constructed as a manufacturing plant for Recold, a successful air conditioning manufacturing company, Recold was established long before the subject property was constructed, in 1932. The construction has no association with the company's initial development or growth and was built as one of several existing manufacturing plants at that time. Therefore, the subject property does not meet NRHP Criterion A and is recommended not eligible.

Under NRHP Criterion B, 550 Mercury Lane lacks a significant association with the productive life of any person important in local, state, or national history. Research did not identify information that would indicate the subject property has an association with Recold employees that would rise to the threshold of significance required for

eligibility. Archival research uncovered no information that H.T. (Hy) Jarvis, president and founder of Recold, was directly associated with the subject property. Construction of the subject property was essentially a corporate undertaking representing the collective decisions of the company's leadership, rather than the distinctive contributions of any single individual. Due to a lack of identified significant associations with any persons important in our past, the subject property is recommended not eligible under NRHP Criterion B.

Under NRHP Criterion C, 550 Mercury Lane does not embody the distinctive characteristics of a type, period, or method of construction that would represent a significant and distinguishable entity. The subject property is a modest and architecturally undistinguished example of a manufacturing building constructed in ca. 1980 that is utilitarian in style, built as a tilt-up concrete building, mostly clad in smooth concrete, with a flat roof and a slight parapet. As an undistinguished utilitarian building, the subject property represents one of many such industrial buildings constructed in Brea and Orange County in the 1980s. The original architect, designer and/or builder is unknown. Although building permit research identified architect/engineering firm Correia and Christian and contractor CB Construction as affiliated with the 1984 addition, no information was uncovered regarding either firm or group, and no person was identified with either Correia and Christian or CB Construction. Additionally, because it is a common, purpose-built building, the subject manufacturing building does not possess high artistic values and is not the product of an architect or builder attempting to articulate the design principles or aesthetics of a formal architectural style or substyle. The property was constructed through already well-documented and common tilt-up construction techniques and methods and does not appear to possess high artistic values by articulating a particular concept of design to the extent that it expresses an aesthetic ideal. It does not contribute to the significance of a potential or existing historic district. Overall, the property lacks sufficient design and construction value to meet NRHP Criterion C and is recommended not eligible under this criterion.

Under NRHP Criterion D, the subject property is not significant as a source, or likely source, of important historical information, nor does it appear likely to yield important information about historical construction methods, materials, or technologies. This technology is well understood through contemporary trade journals and scientific monographs. As such, the subject property lacks significance under NRHP Criterion D.

Integrity Assessment

Integrity is the ability of a property to convey its significance. Because the concept of integrity is based on significance, the assessment of a property's integrity can only proceed after its significance has been fully established. Because the subject property lacks sufficient significance, an integrity analysis was considered immaterial for 550 Mercury Lane.

INTENTIONALLY LEFT BLANK

5 Findings

As a result of a CHRIS records search, archival research, and an intensive-level field survey, five properties were identified within the APE. The subject properties are not currently listed in any national, state, or local registers. Dudek evaluated the five properties in the APE in accordance with Section 106 and found that Map IDs 1–5 did not meet the criteria for the NRHP and are not considered historic properties. The recommended California Historical Resource Status Code for Map IDs 1–5 is 6Z. A summary of the findings is provided in Table 3.

Table 3. Summary of Findings

Map ID	Address	Year Built	NRHP Eligibility	Assigned CHR Status Code
1	111 South Berry Street	1967	Not Eligible	6Z
2	221 South Berry Street	1971	Not Eligible	6Z
3	233 South Berry Street	ca. 1971	Not Eligible	6Z
4	114 South Berry Street	ca. 1977	Not Eligible	6Z
5	550 Mercury Lane	ca. 1980	Not Eligible	6Z

Notes: NRHP = National Register of Historic Places; CHR = California Historical Resources; 6Z=Found ineligible for NRHP, CRHR, or local designation through survey evaluation; ca. = circa.

INTENTIONALLY LEFT BLANK

6 Conclusions and Recommendations

This report concludes that the five properties, Map IDs 1–5, in the APE do not meet the criteria for listing on the NRHP and are recommended not eligible for listing on the NRHP. This report recommends a Section 106 finding of No Historic Properties Affected. As such, it is recommended that no further study is required.

To Whom it May Concern,

I am reaching out today on behalf of Dudek and Orange County Housing and Community Development to provide you with some information about the Mercury Affordable Senior Apartments Project. As part of the cultural resources study for the proposed project, Dudek is consulting all regional historical organizations to determine if there are any known historic or cultural resources that may be within the proposed project area. Please see the attached letter and map for more information about the nature and location of the project, and please feel free to contact me should you have questions or information regarding cultural or historical resources in this area.

Thank you,

Katie Ahmanson

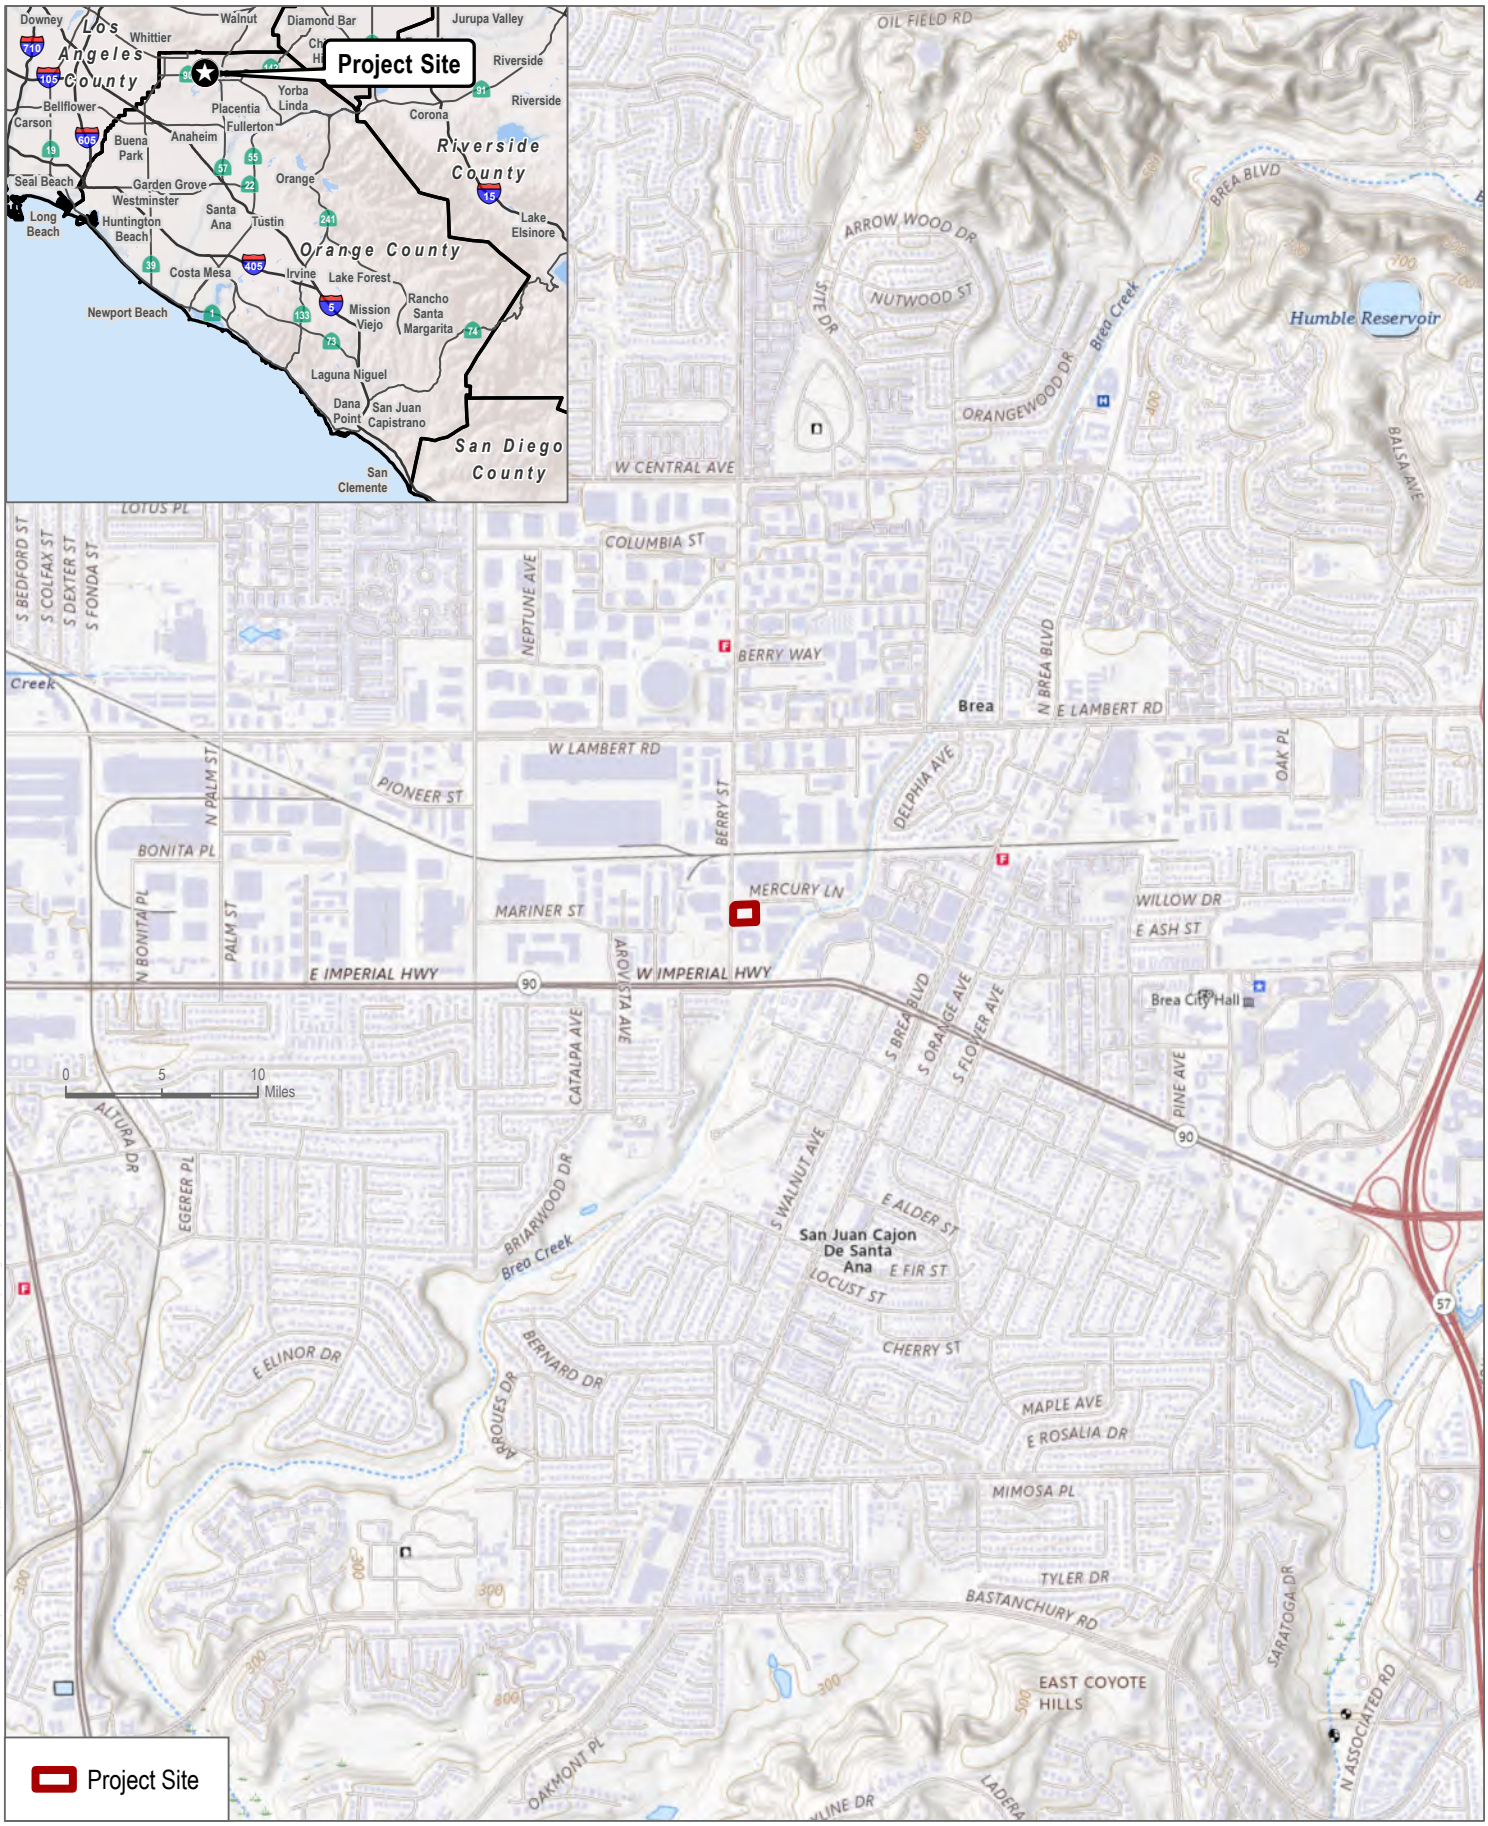
Subject: Mercury Affordable Senior Apartments Project, Brea, Orange County, California

To Whom it May Concern,

Orange County Housing and Community Development has retained Dudek to complete a Built Environment Inventory and Evaluation Report for the Mercury Affordable Senior Apartments Project (Project). The Proposed Project is in Brea, Orange County, California, on a commercial property located at 2110 Mercury Lane (Assessor Parcel Number [APN] 296-141-05) (see Figure 1 enclosed). The study will include the project site and four (4) adjacent parcels to address potential indirect effects because they contain built environment resources of historic age (built in or before 1981). Those parcels are 111 S. Berry Street (APN 296-101-01), 221 S. Berry Street (APN 296-101-02), 233 S. Berry Street (APN 296-101-04), and 114 S. Berry Street (APN 296-141-01).



The client is proposing to build a new 85-unit affordable rental apartment complex for seniors. The units would be provided in a 5-story, 83,850-square-foot, "L"-shaped building with tuck-under parking. The ground floor would contain amenity spaces and building support spaces, including a community game room, fitness room, laundry room, lobby and leasing office, mail room, bike room, outdoor patio space, maintenance room, utility closet, storage, and trash room. The residential units would be located on floors 2 through 5 and would be comprised of 68 one-bedroom and 17 two-bedroom units. A rooftop deck would also be located on the fifth floor. A total of 63 parking spaces would be provided, including 24 tuck-under spaces and 39 spaces in a surface parking lot. Vehicle ingress and egress would be provided via a driveway on Mercury Lane at the northeastern corner of the site.

As part of our study, we are consulting all regional historical organizations to determine if any known historic or cultural resources may be affected by the Project. Your efforts in this process will provide invaluable information for the proper identification and treatment of such resources. If you have any information regarding known cultural resources in the Proposed Project area, please feel free to contact me via phone or email (listed below). All comments, emails, or letters received will be included in the reports generated by this study. Thank you for your time regarding our request.

Sincerely,

Katie Ahmanson

Hello Ms. Ahmanson,
Thank you for your email. We have reviewed the documents, the map and the proposed plans submitted to the City of Brea and do not believe there are any historic or cultural resources in the area.
Good luck with your project.
Cordially,
Linda Shay, PhD

Description (cont.)

The manufacturing volume is clad with smooth painted stucco and is topped by a flat roof with metal coping and a parapet. The main entrance to the office volume consists of a metal frame, fully glazed, mirror glass storefront door recessed beneath a flat roof supported by a brick-veneer panel (Photograph 2). Fenestration on the office volume includes metal-sash fixed tinted windows. The manufacturing volume contains an extending rectangular tower with a vent on the roof, and the fenestration includes a corrugated-metal roll-up industrial door (Photograph 3).

The building's office volume is a very modest example of the Mid-Century Modern style, with elements including its one-story height, low, boxy, horizontal proportions, simple geometric form with lack of exterior decoration, flat roofs, mass-produced materials, simple windows, and industrially plain doors. The building is set back from the street with an asphalt-paved parking lot surrounding the south, primary (east), and a portion of the north elevation, and an asphalt-paved service yard enclosed by a metal gate to the rear (west) of the building. Landscaping includes trees and small plantings in concrete planters along the parking lots. The historic property boundary is limited to the property's APN (296-101-01). The property is in good condition.

Significance (cont.)

The following historic context is adapted from the *Built Environment Inventory and Evaluation Report for the Mercury Affordable Senior Apartments Project,* prepared in April 2026 by Dudek.

Historical Development of Orange County

The present-day territory of Orange County was established in 1769, about 35 miles southeast of Los Angeles. During the Spanish period in the 1770s, the area encompassed ranch lands surrounding Mission San Gabriel, in present-day Los Angeles County, and Mission San Juan Capistrano, which were used for grazing cattle, horses, and sheep. In 1810, José Antonio Yorba and Juan Pablo Peralta were formally granted land south and east of the Santa Ana River that became known as Rancho Santiago de Santa Ana (OCHS 2025).

In 1822, the political situation changed as Mexico won its independence from Spain, and the Orange County area became part of the Mexican Republic. Rancho Santiago de Santa Ana was subdivided into 44,000 acres of land grants for Mexican citizens to occupy and improve. By 1846, most of the land within present-day Orange County comprised ranches, and cattle ranching was the foundation of the local economy. When California became a state in 1850, Los Angeles County encompassed the present-day Orange County boundary. As a result, many of the ranches were sold to American settlers and developers during the late 1860s, along with the existing towns of Anaheim, Santa Ana, Tustin, Orange, Westminster, and Garden Grove, which had been founded during this period (OCHS 2025).

Agriculture emerged as a prosperous industry that benefited from the fertile soil and temperate climate in the region. After the development of new irrigation systems in the 1870s, more orchards were planted in the area, including walnut, apricot, and orange. Additionally, the Southern Pacific Railroad (SPRR) built the first local railroad through the area in 1875 from Los Angeles to Anaheim, which was extended to Santa Ana in the following two years. The SPRR and the Santa Fe Railroad (SFRR), which arrived in 1885, aided in population growth and the transportation of local produce. Additionally, the SPRR and SFRR enabled speculative real estate development to intensify in the 1880s as a wave of settlers arrived by train to Orange County and the greater Southern California region (OCHS 2025).

Orange County was established on August 1, 1889, following a vote by residents of Anaheim and the surrounding area to divide Los Angeles County. Initially, the proposed boundary between Los Angeles and Orange Counties was the San Gabriel River, but the boundary was later moved south along Coyote Creek. Although northern cities such as Anaheim voted against this measure because they wanted to be located toward the center of the new county, it passed with

overwhelming support from the rest of the area, and Santa Ana was chosen as the county seat in 1889 (OCHS 2025).

By the 1930s, Orange County produced a sixth of the nation's Valencia orange crop, and the citrus industry continued to dominate the area's economy throughout the early twentieth century until the end of World War II. During the 1950s, the area's sparsely populated agricultural landscape rapidly transformed into a residential area. Automobile-oriented development increased access to the once rural area, and the development of the Santa Ana Freeway (Interstate-5) in the 1950s further bolstered Orange County's growth. By 1963, Buena Park, Costa Mesa, La Palma, Garden Grove, Cypress, Westminster, Fountain Valley, Los Alamitos, San Juan Capistrano, and Villa Park all became incorporated cities within Orange County, and the County's population reached over one million residents. Planned communities in South Orange County were developed in the 1960s, including Irvine, Mission Viejo, Laguna Niguel, Aliso Viejo, Rancho Santa Margarita, and Ladera Ranch (OCHS 2025). Today, Orange County is primarily composed of residential properties and has over three million residents and 34 incorporated cities (OCHS 2025).

Historical Development of the City of Brea

Brea is located in Orange County and is named after the Spanish word for tar, which the foothills to the north were known to produce. During the Spanish period in the 1770s, the area was part of the lands under the jurisdiction of Rancho San Juan Cajon de Santa Ana. Private land grants were issued in the early 1820s, creating the rancho system of large agricultural estates. The land comprising present-day Brea was granted to Juan Pacifico Ontiveras by Governor Juan B. Alvarado in 1837 and was primarily used for cattle ranching. Ontiveras moved to Santa Barbara in 1850, and the ranch was divided and sold under the ranchero system (OCHS 2025; Robinson 1955: 1, 15; City of Brea 2017: 1).

The area of present-day Brea was purchased by Abel Stearns in 1863. After a drought in 1868, Stearns sold cattle land but did not divide the area that would become Brea. Instead, the area was leased for sheep pasture. Wool became a staple in the local economy and was sold to eastern textile factories (City of Brea 2017: 1). However, in 1895, Union Oil Company developed oil wells in the hills on 1,200 acres of land, and found success by 1898, beginning an oil boom in the area. In response to the growth of the oil industry in the area, the Atchison Topeka and Santa Fe Railway Company constructed the Olinda Branch from Fullerton to the oil fields in Brea in 1899. The Olinda Branch provided a fast new transit option for oil production in the area and opened access to oil industries throughout Southern California. Additionally, Pacific Electric had created a railway through Brea by 1911 for both passenger and freight business to support the growth of the area (White 2010: 5, 6). During the 1910s, the area was developed with small businesses and industries that supported oil production and became known as the Town of Brea. On February 23, 1917, the City was incorporated with a population of 752 residents (City of Brea 2026b: 1; NETR 2026b).

By 1920, the city focused on improving its infrastructure, including its water system, streetlights, roads, and traffic signals. The introduction of automobiles during this period facilitated the residential growth of the area by providing access to surrounding cities and industries. The Union Oil Company developed several residential neighborhoods near the city center to encourage residential settlement. Civic development followed with the establishment of the Brea Olinda Unified School District and the first Orange County library branch. Historical aerial photographs of the area show that, as oil production decreased in the 1940s, the citrus industry emerged as an economic leader. Access to nearby packing houses promoted the growth of the local citrus industry (City of Brea 2017: 3; UCSB 2026).

After the end of World War II in 1945, a massive wave of migration and a building boom occurred throughout California and Orange County. In Brea, neighborhoods replaced sprawling ranches and orchards to accommodate the need for housing, and new businesses replaced the agricultural industry (City of Brea 2017: 3). Residential and commercial development in the area continued into the 1950s and through the 1980s, and industrial development began primarily in the 1960s, with Brea appearing to be fully developed by the early 1990s (NETR 2026a). Development of the Orange Freeway (State Route 57) in the 1970s resulted in the growth of industrial parks and retail areas along major transit

corridors in the 1970s and 1980s. In the 1990s, the City initiated efforts to revitalize its downtown area. This process included community outreach, the relocation of historic homes, and the demolition of multiple blocks north of the intersection of Imperial Highway and Brea Boulevard. Public input allowed the City to plan around the needs of the community to provide essential amenities. As a result, the new downtown became a central entertainment and commercial destination (City of Brea 2017: 4). Presently, Brea has a population of about 47,3337 residents. The economy primarily comprises health care and social assistance professionals, manufacturing industries, and educational services (Data USA 2026).

Development of the Subject Property

Archival research indicates that the industrial building at 111 S. Berry Street was built in 1967 by architect Ray W. Johnson and contractor Secrest Construction Company (AB 1968: 29; City of Brea 2026a: Permit #7584). Historical aerial photographs show that before its development, the subject property was part of an agricultural property from the late 1920s to the late 1960s (NETR 2026a; UCSB 2026). In 1966, the Leffingwell Chemical Company purchased the property to build a 30,000 square-foot manufacturing plant where it developed chemicals such as agricultural insecticides, fungicides, fertilizers, and minor element sprays (TR 1966: 47). The company was established in the early 1950s in Anaheim before relocating to Whittier by the 1960s. In 1967, the company moved to the subject property after its construction (TR 1951: 19; TR 1967: 9; AB 1968: 29). It continued to operate on the subject property in 1971 when a chemical fire outside the property caused $4,000 worth of property damage. However, newspapers no longer reported on Leffingwell Chemical Company after the fire (AB 1971: 25). Building permits indicate that the company remained at the subject property by 1985, but it is unknown who occupied the property between 1985 and 1993.

By 1994, Pace International was listed on building permits as the property owner before Pacific Plastics Incorporated (Pacific Plastics) became the owner by 1997 (City of Brea 2026a). Research was unable to uncover further information about Pace International. Pacific Plastics is a manufacturer of PVC pipe products that was established in Orange in 1979 before relocating to the subject property. It has continued to own and operate the subject property since 1994 (Pacific Plastics 2026).

Architect: Ray Walter Johnson

Architect Ray Walter Johnson designed 111 S. Berry Street. He was an architect based in Whittier, California, who worked in Southern California from the 1950s to the 1970s. He received a degree in engineering from the Pacific Coast University, School of Engineering, before earning his master's degree in architecture from the University of Southern California, School of Architecture. Initially, he worked as a draftsman for Leo F. Bachman from 1939 to 1940, then for Francis J. Huesel from 1945 to 1950. Johnson started his own architecture firm in Whittier under his own name, Ray W. Johnson, Architect, in 1950, with most of his work focused on commercial and industrial properties. He was a member of the American Institute of Architects (AIA) from 1953 to 1973 and served as a Board Director for the AIA Orange County Chapter from 1956 to 1958, secretary in 1959, Vice President in 1960, and President in 1961 (Bowker 1956: 279; Bowker 1970: 457).

Known buildings designed by Johnson include:

- 1950-1952: McDonnels Restaurants
- 1951: Berry's Flower Shop, Altadena
- 1953: Bath Hose Building
- 1953: Whittier City Park Department Building
- 1954: Fluid Packed Pump Company
- 1954: Vaupel's Men's Furnishings

- 1954: Oilfields National Bank
- 1955: Ellenwood Homes
- 1952-1955: Harvey Machine Co.
- 1969: Macrodyne Corp. Building
- 1969: Kyro Corp. Building
- 1970: S.C.M. Walton Printing Corp.
- 1970: Pasadena Hydraulics, Inc. Building

Secrest Construction Company

The Secrest Construction Company was established in Santa Ana, California in 1936, before relocating to Whittier in 1941. The company primarily constructed residential and commercial properties, including 111 S. Berry Street, with 321 homes and 272 commercial properties constructed by 1948 (WN 1948a: 7). Historic newspaper research indicates that the company was primarily known for their large residential track developments, such as a 36-home subdivision in 1947, a 32-home subdivision in 1948, and 72-homes for the Sunrise Vista tract in 1950 (WN 1947: 8; WN 1948b: 11; WN 1950: 14). Archival research was unable to find further information about the company.

Known commercial properties attributed to Secrest Construction Co., include:

- 1945: Secrest Construction Company Offices (1909 W. Whittier Boulevard)
- 1947: Hills Drug Store (121 North Bright Avenue)
- 1948: Pacific Electric Building
- 1949: Whittier Elks Lodge (722 E. Whittier Boulevard)

Architectural Style: Mid-Century Modern Style (1945–1976)

Mid-Century Modern style reflected the International and Bauhaus styles popular in Europe in the early twentieth century. This style and its designers (e.g., Mies Van der Rohe and Gropius) were disrupted by World War II and moved to the United States. During World War II, the United States established itself as a burgeoning manufacturing and industrial leader, with incredible demand for modern buildings to reflect modern products. As a result, many industrial buildings were often "decorated boxes"—plain buildings with applied ornament that suited the era, to appear more modern without detracting from the importance of the activity inside the building. Following World War II, the United States had a focus on forward thinking, which sparked architectural movements like Mid-Century Modernism. Practitioners of the style were focused on the most cutting-edge materials and techniques. Architects throughout Southern California implemented the design aesthetics made famous by early Modernists like Richard Neutra and Frank Lloyd Wright, who created a variety of modern architectural forms. Like other buildings of this era, Mid-Century Modern buildings had to be quickly assembled and use modern materials that could be mass-produced. Both residences and offices designed in this style expressed its structure and materials, displayed large expanses of glass, and had an open interior plan (McAlester 2019: 630-646; Morgan 2004).

Character-defining features include (McAlester 2019: 630-646; Morgan 2004):

- One to two stories in height
- Low, boxy, horizontal proportions
- Simple geometric forms with a lack of exterior decoration
- Flat roofed without coping at roof line; flat roofs hidden behind parapets or cantilevered canopies
- Expressed post-and-beam construction in wood or steel
- Flat exterior walls with smooth sheathing typically displaying whites, buffs, and pale pastel colors

- Mass-produced materials
- Simple windows (metal or wood) flush-mounted and clerestory
- Industrially plain doors
- Large window groupings

Typology: Manufacturing Buildings (1887-1980)

Manufacturing during the late nineteenth century slowly increased along with the growth of Southern California as settlers moved to the region. Early industries often consisted of small-scale operations, such as flour mills and carpentry shops, and grew along with the needs of the increasing population. During the twentieth century, manufacturing embraced technological advancements that opened new markets for consumers, including electricity, automobiles, refrigeration, film, and aviation. Railroads facilitated the transportation of products across the state and nation, and by the 1910s, the Port of Los Angeles provided access to international markets. By 1929, California was ranked as the fifth largest manufacturing industry in the nation after Michigan, Pennsylvania, Missouri, and Ohio, with Los Angeles leading the state's production and output. The fast growth of the population, availability of raw materials, and access to wider markets saw the increased development of manufacturing industries throughout Southern California (LSA 2018: 118):

Consumer culture drove the expansion of manufacturing industries, and creators of household items emerged as prominent manufacturers. The post-World War II era produced a variety of manufactured items using the increased power created from advancements in electricity production, such as hydroelectric production and diesel-burning generators. Industrial buildings were often purpose-built, utilitarian buildings designed in the styles popular during their construction. They were commonly one-story in height with a large plan encompassing versatile open spaces used as workshops. Manufacturers of similar products were often located in the same area, with their brand names displayed on the exterior of the facility (LSA 2018: 119):

Character-defining features of Manufacturing Buildings include (LSA 2018: 121):

- One or more related utilitarian buildings
- May possess branding or company logos on the building exterior
- May retain distinctive equipment or building elements that reflect a particular kind of manufacturing process
- May have programmatic elements on the façade that denote what was manufactured at the plant
- Often designed in prevalent architectural styles of the period

Statement of Significance

111 S. Berry Street was evaluated in consideration of the NRHP and CRHR criteria, City of Brea's Criteria for Designation of Individual Historic Resources, and integrity requirements. As a result of the evaluation, 111 S. Berry Street is recommended not to be eligible for inclusion in the NRHP, CRHR, or City of Brea's Historic Resource Register, due to a lack of significant associations and architectural merit.

NRHP/CRHR Evaluation

Criterion A/1: Events

Under NRHP and CRHR Criterion A/1, archival research did not find that 111 S. Berry Street possesses a direct and important association with any events or pattern of events significant in local, state, or national history. The subject property was constructed in 1967 as a chemical manufacturing plant for Leffingwell Chemical Company, during a period of increased industrial development in Brea. After the decline of the oil and citrus industries in the area during the postwar period, residential, commercial, and industrial construction rapidly increased in the area. After the construction

of the Orange Freeway in the 1970s, industrial and commercial development occurred along major transit corridors in the 1970s and 1980s. The subject property was thus constructed during the early years of Brea's industrial growth before the development of the Orange Freeway. However, National Register Bulletin: How to Apply the National Register Criteria for Evaluation states that "mere association with historic events or trends is not enough, in and of itself, to qualify under Criterion A: the property's specific association must be considered important as well" (NPS 1997: 12). Although the subject property was part of this initial burst of industrial development in Brea during the 1960s, there is no indication that the construction of this specific building is associated with a pivotal movement in the history of the neighborhood or of Brea. It was neither the first nor the last of its type and was merely following a continuous pattern of industrial development that continued through the twentieth century. Additionally, research uncovered no information that the subject property is associated with manufacturing contributions that made a significant contribution to the broad patterns of history, as Leffingwell Chemical Company is not known to have contributed to the broad patterns of history in any way. Therefore, the subject property does not meet NRHP/CRHR Criterion A/1 and is recommended not eligible.

Criterion B/2: Significant Persons

Under NRHP and CRHR Criterion B/2, 111 S. Berry Street lacks a significant association with the productive life of any person important in local, state, or national history. Research did not identify information that would indicate the subject property has an association with members of Leffingwell Chemical Company. Pace International, or Pacific Plastics Inc. that would rise to the threshold of significance required for eligibility. Archival research uncovered no person directly associated with the subject property or anyone known to have had direct involvement operation of the subject property. Development of the subject property was essentially a corporate undertaking representing the collective decisions of copmany leaders, rather than the distinctive contributions of any single individual. Due to a lack of identified significant associations with any persons important in our past, the subject property is recommended not eligible under NRHP/CRHR Criterion B/2.

Criterion C/3: Design/Construction

Under NRHP and CRHR Criterion C/3, 111 S. Berry Street does not embody the distinctive characteristics of a type, period, or method of construction that would represent a significant and distinguishable entity. The subject property is a utilitarian manufacturing building constructed in 1967 that displays elements of the Mid-Century Modern style on the office volume (e.g., its one-story height, low, boxy, horizontal proportions, simple geometric form with a lack of exterior decoration, flat roofs, mass-produced materials, simple windows, and industrially plain doors). Due to its geometric form, mass-produced materials, and minimal ornamentation, Mid-Century Modern design elements were commonly applied to modest utilitarian industrial buildings in the 1960s and 1970s. As an undistinguished example of the style, the subject property represents one of many such industrial buildings constructed in Brea and Orange County in the 1960s and 1970s, as well as in the larger region.

Additionally, the subject property does not appear to represent the work of a master architect or contractor. According to the original building permit for the property, the building was designed by architect Ray W. Johnson and constructed by contractor Secrest Construction Company. Johnson worked on industrial properties throughout Orange County from the 1950s to 1970s. None of the industrial buildings designed by Johnson appear to be designated as historical resources either locally, statewide, or nationally. Not enough about Johnson's work is known to establish a context for the subject property. There is no indication that the subject property is notable within his body of work. However, because it is a common, purpose-built, industrial property type and style, it is unlikely that it would be considered notable within his body of work. Likewise, archival research failed to reveal any substantial information about Secrest Construction Company to indicate it is a notable construction company in Orange County. Furthermore, because it is a common, purpose-built building, this combined office and manufacturing building does not possess high artistic values

and is not the product of an architect or builder attempting to articulate the design principles or aesthetics of a formal architectural style or substyle. The property appears to have been constructed through already well-documented and common construction techniques and methods and does not appear to possess high artistic values by articulating a particular concept of design to the extent that it expresses an aesthetic ideal. It does not contribute to the significance of a potential or existing historic district. Overall, the property lacks sufficient design and construction value to meet NRHP/CRHR Criterion C/3 and is recommended not eligible under this criterion.

Criterion D/4: Data Potential

Under NRHP and CRHR Criterion D, the subject property is not significant as a source, or likely source, of important historical information, nor does it appear likely to yield important information about historic construction methods, materials, or technologies. This technology is well understood through contemporary trade journals and scientific monographs. As such, the subject property lacks significance under NRHP/CRHR Criterion D/4.

City of Brea's Criteria for Designation of Individual Historic Resources

Criterion A: It exemplifies or reflects special elements of the city's cultural, social, economic, political, aesthetic, engineering, architectural, or natural history

As discussed in NRHP/CRHR Criterion A/1, research does not indicate that the subject property was associated with events or developmental trends significant to the City of Brea. The subject property is located in a portion of Brea that experienced steady industrial growth through the 1960s and 1970s. Research did not identify the subject property as reflecting special elements of the city's cultural, social, economic, political, or natural history. Additionally, as discussed in NRHP/CRHR Criterion C/3, the subject property is a utilitarian manufacturing building that does not represent special elements in the city's aesthetic, engineering, or architectural history. Therefore, it is recommended not eligible under the City of Brea's Criterion A.

Criterion B: It is identified with persons or events significant in local, state, or national history

As discussed in NRHP/CRHR B/2 and NRHP/CRHR A/1, research does not indicate that the subject property was associated with persons or events significant in local, state, or national history. The subject property has operated as a manufacturing building since its construction. Archival research did not identify any particular individuals associated with the subject property who have made a significant contribution to our past or any significant events associated with the property. Therefore, it is recommended not eligible under the City of Brea's Criterion B.

Criterion C: It embodies distinctive characteristics of a style, type, period, or method of construction, or is a valuable example of the use of indigenous materials or craftsmanship

As discussed in NRHP/CRHR Criterion C/3, the subject property does not fully embody the distinctive characteristics of a style, type, period, or method of construction, nor is it a valuable example of the use of indigenous materials or craftsmanship. The subject property is a utilitarian manufacturing building constructed in 1967 that displays elements of the Mid-Century Modern Style on the office volume. It does not contain enough elements to distinguishably reflect the style. The subject property is an undistinguished example of the style and represents one of many such industrial buildings constructed in Brea in the 1960s and 1970s. Likewise, research did not indicate that the subject property exemplified indigenous materials or craftsmanship. Therefore, it is recommended not eligible under the City of Brea's Criterion C.

Criterion D: It is representative of the work of a notable builder, designer, or architect

As discussed in NRHP/CRHR Criterion C/3, the subject property does not appear to be representative of the work of a

notable architect, builder, or designer. The building was designed by architect Ray W. Johnson and built by contractor Secrest Construction Company. As it is a common, purpose-built, industrial property type and style, the subject property does not appear to be a notable representation of either the architect or contractor's body or work. Therefore, it is recommended not eligible under the City of Brea's Criterion D.

Criterion E: It contributes to the significance of a historic area, being a geographically definable area possessing a concentration of historic or scenic properties or thematically related grouping of properties which contribute to each other and are unified aesthetically by plan or physical development

Research did not reveal that the subject property is included in a geographically definable area possessing a concentration of historic or scenic properties or a thematically related grouping of properties which contribute to each other and are unified aesthetically by plan or physical development (i.e., a district). The manufacturing building on the subject property was constructed in 1967 during a time of increased industrial development in Brea. It is neither a concentration of historic or scenic properties, nor a thematically related grouping of properties unified by plan or physical development. It does not appear to contribute to a previously identified historic district, and the subject property does not appear to be part of a grouping of properties that contribute to each other and are unified aesthetically by plan or physical development. Therefore, it is recommended not eligible under the City of Brea's Criterion E.

Criterion F: It embodies elements of architectural design, detail, materials, or craftsmanship that represent a significant structural or architectural achievement or innovation

As discussed in NRHP/CRHR Criterion C/3, the subject property does not embody elements of architectural design, detail, materials, or craftsmanship that represent a significant structural or architectural achievement or innovation. Although the subject property possesses elements of the Mid-Century Modern style, it does not contain enough distinctive characteristics of the style to be a significant example. Likewise, the subject property was constructed with common and well-documented materials and construction techniques. Therefore, it is recommended not eligible under the City of Brea's Criterion F.

Criterion G: It reflects significant geographical patterns, including those associated with different eras of settlement and growth, particular transportation modes, or distinctive examples of park or community planning

The subject property does not reflect significant geographical patterns, including those associated with different eras of settlement and growth, particular transportation modes, or distinctive examples of park or community planning. The subject property does not appear to be a significant example of industrial development from the late 1960s as it simply followed an existing pattern of industrial development in Brea. The surrounding area has been significantly altered by further industrial and residential development since the subject property's date of construction (1967). Therefore, it is recommended not eligible under the City of Brea's Criterion G.

Criterion H: It is one of the few remaining examples in the city, region, state, or nation possessing distinguishing characteristics of an architectural or historical type or specimen

As discussed in NRHP/CRHR Criterion C/3, the subject property does not contain enough distinguishing characteristics of the Mid-Century Modern style to be considered a significant example of the style. Furthermore, it is a purpose-built utilitarian manufacturing building that does not exemplify the distinguishing characteristics of the Mid-Century Modern stye. The subject property is a ubiquitous typology exhibiting the influence of the Mid-Century Modern style, one of the most popular styles in Southern California in the 1960s. As such, it is not one of the few remaining examples in the city, region, state, or nation. Therefore, it is recommended not eligible under the City of Brea's Criterion H.

Integrity Considerations

Integrity is the ability of a property to convey its significance. Because the concept of integrity is based on significance, the assessment of a property's integrity can only proceed after its significance has been fully established. Because the subject property lacks sufficient significance to meet any of the criteria for listing in the NRHP, CRHR, or City of Brea's Historic Resources Register, an integrity analysis was considered immaterial for 111 S. Berry Street.

***P3a. Description:** (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

The subject property is a primarily rectangular in plan, one-story, double-height, manufacturing building that features the International style with elements of Mid-Century Modern style (Photograph 1). It is sited on the west side of the intersection of S. Berry Street and Mercury Lane, between W. Lambert Road to the north and Imperial Highway to the south. The stucco-clad building features smooth stucco-clad panels with minimal design, including rounded corners, on the primary (east) elevation and is topped by a flat roof with a parapet. A recessed main entrance centered on the primary (east) elevation contains a metal frame, fully glazed, tinted-glass storefront door surrounded by metal-sash fixed windows (Photograph 2). (See Continuation Sheet)

This property does not meet the criteria for the National Register of Historic Places (NRHP), California Register of Historical Resources (CRHR), or the City of Brea Historic Register. The property was evaluated in accordance with Section 106 of the National Historic Preservation Act (Section 106) and Section 15064.5 (a)(2)-(3) of the CEQA Guidelines using the criteria outlined in Section 5024.1 of the California Public Resources Code. The property is not considered a historic property for the purposes of Section 106 or a historical resource under CEQA. As such, this evaluation assigns a 6Z California Historical Resources Status Code to 221 S. Berry Street. See Continuation Sheet.

Description (cont.)

No other fenestration was visible from the public-right-of-way during the property survey. Only the primary (east) elevation and partial views of the north and south elevations were visible. The building displays character-defining features of the International style, including its vertical box form, tinted glass, repeating pattern of fenestration, flat roof, little decoration, stucco cladding, large concrete expanses, and use of modern materials. Likewise, it exhibits elements of the Mid-Century Modern style, such as its low and boxy horizontal proportions, expressed post-and-beam construction, and symmetry. The building is set back from the street with an asphalt-paved parking lot surrounding the primary (east) and north elevations. A driveway along the southern boundary of the property leads to the rear service yard along the rear (west) elevation. Chain-link fencing encases the northern, southern, and western borders of the property (Photograph 3). Landscaping includes a grass lawn, a hedge, and trees along the parking lot fronting the primary (east) elevation. The historic property boundary is limited to the property's APN (296-101-02). The property is in good condition.

Significance (cont.)

The following historic context is adapted from the *Built Environment Inventory and Evaluation Report for the Mercury Affordable Senior Apartments Project,* prepared in April 2026 by Dudek.

Historical Development of Orange County

The present-day territory of Orange County was established in 1769, about 35 miles southeast of Los Angeles. During the Spanish period in the 1770s, the area encompassed ranch lands surrounding Mission San Gabriel, in present-day Los Angeles County, and Mission San Juan Capistrano, which were used for grazing cattle, horses, and sheep. In 1810, José Antonio Yorba and Juan Pablo Peralta were formally granted land south and east of the Santa Ana River that became known as Rancho Santiago de Santa Ana (OCHS 2025).

In 1822, the political situation changed as Mexico won its independence from Spain, and the Orange County area became part of the Mexican Republic. Rancho Santiago de Santa Ana was subdivided into 44,000 acres of land grants for Mexican citizens to occupy and improve. By 1846, most of the land within present-day Orange County comprised ranches, and cattle ranching was the foundation of the local economy. When California became a state in 1850, Los Angeles County encompassed the present-day Orange County boundary. As a result, many of the ranches were sold to American settlers and developers during the late 1860s, along with the existing towns of Anaheim, Santa Ana, Tustin, Orange, Westminster, and Garden Grove, which had been founded during this period (OCHS 2025).

Agriculture emerged as a prosperous industry that benefited from the fertile soil and temperate climate in the region. After the development of new irrigation systems in the 1870s, more orchards were planted in the area, including walnut, apricot, and orange. Additionally, the Southern Pacific Railroad (SPRR) built the first local railroad through the area in 1875 from Los Angeles to Anaheim, which was extended to Santa Ana in the following two years. The SPRR and the Santa Fe Railroad (SFRR), which arrived in 1885, aided in population growth and the transportation of local produce. Additionally, the SPRR and SFRR enabled speculative real estate development to intensify in the 1880s as a wave of settlers arrived by train to Orange County and the greater Southern California region (OCHS 2025).

Orange County was established on August 1, 1889, following a vote by residents of Anaheim and the surrounding area to divide Los Angeles County. Initially, the proposed boundary between Los Angeles and Orange Counties was the San Gabriel River, but the boundary was later moved south along Coyote Creek. Although northern cities such as Anaheim voted against this measure because they wanted to be located toward the center of the new county, it passed with overwhelming support from the rest of the area, and Santa Ana was chosen as the county seat in 1889 (OCHS 2025).

By the 1930s, Orange County produced a sixth of the nation's Valencia orange crop, and the citrus industry continued to dominate the area's economy throughout the early twentieth century until the end of World War II. During the 1950s, the area's sparsely populated agricultural landscape rapidly transformed into a residential area. Automobile-oriented development increased access to the once rural area, and the development of the Santa Ana Freeway (Interstate-5) in the 1950s further bolstered Orange County's growth. By 1963, Buena Park, Costa Mesa, La Palma, Garden Grove, Cypress, Westminster, Fountain Valley, Los Alamitos, San Juan Capistrano, and Villa Park all became incorporated cities within Orange County, and the County's population reached over one million residents. Planned communities in South Orange County were developed in the 1960s, including Irvine, Mission Viejo, Laguna Niguel, Aliso Viejo, Rancho Santa Margarita, and Ladera Ranch (OCHS 2025). Today, Orange County is primarily composed of residential properties and has over three million residents and 34 incorporated cities (OCHS 2025).

Historical Development of the City of Brea

Brea is located in Orange County and is named after the Spanish word for tar, which the foothills to the north were known to produce. During the Spanish period in the 1770s, the area was part of the lands under the jurisdiction of Rancho San Juan Cajon de Santa Ana. Private land grants were issued in the early 1820s, creating the rancho system of large agricultural estates. The land comprising present-day Brea was granted to Juan Pacifico Ontiveras by Governor Juan B. Alvarado in 1837 and was primarily used for cattle ranching. Ontiveras moved to Santa Barbara in 1850, and the ranch was divided and sold under the ranchero system (OCHS 2025; Robinson 1955: 1, 15; City of Brea 2017: 1).

The area of present-day Brea was purchased by Abel Stearns in 1863. After a drought in 1868, Stearns sold cattle land but did not divide the area that would become Brea. Instead, the area was leased for sheep pasture. Wool became a staple in the local economy and was sold to eastern textile factories (City of Brea 2017: 1). However, in 1895, Union Oil Company developed oil wells in the hills on 1,200 acres of land, and found success by 1898, beginning an oil boom in the area. In response to the growth of the oil industry in the area, the Atchison Topeka and Santa Fe Railway Company constructed the Olinda Branch from Fullerton to the oil fields in Brea in 1899. The Olinda Branch provided a fast new transit option for oil production in the area and opened access to oil industries throughout Southern California. Additionally, Pacific Electric had created a railway through Brea by 1911 for both passenger and freight business to support the growth of the area (White 2010: 5, 6). During the 1910s, the area was developed with small businesses and industries that supported oil production and became known as the Town of Brea. On February 23, 1917, the City was incorporated with a population of 752 residents (City of Brea 2026b: 1; NETR 2026b).

By 1920, the city focused on improving its infrastructure, including its water system, streetlights, roads, and traffic signals. The introduction of automobiles during this period facilitated the residential growth of the area by providing access to surrounding cities and industries. The Union Oil Company developed several residential neighborhoods near the city center to encourage residential settlement. Civic development followed with the establishment of the Brea Olinda Unified School District and the first Orange County library branch. Historical aerial photographs of the area show that, as oil production decreased in the 1940s, the citrus industry emerged as an economic leader. Access to nearby packing houses promoted the growth of the local citrus industry (City of Brea 2017: 3; UCSB 2026).

After the end of World War II in 1945, a massive wave of migration and a building boom occurred throughout California and Orange County. In Brea, neighborhoods replaced sprawling ranches and orchards to accommodate the need for housing, and new businesses replaced the agricultural industry (City of Brea 2017: 3). Residential and commercial development in the area continued into the 1950s and through the 1980s, and industrial development began primarily in the 1960s, with Brea appearing to be fully developed by the early 1990s (NETR 2026a). Development of the Orange Freeway (State Route 57) in the 1970s resulted in the growth of industrial parks and retail areas along major transit corridors in the 1970s and 1980s. In the 1990s, the City initiated efforts to revitalize its downtown area. This process included community outreach, the relocation of historic homes, and the demolition of multiple blocks north of the

intersection of Imperial Highway and Brea Boulevard. Public input allowed the City to plan around the needs of the community to provide essential amenities. As a result, the new downtown became a central entertainment and commercial destination (City of Brea 2017: 4). Presently, Brea has a population of about 47,3337 residents. The economy primarily comprises health care and social assistance professionals, manufacturing industries, and educational services (Data USA 2026).

Development of the Subject Property

The manufacturing building at 221 S. Berry Street was constructed in 1971 as the West Coast headquarters for the Russell Coil Company (Russell) (AB 1971a: 29). The company was a subsidiary of Ardco, Incorporated (Ardco), which specialized in manufacturing air conditioning and refrigeration coils, condensers, and other refrigeration products (AB 1975a: 9). The company moved to the subject manufacturing facility from Santa Fe Springs (Los Angeles County) where it was founded in 1946 (Russell 2026). Executive Vice President of Russell, Steve Balogh, was appointed the head of the new facility. The new building was designed to contain manufacturing, laboratory, and office facilities. Don Koll Company Inc., an industrial builder-developer from Newport Beach, constructed the approximately 60,000 square-foot building for about $500,000, and it was designed by the Irvine design company, Building Concepts Inc. The La Habra construction firm, Nationwide Constructors Corporation (Nationwide), was awarded the contract for the tilt-up construction of the building with sculpted concrete (AB 1972a: 32). Additionally, the walls of the rear (west) elevation were built so they may be moved for future expansion of the building (AB 1971a: 29). According to historical aerial photographs of the subject property, several additions to the rear (west) elevation occurred by 1980, 1987, and 1992 (NETR 2026a).

Archival research indicates that Russell y maintained its location at 221 S. Berry Street in 2008, but after the company was acquired by Monomy Capital Partners in 2010, it likely left the subject property. By 2011, Google Street View images show that the building was occupied by the refrigeration manufacturer, Hill Phoenix Inc., before it was occupied by Pacific Plastics by 2016, who also owned the adjacent property at 111 S. Berry Street. As of 2017, the signage outside the primary (east) elevation no longer displayed a company name (Russell 2000; Russell 2026; Google Street View 2026). Archival research was unable to determine the occupant of the subject property between 2016 and 2026.

Russell Coil Company

Russell was founded in 1946 as a manufacturer of coils for refrigeration and air conditioning in Santa Fe Springs, California. The company's founder, Lewis Russell, developed the first machine to feature a variable spacing on a coil in 1947, and went on to develop a unit cooler line that it sold through the 1950s and 1960s. Ardco acquired Russell in 1967, and it became a brand under its Heat Transfer Products Group (HTPG) division. In 1971, the company moved its headquarters to the subject property in Brea, and in 1985, the company opened a manufacturing facility in Yuma, Arizona. During the 1980s and 1990s, the company developed several new products, including compressorized units, several unit-cooler models for warehouse applications, fiberglass evaporative and condensing units, air-cooled condensers, ripening-room product coolers, an all-in-one refrigeration system, and air-conditioning and heating systems custom-designed for convenience stores and fast-food outlets (Russell 2026).

In 1997, Ardco was acquired by Carrier, which maintained the Russell brand under its ownership. A new Russell warehouse facility opened in Scottsboro, Alabama, in 1999. However, in 2010, Carrier sold the HTPG division brands, including Russell, to Monomy Capital Partners, before the division was sold again in 2013 to Rheem as one of its commercial refrigeration segments. During this time, Rheem was focusing on growing its energy-efficient products, and as a result, Russell boosted its quality in manufacturing to increase the efficiency and performance of its products. Consequently, the brand won its first product design award at the Dealer Design Awards (DDA) in 2016 for the Next-Gen MiniCon ½ to 6 HP Condensing Unit. Over the next five years, Russell continued to design award-winning

refrigeration models, winning a DDA Award in 2017, 2018, 2019, 2020, and 2021 (Russell 2026).

Architect: Building Concepts Incorporated

Building Concepts Inc. was a construction company based in Irvine, California, during the 1970s (AB 1971a: 29). Newspaper research indicates that the company primarily worked throughout Southern California, building industrial facilities and office complexes. Often, the company partnered with the development firm, Don Koll Company Inc., to build industrial parks with large campus-like plans. Newspapers no longer report about the company after 1977, and archival research was unable to determine how long the company remained in operation (AB 1971b: 26; AB 1971c: 37; AB 1972b: 29; AB 1975b: 27; AB 1976: 17; AB 1977: 23).

Known properties associated with Building Concepts Inc. include the following:

- Fenton Material Company Plant (1971)
- John H. Harland Company Plant (1971)
- Don Koll Company Inc. Headquarters (1972)
- Los Alamitos Business Park (1975)
- American River Business Park (1976)

Builder: Don Koll Company Incorporated (Koll Company)

Don Koll Company Inc. was established in Irvine, California, in 1962 by Don Koll. The firm was a regional general construction firm specializing in custom residences and grew to become a full-service real estate company with services including development, acquisition, construction, brokerage, and property management. In 1964, the company purchased several properties to construct its first industrial and warehouse developments, such as Orange County Airport (now John Wayne Airport). The company joined its first partnership with Aetna Life & Casualty Company in 1968 to develop a 68-building 75-acre multi-tenant business park in Irvine. By 1972, Don Koll Company Inc. had developed over 5 million square feet of industrial facilities and had become known for its industrial park projects. The company changed its name to the Koll Company in 1976, and in 1977, it was recognized by the White House as a leader in the real estate industry, "for its focus on creating environments of excellence" (Koll 2026). During the 1980s, the company continued to expand with the development of multiple industrial parks, including the Koll Center San Jose in 1979, Koll Center Irvine in 1981, Koll Center Bothell and Koll Center Bellevue in 1985, and Koll Center San Diego in 1988. Likewise, it became the first American real estate firm to develop an industrial park in Mexico after construction of the 87-acre La Frontera Business Center in 1988, and expanded to Texas in 1989 with the establishment of a Dallas office. In 1992, the Koll Company developed Jack Nicklaus's first golf course in Latin America in Palmilla, Los Cabos, Mexico, the Cao del Sol Golf Course. After its completion, the golf course was ranked 68th in the world by *Golf Digest Magazine*. The company joined a partnership with the Thailand-based firm, C.P. Group, in 1994 and began operating in Asia. In 1999, the Koll Company formed the Koll Development Company, a New York-based firm that developed over 10-million square feet of property in its first year. The company continued to focus on developing industrial, office, and resort properties in the 2000s with various joint ventures and partnerships, and continued to expand to Nevada, Northern California, and Arizona (Koll 2026).

Known properties associated with the Koll Company include the following:

- John Wayne Airport (1964)
- Airport Business Center in Irvine (1968)
- Carlsbad Research Center (1982)
- Hughes Aircraft Company Headquarters (1983)
- Palmilla Hotel (1986)

- Phoenix Plaza (1987)
- San Marcos Town Center (1995)
- Hacienda Hotel (2005)
- Hacienda Beach Club (2008)

Builder: Nationwide Constructors Corporation

The Nationwide Constructors Corporation was a construction company based in La Habra, California, in the 1970s (AB 1972a: 32). Historic newspapers no longer report on Nationwide Constructors Corp. after 1974 (LAT 1974: 103). Archival research was unable to identify further information about the company.

Architectural Style: International Style (c. 1925-Present)

The International style came to the United States in the 1930s after gaining popularity in Germany, Holland, and France through architects such as Walter Gropius and Ludwig Mies van der Rohe. The style spread in part because of Henry-Russell Hitchcock and Philip Johnson's 1932 book, titled The International Style: Architecture Since 1922, originally produced as the catalog for the New York Museum of Modern Art's exhibition showcasing the style. In their book, Hitchcock and Johnson introduced the term International and identified its three architectural principles as volume, regularity, and avoiding the application of ornament. These three principles are the baseline for the American International style (SFPD 2011: 168; McAlester 2019: 616–621).

The main difference between International style buildings and their predecessors was that International style buildings did not use exterior solid masonry for support. Instead, they often depended on a metal interior skeleton and used the curtain wall concept to clad walls in glass. This dependency on the metal frame resulted in windows hung in repeating patterns, which brought a further level of order to these already stripped-down buildings. Mies's designs specifically focused on perfection through mathematics, generating rectangular curtain wall designs displaying strong roots in the philosophy of the Bauhaus. This movement incorporated simple and precise designs and used mass-produced materials such as concrete, steel, and glass, paired with functionality in design (SFPD 2011: 168; McAlester 2019: 616–621).

The International style remained popular after World War II and through the 1970s, as the clean and geometric characteristics of the style provided efficient construction for large buildings. Over time architects began to diverge from the formulaic constraints inherent in the International style by including asymmetrical features such as cantilevered projections, although the style's easily replicable forms, materials, and minimal ornamentation continued to make it a popular choice for utilitarian and corporate buildings. In the 1960s, the style became the dominant style for skyscrapers, emphasizing volume over mass through the use of lightweight, mass-produced materials. By the 1970s, it was the most common style for corporate offices, with aspects of the style still being applied today (Hitchcock and Johnson 1995: 33–37; Britannica 2020; McAlester 2019: 620).

Characteristics of the International style:

- Vertical box
- Often set on "pilotis" or stilts, giving the appearance of floating
- Asymmetry
- Windows and wall surfaces are on the same plane, providing the look of a taut skin
- Tinted and/or mirrored glass
- Repeating pattern of fenestration
- Flat roof structure often with cantilevered projections

- Little decoration or ornamentation
- Open interior spaces
- Smooth wall surfaces, usually clad with stucco
- Large concrete expanses
- Use of modern materials such as metal windows, concrete, and steel

Architectural Style: Mid-Century Modern (1945-1976)

Mid-Century Modern style reflected the International and Bauhaus styles popular in Europe in the early twentieth century. This style and its designers (e.g., Mies Van der Rohe and Gropius) were disrupted by World War II and moved to the United States. During World War II, the United States established itself as a burgeoning manufacturing and industrial leader, with incredible demand for modern buildings to reflect modern products. As a result, many industrial buildings were often "decorated boxes"—plain buildings with applied ornament that suited the era, to appear more modern without detracting from the importance of the activity inside the building. Following World War II, the United States had a focus on forward thinking, which sparked architectural movements like Mid-Century Modernism. Practitioners of the style were focused on the most cutting-edge materials and techniques. Architects throughout Southern California implemented the design aesthetics made famous by early Modernists like Richard Neutra and Frank Lloyd Wright, who created a variety of modern architectural forms. Like other buildings of this era, Mid-Century Modern buildings had to be quickly assembled and use modern materials that could be mass-produced. Both residences and offices designed in this style expressed its structure and materials, displayed large expanses of glass, and had an open interior plan (McAlester 2019: 630-646; Morgan 2004).

Character-defining features include (McAlester 2019: 630-646; Morgan 2004):

- One to two stories in height
- Low, boxy, horizontal proportions
- Simple geometric forms with a lack of exterior decoration
- Flat roofed without coping at roof line; flat roofs hidden behind parapets or cantilevered canopies
- Expressed post-and-beam construction in wood or steel
- Flat exterior walls with smooth sheathing typically displaying whites, buffs, and pale pastel colors
- Mass-produced materials
- Simple windows (metal or wood) flush-mounted and clerestory
- Industrially plain doors
- Large window groupings

Typology: Manufacturing Buildings (1887-1980)

Manufacturing during the late nineteenth century slowly increased along with the growth of Southern California as settlers moved to the region. Early industries often consisted of small-scale operations, such as flour mills and carpentry shops, and grew along with the needs of the increasing population. During the twentieth century, manufacturing embraced technological advancements that opened new markets for consumers, including electricity, automobiles, refrigeration, film, and aviation. Railroads facilitated the transportation of products across the state and nation, and by the 1910s, the Port of Los Angeles provided access to international markets. By 1929, California was ranked as the fifth largest manufacturing industry in the nation after Michigan, Pennsylvania, Missouri, and Ohio, with Los Angeles leading the state's production and output. The fast growth of the population, availability of raw materials, and access to wider markets saw the increased development of manufacturing industries throughout Southern California (LSA 2018: 118):

Consumer culture drove the expansion of manufacturing industries, and creators of household items emerged as prominent manufacturers. The post-World War II era produced a variety of manufactured items using the increased power created from advancements in electricity production, such as hydroelectric production and diesel-burning generators. Industrial buildings were often purpose-built, utilitarian buildings designed in the styles popular during their construction. They were commonly one-story in height with a large plan encompassing versatile open spaces used as workshops. Manufacturers of similar products were often located in the same area, with their brand names displayed on the exterior of the facility (LSA 2018: 119):

Character-defining features of Manufacturing Buildings include (LSA 2018: 121):

- One or more related utilitarian buildings
- May possess branding or company logos on the building exterior
- May retain distinctive equipment or building elements that reflect a particular kind of manufacturing process
- May have programmatic elements on the façade that denote what was manufactured at the plant
- Often designed in prevalent architectural styles of the period

Statement of Significance

221 S. Berry Street was evaluated in consideration of the NRHP and CRHR criteria, City of Brea's Criteria for Designation of Individual Historic Resources, and integrity requirements. As a result of the evaluation, 221 S. Berry Street is recommended not to be eligible for inclusion in the NRHP, CRHR, or the City of Brea's Criteria for Designation of Individual Historic Resources, due to a lack of significant associations and architectural merit.

NRHP/CRHR Evaluation

Criterion A/1: Events

Under NRHP and CRHR Criterion A/1, archival research did not find that 221 S. Berry Street possesses a direct and important association with any events or pattern of events significant in local, state, or national history. The subject property was constructed in 1971 as an air conditioning and refrigeration products manufacturer during a period of increased industrial development in Brea. After the decline of the oil and citrus industries in the area during the postwar period, residential, commercial, and industrial construction rapidly increased. Construction of the Orange Freeway in the 1970s resulted in an increase in industrial and commercial development along major transit corridors throughout the 1980s. Although the subject property has an association with the industrial development of the area, it did not contribute in any significant way to that pattern of development. The subject property is representative of an industrial property constructed during the early 1970s. It was neither the first nor the last of its type and was merely following a continuous pattern of industrial development that continued through the twentieth century.

The subject property was constructed in 1971 as the West Coast headquarters for Russell Coil Company (Russel), which occupied it until about 2010. The company was founded in 1946 by Lewis Russell and appears to have been an innovative company within the refrigeration manufacturing industry. However, there is no indication that the subject property is particularly significant within this industry, either regionally or nationwide. It was not the company's first facility nor its last. The first facility was located in Santa Fe Springs, California, and the company opened a manufacturing facility in Yuma, Arizona, in 1985, where it began operating its headquarters after leaving the subject property. Most of Russell's achievements in the refrigeration industry, such as its awards for product design between 2016 and 2021, took place after it departed from the subject property. The subject property is not known to be directly associated with

any events that have made a significant contribution to the history of Russell, Brea, California, or the United States. Therefore, the subject property does not meet NRHP/CRHR Criterion A/1 and is recommended not eligible.

Criterion B/2: Significant Persons

Under NRHP and CRHR Criterion B/2, 221 S. Berry Street lacks a significant association with the productive life of any person important in local, state, or national history. Research did not identify information that would indicate the subject property has an association with members of Russell, Hill Phoenix Inc., or Pacific Plastics Inc. that would rise to the threshold of significance required for eligibility. Although executive vice president of Russell, Steve Balogh, was appointed the head of the subject property, he is not known to have had a direct involvement in the construction or operation of the subject property. Archival research uncovered no person directly associated with the subject property or anyone known to have had direct involvement in the construction or operation of the subject property. Development of the subject property was essentially a corporate undertaking representing the collective decisions of the company's leadership, rather than the distinctive contributions of any single individual. Due to a lack of identified significant associations with any persons important in our past, the subject property is recommended not eligible under NRHP/CRHR Criterion B/2.

Criterion C/3: Design/Construction

Under NRHP and CRHR Criterion C/3, 221 S. Berry Street does not embody the distinctive characteristics of a type, period, or method of construction that would represent a significant and distinguishable entity. The subject property is a modest and architecturally undistinguished example of a manufacturing building constructed in 1971 that displays the International style (e.g., its vertical box form, tinted glass, repeating pattern of fenestration, flat roof, little decoration, stucco cladding, large concrete expanses, and use of modern materials) with elements of the Mid-Century Modern style (e.g., its low and boxy horizontal proportions, expressed post-and-beam construction, and symmetry). Due to their geometric form, mass-produced materials, and minimal ornamentation, International style and Mid-Century Modern design elements were commonly applied to modest utilitarian industrial buildings in the 1960s and 1970s. As an undistinguished example of postwar modern design, the subject property represents one of many such industrial buildings constructed in Brea and Orange County in the 1970s.

The subject property was designed by Building Concepts Inc. and built by Don Koll Company Inc., both of which were both based in Irvine, California. Building Concepts Inc. primarily built industrial facilities and office complexes throughout Southern California, and often partnered with Don Koll Company Inc. By 1972, Don Koll Company Inc. had developed over 5 million square feet of industrial facilities and had become known for its industrial park projects. The subject property was built in 1971, before the development firm gained recognition from the White House as a leader in the real estate industry in 1977. Although Don Knoll Company Inc. achieved success as industrial real estate developers, research failed to reveal information demonstrating that the firm gained historical significance due to its association with the subject property. Likewise, there are other examples of Don Koll Company Inc.'s designs that appear to better represent the firm's work, including the John Wayne Airport (1964) and the Airport Business Center in Irvine (1968). The subject property is a common, purpose-built manufacturing building that does not possess high artistic values and appears to have been constructed through already well-documented and common construction techniques and methods. Nationwide Constructors Corporation built the tilt-up construction of the building with sculpted concrete, a technique often used for simple warehouses and industrial properties through the 1960s and 1970s. Additionally, the subject property does not contribute to the significance of a potential or existing historic district. Overall, the property lacks sufficient design and construction value to meet NRHP/CRHR Criterion C/3 and is recommended not eligible under this criterion.

Criterion D/4: Data Potential

Under NRHP and CRHR Criterion D, the subject property is not significant as a source, or likely source, of important historical information, nor does it appear likely to yield important information about historic construction methods, materials, or technologies. This technology is well understood through contemporary trade journals and scientific monographs. As such, the subject property lacks significance under NRHP/CRHR Criterion D/4.

City of Brea's Criteria for Designation of Individual Historic Resources

Criterion A: It exemplifies or reflects special elements of the city's cultural, social, economic, political, aesthetic, engineering, architectural, or natural history

As discussed in NRHP/CRHR Criterion A/1, research does not indicate that the subject property was associated with events or developmental trends significant to the City of Brea. The subject property is located in a portion of Brea that experienced steady industrial growth through the 1970s. Research did not identify the subject property as reflecting special elements of the city's cultural, social, economic, political, or natural history. Additionally, as discussed in NRHP/CRHR Criterion C/3, the subject property is a utilitarian manufacturing building that does not represent special elements in the city's aesthetic, engineering, or architectural history. Therefore, it is recommended not eligible under the City of Brea's Criterion A.

Criterion B: It is identified with persons or events significant in local, state, or national history

As discussed in NRHP/CRHR B/2 and NRHP/CRHR A/1, research does not indicate that the subject property was associated with persons or events significant in local, state, or national history. The subject property has operated as a manufacturing building since its construction. Archival research did not identify any particular individuals associated with the subject property who have made a significant contribution to our past or any significant events associated with the property. Therefore, it is recommended not eligible under the City of Brea's Criterion B.

Criterion C: It embodies distinctive characteristics of a style, type, period, or method of construction, or is a valuable example of the use of indigenous materials or craftsmanship

As discussed in NRHP/CRHR Criterion C/3, the subject property does not fully embody the distinctive characteristics of a style, type, period, or method of construction, nor is it a valuable example of the use of indigenous materials or craftsmanship. The subject property is a utilitarian manufacturing building constructed in 1971 that displays elements of the International and Mid-Century Modern styles. It does not contain enough elements to distinguishably reflect either style. The subject property is an undistinguished example of a 1970s manufacturing building and represents one of many such industrial buildings constructed in Brea. Likewise, research did not indicate that the subject property exemplified indigenous materials or craftsmanship. Therefore, it is recommended not eligible under the City of Brea's Criterion C.

Criterion D: It is representative of the work of a notable builder, designer, or architect

As discussed in NRHP/CRHR Criterion C/3, the subject property does not appear to be representative of the work of a notable architect, builder, or designer. The building was designed by Building Concepts Inc. and built by Don Koll Company Inc. As it is a common, purpose-built, industrial property type and style, the subject property does not appear to be a notable representation of either corporation's body of work. Therefore, it is recommended not eligible under the City of Brea's Criterion D.

Criterion E: It contributes to the significance of a historic area, being a geographically definable area possessing a concentration of historic or scenic properties or thematically related grouping of properties which contribute to each other and are unified aesthetically by plan or physical development

Research did not reveal that the subject property is included in a geographically definable area possessing a concentration of historic or scenic properties or a thematically related grouping of properties which contribute to each other and are unified aesthetically by plan or physical development (i.e., a district). The manufacturing building on the subject property was constructed in 1971 during a time of increased industrial development in Brea. It is neither a concentration of historic or scenic properties, nor a thematically related grouping of properties unified by plan or physical development. It does not appear to contribute to a previously identified historic district, and the subject property does not appear to be part of a grouping of properties that contribute to each other and are unified aesthetically by plan or physical development. Therefore, it is recommended not eligible under the City of Brea's Criterion E.

Criterion F: It embodies elements of architectural design, detail, materials, or craftsmanship that represent a significant structural or architectural achievement or innovation

As discussed in NRHP/CRHR Criterion C/3, the subject property does not embody elements of architectural design, detail, materials, or craftsmanship that represent a significant structural or architectural achievement or innovation. Although the subject property possesses elements of the Mid-Century Modern and International styles, it does not contain enough distinctive characteristics of the styles to be a significant example. Likewise, the subject property was constructed with common and well-documented materials and construction techniques. Therefore, it is recommended not eligible under the City of Brea's Criterion F.

Criterion G: It reflects significant geographical patterns, including those associated with different eras of settlement and growth, particular transportation modes, or distinctive examples of park or community planning

The subject property does not reflect significant geographical patterns, including those associated with different eras of settlement and growth, particular transportation modes, or distinctive examples of park or community planning. The subject property does not appear to be a significant example of industrial development from the early 1970s, as it simply followed an existing pattern of industrial development in Brea. The surrounding area has been significantly altered by further industrial and residential development since the subject property's date of construction (1971). Therefore, it is recommended not eligible under the City of Brea's Criterion G.

Criterion H: It is one of the few remaining examples in the city, region, state, or nation possessing distinguishing characteristics of an architectural or historical type or specimen

As discussed in NRHP/CRHR Criterion C/3, the subject property does not contain enough distinguishing characteristics of the Mid-Century Modern or International styles to be considered a significant example of either style. Furthermore, it is a purpose-built utilitarian manufacturing building that does not exemplify the distinguishing characteristics. The subject property is a ubiquitous typology exhibiting the influences of the Mid-Century Modern and International styles, which were commonly applied to modest utilitarian industrial in Southern California in the 1970s. As such, it is not one of the few remaining examples in the city, region, state, or nation. Therefore, it is recommended not eligible under the City of Brea's Criterion H

Integrity Considerations

Integrity is the ability of a property to convey its significance. Because the concept of integrity is based on significance, the assessment of a property's integrity can only proceed after its significance has been fully established. Because the subject property lacks sufficient significance to meet any of the criteria for listing in the NRHP, CRHR, or the City of Brea's Historic Resources Register, an integrity analysis was considered immaterial for 221 S. Berry Street.

This property does not meet the criteria for the National Register of Historic Places (NRHP), California Register of Historical Resources (CRHR), or the City of Brea Historic Register. The property was evaluated in accordance with Section 106 of the National Historic Preservation Act (Section 106) and Section 15064.5 (a)(2)-(3) of the CEQA Guidelines using the criteria outlined in Section 5024.1 of the California Public Resources Code. The property is not considered a historic property for the purposes of Section 106 or a historical resource under CEQA. As such, this evaluation assigns a 6Z California Historical Resources Status Code to 233 S. Berry Street. See Continuation Sheet.

Description (cont.)

A set of partially glazed metal doors is recessed on the primary (east) elevation of the administration volume's main entrance beneath a wood-clad overhang displaying "Yorba Linda Electric, Inc." and accessed by either a concrete ramp or concrete steps with metal support rails. Two sets of full-length metal-sash fixed windows are located on the north and south corners of the primary (east) elevation of the main entrance. The warehouse volume is stucco-clad and topped by a flat roof with a parapet. Fenestration on the warehouse volume includes a corrugated-metal roll-up industrial door on the primary (east), north, and south elevations (Photograph 3). The administration volume is a very modest example of the Mid-Century Modern Style with elements including its one-story height, low, boxy, horizontal proportions, simple geometric form with a lack of exterior decoration, flat roof, mass-produced materials, simple windows, and industrially plain doors. The building is set back from the street with an asphalt-paved parking lot surrounding the primary (east) elevation, and an asphalt-paved service yard enclosed by a metal gate along the north, south, and rear (west) elevations. Landscaping includes trees and small plantings in concrete planters along the edge of the parking lot. The historic property boundary is limited to the property's APN (296-101-04). The property is in good condition.

Significance (cont.)

The following historic context is adapted from the *Built Environment Inventory and Evaluation Report for the Mercury Affordable Senior Apartments Project,* prepared in April 2026 by Dudek.

Historical Development of Orange County

The present-day territory of Orange County was established in 1769, about 35 miles southeast of Los Angeles. During the Spanish period in the 1770s, the area encompassed ranch lands surrounding Mission San Gabriel, in present-day Los Angeles County, and Mission San Juan Capistrano, which were used for grazing cattle, horses, and sheep. In 1810, José Antonio Yorba and Juan Pablo Peralta were formally granted land south and east of the Santa Ana River that became known as Rancho Santiago de Santa Ana (OCHS 2025).

In 1822, the political situation changed as Mexico won its independence from Spain, and the Orange County area became part of the Mexican Republic. Rancho Santiago de Santa Ana was subdivided into 44,000 acres of land grants for Mexican citizens to occupy and improve. By 1846, most of the land within present-day Orange County comprised ranches, and cattle ranching was the foundation of the local economy. When California became a state in 1850, Los Angeles County encompassed the present-day Orange County boundary. As a result, many of the ranches were sold to American settlers and developers during the late 1860s, along with the existing towns of Anaheim, Santa Ana, Tustin, Orange, Westminster, and Garden Grove, which had been founded during this period (OCHS 2025).

Agriculture emerged as a prosperous industry that benefited from the fertile soil and temperate climate in the region. After the development of new irrigation systems in the 1870s, more orchards were planted in the area, including walnut, apricot, and orange. Additionally, the Southern Pacific Railroad (SPRR) built the first local railroad through the area in 1875 from Los Angeles to Anaheim, which was extended to Santa Ana in the following two years. The SPRR and the Santa Fe Railroad (SFRR), which arrived in 1885, aided in population growth and the transportation of local produce. Additionally, the SPRR and SFRR enabled speculative real estate development to intensify in the 1880s as a wave of settlers arrived by train to Orange County and the greater Southern California region (OCHS 2025).

Orange County was established on August 1, 1889, following a vote by residents of Anaheim and the surrounding area to divide Los Angeles County. Initially, the proposed boundary between Los Angeles and Orange Counties was the San Gabriel River, but the boundary was later moved south along Coyote Creek. Although northern cities such as Anaheim voted against this measure because they wanted to be located toward the center of the new county, it passed with

overwhelming support from the rest of the area, and Santa Ana was chosen as the county seat in 1889 (OCHS 2025).

By the 1930s, Orange County produced a sixth of the nation's Valencia orange crop, and the citrus industry continued to dominate the area's economy throughout the early twentieth century until the end of World War II. During the 1950s, the area's sparsely populated agricultural landscape rapidly transformed into a residential area. Automobile-oriented development increased access to the once rural area, and the development of the Santa Ana Freeway (Interstate-5) in the 1950s further bolstered Orange County's growth. By 1963, Buena Park, Costa Mesa, La Palma, Garden Grove, Cypress, Westminster, Fountain Valley, Los Alamitos, San Juan Capistrano, and Villa Park all became incorporated cities within Orange County, and the County's population reached over one million residents. Planned communities in South Orange County were developed in the 1960s, including Irvine, Mission Viejo, Laguna Niguel, Aliso Viejo, Rancho Santa Margarita, and Ladera Ranch (OCHS 2025). Today, Orange County is primarily composed of residential properties and has over three million residents and 34 incorporated cities (OCHS 2025).

Historical Development of the City of Brea

Brea is located in Orange County and is named after the Spanish word for tar, which the foothills to the north were known to produce. During the Spanish period in the 1770s, the area was part of the lands under the jurisdiction of Rancho San Juan Cajon de Santa Ana. Private land grants were issued in the early 1820s, creating the rancho system of large agricultural estates. The land comprising present-day Brea was granted to Juan Pacifico Ontiveras by Governor Juan B. Alvarado in 1837 and was primarily used for cattle ranching. Ontiveras moved to Santa Barbara in 1850, and the ranch was divided and sold under the ranchero system (OCHS 2025; Robinson 1955: 1, 15; City of Brea 2017: 1).

The area of present-day Brea was purchased by Abel Stearns in 1863. After a drought in 1868, Stearns sold cattle land but did not divide the area that would become Brea. Instead, the area was leased for sheep pasture. Wool became a staple in the local economy and was sold to eastern textile factories (City of Brea 2017: 1). However, in 1895, Union Oil Company developed oil wells in the hills on 1,200 acres of land, and found success by 1898, beginning an oil boom in the area. In response to the growth of the oil industry in the area, the Atchison Topeka and Santa Fe Railway Company constructed the Olinda Branch from Fullerton to the oil fields in Brea in 1899. The Olinda Branch provided a fast new transit option for oil production in the area and opened access to oil industries throughout Southern California. Additionally, Pacific Electric had created a railway through Brea by 1911 for both passenger and freight business to support the growth of the area (White 2010: 5, 6). During the 1910s, the area was developed with small businesses and industries that supported oil production and became known as the Town of Brea. On February 23, 1917, the City was incorporated with a population of 752 residents (City of Brea 2026b: 1; NETR 2026b).

By 1920, the city focused on improving its infrastructure, including its water system, streetlights, roads, and traffic signals. The introduction of automobiles during this period facilitated the residential growth of the area by providing access to surrounding cities and industries. The Union Oil Company developed several residential neighborhoods near the city center to encourage residential settlement. Civic development followed with the establishment of the Brea Olinda Unified School District and the first Orange County library branch. Historical aerial photographs of the area show that, as oil production decreased in the 1940s, the citrus industry emerged as an economic leader. Access to nearby packing houses promoted the growth of the local citrus industry (City of Brea 2017: 3; UCSB 2026).

After the end of World War II in 1945, a massive wave of migration and a building boom occurred throughout California and Orange County. In Brea, neighborhoods replaced sprawling ranches and orchards to accommodate the need for housing, and new businesses replaced the agricultural industry (City of Brea 2017: 3). Residential and commercial development in the area continued into the 1950s and through the 1980s, and industrial development began primarily in the 1960s, with Brea appearing to be fully developed by the early 1990s (NETR 2026a). Development of the Orange Freeway (State Route 57) in the 1970s resulted in the growth of industrial parks and retail areas along major transit

corridors in the 1970s and 1980s. In the 1990s, the City initiated efforts to revitalize its downtown area. This process included community outreach, the relocation of historic homes, and the demolition of multiple blocks north of the intersection of Imperial Highway and Brea Boulevard. Public input allowed the City to plan around the needs of the community to provide essential amenities. As a result, the new downtown became a central entertainment and commercial destination (City of Brea 2017: 4). Presently, Brea has a population of about 47,3337 residents. The economy primarily comprises health care and social assistance professionals, manufacturing industries, and educational services (Data USA 2026).

Development of the Subject Property

The manufacturing building was constructed at 233 S. Berry Street in c. 1971 (OCLI 2026). Historical aerial photographs show that before its development, the subject property was part of an agricultural property from the late 1920s to the late 1960s (NETR 2026a). The City of Brea did not have the original building permits on file, and archival research was unable to uncover any information regarding the original construction of the subject property. The property's original builder and use are unknown. Google Street View images show that as of 2007, Yorba Linda Electric Inc. occupied the subject property and continue to operate the property to the present (Google Street View 2026). Yorba Linda Electric Inc. provides electrical services for residential and commercial properties in Orange County. The company appears to have been established by the early 1970s, as evidenced by a legal case involving a workplace safety incident during a service line installation in 1971, but research did not reveal any further information about the company (OSHRC 2026). According to historical aerial photographs, the subject property has not undergone any significant alterations since its construction (NETR 2026a).

Architectural Style: Mid-Century Modern Style (1945–1976)

Mid-Century Modern style reflected the International and Bauhaus styles popular in Europe in the early twentieth century. This style and its designers (e.g., Mies Van der Rohe and Gropius) were disrupted by World War II and moved to the United States. During World War II, the United States established itself as a burgeoning manufacturing and industrial leader, with incredible demand for modern buildings to reflect modern products. As a result, many industrial buildings were often "decorated boxes"—plain buildings with applied ornament that suited the era, to appear more modern without detracting from the importance of the activity inside the building. Following World War II, the United States had a focus on forward thinking, which sparked architectural movements like Mid-Century Modernism. Practitioners of the style were focused on the most cutting-edge materials and techniques. Architects throughout Southern California implemented the design aesthetics made famous by early Modernists like Richard Neutra and Frank Lloyd Wright, who created a variety of modern architectural forms. Like other buildings of this era, Mid-Century Modern buildings had to be quickly assembled and use modern materials that could be mass-produced. Both residences and offices designed in this style expressed its structure and materials, displayed large expanses of glass, and had an open interior plan (McAlester 2019: 630-646; Morgan 2004).

Character-defining features include (McAlester 2019: 630-646; Morgan 2004):

- One to two stories in height
- Low, boxy, horizontal proportions
- Simple geometric forms with a lack of exterior decoration
- Flat roofed without coping at roof line; flat roofs hidden behind parapets or cantilevered canopies
- Expressed post-and-beam construction in wood or steel
- Flat exterior walls with smooth sheathing typically displaying whites, buffs, and pale pastel colors
- Mass-produced materials
- Simple windows (metal or wood) flush-mounted and clerestory

- Industrially plain doors
- Large window groupings

Statement of Significance

233 S. Berry Street was evaluated in consideration of the NRHP and CRHR criteria, City of Brea's Criteria for Designation of Individual Historic Resources, and integrity requirements. As a result of the evaluation, 233 S. Berry Street is recommended not to be eligible for inclusion in the NRHP, CRHR, or the City of Brea's Criteria for Designation of Individual Historic Resources, due to a lack of significant associations and architectural merit.

NRHP/CRHR Evaluation

Criterion A/1: Events

Under NRHP and CRHR Criterion A/1, archival research did not find that 233 S. Berry Street possesses a direct and important association with any events or pattern of events significant in local, state, or national history. The subject property was constructed in c. 1971. Although the original occupant is unknown, it was likely developed as an industrial property given the building's utilitarian design and current use. It was constructed during a period of increased industrial development in Brea in the 1970s. After the decline of the oil and citrus industries in the area during the post-war period, residential, commercial, and industrial construction rapidly increased in the area. Construction of the Orange Freeway in the 1970s resulted in an increase in industrial and commercial development along major transit corridors through the 1980s. Although the subject property has an association with the development of the area, it did not contribute in any significant way to that pattern of development. The subject property is a typical example of a utility building constructed during the early 1970s to serve the region's growing population. Post-World War II growth was an important trend both regionally and in California; however, this property did not contribute in any significant way to this pattern of development. It is also not known to be directly associated with events that have made a significant contribution to the history of Brea, Orange County, California, or the nation. Research also did not identify a significant historical event that occurred on the property. Therefore, the subject property does not meet NRHP/CRHR Criterion A/1 and is recommended not eligible.

Criterion B/2: Significant Persons

Under NRHP and CRHR Criterion B/2, 233 S. Berry Street lacks a significant association with the productive life of any person important in local, state, or national history. Research did not identify information that would indicate the subject property has an association with members of Yorba Linda Electric Inc. that would rise to the threshold of significance required for eligibility. Archival research uncovered no person directly associated with the subject property or anyone known to have had direct involvement in the operation of the subject property. Due to a lack of identified significant associations with any persons important in our past, the subject property is recommended not eligible under NRHP/CRHR Criterion B/2.

Criterion C/3: Design/Construction

Under NRHP and CRHR Criterion C/3, 233 S. Berry Street does not embody the distinctive characteristics of a type, period, or method of construction that would represent a significant and distinguishable entity. The subject property is a modest and architecturally undistinguished example of a utilitarian building constructed c. 1971 that displays elements of the Mid-Century Modern style (e.g., its one-story height, low, boxy, horizontal proportions, simple geometric form with a lack of exterior decoration, flat roof, mass-produced materials, simple windows, and industrially plain doors). Due to its geometric form, mass-produced materials, and minimal ornamentation, Mid-Century Modern design elements were commonly applied to modest utilitarian industrial buildings in the 1970s. As an undistinguished example of the

style, the subject property represents one of many such industrial buildings constructed in Brea and Orange County in the 1970s. Archival research did not identify an architect, designer, or builder. However, because it is a common, purpose-built building, this building does not possess high artistic value and is not the product of an architect or builder attempting to articulate the design principles or aesthetics of a formal architectural style or substyle. The property appears to have been constructed through already well-documented and common construction techniques and methods, and it does not appear to possess high artistic value by articulating a particular concept of design to the extent that it expresses an aesthetic ideal. It does not contribute to the significance of a potential or existing historic district. Overall, the property lacks sufficient design and construction value to meet NRHP/CRHR Criterion C/3 and is recommended not eligible under this criterion.

Criterion D/4: Data Potential

Under NRHP and CRHR Criterion D, the subject property is not significant as a source, or likely source, of important historical information, nor does it appear likely to yield important information about historic construction methods, materials, or technologies. This technology is well understood through contemporary trade journals and scientific monographs. As such, the subject property lacks significance under NRHP/CRHR Criterion D/4.

City of Brea's Criteria for Designation of Individual Historic Resources

Criterion A: It exemplifies or reflects special elements of the city's cultural, social, economic, political, aesthetic, engineering, architectural, or natural history

As discussed in NRHP/CRHR Criterion A/1, research does not indicate that the subject property was associated with events or developmental trends significant to the City of Brea. The subject property is a industrial building that was constructed to support a portion of Brea that experienced steady industrial growth through the 1970s. Research did not identify the subject property as reflecting special elements of the city's cultural, social, economic, political, or natural history. Additionally, as discussed in NRHP/CRHR Criterion C/3, the subject property is a utilitarian building that does not represent special elements in the city's aesthetic, engineering, or architectural history. Therefore, it is recommended not eligible under the City of Brea's Criterion A.

Criterion B: It is identified with persons or events significant in local, state, or national history

As discussed in NRHP/CRHR B/2 and NRHP/CRHR A/1, research does not indicate that the subject property was associated with persons or events significant in local, state, or national history. The subject property has operated as a manufacturing building since its construction. Archival research did not identify any members of Yorba Linda Electric Inc. associated with the subject property who have made a significant contribution to our past or any significant events associated with the property. Therefore, it is recommended not eligible under the City of Brea's Criterion B.

Criterion C: It embodies distinctive characteristics of a style, type, period, or method of construction, or is a valuable example of the use of indigenous materials or craftsmanship

As discussed in NRHP/CRHR Criterion C/3, the subject property does not fully embody the distinctive characteristics of a style, type, period, or method of construction, nor is it a valuable example of the use of indigenous materials or craftsmanship. The subject property is a industrial building constructed c. 1971 that displays elements of the Mid-Century Modern style. It does not contain enough elements to distinguishably reflect the style. The subject property is an undistinguished example of a 1970s building and represents one of many such buildings constructed in Brea. Likewise, research did not indicate that the subject property exemplified indigenous materials or craftsmanship. Therefore, it is recommended not eligible under the City of Brea's Criterion C.

Criterion D: It is representative of the work of a notable builder, designer, or architect

As discussed in NRHP/CRHR Criterion C/3, the subject property does not appear to be representative of the work of a notable architect, builder, or designer. The original building permit for the building was not on file with the city, and additional research did not identify an architect or builder for the property. The property is not known to be associated with a notable architect, builder, or designer. Therefore, it is recommended not eligible under the City of Brea's Criterion D.

Criterion E: It contributes to the significance of a historic area, being a geographically definable area possessing a concentration of historic or scenic properties or thematically related grouping of properties which contribute to each other and are unified aesthetically by plan or physical development

Research did not reveal that the subject property is included in a geographically definable area possessing a concentration of historic or scenic properties or a thematically related grouping of properties which contribute to each other and are unified aesthetically by plan or physical development (i.e., a district). The building on the subject property was constructed c. 1971 during a time of increased industrial development in Brea. It is neither a concentration of historic or scenic properties, nor a thematically related grouping of properties unified by plan or physical development. It does not appear to contribute to a previously identified historic district, and the subject property does not appear to be part of a grouping of properties that contribute to each other and are unified aesthetically by plan or physical development. Therefore, it is recommended not eligible under the City of Brea's Criterion E.

Criterion F: It embodies elements of architectural design, detail, materials, or craftsmanship that represent a significant structural or architectural achievement or innovation

As discussed in NRHP/CRHR Criterion C/3, the subject property does not embody elements of architectural design, detail, materials, or craftsmanship that represent a significant structural or architectural achievement or innovation. Although the subject property possesses elements of the Mid-Century Modern style, it does not contain enough distinctive characteristics of the style to be a significant example. Likewise, the subject property was constructed with common and well-documented materials and construction techniques. Therefore, it is recommended not eligible under the City of Brea's Criterion F.

Criterion G: It reflects significant geographical patterns, including those associated with different eras of settlement and growth, particular transportation modes, or distinctive examples of park or community planning

The subject property does not reflect significant geographical patterns, including those associated with different eras of settlement and growth, particular transportation modes, or distinctive examples of park or community planning. The subject property does not appear to be a significant example of civic development from the early 1970s, as it simply followed an existing pattern of development in Brea. The surrounding area has been significantly altered by further industrial and residential development since the subject property's date of construction (c. 1971). Therefore, it is recommended not eligible under the City of Brea's Criterion G.

Criterion H: It is one of the few remaining examples in the city, region, state, or nation possessing distinguishing characteristics of an architectural or historical type or specimen

As discussed in NRHP/CRHR Criterion C/3, the subject property does not contain enough distinguishing characteristics of the Mid-Century Modern style to be considered a significant example of the style. Furthermore, it is a purpose-built utilitarian building that does not exemplify the distinguishing characteristics of the Mid-Century Modern style. The subject property is a ubiquitous typology exhibiting the influence of the Mid-Century Modern style, one of the most popular styles in Southern California in the 1970s. As such, it is not one of the few remaining examples in the city, region, state, or nation. Therefore, it is recommended not eligible under the City of Brea's Criterion H.

Integrity Considerations

Integrity is the ability of a property to convey its significance. Because the concept of integrity is based on significance, the assessment of a property's integrity can only proceed after its significance has been fully established. Because the subject property lacks sufficient significance to meet any of the criteria for listing in the NRHP, CRHR, or the City of Brea's Historic Resources Register, an integrity analysis was considered immaterial for 233 S. Berry Street.

Description (cont.)

It features recessed fenestration beneath a tiered overhang, including a set of fully glazed storefront doors and metal-sash fixed windows on the primary (west) elevation, and metal-sash fixed windows on the north and south elevations (Photograph 2). The office volume is a very modest example of the International style, displaying elements including asymmetry, repeating fenestration, flat roof with cantilevered projections, little ornamentation, stucco cladding, and large concrete expanses. Cladding on the manufacturing volume is a combination of stucco panels along the bottom third and concrete panels sculpted with vertical lines along the top three-quarters of the northwest and southwest corners of the building, and stucco-cladding on the rest of the building. Likewise, it is topped by a flat roof with a parapet. Fenestration on the manufacturing volume includes a set of metal doors on the south elevation that are accessed by a concrete ramp with metal support rails, and corrugated-metal roll-up industrial doors on the rear (east) elevation (Photograph 3). The building is set back from the street with an asphalt-paved parking lot surrounding the south elevation, and an asphalt-paved service yard enclosed by a concrete masonry unit wall along the rear (east) of the building. Landscaping includes trees, grass lawns, and small plantings along the primary (west) elevation and the south parking lot. The historic property boundary is limited to the property's APN (296-141-01). The property is in good condition.

Significance (cont.)

The following historic context is adapted from the *Built Environment Inventory and Evaluation Report for the Mercury Affordable Senior Apartments Project,* prepared in April 2026 by Dudek.

Historical Development of Orange County

The present-day territory of Orange County was established in 1769, about 35 miles southeast of Los Angeles. During the Spanish period in the 1770s, the area encompassed ranch lands surrounding Mission San Gabriel, in present-day Los Angeles County, and Mission San Juan Capistrano, which were used for grazing cattle, horses, and sheep. In 1810, José Antonio Yorba and Juan Pablo Peralta were formally granted land south and east of the Santa Ana River that became known as Rancho Santiago de Santa Ana (OCHS 2025).

In 1822, the political situation changed as Mexico won its independence from Spain, and the Orange County area became part of the Mexican Republic. Rancho Santiago de Santa Ana was subdivided into 44,000 acres of land grants for Mexican citizens to occupy and improve. By 1846, most of the land within present-day Orange County comprised ranches, and cattle ranching was the foundation of the local economy. When California became a state in 1850, Los Angeles County encompassed the present-day Orange County boundary. As a result, many of the ranches were sold to American settlers and developers during the late 1860s, along with the existing towns of Anaheim, Santa Ana, Tustin, Orange, Westminster, and Garden Grove, which had been founded during this period (OCHS 2025).

Agriculture emerged as a prosperous industry that benefited from the fertile soil and temperate climate in the region. After the development of new irrigation systems in the 1870s, more orchards were planted in the area, including walnut, apricot, and orange. Additionally, the Southern Pacific Railroad (SPRR) built the first local railroad through the area in 1875 from Los Angeles to Anaheim, which was extended to Santa Ana in the following two years. The SPRR and the Santa Fe Railroad (SFRR), which arrived in 1885, aided in population growth and the transportation of local produce. Additionally, the SPRR and SFRR enabled speculative real estate development to intensify in the 1880s as a wave of settlers arrived by train to Orange County and the greater Southern California region (OCHS 2025).

Orange County was established on August 1, 1889, following a vote by residents of Anaheim and the surrounding area to divide Los Angeles County. Initially, the proposed boundary between Los Angeles and Orange Counties was the San Gabriel River, but the boundary was later moved south along Coyote Creek. Although northern cities such as Anaheim

voted against this measure because they wanted to be located toward the center of the new county, it passed with overwhelming support from the rest of the area, and Santa Ana was chosen as the county seat in 1889 (OCHS 2025).

By the 1930s, Orange County produced a sixth of the nation's Valencia orange crop, and the citrus industry continued to dominate the area's economy throughout the early twentieth century until the end of World War II. During the 1950s, the area's sparsely populated agricultural landscape rapidly transformed into a residential area. Automobile-oriented development increased access to the once rural area, and the development of the Santa Ana Freeway (Interstate-5) in the 1950s further bolstered Orange County's growth. By 1963, Buena Park, Costa Mesa, La Palma, Garden Grove, Cypress, Westminster, Fountain Valley, Los Alamitos, San Juan Capistrano, and Villa Park all became incorporated cities within Orange County, and the County's population reached over one million residents. Planned communities in South Orange County were developed in the 1960s, including Irvine, Mission Viejo, Laguna Niguel, Aliso Viejo, Rancho Santa Margarita, and Ladera Ranch (OCHS 2025). Today, Orange County is primarily composed of residential properties and has over three million residents and 34 incorporated cities (OCHS 2025).

Historical Development of the City of Brea

Brea is located in Orange County and is named after the Spanish word for tar, which the foothills to the north were known to produce. During the Spanish period in the 1770s, the area was part of the lands under the jurisdiction of Rancho San Juan Cajon de Santa Ana. Private land grants were issued in the early 1820s, creating the rancho system of large agricultural estates. The land comprising present-day Brea was granted to Juan Pacifico Ontiveras by Governor Juan B. Alvarado in 1837 and was primarily used for cattle ranching. Ontiveras moved to Santa Barbara in 1850, and the ranch was divided and sold under the ranchero system (OCHS 2025; Robinson 1955: 1, 15; City of Brea 2017: 1).

The area of present-day Brea was purchased by Abel Stearns in 1863. After a drought in 1868, Stearns sold cattle land but did not divide the area that would become Brea. Instead, the area was leased for sheep pasture. Wool became a staple in the local economy and was sold to eastern textile factories (City of Brea 2017: 1). However, in 1895, Union Oil Company developed oil wells in the hills on 1,200 acres of land, and found success by 1898, beginning an oil boom in the area. In response to the growth of the oil industry in the area, the Atchison Topeka and Santa Fe Railway Company constructed the Olinda Branch from Fullerton to the oil fields in Brea in 1899. The Olinda Branch provided a fast new transit option for oil production in the area and opened access to oil industries throughout Southern California. Additionally, Pacific Electric had created a railway through Brea by 1911 for both passenger and freight business to support the growth of the area (White 2010: 5, 6). During the 1910s, the area was developed with small businesses and industries that supported oil production and became known as the Town of Brea. On February 23, 1917, the City was incorporated with a population of 752 residents (City of Brea 2026b: 1; NETR 2026b).

By 1920, the city focused on improving its infrastructure, including its water system, streetlights, roads, and traffic signals. The introduction of automobiles during this period facilitated the residential growth of the area by providing access to surrounding cities and industries. The Union Oil Company developed several residential neighborhoods near the city center to encourage residential settlement. Civic development followed with the establishment of the Brea Olinda Unified School District and the first Orange County library branch. Historical aerial photographs of the area show that, as oil production decreased in the 1940s, the citrus industry emerged as an economic leader. Access to nearby packing houses promoted the growth of the local citrus industry (City of Brea 2017: 3; UCSB 2026).

After the end of World War II in 1945, a massive wave of migration and a building boom occurred throughout California and Orange County. In Brea, neighborhoods replaced sprawling ranches and orchards to accommodate the need for housing, and new businesses replaced the agricultural industry (City of Brea 2017: 3). Residential and commercial development in the area continued into the 1950s and through the 1980s, and industrial development began primarily in the 1960s, with Brea appearing to be fully developed by the early 1990s (NETR 2026a). Development of the Orange

Freeway (State Route 57) in the 1970s resulted in the growth of industrial parks and retail areas along major transit corridors in the 1970s and 1980s. In the 1990s, the City initiated efforts to revitalize its downtown area. This process included community outreach, the relocation of historic homes, and the demolition of multiple blocks north of the intersection of Imperial Highway and Brea Boulevard. Public input allowed the City to plan around the needs of the community to provide essential amenities. As a result, the new downtown became a central entertainment and commercial destination (City of Brea 2017: 4). Presently, Brea has a population of about 47,3337 residents. The economy primarily comprises health care and social assistance professionals, manufacturing industries, and educational services (Data USA 2026).

Development of the Subject Property

Archival research indicates that the manufacturing building at 114 S. Berry Street was constructed c. 1977 (OCLI 2026). Historic aerial photographs show that before its development, the subject property was part of an agricultural property from the late 1920s until the mid-1960s, when it appears undeveloped. It remained undeveloped for several years before the construction of the subject property, and does not appear to have undergone any substantial alterations since (NETR 2026a; UCSB 2026).

Research was unable to identify the original owner or occupant of the subject property. Likewise, it is unknown who was associated with the subject property between 1977 and 2011. According to Google Street View images, Blaine Convention Services occupied the building from 2011 to 2020 (Google Street View 2026). Building permits indicate that the property was owned by IDI Logistics from 2021 to 2022, before TAPB Properties LLC owned the property from 2023 to 2024 (City of Brea 2026a: Permits #2021-01614, #2022-00119, #2022-01292, & #2022-01303). However, research was unable to reveal further information about Blaine Convention Services, IDI Logistics, and TAPB Properties LLC. Under the ownership of TAPB Properties LLC in 2022, Google Street View images show that the personal care products company, Dr. Squatch, began occupying the subject property (Google Street View 2026). It is unknown when the company was founded. The subject property appears to be one of many manufacturing sites for the company's products in Southern California. Dr. Squatch headquarters are located in Marina del Rey, California, and were completed in 2022 (Studios 2026). It has continued to operate on the subject property to the present.

Architectural Style: International Style (c. 1925-Present)

The International style came to the United States in the 1930s after gaining popularity in Germany, Holland, and France through architects such as Walter Gropius and Ludwig Mies van der Rohe. The style spread in part because of Henry-Russell Hitchcock and Philip Johnson's 1932 book, titled The International Style: Architecture Since 1922, originally produced as the catalog for the New York Museum of Modern Art's exhibition showcasing the style. In their book, Hitchcock and Johnson introduced the term International and identified its three architectural principles as volume, regularity, and avoiding the application of ornament. These three principles are the baseline for the American International style (SFPD 2011: 168; McAlester 2019: 616–621).

The main difference between International style buildings and their predecessors was that International style buildings did not use exterior solid masonry for support. Instead, they often depended on a metal interior skeleton and used the curtain wall concept to clad walls in glass. This dependency on the metal frame resulted in windows hung in repeating patterns, which brought a further level of order to these already stripped-down buildings. Mies's designs specifically focused on perfection through mathematics, generating rectangular curtain wall designs displaying strong roots in the philosophy of the Bauhaus. This movement incorporated simple and precise designs and used mass-produced materials such as concrete, steel, and glass, paired with functionality in design (SFPD 2011: 168; McAlester 2019: 616–621).

The International style remained popular after World War II and through the 1970s, as the clean and geometric

characteristics of the style provided efficient construction for large buildings. Over time architects began to diverge from the formulaic constraints inherent in the International style by including asymmetrical features such as cantilevered projections, although the style's easily replicable forms, materials, and minimal ornamentation continued to make it a popular choice for utilitarian and corporate buildings. In the 1960s, the style became the dominant style for skyscrapers, emphasizing volume over mass through the use of lightweight, mass-produced materials. By the 1970s, it was the most common style for corporate offices, with aspects of the style still being applied today (Hitchcock and Johnson 1995: 33–37; Britannica 2020; McAlester 2019: 620).

Characteristics of the International style:

- Vertical box
- Often set on "pilotis" or stilts, giving the appearance of floating
- Asymmetry
- Windows and wall surfaces are on the same plane, providing the look of a taut skin
- Tinted and/or mirrored glass
- Repeating pattern of fenestration
- Flat roof structure often with cantilevered projections
- Little decoration or ornamentation
- Open interior spaces
- Smooth wall surfaces, usually clad with stucco
- Large concrete expanses
- Use of modern materials such as metal windows, concrete, and steel

Typology: Manufacturing Building (1887-1980)

Manufacturing during the late nineteenth century slowly increased along with the growth of Southern California as settlers moved to the region. Early industries often consisted of small-scale operations, such as flour mills and carpentry shops, and grew along with the needs of the increasing population. During the twentieth century, manufacturing embraced technological advancements that opened new markets for consumers, including electricity, automobiles, refrigeration, film, and aviation. Railroads facilitated the transportation of products across the state and nation, and by the 1910s, the Port of Los Angeles provided access to international markets. By 1929, California was ranked as the fifth largest manufacturing industry in the nation after Michigan, Pennsylvania, Missouri, and Ohio, with Los Angeles leading the state's production and output. The fast growth of the population, availability of raw materials, and access to wider markets saw the increased development of manufacturing industries throughout Southern California (LSA 2018: 118):

Consumer culture drove the expansion of manufacturing industries, and creators of household items emerged as prominent manufacturers. The post-World War II era produced a variety of manufactured items using the increased power created from advancements in electricity production, such as hydroelectric production and diesel-burning generators. Industrial buildings were often purpose-built, utilitarian buildings designed in the styles popular during their construction. They were commonly one-story in height with a large plan encompassing versatile open spaces used as workshops. Manufacturers of similar products were often located in the same area, with their brand names displayed on the exterior of the facility (LSA 2018: 119):

Character-defining features of Manufacturing Buildings include (LSA 2018: 121):

- One or more related utilitarian buildings
- May possess branding or company logos on the building exterior

- May retain distinctive equipment or building elements that reflect a particular kind of manufacturing process
- May have programmatic elements on the façade that denote what was manufactured at the plant
- Often designed in prevalent architectural styles of the period

Statement of Significance

114 S. Berry Street was evaluated in consideration of the NRHP and CRHR criteria, City of Brea's Criteria for Designation of Individual Historic Resources, and integrity requirements. As a result of the evaluation, 114 S. Berry Street is recommended not to be eligible for inclusion in the NRHP, CRHR, or the City of Brea's Criteria for Designation of Individual Historic Resources, due to a lack of significant associations and architectural merit.

NRHP/CRHR Evaluation

Criterion A/1: Events

Under NRHP and CRHR Criterion A/1, archival research did not find that 114 S. Berry Street possesses a direct and important association with any events or pattern of events significant in local, state, or national history. The subject property was constructed c. 1977. Although the original occupant is unknown, it was likely developed as an industrial/manufacturing property given the building's utilitarian design and current use. It was constructed during a period of increased industrial development in Brea in the late 1970s. After the decline of the oil and citrus industries in the area during the post-World War II period, residential, commercial, and industrial construction rapidly increased. Construction of the Orange Freeway in the 1970s resulted in an increase in industrial and commercial development along major transit corridors through the 1980s. Although the subject property has an association with the industrial development of the area, it did not contribute in any significant way to that pattern of development. The subject property is representative of a typical industrial property following a pattern of industrial development that continued through the twentieth century. There is no indication that the construction of this specific building is associated with a pivotal movement in the history of the neighborhood or Brea. Therefore, the subject property does not meet NRHP/CRHR Criterion A/1 and is recommended not eligible.

Criterion B/2: Significant Persons

Under NRHP and CRHR Criterion B/2, 114 S. Berry Street lacks a significant association with the productive life of any person important in local, state, or national history. Archival research uncovered no person directly associated with the subject property or anyone known to have had direct involvement in the planning or operation of the subject property. Two occupants and two owners were identified between 2011 and 2026, including Blaine Convention Services (2011-2020), IDI Logistics (2021-2022), TAPB Properties LLC (2023-2024), and Dr. Squatch (2022-2026). Due to the lack of additional information, it is unlikely that these owners and occupants achieved individual significance within the history of Brea, Orange County, California, or the nation. Likewise, the majority of these owners and occupants were short-term, so the length and nature of their associations with the property do not warrant listing. Because of a lack of identified significant associations with any persons important in our past, the subject property is recommended not eligible under NRHP/CRHR Criterion B/2.

Criterion C/3: Design/Construction

Under NRHP and CRHR Criterion C/3, 114 S. Berry Street does not embody the distinctive characteristics of a type, period, or method of construction that would represent a significant and distinguishable entity. The subject property is a modest and architecturally undistinguished example of a utilitarian manufacturing building constructed c. 1977 that displays elements of the International Style (e.g., its asymmetry, repeating fenestration, flat roof with cantilevered projections, little ornamentation, stucco cladding, and large concrete expanses). Due to its geometric form, mass-

produced materials, and minimal ornamentation, International style design elements were commonly applied to modest utilitarian industrial buildings in the 1970s. As an undistinguished example of the style, the subject property represents one of many such industrial buildings constructed in Brea and Orange County in the 1970s. Archival research did not identify an architect, designer, or builder. However, because it is a common, purpose-built building, this combined office and manufacturing building does not possess high artistic values and is not the product of an architect or builder attempting to articulate the design principles or aesthetics of a formal architectural style or substyle. The property appears to have been constructed through already well-documented and common construction techniques and methods and does not appear to possess high artistic value by articulating a particular concept of design to the extent that it expresses an aesthetic ideal. It does not contribute to the significance of a potential or existing historic district. Overall, the property lacks sufficient design and construction value to meet NRHP/CRHR Criterion C/3 and is recommended not eligible under this criterion.

Criterion D/4: Data Potential

Under NRHP and CRHR Criterion D, the subject property is not significant as a source, or likely source, of important historical information, nor does it appear likely to yield important information about historical construction methods, materials, or technologies. This technology is well understood through contemporary trade journals and scientific monographs. As such, the subject property lacks significance under NRHP/CRHR Criterion D/4.

City of Brea's Criteria for Designation of Individual Historic Resources

Criterion A: It exemplifies or reflects special elements of the city's cultural, social, economic, political, aesthetic, engineering, architectural, or natural history

As discussed in NRHP/CRHR Criterion A/1, research does not indicate that the subject property was associated with events or developmental trends significant to the City of Brea. The subject property is located in a portion of Brea that experienced steady industrial growth through the 1970s. Research did not identify the subject property as reflecting special elements of the city's cultural, social, economic, political, or natural history event. Additionally, as discussed in NRHP/CRHR Criterion C/3, the subject property is a utilitarian manufacturing building that does not represent special elements in the city's aesthetic, engineering, or architectural history. Therefore, it is recommended not eligible under the City of Brea's Criterion A.

Criterion B: It is identified with persons or events significant in local, state, or national history

As discussed in NRHP/CRHR B/2 and NRHP/CRHR A/1, research does not indicate that the subject property was associated with persons or events significant in local, state, or national history. The subject property has operated as a manufacturing building since its construction. Archival research did not identify any particular individuals associated with the subject property who have made a significant contribution to our past or any significant events associated with the property. Therefore, it is recommended not eligible under the City of Brea's Criterion B.

Criterion C: It embodies distinctive characteristics of a style, type, period, or method of construction, or is a valuable example of the use of indigenous materials or craftsmanship

As discussed in NRHP/CRHR Criterion C/3, the subject property does not fully embody the distinctive characteristics of a style, type, period, or method of construction, nor is it a valuable example of the use of indigenous materials or craftsmanship. The subject property is a utilitarian manufacturing building constructed c. 1977 that displays elements of the International style. It does not contain enough elements to distinguishably reflect the style. The subject property is an undistinguished example of the style and represents one of many such industrial buildings constructed in Brea in the 1970s. Likewise, research did not indicate that the subject property exemplified indigenous materials or craftsmanship. Therefore, it is recommended not eligible under the City of Brea's Criterion C.

Criterion D: It is representative of the work of a notable builder, designer, or architect

As discussed in NRHP/CRHR Criterion C/3, the subject property does not appear to be representative of the work of a notable architect, builder, or designer. The original building permit for the building was not on file with the city, and additional research did not identify an architect or builder for the property. The property is not known to be associated with a notable architect, builder, or designer. Therefore, it is recommended not eligible under the City of Brea's Criterion D.

Criterion E: It contributes to the significance of a historic area, being a geographically definable area possessing a concentration of historic or scenic properties or thematically related grouping of properties which contribute to each other and are unified aesthetically by plan or physical development

Research did not reveal that the subject property is included in a geographically definable area possessing a concentration of historic or scenic properties or a thematically related grouping of properties which contribute to each other and are unified aesthetically by plan or physical development (i.e., a district). The manufacturing building on the subject property was constructed c. 1977 during a time of increased industrial development in Brea. It is neither a concentration of historic or scenic properties, nor a thematically related grouping of properties unified by plan or physical development. It does not appear to contribute to a previously identified historic district, and the subject property does not appear to be part of a grouping of properties that contribute to each other and are unified aesthetically by plan or physical development. Therefore, it is recommended not eligible under the City of Brea's Criterion E.

Criterion F: It embodies elements of architectural design, detail, materials, or craftsmanship that represent a significant structural or architectural achievement or innovation

As discussed in NRHP/CRHR Criterion C/3, the subject property does not embody elements of architectural design, detail, materials, or craftsmanship that represent a significant structural or architectural achievement or innovation. Although the subject property possesses elements of the International style, it does not contain enough distinctive characteristics of the style to be a significant example. Likewise, the subject property was constructed with common and well-documented materials and construction techniques. Therefore, it is recommended not eligible under the City of Brea's Criterion F.

Criterion G: It reflects significant geographical patterns, including those associated with different eras of settlement and growth, particular transportation modes, or distinctive examples of park or community planning

The subject property does not reflect significant geographical patterns, including those associated with different eras of settlement and growth, particular transportation modes, or distinctive examples of park or community planning. The subject property does not appear to be a significant example of industrial development from the late 1970s as it simply followed an existing pattern of industrial development in Brea. The surrounding area has been significantly altered by further industrial and residential development since the subject property's date of construction (c. 1977). Therefore, it is recommended not eligible under the City of Brea's Criterion G.

Criterion H: It is one of the few remaining examples in the city, region, state, or nation possessing distinguishing characteristics of an architectural or historical type or specimen

As discussed in NRHP/CRHR Criterion C/3, the subject property does not contain enough distinguishing characteristics of the International style to be considered a significant example of the style. Furthermore, it is a purpose-built utilitarian manufacturing building that does not exemplify the distinguishing characteristics of the International stye. The subject property is a ubiquitous typology exhibiting the influence of the International style, one of the most popular styles in

Southern California in the 1970s. As such, it is not one of the few remaining examples in the city, region, state, or nation. Therefore, it is recommended not eligible under the City of Brea's Criterion H.

Integrity Considerations

Integrity is the ability of a property to convey its significance. Because the concept of integrity is based on significance, the assessment of a property's integrity can only proceed after its significance has been fully established. Because the subject property lacks sufficient significance to meet any of the criteria for listing in the NRHP, CRHR, or the City of Brea's Historic Resources Register, an integrity analysis was considered immaterial for 114 S. Berry Street.

***P3a. Description:** (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

The subject property at 550 Mercury Lane is a one-story, double-height utilitarian manufacturing building with a rectangular plan sited on the south side of Mercury Lane between S. Berry Street to the west and the Brea Canyon Channel to the east (Photograph 1). The building is a tilt-up concrete building, mostly clad in smooth concrete with minimal scored vertical lines, with a flat roof and a slight parapet that wraps around the entire roof (Photograph 2). In 1984, a 140-foot by 112-foot addition was added to the west elevation of the building. The building's main entrance is located on the primary (north) elevation, situated toward the building's northeast corner. (See Continuation Sheet)

This property does not meet the criteria for the National Register of Historic Places (NRHP), California Register of Historical Resources (CRHR), or the City of Brea Historic Register. The property was evaluated in accordance with Section 106 of the National Historic Preservation Act (Section 106) and Section 15064.5 (a)(2)-(3) of the CEQA Guidelines using the criteria outlined in Section 5024.1 of the California Public Resources Code. The property is not considered a historic property for the purposes of Section 106 or a historical resource under CEQA. As such, this evaluation assigns a 6Z California Historical Resources Status Code to 550 Mercury Lane. See Continuation Sheet.

Description (cont.)

The main entrance is recessed behind the main concrete exterior, set back behind two narrow support columns clad in smooth concrete. The entrance area contains the majority of the building's fenestration, which is composed of a band of fixed, metal-frame windows that flank a single, fully glazed main entrance pedestrian door. T1-11 siding flanks the main entrance fenestration and spans its length above. The remaining elevations at the south, east, and west serve manufacturing functions with loading bays, vehicular metal roll-down doors, and limited fenestration (Photograph 3).

The building is set back from the street with its rear (south) elevation slightly below grade from Mercury Lane. An asphalt-paved parking lot enclosed by a metal fence and gate resides to the east. A concrete-paved service yard to the west and rear (south) of the building is accessed by a downward sloping concrete driveway to the west of the building. Landscaping includes a strip of lawn with some trees and shrubs in front of the main entrance at the building's primary (north) elevation. Additional trees are planted along the parcel's north and west elevations. The historic property boundary is limited to the property's APN (296-141-12). The property is in good condition.

Significance (cont.)

The following historic context is adapted from the *Built Environment Inventory and Evaluation Report for the Mercury Affordable Senior Apartments Project,* prepared in April 2026 by Dudek.

Historical Development of Orange County

The present-day territory of Orange County was established in 1769, about 35 miles southeast of Los Angeles. During the Spanish period in the 1770s, the area encompassed ranch lands surrounding Mission San Gabriel, in present-day Los Angeles County, and Mission San Juan Capistrano, which were used for grazing cattle, horses, and sheep. In 1810, José Antonio Yorba and Juan Pablo Peralta were formally granted land south and east of the Santa Ana River that became known as Rancho Santiago de Santa Ana (OCHS 2025).

In 1822, the political situation changed as Mexico won its independence from Spain, and the Orange County area became part of the Mexican Republic. Rancho Santiago de Santa Ana was subdivided into 44,000 acres of land grants for Mexican citizens to occupy and improve. By 1846, most of the land within present-day Orange County comprised ranches, and cattle ranching was the foundation of the local economy. When California became a state in 1850, Los Angeles County encompassed the present-day Orange County boundary. As a result, many of the ranches were sold to American settlers and developers during the late 1860s, along with the existing towns of Anaheim, Santa Ana, Tustin, Orange, Westminster, and Garden Grove, which had been founded during this period (OCHS 2025).

Agriculture emerged as a prosperous industry that benefited from the fertile soil and temperate climate in the region. After the development of new irrigation systems in the 1870s, more orchards were planted in the area, including walnut, apricot, and orange. Additionally, the Southern Pacific Railroad (SPRR) built the first local railroad through the area in 1875 from Los Angeles to Anaheim, which was extended to Santa Ana in the following two years. The SPRR and the Santa Fe Railroad (SFRR), which arrived in 1885, aided in population growth and the transportation of local produce. Additionally, the SPRR and SFRR enabled speculative real estate development to intensify in the 1880s as a wave of settlers arrived by train to Orange County and the greater Southern California region (OCHS 2025).

Orange County was established on August 1, 1889, following a vote by residents of Anaheim and the surrounding area to divide Los Angeles County. Initially, the proposed boundary between Los Angeles and Orange Counties was the San Gabriel River, but the boundary was later moved south along Coyote Creek. Although northern cities such as

Anaheim voted against this measure because they wanted to be located toward the center of the new county, it passed with overwhelming support from the rest of the area, and Santa Ana was chosen as the county seat in 1889 (OCHS 2025).

By the 1930s, Orange County produced a sixth of the nation's Valencia orange crop, and the citrus industry continued to dominate the area's economy throughout the early twentieth century until the end of World War II. During the 1950s, the area's sparsely populated agricultural landscape rapidly transformed into a residential area. Automobile-oriented development increased access to the once rural area, and the development of the Santa Ana Freeway (Interstate-5) in the 1950s further bolstered Orange County's growth. By 1963, Buena Park, Costa Mesa, La Palma, Garden Grove, Cypress, Westminster, Fountain Valley, Los Alamitos, San Juan Capistrano, and Villa Park all became incorporated cities within Orange County, and the County's population reached over one million residents. Planned communities in South Orange County were developed in the 1960s, including Irvine, Mission Viejo, Laguna Niguel, Aliso Viejo, Rancho Santa Margarita, and Ladera Ranch (OCHS 2025). Today, Orange County is primarily composed of residential properties and has over three million residents and 34 incorporated cities (OCHS 2025).

Historical Development of the City of Brea

Brea is located in Orange County and is named after the Spanish word for tar, which the foothills to the north were known to produce. During the Spanish period in the 1770s, the area was part of the lands under the jurisdiction of Rancho San Juan Cajon de Santa Ana. Private land grants were issued in the early 1820s, creating the rancho system of large agricultural estates. The land comprising present-day Brea was granted to Juan Pacifico Ontiveras by Governor Juan B. Alvarado in 1837 and was primarily used for cattle ranching. Ontiveras moved to Santa Barbara in 1850, and the ranch was divided and sold under the ranchero system (OCHS 2025; Robinson 1955: 1, 15; City of Brea 2017: 1).

The area of present-day Brea was purchased by Abel Stearns in 1863. After a drought in 1868, Stearns sold cattle land but did not divide the area that would become Brea. Instead, the area was leased for sheep pasture. Wool became a staple in the local economy and was sold to eastern textile factories (City of Brea 2017: 1). However, in 1895, Union Oil Company developed oil wells in the hills on 1,200 acres of land, and found success by 1898, beginning an oil boom in the area. In response to the growth of the oil industry in the area, the Atchison Topeka and Santa Fe Railway Company constructed the Olinda Branch from Fullerton to the oil fields in Brea in 1899. The Olinda Branch provided a fast new transit option for oil production in the area and opened access to oil industries throughout Southern California. Additionally, Pacific Electric had created a railway through Brea by 1911 for both passenger and freight business to support the growth of the area (White 2010: 5, 6). During the 1910s, the area was developed with small businesses and industries that supported oil production and became known as the Town of Brea. On February 23, 1917, the City was incorporated with a population of 752 residents (City of Brea 2026b: 1; NETR 2026b).

By 1920, the city focused on improving its infrastructure, including its water system, streetlights, roads, and traffic signals. The introduction of automobiles during this period facilitated the residential growth of the area by providing access to surrounding cities and industries. The Union Oil Company developed several residential neighborhoods near the city center to encourage residential settlement. Civic development followed with the establishment of the Brea Olinda Unified School District and the first Orange County library branch. Historical aerial photographs of the area show that, as oil production decreased in the 1940s, the citrus industry emerged as an economic leader. Access to nearby packing houses promoted the growth of the local citrus industry (City of Brea 2017: 3; UCSB 2026).

After the end of World War II in 1945, a massive wave of migration and a building boom occurred throughout California and Orange County. In Brea, neighborhoods replaced sprawling ranches and orchards to accommodate

the need for housing, and new businesses replaced the agricultural industry (City of Brea 2017: 3). Residential and commercial development in the area continued into the 1950s and through the 1980s, and industrial development began primarily in the 1960s, with Brea appearing to be fully developed by the early 1990s (NETR 2026a). Development of the Orange Freeway (State Route 57) in the 1970s resulted in the growth of industrial parks and retail areas along major transit corridors in the 1970s and 1980s. In the 1990s, the City initiated efforts to revitalize its downtown area. This process included community outreach, the relocation of historic homes, and the demolition of multiple blocks north of the intersection of Imperial Highway and Brea Boulevard. Public input allowed the City to plan around the needs of the community to provide essential amenities. As a result, the new downtown became a central entertainment and commercial destination (City of Brea 2017: 4). Presently, Brea has a population of about 47,3337 residents. The economy primarily comprises health care and social assistance professionals, manufacturing industries, and educational services (Data USA 2026).

Development of the Subject Property

Historic aerial photographs show that the subject property's land was originally part of an agricultural property from the late 1920s to the late 1960s (NETR 2026; UCSB 2026). The industrial building at 550 Mercury Lane was built in c. 1980 (NETR 2026). The building's current air conditioning manufacturer tenant, SPX Cooling Technologies (also known as Recold), has occupied the building since at least 1982 and is likely the original tenant (City of Brea 2026a). According to the SPX Cooling Technologies' website, the Recold company was established in 1932 in Brea, California (SPX Cooling Tech, LLC 2026a). Although newspaper research confirmed that the company began in 1932, research could not confirm that Recold was established in Brea. Based on the number of offices in Los Angeles in the 1950s and 1960s, it appears likely that the company began in Los Angeles. H.T. (Hy) Jarvis, president and founder of Recold Corp., started the company as a refrigeration retailer that transformed into an air conditioning retailer, and later manufacturer (Los Angeles Mirror 1958: 23). The company "grew from a one-man operation to become the largest industrial refrigeration and air-conditioning company in the West" by 1957 (LAT 1957: 36). In 1957, Recold projected to have sold approximately $8 million in sales by 1960 (Los Angeles Mirror 1958: 23). Newspaper research revealed no information regarding the subject property's original construction or its relationship to the current tenant. In 1984, permit # 84-3008 was filed for a 140 foot by 112 foot addition to existing tilt-up building, completed by architect/engineering firm Correia and Christian and contractor CB Construction (City of Brea 2026a). The addition nearly doubled the size of the original building. Newspaper research uncovered no information regarding the architect/engineer or contractor.

In 2005, SPX Cooling Technologies formed as one company that merged several existing cooling companies: Recold, Marley, Balcke, Ceramic, Davenport, and Hamon Dry Cooling (SPX Cooling Tech, LLC 2026a). SPX Cooling Technologies currently occupies the subject property and has over 150 global offices, subsidiaries, and partners, with headquarters based in Overland Park, Kansas (SPX Cooling Tech, LLC 2026b).

Typology: Manufacturing Buildings (1887-1980)

Manufacturing during the late nineteenth century slowly increased along with the growth of Southern California as settlers moved to the region. Early industries often consisted of small-scale operations, such as flour mills and carpentry shops, and grew along with the needs of the increasing population. During the twentieth century, manufacturing embraced technological advancements that opened new markets for consumers, including electricity, automobiles, refrigeration, film, and aviation. Railroads facilitated the transportation of products across the state and nation, and by the 1910s, the Port of Los Angeles provided access to international markets. By 1929, California was ranked as the fifth largest manufacturing industry in the nation after Michigan, Pennsylvania, Missouri, and Ohio, with Los Angeles leading the state's production and output. The fast growth of the population, availability of raw materials, and access to wider markets saw the increased development of manufacturing industries throughout Southern California (LSA

2018: 118):

Consumer culture drove the expansion of manufacturing industries, and creators of household items emerged as prominent manufacturers. The post-World War II era produced a variety of manufactured items using the increased power created from advancements in electricity production, such as hydroelectric production and diesel-burning generators. Industrial buildings were often purpose-built, utilitarian buildings designed in the styles popular during their construction. They were commonly one-story in height with a large plan encompassing versatile open spaces used as workshops. Manufacturers of similar products were often located in the same area, with their brand names displayed on the exterior of the facility (LSA 2018: 119):

Character-defining features of Manufacturing Buildings include (LSA 2018: 121):

- One or more related utilitarian buildings
- May possess branding or company logos on the building exterior
- May retain distinctive equipment or building elements that reflect a particular kind of manufacturing process
- May have programmatic elements on the façade that denote what was manufactured at the plant
- Often designed in prevalent architectural styles of the period

Statement of Significance

550 Mercury Lane was evaluated in consideration of the NRHP and CRHR criteria, City of Brea's Criteria for Designation of Individual Historic Resources, and integrity requirements. As a result of the evaluation, 550 Mercury Lane is recommended not to be eligible for inclusion in the NRHP, CRHR, or the City of Brea's Criteria for Designation of Individual Historic Resources, due to a lack of significant associations and architectural merit.

NRHP/CRHR Evaluation

Criterion A/1: Events

Under NRHP and CRHR Criterion A/1, archival research did not find that 550 Mercury Lane possesses a direct and important association with any events or pattern of events significant in local, state, or national history. The subject property was constructed in ca. 1980. Although the original occupant is unknown, the subject property was likely developed as an industrial/manufacturing property for Recold, given the building's utilitarian design and current use and that Recold is the current occupant and has occupied the building since at least 1982. It was constructed during a period of increased industrial development in Brea. After the decline of the oil and citrus industries in the area during the post-World War II period, residential, commercial, and industrial construction rapidly increased in the area. After the construction of the Orange Freeway in the 1970s, industrial and commercial development occurred along major transit corridors in the 1970s and 1980s. Although the subject property has an association with the industrial development of the area, it did not contribute in any significant way to that pattern of development. The subject property is representative of a typical industrial property constructed during the early 1980s. It was neither the first nor the last of its type and was merely following a pattern of industrial development that continued through the twentieth century. There is no indication that the construction of this specific building is associated with a pivotal movement in the history of the neighborhood or Brea. Additionally, although the building was constructed as a manufacturing plant for Recold, a successful air conditioning manufacturing company, Recold was established long before the subject property was constructed, in 1932. The construction has no association with the company's initial development or growth and was built as one of several existing manufacturing plants at that time. Therefore, the subject property does not meet NRHP/CRHR Criterion A/1 and is recommended not eligible.

Criterion B/2: Significant Persons

Under NRHP and CRHR Criterion B/2, 550 Mercury Lane lacks a significant association with the productive life of any person important in local, state, or national history. Research did not identify information that would indicate the subject property has an association with Recold employees that would rise to the threshold of significance required for eligibility. Archival research uncovered no information that H.T. (Hy) Jarvis, president and founder of Recold, was directly associated with the subject property. Construction of the subject property was essentially a corporate undertaking representing the collective decisions of the company's leadership, rather than the distinctive contributions of any single individual. Due to a lack of identified significant associations with any persons important in our past, the subject property is recommended not eligible under NRHP/CRHR Criterion B/2.

Criterion C/3: Design/Construction

Under NRHP and CRHR Criterion C/3, 550 Mercury Lane does not embody the distinctive characteristics of a type, period, or method of construction that would represent a significant and distinguishable entity. The subject property is a modest and architecturally undistinguished example of a manufacturing building constructed in ca. 1980 that is utilitarian in style, built as a tilt-up concrete building, mostly clad in smooth concrete, with a flat roof and a slight parapet. As an undistinguished utilitarian building, the subject property represents one of many such industrial buildings constructed in Brea and Orange County in the 1980s. The original architect, designer and/or builder is unknown. Although building permit research identified architect/engineering firm Correia and Christian and contractor CB Construction as affiliated with the 1984 addition, no information was uncovered regarding either firm or group, and no person was identified with either Correia and Christian or CB Construction. Additionally, because it is a common, purpose-built building, the subject manufacturing building does not possess high artistic values and is not the product of an architect or builder attempting to articulate the design principles or aesthetics of a formal architectural style or substyle. The property was constructed through already well-documented and common tilt-up construction techniques and methods and does not appear to possess high artistic values by articulating a particular concept of design to the extent that it expresses an aesthetic ideal. It does not contribute to the significance of a potential or existing historic district. Overall, the property lacks sufficient design and construction value to meet NRHP/CRHR Criterion C/3 and is recommended not eligible under this criterion.

Criterion D/4: Data Potential

Under NRHP and CRHR Criterion D, the subject property is not significant as a source, or likely source, of important historical information, nor does it appear likely to yield important information about historical construction methods, materials, or technologies. This technology is well understood through contemporary trade journals and scientific monographs. As such, the subject property lacks significance under NRHP/CRHR Criterion D/4.

<u>City of Brea's Criteria for Designation of Individual Historic Resources</u>

Criterion A: It exemplifies or reflects special elements of the city's cultural, social, economic, political, aesthetic, engineering, architectural, or natural history

As discussed in NRHP/CRHR Criterion A/1, research does not indicate that the subject property was associated with events or developmental trends significant to the City of Brea. The subject property is located in a portion of Brea that experienced steady industrial growth after the construction of the Orange (57) Freeway in the 1970s through the 1980s. Research did not identify the subject property as reflecting special elements of the city's cultural, social, economic, political, or natural history. Additionally, as discussed in NRHP/CRHR Criterion C/3, the subject property is a utilitarian manufacturing building that does not represent special elements in the city's aesthetic, engineering, or architectural history. Therefore, it is recommended not eligible under the City of Brea's Criterion A.

Criterion B: It is identified with persons or events significant in local, state, or national history

As discussed in NRHP/CRHR B/2 and NRHP/CRHR A/1, research does not indicate that the subject property was associated with persons or events significant in local, state, or national history. The subject property has operated as a manufacturing building since its construction. Archival research did not identify any particular individuals associated with the subject property who have made a significant contribution to our past or any significant events associated with the property. Therefore, it is recommended not eligible under the City of Brea's Criterion B.

Criterion C: It embodies distinctive characteristics of a style, type, period, or method of construction, or is a valuable example of the use of indigenous materials or craftsmanship

As discussed in NRHP/CRHR Criterion C/3, the subject property does not fully embody the distinctive characteristics of a style, type, period, or method of construction, nor is it a valuable example of the use of indigenous materials or craftsmanship. The subject property is a manufacturing building constructed c. 1980 that is utilitarian in style. The subject property is an undistinguished utilitarian building and represents one of many such industrial buildings constructed in Brea in the 1980s. Likewise, research did not indicate that the subject property exemplified indigenous materials or craftsmanship. Therefore, it is recommended not eligible under the City of Brea's Criterion C.

Criterion D: It is representative of the work of a notable builder, designer, or architect

As discussed in NRHP/CRHR Criterion C/3, the subject property does not appear to be representative of the work of a notable architect, builder, or designer. The original building permit for the building was not on file with the city, and additional research did not identify an architect or builder for the property. The property is not known to be associated with a notable architect, builder, or designer. Therefore, it is recommended not eligible under the City of Brea's Criterion D.

Criterion E: It contributes to the significance of a historic area, being a geographically definable area possessing a concentration of historic or scenic properties or thematically related grouping of properties which contribute to each other and are unified aesthetically by plan or physical development

Research did not reveal that the subject property is included in a geographically definable area possessing a concentration of historic or scenic properties or a thematically related grouping of properties which contribute to each other and are unified aesthetically by plan or physical development (i.e., a district). The manufacturing building on the subject property was constructed c. 1980 during a time of increased industrial development in Brea. It is neither a concentration of historic or scenic properties, nor a thematically related grouping of properties unified by plan or physical development. It does not appear to contribute to a previously identified historic district, and the subject property does not appear to be part of a grouping of properties that contribute to each other and are unified aesthetically by plan or physical development. Therefore, it is recommended not eligible under the City of Brea's Criterion E.

Criterion F: It embodies elements of architectural design, detail, materials, or craftsmanship that represent a significant structural or architectural achievement or innovation

As discussed in NRHP/CRHR Criterion C/3, the subject property does not embody elements of architectural design, detail, materials, or craftsmanship that represent a significant structural or architectural achievement or innovation. The building is utilitarian in design and does not display a distinctive architectural style. Likewise, the subject property was constructed using common, well-documented materials and construction techniques. Therefore, it is recommended not eligible under the City of Brea's Criterion F.

Criterion G: It reflects significant geographical patterns, including those associated with different eras of settlement and growth, particular transportation modes, or distinctive examples of park or community planning

The subject property does not reflect significant geographical patterns, including those associated with different eras of settlement and growth, particular transportation modes, or distinctive examples of park or community planning. The subject property does not appear to be a significant example of industrial development from the 1980s, as it simply followed an existing pattern of industrial development in Brea. The surrounding area has been significantly altered by further industrial and residential development since the subject property's date of construction (c. 1980). Therefore, it is recommended not eligible under the City of Brea's Criterion G.

Criterion H: It is one of the few remaining examples in the city, region, state, or nation possessing distinguishing characteristics of an architectural or historical type or specimen

As discussed in NRHP/CRHR Criterion C/3, the subject property does not display a distinctive architectural style to be considered a significant example of a style. It is a purpose-built utilitarian manufacturing building that does not exemplify the distinguishing characteristics of an architectural style. Likewise, the subject property is a ubiquitous typology. As such, it is not one of the few remaining examples in the city, region, state, or nation. Therefore, it is recommended not eligible under the City of Brea's Criterion H.

Integrity Considerations

Integrity is the ability of a property to convey its significance. Because the concept of integrity is based on significance, the assessment of a property's integrity can only proceed after its significance has been fully established. Because the subject property lacks sufficient significance to meet any of the criteria for listing in the NRHP, CRHR, or the City of Brea's Historic Resources Register, an integrity analysis was considered immaterial for 550 Mercury Lane.

1725 23rd Street, Suite 100
Sacramento, CA 95816

Dear Ms. Polanco:

Re: Request for Concurrence for the Mercury Affordable Senior Apartments Project, City of Brea, Orange County, California

In accordance with Section 106 of the National Historic Preservation Act (NHPA) of 1966 as amended (16 U.S.C 470f), and as required by the U.S. Department of Housing and Urban Development, we are requesting your review and comments on the determination of no effect that Project implementation would have on historic properties within the Area of Potential Effects (APE) for the Mercury Affordable Senior Apartments Project (Project).

Mercury Affordable Senior Apartments Project
Southeast Corner of intersection of Mercury Lane and South Berry Street (Assessor's Parcel Number [APN] 296-141-05)
Brea, CA 92821

Undertaking: The Project is located on approximately 1.01 acres and consists of one parcel (APN 296-141-05) located on the southeast corner of the intersection of Mercury Lane and South Berry in the City of Brea, Orange County, California (Attachment 1: Project Location). The Project falls within Section 10 of Township 3 South and Range 10 West of the La Habra, California U.S Geological Survey (USGS) 7.5-minute Series Quadrangle Maps. The Project would construct a 5-story, 83,850-square-foot, affordable housing development for seniors with tuck-under parking. The "L"-shaped development would consist of a single building containing 85 units, including 68 one-bedroom units (each unit = 595 square feet) and 17 two-bedroom units (each unit = 800 square feet). One two-bedroom unit would be reserved for an on-site manager. Of the 84 available rental units, 74 apartments, including 58 one-bedroom and 16 two-bedroom units, would be income-restricted to households earning between 30% to 80% of the area median income for Orange County, and 10 one-bedroom units would be permanent supportive housing units reserved for individuals experiencing homelessness.

The ground floor would contain amenity spaces and building support spaces, including a community game room, fitness room, laundry room, lobby and leasing office, mail room, bike room, outdoor patio space, maintenance room, utility closet, storage, and trash room. The residential units would be located on floors 2 through 5, and tuck-under parking would be provided. A rooftop deck would also be located on the fifth floor. A total of 63 parking spaces would be provided, including 24 tuck-under spaces and 39 spaces in a surface parking lot. Vehicle entrance and exit would be provided via a driveway on Mercury Lane at the northeastern corner of the site.

The building would feature a modern architectural design intended to complement the surrounding neighborhood. The Project would be designed to create a prominent visual and functional landmark at the intersection of Berry Street/Mercury Lane. The façade of the proposed development uses a combination of materials and textures to create a contemporary appearance that connects it to the existing fabric of adjacent buildings. The upper floors of the development would be articulated with a variety of window styles and balcony spaces, facilitating visual interest.

The site is connected to the nearby downtown area via the Mercury Lane Bridge, which spans the Brea Canyon Channel and trail system. This bridge links the site to public parking and pedestrian pathways, with downtown amenities located approximately 580 feet away.

Area of Potential Effects: The Project APE consists of the geographic areas where the Project may directly or indirectly cause alterations in the character or use of historic properties as delineated in Attachment 2. The vertical aboveground extent of the APE is anticipated to be five stories, which is the height of the multi-unit affordable housing development for seniors proposed for construction on the Project site. The maximum vertical underground extent of the APE is 7 feet below existing grade. Anticipated ground disturbance would involve tree removals, trenching for utilities, foundation work, and grading. The horizontal limits of the direct APE considered the proposed project components, which include the footprint of the Project site (APN 296-141-05). Delineation of the APE for built environment resources (indirect APE) considered the proposed project activities in conjunction with historic-age built resources that are 45 years of age or older (those built in or before 1981) at the time of survey that may sustain impacts due to the construction or operation of the Project. The built environment APE considered areas of indirect physical effects that encompass five adjacent historic-age properties facing the project site. The other two adjacent parcels at 555 W. Imperial Highway (APN 296-143-04) (built in 1982) and 591 W. Imperial Highway (APN 296-143-04) (built in circa 2009) were not included in the APE because they are not of historic age.

Historic Property Identification Effort: Dudek conducted a records search at the California Historic Resources Information System South Central Coastal Information Center (SCCIC) on January 13, 2026. The records search indicates that three previously recorded cultural resources are located within 1 mile of the Project APEs, none of which intersect with either APE, as shown in Appendix B of Attachment 3 The resources consist of a prehistoric artifact and ecofact scatter, and two historic-era built environment resources (Laurel Elementary School and Brea City Hall and Park). Results of the records search also indicate that the direct Project APE has been subject to previous archaeological investigation (OR-00024). Analysis of historic aerials and topographic maps indicate that the direct APE has been subject to past disturbances associated with the grading and plowing of agricultural use since at least 1927. Dudek conducted an intensive-level archaeological survey of the direct APE on February 2, 2026. Based on background research indicating past disturbances, and in consideration of the lack of prehistoric and historic-era archaeological resources within the direct APE, Dudek concludes that there is a low potential for encountering intact subsurface archaeological deposits within the direct APE during Project implementation.

Record search results identified no previously recorded built environment resources in the indirect APE. Dudek conducted archival research regarding the five built environment resources located within the APE to understand the history of the area and how the landscape has changed and developed over time. Archival research included a records review of the California Office of Historic Preservation's Built Environment Resource Directory, Calisphere, Online Archive of California, Orange County Assessor, Orange County Land Insights, Orange County Historical Society, City of Brea Clerk's Office, City of Brea Historic Resource Register, historical aerial photographs and maps of the APE, and historical newspapers. The information gained from these repositories was used in the development of the historic contexts and significance evaluations for the properties in the APE. A Dudek architectural historian who meets the Secretary of the Interior's Professional Qualification Standards in architectural history conducted an intensive-level survey of the built environment resources APE on February 11, 2026.

No historic properties were identified within the Project APE as a result of archival research, a records search, and field survey.

Description of Findings: We did not identify any historic properties within the Project APE. All five historic-era properties in the built environment APE were evaluated using the criteria of the National Register of Historic Places (NRHP). The five properties are recommended not eligible for the NRHP because they do not meet the evaluation criteria due to a lack of significant associations and architectural merit.

Tribal Consultation: Dudek sent a request to the Native American Heritage Commission (NAHC) for a search of the Sacred Lands File (SLF) encompassing the Project APE and a 1-mile radius on December 29, 2025. On January 13, 2026, the NAHC responded via email, indicating that the SLF search yielded negative results. In addition, the NAHC provided a list of 23 Native American tribes and individuals/organizations with traditional geographic affiliations who may possess knowledge concerning Tribal properties in the vicinity of the Project APE. In accordance with 36 CFR § 800.3(f), Orange County initiated Section 106 consultation by issuing formal notification letters via certified mail to all entities included on the Tribal Contact List on March 10, 2026. Email notifications were also sent to ensure comprehensive outreach and that all parties received the invitation to participate in the consultation process. Two Tribes responded to the consultation invitation and requested consultation (all Tribal Consultation is included in Attachment 5): Gabrieleño Band of Mission Indians - Kizh Nation (Kizh Nation) responded on March 20, 2026, and Gabrielino Tongva Indians of California (Gabrielino Tongva) responded on April 6, 2026. Kizh Nation indicated an interest in consulting but advised that it would not be available to meet until May 21. Gabrielino Tongva did not respond to multiple follow-up requests to schedule a consultation meeting. In order to avoid unreasonable delay to the environmental review process and meet project deadlines, the County is proceeding with the Section 106 review while keeping the consultation opportunity open. The County will continue to consider any information received from either Tribe should consultation occur at a later date. Consultation efforts were conducted in good faith and provided the Tribes a reasonable opportunity to participate. No historic properties were identified within the APE as a result of the consultation process to date.

Interested Party Correspondence: On February 16, 2026, Dudek sent an outreach letter and figure depicting the built environment APE to the Orange County Historical Society, the Brea Museum & Historical Society, and Preserve Orange County. The letter provided a brief description of the proposed Project and requested information about cultural resources in or near the APE. On February 21, 2026, Dudek received a response from Linda Shay, PhD, of the Brea Museum & Historical Society, stating that they were not aware of any historical or cultural resources in the area. No response was received from

the Orange County Historical Society or Preserve Orange County. Copies of the interested party correspondence are in Appendix A of the built environment inventory and evaluation report (Attachment 5).

Determination of Effect: We have determined that the undertaking would have no effect on historic properties because our investigation did not identify any historic properties within the Project APE.

Your review and comments on our determination of no historic properties affected is requested. Please provide us with your response on or before 30 days of receipt of this letter.

To assist in your review, the following materials are included with this submittal: a Project Location Map (Attachment 1), the APE Map (Attachment 2), the Cultural Resources Constraints Analysis Report (with confidential records search results) (Attachment 3), Tribal Consultation documentation (Attachment 4), and the Built Environment Inventory and Evaluation Report (with interested party correspondence and California Department of Parks and Recreation 523 Forms) (Attachment 5).

Should you need further information, please contact me via email at francisco.padillajr@occr.ocgov.com.

Sincerely,

Frank Padilla
Community Development and Environmental Compliance Manager

1 Project Location Map
2 Project APE Map
3 Cultural Resources Constraints Analysis for the Mercury Brea Project, City of Brea, Orange County, California
4 Tribal Consultation Documentation
5 Built Environment Inventory and Evaluation Report, Mercury Affordable Senior Apartments Project, Brea, California

Description of Undertaking:
Address: Southeast corner of Mercury Lane and South Berry Street, Brea, CA 92821
Census Tract: 15.03
APN: 296-141-05

Agency Official Determination:
Based on our review, it is our determination that no historic properties or archaeological resources will be affected by this Project. We base these findings on:

- SCCIC records search indicating that no previously recorded cultural resources are within the Project APE
- Background research and aerial imagery indicating past disturbances within the Project APE
- No historic properties were identified as a result of the Tribal consultation process

Project Description:
The Project would involve the construction of a 5-story, 83,850-square-foot, affordable housing development for seniors with tuck-under parking. The "L"-shaped development would consist of a single building containing 85 units, including 68 one-bedroom units (each unit = 595 square feet) and 17 two-bedroom units (each unit = 800 square feet). One two-bedroom unit would be reserved for an on-site manager. Of the 84 available rental units, 74 apartments, including 58 one-bedroom and 16 two-bedroom units, would be income-restricted to households earning between 30% to 80% of the area median income for Orange County, and 10 one-bedroom units would be permanent supportive housing units reserved for individuals experiencing homelessness.

Site Information:

- **Zoning Designation:** Industrial Commercial (C-M)
- **General Plan Land Use Designation:** Specific Plan – Brea Core Study Area
- **Existing Use:** Vacant land
- **Prior Use(s)/Development(s):** Agriculture/Orchards

Existing Conditions and Trends: The Project APE currently consists of an undeveloped parcel located at the southeast corner of Mercury Lane and South Berry Street in the City of Brea, Orange County, California. Surrounding land uses include a mix of light and general industrial operations, commercial offices, and manufacturing facilities.

Re: Mercury Senior Apartments Project at the Southeast Corner of Mercury Lane and South Berry Street, Brea, CA

Dear Mr. Padilla:

The California State Historic Preservation Office (SHPO) received the consultation submittal for the above-referenced undertaking for our review and comment pursuant to Section 106 of the National Historic Preservation Act and its implementing regulations found at 36 CFR Part 800. The regulations and advisory materials are located at www.achp.gov.

Orange County has informed us that they intend to provide funding from the U.S. Department of Housing and Urban Development (HUD) for the Mercury Senior Apartments Project located at the southeast corner of Mercury Lane and South Berry Street in Brea. Project activities will be limited to the subject parcel.

After reviewing the documentation submitted for the undertaking SHPO offers the following comments:

- Pursuant to 36 CFR § 800.4(a)(1), I have no comments on the County of Orange's delineation of the Area of Potential Effects (APE).
- Pursuant to 36 CFR § 800.4(b)(1), the County of Orange Vista has made a reasonable and good faith effort to identify historic properties within the APE.
- In accordance with 36 CFR § 800.4(c)(2), Orange County has determined that the properties located at: 111 South Berry Street, 221 South Berry Street, 233 South Berry Street, 114 South Berry Street, and 550 Mercury Lane in the City of Brea are not eligible for listing in the National Register of Historic Places (NRHP), either individually or as part of a historic district. Based on review of the submitted documentation, SHPO **concurs** with this determination.
- Pursuant to 36 CFR § 800.4(d) the SHPO does not object to Orange County's finding of *No Historic Properties Affected* for the undertaking.

Please be mindful that Indian tribes possess special expertise in assessing historic properties of religious and cultural significance not available to Office of Historic Preservation staff. The SHPO requests that the County of Orange provide a summary of any views conveyed by Indian tribes or other individuals and organizations likely to have knowledge of, or concerns with historic properties in the project area, should they be submitted following receipt of this letter. In so doing, the SHPO reserves the right to resume Section 106 consultation and respond to new information, as necessary.

In the event that historic properties are discovered during the implementation of the undertaking, the County is required to consult further pursuant to 36 CFR § 800.13(b).

SHPO appreciates Orange County's consideration of historic properties in the project planning process. If you have questions please contact Chris Wendt, State Historian II, with the Local Government & Environmental Compliance Unit at chris.wendt@parks.ca.gov .

Sincerely,

Julianne Polanco
State Historic Preservation Officer

Noise Technical Memorandum

MEMORANDUM

To:	Catherine Wade; Kristin Arakawa (Dudek)
From:	Nick Segovia, INCE
Subject:	Noise Technical Memorandum – Mercury Brea Senior Affordable Apartments Project
Date:	3/2/2026
cc:	Dana Lodico, PE, INCE Bd. Cert. (Dudek)
Attachment(s):	Figure 1, Project Location Figure 2, Noise Assessment Locations Attachment A, Traffic Noise Model Input/Output Data Attachment B, Barrier Insertion Loss and Composite Transmission Loss/Sound Transmission Class Calculations

This technical noise memo summarizes the results of the noise analysis conducted for on-site uses of the Mercury Brea Senior Affordable Apartments Project (Project) in Brea, California (see Figure 1).

1 Background

1.1 Project Description

The approximately 1.01-acre project site consists of a single parcel located at the southeast corner of Berry Street/Mercury Lane intersection in the City of Brea, CA, 92821. The proposed project would be a 5-story, 83,850-square-foot, affordable housing development for seniors with tuck-under parking. The "L"-shaped development would consist of a single building containing 85 units, including 68 one-bedroom units (595-square-feet) and 17 two-bedroom units (800-square-feet).

The ground floor would contain amenity spaces and building support spaces, including a community game room, fitness room, laundry room, lobby and leasing office, mail room, bike room, outdoor patio space, maintenance room, utility closet, storage, and trash room. The residential units would be located on floors 2 through 5 and tuck-under parking would be provided. A rooftop deck would be located on the fifth floor. A total of 63 parking spaces would be provided, including 24 tuck-under spaces and 39 spaces in a surface parking lot. Vehicle ingress and egress would be provided via a driveway on Mercury Lane at the northeastern corner of the site.

The building would feature a modern architectural design intended to complement the surrounding neighborhood. The project would be designed to create a prominent visual and functional landmark at the intersection of Berry Street/Mercury Lane. The façade of the proposed development utilizes a combination of materials and textures to create a contemporary appearance that connects it to the historical fabric of the area. The upper floors of the development would be articulated with a variety of window styles and balcony spaces, facilitating visual interest.

The Project site is located in a commercial and industrial area, designated as the Brea Core Plan Area, just west of Brea Downtown. The Brea Core Plan Area is roughly bounded by Lambert Road to the north, Imperial Highway to the south, Berry Street to the west, and the SR -57 Freeway to the east. The Brea Core Plan Area contains several key roadways that are regionally significant—Imperial Highway, Lambert Road, Brea Boulevard, State College Boulevard, and the SR -57 Freeway. Land uses surrounding the project site include a mix of light and general industrial operations, commercial offices, and manufacturing facilities. A railroad spur is located approximately 0.1 miles north of the site, though this segment is no longer active. Freight activity is minimal and limited to occasional deliveries to nearby businesses. The site is connected to the nearby downtown area via the Mercury Lane Bridge that spans the Brea Canyon Channel and trail system. This bridge links the site to public parking and pedestrian pathways, with downtown amenities located approximately 580 feet away.

1.2 Noise Fundamentals and Terminology

Vibrations, traveling as waves through air from a source, exert a force perceived by the human ear as sound. Sound pressure level (referred to as sound level) is measured on a logarithmic scale in decibels (dB) that represent the fluctuation of air pressure above and below atmospheric pressure. Frequency, or pitch, is a physical characteristic of sound and is expressed in units of cycles per second or hertz (Hz). The normal frequency range of hearing for most people extends from about 20 to 20,000 Hz. The human ear is more sensitive to middle and high frequencies, especially when the noise levels are quieter. As noise levels get louder, the human ear starts to hear the frequency spectrum more evenly. To accommodate for this phenomenon, a weighting system to evaluate how loud a noise level is to a human was developed. The frequency weighting called “A” weighting is typically used for quieter noise levels, which de-emphasizes the low-frequency components of the sound in a manner similar to the response of a human ear. This A-weighted sound level is called the “noise level” and is referenced in units of dBA.

Because sound is measured on a logarithmic scale, a doubling of sound energy results in a 3 dBA increase in the noise level. Changes in a community noise level of less than 3 dB are not typically noticed by the human ear (Caltrans 2013). Changes from 3 to 5 dB may be noticed by some individuals who are extremely sensitive to changes in noise. A 5 dB increase is readily noticeable. The human ear perceives a 10 dB increase in sound level as a doubling of the sound level (i.e., 65 dBA sounds twice as loud as 55 dBA to a human ear).

An individual’s noise exposure occurs over a period of time; however, noise level is a measure of noise at a given instant in time. The equivalent continuous sound level (L_{eq}), also referred to as the average sound level, is a single number representing the fluctuating sound level in A-weighted decibels (dBA) over a specified period of time. It is a sound-energy average of the fluctuating level and is equal to a constant unchanging sound of that dB level. Community noise sources vary continuously, being the product of many noise sources at various distances, all of which constitute a relatively stable background or ambient noise environment.

Noise levels are generally higher during the daytime and early evening when traffic (including airplanes), commercial, and industrial activity is the greatest. However, noise sources experienced during nighttime hours when background levels are generally lower can be potentially more conspicuous and irritating to the receiver. In order to evaluate noise in a way that considers periodic fluctuations experienced throughout the day and night, a concept termed “community noise equivalent level” (CNEL) was developed, The CNEL scale represents a time-weighted 24-hour average noise level based on the A-weighted sound level. CNEL

accounts for the increased noise sensitivity during the evening hours (7 p.m. to 10 p.m.) and nighttime hours (10 p.m. to 7 a.m.) by adding 5 dB to the average sound levels occurring during the evening hours and 10 dB to the sound levels occurring during nighttime hours. Additional noise definitions are provided below.

Ambient Noise Level. The composite of noise from all sources near and far. The normal or existing level of environmental noise at a given location.

A-Weighted Sound Level (dBA). The sound pressure level in decibels as measured on a sound level meter using the A-weighted filter network. The A-weighting filter deemphasizes the very low and very high frequency components of the sound in a manner similar to the frequency response of the human ear and correlates well with community responses to noise.

Community Noise Equivalent Level (CNEL). CNEL is the A-weighted equivalent continuous sound exposure level for a 24-hour period with a 10 dB adjustment added to sound levels occurring during the nighttime hours (10 p.m.–7 a.m.) and 5 dB added to the sound during the evening hours (7 p.m.–10 p.m.).

Day Night Average Sound Level (DNL or L_{dn}). Similar to the CNEL noise metric, except that no penalty is added during the evening hours (7 p.m.–10 p.m.). Typically, the CNEL and L_{dn} noise metrics vary by approximately 1 decibel or less and are often considered to be functionally equivalent.

Decibel (dB). The decibel is a unit for measuring sound pressure level and is equal to 10 times the logarithm to the base 10 of the ratio of the measured sound pressure squared to a reference pressure, which is 20 micropascals.

2 Noise Analysis Methodology

2.1 Applicable Noise Standards

Because the proposed Project may receive funding from the U.S. Department of Housing and Urban Development (HUD), the noise standards specified by HUD were used for this analysis. HUD's noise standards may be found in 24 CFR Part 51, Subpart B (CFR 2013). Exterior uses with a day night average sound level (DNL) of 65 dBA or less are considered acceptable. Sites at which the environmental or community noise exposure exceeds 65 decibels DNL are considered noise-impacted areas. For new construction proposed in high noise areas, grantees shall incorporate noise attenuation features to the extent required by HUD environmental criteria and standards contained in Subpart B (Noise Abatement and Control) of 24 CFR Part 51.

The "Normally Unacceptable" noise zone includes community noise levels from above 65 decibels to 75 decibels DNL. Approvals in this noise zone require a minimum of 5 dB additional sound attenuation for buildings having noise-sensitive uses if the day-night average sound level is greater than 65 dBA but does not exceed 70 dBA, or a minimum of 10 decibels of additional sound attenuation if the day-night average sound level is greater than 70 dBA but does not exceed 75 dBA.

The interior noise standard is 45 dBA DNL.

2.2 Traffic Noise Modeling

The primary noise source in the Project vicinity is motor vehicle traffic. The façades and outdoor use areas of the proposed residential units would face Berry Street to the west and Imperial Highway to the south. Additionally, the I-57 freeway is approximately 7,500 feet away and is therefore not considered in the traffic noise analysis. The nearest airport, Fullerton Municipal Airport, is located approximately 6 miles away. Based upon the Airport Environs Land Use Plan for Fullerton Municipal Airport (ALUC 2019), the Project site is located approximately 5 miles northeast of the airport's 60 dB CNEL noise contour. Thus, noise from the airport would have a negligible contribution to the on-site noise environment. While a Union Pacific Railroad Company railroad spur is located approximately 0.1 miles north of the site, this segment is no longer active and is therefore not considered in the noise analysis.

A noise analysis of traffic noise from Berry Street and Imperial Highway carried out using HUD's DNL Calculator[1] indicated that worst-case exterior building façade noise levels would be higher than the "acceptable" HUD standard of 65 dBA DNL.

3 Noise Analysis Results

The results of the traffic noise analysis for the modeled on-site receivers (shown in Figure 2) are summarized in Table 1. The modeled input and output data are provided in Attachment A. As shown in Table 1, the highest noise levels would occur at Noise Assessment Locations NAL1, NAL2 and NAL3. These areas are closest to both Berry Street to the west and Imperial Highway to the south, the major sources of traffic noise in the Project area, and exterior noise levels would exceed the HUD "acceptable" standard of 65 dBA DNL. NAL2 is representative of a fifth-floor outdoor use area (i.e., patio), whereas NAL1 and NAL4 are representative of single-bedroom apartments on with southwestern and northwestern exposure to Berry Street and Imperial Highway. Noise levels at NAL4, which faces Mercury Lane, would not exceed the 65 dBA DNL standard.

Thus, the exposure from traffic noise along the southwestern and northwestern building facades (NAL1 and NAL3) and the open space/outdoor area (NAL2) would exceed the HUD exterior noise standard of 65 dBA DNL by up to 4 dB, putting these receivers in the "normally unacceptable" noise range.

Table 1 – Traffic Noise Level Results Summary

Receiver #	Noise Level (DNL (dBA))
NAL1 – Southwestern exposure	**69**
NAL2 – Western exposure	**69**
NAL3 – Northwestern exposure	**68**
NAL4 – Northern exposure	61

Source: Attachment A.
Note: **Bolded** numbers indicate that the noise levels exceed the HUD noise standard of 65 dBA DNL.

[1] https://www.hudexchange.info/programs/environmental-review/dnl-calculator/.

NAL2, representative of the proposed outdoor patio, would be approximately 50 feet higher than the vehicle traffic along Berry Street, and the direct line-of-sight between the outdoor patio and the roadway would be occluded by the western building façade. Thus, NAL2 is expected to benefit from partial barrier attenuation, which was estimated using HUD's Barrier Performance Module (BPM)[2] and entering available information of noise source-to-receiver distances, noise source height, receiver height, and building height . The insertion loss provided by the proposed residential building's western façade(acting as the barrier) was estimated to be approximately 4.5 dBA. As a result, traffic noise exposure at NAL2 would be attenuated to 64.5 dBA DNL, and would thus be below the HUD exterior noise standard of 65 dBA DNL. Calculations derived from HUD's BPM can be found in Attachment B.

Additionally, as detailed in Section 2.1, 24 CFR Part 51, Subpart B states that sites at which environmental or community noise exposure exceeds the day night average sound level (DNL) of 65 dBA are considered to be noise-impacted. For new construction proposed in high noise areas, grantees shall incorporate noise attenuation features to the extent required. Approvals in the "normally unacceptable" noise zone require a minimum of 5 dB additional sound attenuation for buildings having noise-sensitive uses if the day-night average sound level is greater than 65 dBA but does not exceed 70 dBA, or a minimum of 10 decibels of additional sound attenuation if the day-night average sound level is greater than 70 dBA but does not exceed 75 dBA.

Typical new construction of multi-family homes with windows closed provides a minimum of 25 dB exterior to interior noise reduction. All residential units will be equipped with a forced air heating ventilation air conditioning (HVAC) unit that allows for a "windows closed" condition (i.e., windows do not need to be left open for ventilation).

To derive the anticipated noise reduction at each representative receiver, the composite transmission loss (TL) per sound transmission class (STC) window rating was calculated using provided residential unit and window dimensions (feet), and assuming a standard, non-upgraded exterior wall STC rating of 35 and a standard, non-upgraded window STC rating of 25. These calculations are detailed in Attachment B.

Table 2 provides the anticipated noise reduction needed at each representative receiver to reach compliant interior noise levels. With implementation of this requirement, the proposed Project would not exceed the HUD interior noise standard of 45 dBA DNL and would be within the "acceptable" noise range for interior noise.

Table 2 – Interior Noise Levels (DNL (dBA))

Receivers / Location	Maximum Noise Level at Façade[1]	Required Interior Noise Reduction[2]	Minimum Anticipated Interior Noise Reduction[3]	Upgraded Windows /Doors?[4]	Interior Noise Level[5]	Exceedance of Interior Noise Standard?
NAL1 – Southwestern exposure	69	24	33	No	36	No

[2] https://www.hudexchange.info/programs/environmental-review/bpm-calculator/

Table 2 – Interior Noise Levels (DNL (dBA))						
Receivers / Location	Maximum Noise Level at Façade[1]	Required Interior Noise Reduction[2]	Minimum Anticipated Interior Noise Reduction[3]	Upgraded Windows /Doors?[4]	Interior Noise Level[5]	Exceedance of Interior Noise Standard?
NAL2 – Western exposure	69	16	33	No	36	No
NAL3 – Northwestern exposure	68	16	33	No	35	No
NAL4 – Northern exposure	61	22	33	No	28	No

1 - Estimated exterior noise level at the building façade based upon Table 1.
2 - Noise reduction required to satisfy the interior noise standards.
3 - Minimum interior noise reduction with typical new construction windows and doors closed.
4 - Does the required interior noise reduction trigger upgraded windows with an STC greater than 25 or walls/doors with an STC rating greater than 35?
5 - Estimated noise level based upon minimum anticipated noise reduction.

4 Conclusion

While exterior noise levels would exceed the HUD "acceptable" standard at facades with western and southwestern exposure to traffic noise, the analysis herein demonstrates that interior noise levels would meet HUD's 45 dBA DNL standard with typical construction features. With compliant interior conditions achieved, the Project satisfies HUD's interior noise requirements.

Traffic Noise Model Input/Output Data

Day/Night Noise Level (DNL) Calculator

The Day/Night Noise Level Calculator is an electronic assessment tool that calculates the Day/Night Noise Level (DNL) from roadway and railway traffic. For more information on using the DNL calculator, view the **Day/Night Noise Level Calculator Electronic Assessment Tool Overview (/programs/environmental-review/daynight-noise-level-electronic-assessment-tool/)**.

Guidelines

- To display the Road and/or Rail DNL calculator(s), click on the "Add Road Source" and/or "Add Rail Source" button(s) below.
- All Road and Rail input values must be positive non-decimal numbers.
- All Road and/or Rail DNL value(s) must be calculated separately before calculating the Site DNL.
- All checkboxes that apply must be checked for vehicles and trains in the tables' headers.
- **Note #1:** Tooltips, containing field specific information, have been added in this tool and may be accessed by hovering over all the respective data fields (site identification, roadway and railway assessment, DNL calculation results, roadway and railway input variables) with the mouse.
- **Note #2:** DNL Calculator assumes roadway data is always entered.

Mitigation Options

If your site DNL is in Excess of 65 decibels, your options are:

- **No Action Alternative**: Cancel the project at this location
- **Other Reasonable Alternatives**: Choose an alternate site
- **Mitigation**
    - **Contact your Field or Regional Environmental Officer (/programs/environmental-review/hud-environmental-staff-contacts/)**
    - Increase mitigation in the building walls (only effective if no outdoor, noise sensitive areas)
    - Reconfigure the site plan to increase the distance between the noise source and noise-sensitive uses
    - Incorporate natural or man-made barriers.
    - Construct noise barrier. See the **Barrier Performance Module (/programs/environmental-review/bpm-calculator/)**

HUD Barrier Performance Module (BPM) and Composite Transmission Loss/ Sound Transmission Class Calculations

Barrier Performance Module (BPM) Calculator

This module provides to the user a measure on the barrier's effectiveness on noise reduction. A list of the input/output variables and their definitions, as well as illustrations of different scenarios are provided.

Calculator

View Day/Night Noise Level Calculator (/programs/environmental-review/dnl-calculator/)

View Descriptions of the Input/Output variables.

Note: Tool tips, containing field specific information, have been added in this tool and may be accessed by hovering over the Input and Output variables with the mouse.

WARNING: If there is direct line-of-sight between the Source and the Observer, the module will report erroneous attenuation. "Direct line-of-sight" means if the 5' tall Observer can see the noise Source (cars, trucks, trains, etc.) over the Barrier (wall, hill/excavation, building, etc.), the current version of Barrier Performance Module will not accurately calculate the attenuation provided. In this instance, there is unlikely to be any appreciable attenuation.

Note: Barrier height must block the line of sight

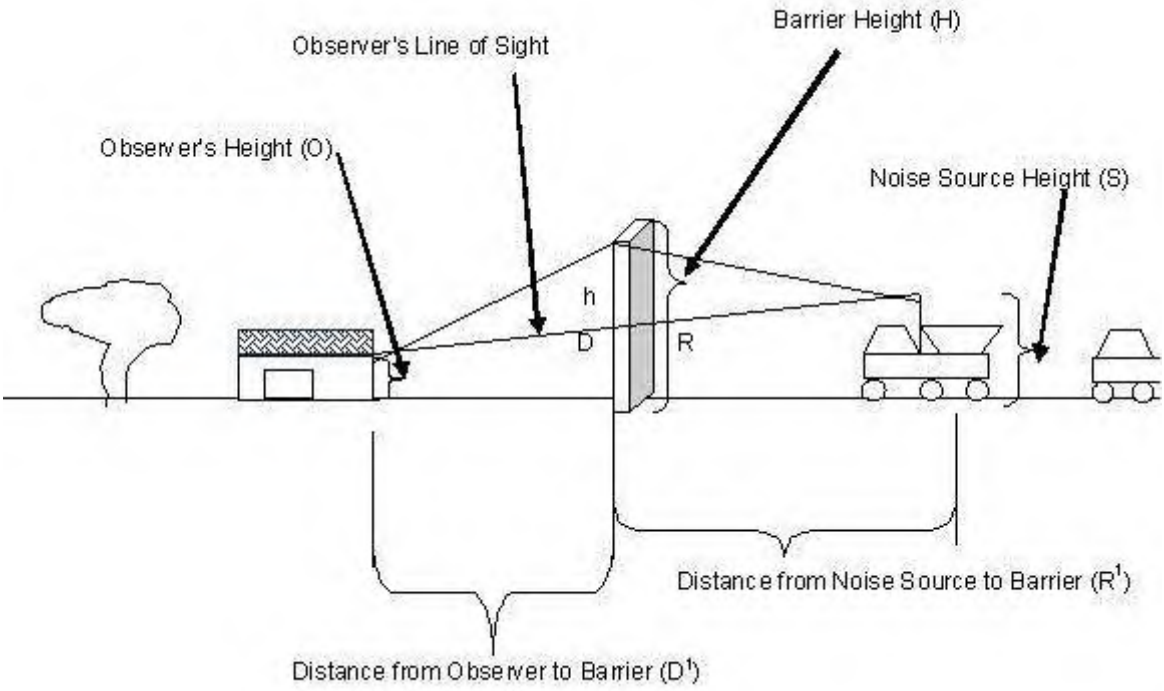
Input/Output Variables

Input Variables

The following variables and definitions from the barrier being assessed are the input required for the web-based barrier performance module:

- H = Barrier Height
- S = Noise Source Height
- O = Observer Height (known as the receiver)
- R^1 = Distance from Noise Source to Barrier
- D^1 = Distance from the Observer to the Barrier
- α = Line of sight angle between the Observer and the Noise Source, subtended by the barrier at observer's location

Output Variables

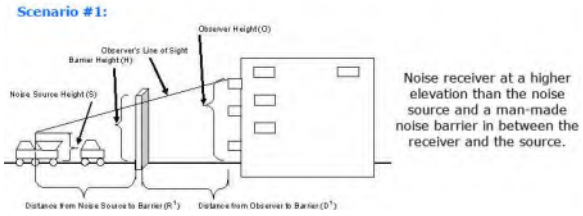


Definitions of the output variables from the mitigation module of the Day/Night Noise Level Assessment Tools as part of the Assessment Tools for Environmental Compliance:

- h = The shortest distance from the barrier top to the line of sight from the Noise source to

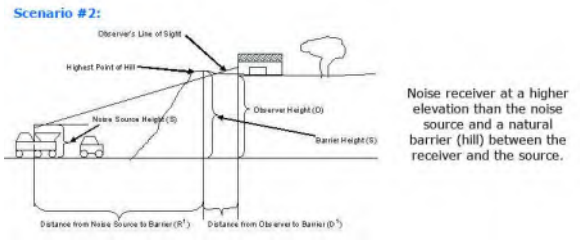
the Observer.

- R = Slant distance along the line of sight from the Barrier to the Noise Source
- D = Slant distance along the line of sight from the Barrier to the Observer



The “actual barrier performance for barriers of finite length” is noted on the worksheets(in the Guidebook) as **FS**.

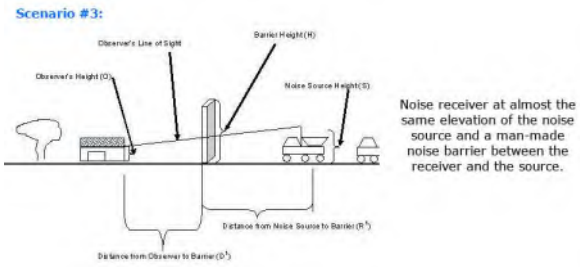
Barrier Implementation Scenarios



View larger versions of the images featured in the following scenario examples (/resource/3841/barrier-performance-module-bpm-barrier-implementation-scenarios/).

Scenario #1:

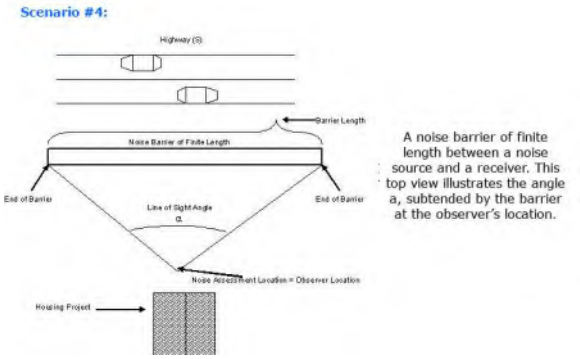
Noise receiver at a higher elevation than the noise source and a man-made noise barrier in between the receiver and the source.



Scenario #2:

Noise receiver at a higher elevation than the noise source and a natural barrier (hill) between the receiver and the source.

Noise receiver at a higher elevation than the noise source and a natural barrier (hill) between the receiver and the source.



Scenario #3:

Noise receiver at almost the same elevation of the noise source and a man-made noise barrier between the receiver and the source.

Noise receiver at almost the same elevation of the noise source and a man-made noise barrier between the receiver and the source.

Scenario #4:

Barrier Implementation Scenarios

Calculation of Composite TL/STC

The defining equation for TL is:
TL = 10xlog (1/τ), where τ is the transmission coefficient, assuming a homogeneous partition.
To calculate the composite TL, you must first calculate the composite transmission coefficient, based on the τ value of the specific partition component and its surface area (S). So,
τcomp = the sum of the individual components divided by the surface area of the full partition (including all components) = (τ1S1 + τ2S2 + … + τnSn)/S
To determine the τ value for each component, do the inverse of the TL calculation; so:
τ = 10(-TL/10), then calculate the τcomp and use it in the original TL equation above. Although it's not appropriate for laboratory studies, it's fine to say that the mid-frequency (500 to 1,000 Hz) TL is the same as the STC for HUD-types of studies.
Here's an example:
Say you have a main wall with an STC rating of 40 and a window having an STC rating of 25 in the wall. The overall wall surface area is 140 square feet and the window's surface area is 12 square feet.
τwall = 10(-40/10) and τwindow = 10(-25/10), and τcomp = ((140-12)x10-4 + 12x10-2.5)/140 = 0.00036, so:
TL/STCcomp = 10xlog(1/.00036) = 34

PARTNER WORKSHEETS

Airport Hazards

OMB No. 2506-0177
(exp. 7/31/2028)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Airport Hazards (CEST and EA) – PARTNER

HUD Exchange Airport Hazards Page

1. **To ensure compatible land use development, you must determine your site's proximity to civil and military airports. Is your project within 15,000 feet of a military airport or 2,500 feet of a civilian airport?**

   ☒No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide a map showing that the site is not within the applicable distances to a military or civilian airport.*

   ☐Yes → *Continue to Question 2.*

2. **Is your project located within a Runway Potential Zone/Clear Zone (RPZ/CZ) or Accident Potential Zone (APZ)?**

   ☐Yes, project is in an APZ → *Continue to Question 3.*

   ☐Yes, project is an RPZ/CZ → *Project cannot proceed at this location.*

   ☐No, project is not within an APZ or RPZ/CZ

   → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Continue to the Worksheet Summary below. Provide a map showing that the site is not within either zone.*

3. **Is the project in conformance with DOD guidelines for APZ?**

   ☐Yes, project is consistent with DOD guidelines without further action.

   → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documentation supporting this determination.*

   ☐No, the project cannot be brought into conformance with DOD guidelines and has not been approved. → *Project cannot proceed at this location.*

If mitigation measures have been or will be taken, explain in detail the proposed measures that must be implemented to mitigate for the impact or effect, including the timeline for implementation.

Click here to enter text.

→ *Work with the RE/HUD to develop mitigation measures. Continue to the Worksheet Summary below. Provide any documentation supporting this determination.*

Worksheet Summary

The project site is not located within 15,000 feet of a military airport or 2,500 feet of a civilian airport. The nearest civilian airport, Fullerton Municipal Airport, is located approximately 5 miles southwest, and the nearest military airport, Los Alamitos Army Airfield, is located approximately 11 miles southwest. Therefore, the project is in compliance with airport hazards requirements.

See Attachment 1.

Flood Insurance

OMB No. 2506-0177
(exp. 7/31/2028)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Flood Insurance (CEST and EA) – PARTNER

General requirements	Legislation	Regulation
Certain types of federal financial assistance may not be used in floodplains unless the community participates in National Flood Insurance Program and flood insurance is both obtained and maintained.	Flood Disaster Protection Act of 1973 as amended (42 USC 4001-4128)	24 CFR 50.4(b)(1) and 24 CFR 58.6(a) and (b); 24 CFR 55.5.
Reference		
HUD Exchange Flood Insurance Page		

1. **Does this project involve mortgage insurance, refinance, acquisition, repairs, rehabilitation, or construction of a structure, mobile home, or insurable personal property**?

   ☐No. This project does not require flood insurance or is excepted from flood insurance.
   Continue to the Worksheet Summary.

   ☒Yes *Continue to Question 2.*

2. **Provide a FEMA/FIRM map showing the site.**
   The Federal Emergency Management Agency (FEMA) designates floodplains. The FEMA Map Service Center provides this information in the form of FEMA Flood Insurance Rate Maps (FIRMs).

   Is the structure, part of the structure, or insurable property located in a FEMA-designated Special Flood Hazard Area?

   ☐ No *Continue to the Worksheet Summary.*

   ☒ Yes *Continue to Question 3.*

3. **Is the community participating in the National Flood Insurance Program *or* has less than one year passed since FEMA notification of Special Flood Hazards?**

   ☒ Yes, the community is participating in the National Flood Insurance Program.
   Flood insurance is required. Provide a copy of the flood insurance policy declaration or a paid receipt for the current annual flood insurance premium and a copy of the application for flood insurance.
   Continue to the Worksheet Summary.

☐ Yes, less than one year has passed since FEMA notification of Special Flood Hazards.
If less than one year has passed since notification of Special Flood Hazards, no flood Insurance is required.
Continue to the Worksheet Summary.

☐ No. The community is not participating, or its participation has been suspended.
Federal assistance may not be used at this location. Cancel the project at this location.

Worksheet Summary

FEMA's Flood Insurance Rate Map (FIRM) number 06059C0041J, effective December 3, 2009, shows that the project site is located within Zone X (shaded), an area with a 0.2% annual chance flood hazard. This is an area with a moderate flood hazard, usually between the 100-year and 500-year floodplains. Therefore, the project site is not located within a FEMA-designated SFHA. While flood insurance is not mandatory for the project, HUD recommends that all insurable structures maintain flood insurance under the NFIP. According to the NFIP Community Status Book (FEMA 2025), the City of Brea and County of Orange participate in the NFIP (Community Identification Numbers 060214# and 060222C, respectively). The project is in compliance with flood insurance requirements.

See Attachment 3.

Air Quality

OMB No. 2506-0177
(exp. 7/31/2028)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Air Quality (CEST and EA) – PARTNER

HUD Exchange Air Quality Page

1. **Does your project include new construction or conversion of land use facilitating the development of public, commercial, or industrial facilities OR five or more dwelling units?**

   ☒ Yes → *Continue to Question 2.*

   ☐ No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Provide any documents used to make your determination.*

2. **Is your project's air quality management district or county in non-attainment or maintenance status for any criteria pollutants?**
   Follow the link below to determine compliance status of project county or air quality management district:
   EPA Green Book: detailed information about area National Ambient Air Quality Standards (NAAQS) designations

   ☐ No, project's county or air quality management district is in attainment status for all criteria pollutants
   → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination.*

   ☒ Yes, project's management district or county is in non-attainment or maintenance status for one or more criteria pollutants. → *Continue to Question 3.*

3. **Determine the estimated emissions levels of your project for each of those criteria pollutants that are in non-attainment or maintenance status on your project area. Will your project exceed any of the *de minimis or threshold* emissions levels of non-attainment and maintenance level pollutants or exceed the screening levels established by the state or air quality management district?**

   ☒ No, the project will not exceed *de minimis* or threshold emissions levels or screening levels
   → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Explain how you determined that the project would not exceed de minimis or threshold emissions.*

☐ Yes, the project exceeds *de minimis* emissions levels or screening levels.

→ *Continue to Question 4. Explain how you determined that the project would not exceed de minimis or threshold emissions in the Worksheet Summary.*

4. **For the project to be brought into compliance with this section, all adverse impacts must be mitigated. Explain in detail the exact measures that must be implemented to mitigate for the impact or effect, including the timeline for implementation.**
   Click here to enter text.

Worksheet Summary

The project site is located in the South Coast Air Basin (SoCAB), which includes all of Orange County and the urbanized portions of Los Angeles, Riverside, and San Bernardino counties, under the jurisdiction of the South Coast Air Quality Management District (SCAQMD). The SoCAB is designated as in extreme nonattainment with the NAAQS for O_3, serious nonattainment for $PM_{2.5}$, and partial nonattainment for lead (i.e., Orange County is in attainment but Los Angeles County within the SoCAB is in nonattainment) (EPA 2025a). The SoCAB is designated as maintenance for PM_{10}, CO, and NO_2.

The California Emissions Estimator Model (CalEEMod) Version 2022.1.1.35 was used to estimate emissions from the construction and operational phases of the project. Annual construction and operational emissions would be below *de minimis* thresholds. The project would also not exceed SCAQMD's regional construction or operation emissions thresholds.

Therefore, the project is in compliance with the Clean Air Act. See Attachment 4.

Coastal Zone Management Act

OMB No. 2506-0177
(exp. 7/31/2028)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Coastal Zone Management Act (CEST and EA) – PARTNER

HUD Exchange Coastal Zone Management Page

Projects located in the following states must complete this form.

Alabama	Florida	Louisiana	Mississippi	Ohio	Texas
Alaska	Georgia	Maine	New Hampshire	Oregon	Virgin Islands
American Samona	Guam	Maryland	New Jersey	Pennsylvania	Virginia
California	Hawaii	Massachusetts	New York	Puerto Rico	Washington
Connecticut	Illinois	Michigan	North Carolina	Rhode Island	Wisconsin
Delaware	Indiana	Minnesota	Northern Mariana Islands	South Carolina	

1. **Is the project located in, or does it affect, a Coastal Zone as defined in your state Coastal Management Plan?**

   ☐Yes → *Continue to Question 2.*
   ☒No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide a map showing that the site is not within a Coastal Zone.*

2. **Does this project include activities that are subject to state review**?

   ☐Yes → *Continue to Question 3.*
   ☐No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide documentation used to make your determination.*

3. **Has this project been determined to be consistent with the State Coastal Management Program**?
   ☐Yes, with mitigation. → *The RE/HUD must work with the State Coastal Management Program to develop mitigation measures to mitigate the impact or effect of the project.*

   ☐Yes, without mitigation. → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide documentation used to make your determination.*

   ☐No → Project cannot proceed at this location.

Worksheet Summary

The project site is not located in the coastal zone. The project site is located approximately 15 miles inland from the coastal zone boundary. Therefore, the Project is in compliance with the CZMA.

See Attachment 5.

Contamination and Toxic Substances

OMB No. 2506-0177
(exp. 7/31/2028)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Contamination and Toxic Substances (Multifamily and Non-Residential Properties) – PARTNER

HUD Exchange Site Contamination Page

1. **How was site contamination evaluated?** [1] **Select all that apply.**

   ☒ ASTM Phase I ESA
   ☐ ASTM Phase II ESA
   ☐ Remediation or clean-up plan
   ☐ ASTM Vapor Encroachment Screening
   ☐ None of the above

   → *Provide documentation and reports and include an explanation of how site contamination was evaluated in the Worksheet Summary.*
   Continue to Question 2.

2. **Were any on-site or nearby toxic, hazardous, or radioactive substances found that could affect the health and safety of project occupants or conflict with the intended use of the property? (Were any recognized environmental conditions or RECs identified in a Phase I ESA and confirmed in a Phase II ESA?)**

   ☒ No → **Explain below.**

   Integrated Property Analysis, Inc. prepared a Phase I Environmental Site Assessment (ESA) for the project site in July 2025, which found no evidence of recognized environmental conditions (RECs), historical RECs, controlled RECs, or de minimis conditions associated with the property.

   → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

   ☐ Yes → *Describe the findings, including any recognized environmental conditions (RECs), in Worksheet Summary below. Continue to Question 3.*

3. **Can adverse environmental impacts be mitigated?**

[1] HUD regulations at 24 CFR § 58.5(i)(2)(ii) require that the environmental review for multifamily housing with five or more dwelling units or non-residential property include the evaluation of previous uses of the site or other evidence of contamination on or near the site. For acquisition and new construction of multifamily and nonresidential properties HUD strongly advises the review include an ASTM Phase I Environmental Site Assessment (ESA) to meet real estate transaction standards of due diligence and to help ensure compliance with HUD's toxic policy at 24 CFR §58.5(i) and 24 CFR §50.3(i). Also note that some HUD programs require an ASTM Phase I ESA.

☐ Adverse environmental impacts cannot feasibly be mitigated → HUD assistance may not be used for the project at this site. Project cannot proceed at this location.

☐ Yes, adverse environmental impacts can be eliminated through mitigation.
→ *Provide all mitigation requirements*[2] *and documents. Continue to Question 4.*

4. **Describe how compliance was achieved. Include any of the following that apply: State Voluntary Clean-up Program, a No Further Action letter, use of engineering controls**[3]**, or use of institutional controls**[4]**.**
Click here to enter text.

If a remediation plan or clean-up program was necessary, which standard does it follow?
☐ Complete removal
☐ Risk-based corrective action (RBCA)
→ *Continue to the Worksheet Summary.*

Worksheet Summary

HUD requires new multifamily construction projects to follow radon-resistant construction requirements in accordance with standards developed by the American Association of Radon Scientists and Technologists (AARST) in collaboration with the American National Standards Institute (ANSI) for Soil Gas Control Systems in New Construction of Buildings (ANSI-AARST CC-1000-2018). This standard provides minimum requirements for construction of buildings intended for human occupancy, except for one- and two-family dwellings, to reduce occupant exposure to radon and other hazardous soil gases. HUD also requires post-construction radon testing prior to final completion inspection per Section 9.6.3.5 of the MAP Guide (HUD 2021). If indoor radon levels are found to exceed the EPA action level of 4.0 pCi/L, then mitigation is required. Implementation of MM-TOX-2 would ensure compliance with HUD's radon requirements by requiring post-construction radon testing, followed by mitigation if testing determines that radon levels are at or above the EPA's threshold of 4.0 pCi/L. This ERR will be updated with the radon evaluation and proof of any required mitigation when complete prior to project occupancy.

With incorporation of the mitigation measures outlined above, the project is in compliance with HUD's requirements related to contamination and toxic substances.

See Attachment 6.

---

[2] Mitigation requirements include all clean-up actions required by applicable federal, state, tribal, or local law. Additionally, provide, as applicable, the long-term operations and maintenance plan, Remedial Action Work Plan, and other equivalent documents.

[3] Engineering controls are any physical mechanism used to contain or stabilize contamination or ensure the effectiveness of a remedial action. Engineering controls may include, without limitation, caps, covers, dikes, trenches, leachate collection systems, signs, fences, physical access controls, ground water monitoring systems and ground water containment systems including, without limitation, slurry walls and ground water pumping systems.

[4] Institutional controls are mechanisms used to limit human activities at or near a contaminated site, or to ensure the effectiveness of the remedial action over time, when contaminants remain at a site at levels above the applicable remediation standard which would allow for unrestricted use of the property. Institutional controls may include structure, land, and natural resource use restrictions, well restriction areas, classification exception areas, deed notices, and declarations of environmental restrictions.

Endangered Species Act

OMB No. 2506-0177
(exp. 7/31/2028)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Endangered Species Act (CEST and EA) – PARTNER

HUD Exchange Endangered Species Page

1. Does the project involve any activities that have the potential to affect species or habitats?

☐No, the project will have No Effect due to the nature of the activities involved in the project.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination.*

☐No, the project will have No Effect based on a letter of understanding, memorandum of agreement, programmatic agreement, or checklist provided by local HUD office.

Explain your determination:

Click here to enter text.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination.*

☒Yes, the activities involved in the project have the potential to affect species and/or habitats. → *Continue to Question 2.*

2. Are federally listed species or designated critical habitats present in the action area?

Obtain a list of protected species from the Services. This information is available on the FWS Website.

☒No, the project will have No Effect due to the absence of federally listed species and designated critical habitat.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination. Documentation may include letters from the Services, species lists from the Services' websites, surveys or other documents and analysis showing that there are no species in the action area.*

☐Yes, there are federally listed species or designated critical habitats present in the action area. → *Continue to Question 3.*

3. Recommend one of the following effects that the project will have on federally listed species or designated critical habitat:

☐No Effect: Based on the specifics of both the project and any federally listed species in the action area, you have determined that the project will have absolutely no effect on listed species or critical habitat.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination. Documentation should include a species list and explanation of your conclusion, and may require maps, photographs, and surveys as appropriate.*

☐May Affect, Not Likely to Adversely Affect: Any effects that the project may have on federally listed species or critical habitats would be beneficial, discountable, or insignificant.

→ Partner entities should not contact the Services directly. *If the RE/HUD agrees with this recommendation, they will have to complete Informal Consultation. Provide the RE/HUD with a biological evaluation or equivalent document. They may request additional information, including surveys and professional analysis, to complete their consultation.*

☐Likely to Adversely Affect: The project may have negative effects on one or more listed species or critical habitat.

→ Partner entities should not contact the Services directly. *If the RE/HUD agrees with this recommendation, they will have to complete Formal Consultation. Provide the RE/HUD with a biological evaluation or equivalent document. They may request additional information, including surveys and professional analysis, to complete their consultation.*

Worksheet Summary

An official species list was requested from U.S. Fish and Wildlife Service (USFWS) using its Information for Planning and Consultation (IPaC) tool. The list identified 7 threatened, endangered, or candidate species under USFWS jurisdiction that have the potential to occur in the project area. However, there are no designated or proposed critical habitats within the project area. Furthermore, the project site constitutes infill development and is bordered by industrial and commercial land uses. Therefore, it is unlikely that special-status species occur on site. Therefore, it is unlikely that special-status species occur on site. The project would have no effect on listed species or critical habitats under USFWS jurisdiction. Therefore, the project is in compliance with the Endangered Species Act.

See Attachment 7.

Explosives

OMB No. 2506-0177
(exp. 7/31/2028)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Explosive and Flammable Hazards (CEST and EA) – PARTNER

HUD Exchange Explosive and Flammable Facilities Page

1. **Does the proposed HUD-assisted project include a hazardous facility (a facility that mainly stores, handles or processes flammable or combustible chemicals such as bulk fuel storage facilities and refineries)?**

   ☒ No
   → *Continue to Question 2.*

   ☐ Yes
   Explain:
   Click here to enter text.
   → *Continue to Question 5.*

2. **Does this project include any of the following activities: development, construction, rehabilitation that will increase residential densities, or conversion?**

   ☐ No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

   ☒ Yes → *Continue to Question 3.*

3. **Within 1 mile of the project site, are there any current *or planned* stationary aboveground storage containers:**
   - Of more than 100-gallon capacity, containing common liquid industrial fuels OR
   - Of any capacity, containing hazardous liquids or gases that are not common liquid industrial fuels?

   ☐ No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide all documents used to make your determination.*

   ☒ Yes → *Continue to Question 4.*

4. **Is the Separation Distance from the project acceptable based on standards in the Regulation?**
   Please visit HUD's website for information on calculating Acceptable Separation Distance.

   ☐ Yes
   → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

Provide map(s) showing the location of the project site relative to any tanks and your separation distance calculations. If the map identifies more than one tank, please identify the tank you have chosen as the "assessed tank."

☒ No

→ *Continue to Question 6.*

Provide map(s) showing the location of the project site relative to any tanks and your separation distance calculations. If the map identifies more than one tank, please identify the tank you have chosen as the "assessed tank."

5. **Is the hazardous facility located at an acceptable separation distance from residences and any other facility or area where people may congregate or be present?**

Please visit HUD's website for information on calculating Acceptable Separation Distance.

☐ Yes

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

Provide map(s) showing the location of the project site relative to residences and any other facility or area where people congregate or are present and your separation distance calculations.

☐ No

→ *Continue to Question 6.*

Provide map(s) showing the location of the project site relative to residences and any other facility or area where people congregate or are present and your separation distance calculations.

6. **For the project to be brought into compliance with this section, all adverse impacts must be mitigated. Explain in detail the exact measures that must be implemented to make the Separation Distance acceptable, including the timeline for implementation. If negative effects cannot be mitigated, cancel the project at this location.**

A total of 8 facilities did not meet the minimum separation distance required based on the volume of chemicals stored onsite, of which 5 facilities stored chemicals contained substances listed in Appendix I of 24 CFR Part 51 Subpart C. For this analysis, petroleum products and CalEPA-designated flammable or combustible materials not explicitly listed in the regulation were conservatively treated as hazardous materials.

The five facilities that did not meet HUD's required ASD and stored chemicals listed in Appendix I of 24 CFR Part 51 Subpart C include Albertson's Distribution Center (200 North Puente Street), Crimson Pipeline Stewart Station (985 Challenger Street), Dr. Squatch- Bricc City (114 South Berry Street), Mercury Insurance Group (555 West Imperial Highway), and Moravek Biochemicals Inc. (577 Mercury Lane). For these five facilities, further evaluation was conducted to determine whether natural or manmade barriers exist that could mitigate potential impacts, in accordance with 24 CFR § 51.205(c) and HUD's ASD Guidebook. This provision allows for modification or elimination of the ASD requirement if a barrier obstructs a direct line of sight between the hazard and the project site. There is no direct line of sight between ASTs at these facilities and the project site.

Worksheet Summary

A search of the California Environmental Protection Agency's (CalEPA's) Regulated Site Portal was conducted on January 1, 2026, to identify facilities with aboveground petroleum or chemical storage within a 1-mile radius of the project site (CalEPA 2026). The search identified a total of 116 facilities storing hazardous or flammable chemicals. HUD's ASD Assessment Tool was used to calculate the minimum required separation distance between the project site and each of the 116 facilities, conservatively assuming that all hazardous materials are stored above ground in unpressurized, undiked tanks. A total of 8 facilities did not meet the minimum separation distance required based on the volume of chemicals stored onsite, of which 5 facilities stored chemicals contained substances listed in Appendix I of 24 CFR Part 51 Subpart C. For this analysis, petroleum products and CalEPA-designated flammable or combustible materials not explicitly listed in the regulation were conservatively treated as hazardous materials.

The five facilities that did not meet HUD's required ASD and stored chemicals listed in Appendix I of 24 CFR Part 51 Subpart C include Albertson's Distribution Center (200 North Puente Street), Crimson Pipeline Stewart Station (985 Challenger Street), Dr. Squatch-Bricc City (114 South Berry Street), Mercury Insurance Group (555 West Imperial Highway), and Moravek Biochemicals Inc. (577 Mercury Lane). For these five facilities, further evaluation was conducted to determine whether natural or manmade barriers exist that could mitigate potential impacts, in accordance with 24 CFR § 51.205(c) and HUD's ASD Guidebook. This provision allows for modification or elimination of the ASD requirement if a barrier obstructs a direct line of sight between the hazard and the project site.

According to Google Earth' Street View imagery, there is no direct line of sight between the project site and the Albertson's Distribution Center facility and Crimson Pipeline Stewart Station facility due to intervening buildings. The Dr. Squatch-Bricc City building lies immediately north of the project site across Mercury Lane, while the Mercury Insurance Group building borders the project site to the south and the Moravek Biochemicals Inc. facility borders the project site to the east. Although these facilities are located adjacent to the project site, there is no direct line of sight between the project site and the AST at these three facilities, as they are located inside the facility buildings. Based on this analysis, the proposed project would not expose project occupants to risk of injury from fire or explosion and no mitigation is required. Therefore, the project is in compliance with 24 CFR Part 51 Subpart C.

See Attachment 8.

Farmlands

OMB No. 2506-0177
(exp. 7/31/2028)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Farmlands Protection (CEST and EA) - PARTNER

HUD Exchange Farmlands Protection Page

1. **Does your project include any activities, including new construction, acquisition of undeveloped land or conversion, that could convert agricultural land to a non-agricultural use?**
   ☐ Yes → *Continue to Question 2.*
   ☒ No
   → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

2. **Does "important farmland," including prime farmland, unique farmland, or farmland of statewide or local importance regulated under the Farmland Protection Policy Act, occur on the project site?**
   You may use the links below to determine important farmland occurs on the project site:
   - Utilize USDA Natural Resources Conservation Service's (NRCS) Web Soil Survey NRCS Web Soil Survey Webpage
   - Check with your city or county's planning department and ask them to document if the project is on land regulated by the FPPA (zoning important farmland as non-agricultural does not exempt it from FPPA requirements)
   - Contact NRCS at the local USDA service center USDA Local Service Center Contact Webpage or your NRCS state soil scientist NRCS State Contacts Webpage for assistance

   ☐ No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination.*

   ☐ Yes → *Continue to Question 3.*

3. **Consider alternatives to completing the project on important farmland and means of avoiding impacts to important farmland.**
   - Complete form **AD-1006**, "Farmland Conversion Impact Rating" and contact the state soil scientist before sending it to the local NRCS District Conservationist.
   - Work with NRCS to minimize the impact of the project on the protected farmland. When you have finished with your analysis, return a copy of form AD-1006 to the USDA-NRCS State Soil Scientist or his/her designee informing them of your determination.

   Work with the RE/HUD to determine how the project will proceed. Document the conclusion:
   ☐Project will proceed with mitigation.

Explain in detail the proposed measures that must be implemented to mitigate for the impact or effect, including the timeline for implementation.

Click here to enter text.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide form AD-1006 and all other documents used to make your determination.*

☐Project will proceed without mitigation.

Explain why mitigation will not be made here:

Click here to enter text.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide form AD-1006 and all other documents used to make your determination.*

Worksheet Summary

According to the California Department of Conservation's (DOC's) California Important Farmland Finder (DOC 2022), the project site and surrounding area are designated as "Urban and Built-up Land," which includes land that is "used for residential, industrial, commercial, construction, institutional, public administration, railroad and other transportation yards, cemeteries, airports, golf courses, sanitary landfills, sewage treatment, water control structures, and other developed purposes." As such, no farmland is located on or near the project site, and the project would not result in the conversion of farmland to non-agricultural use. Therefore, the project is in compliance with the Farmland Protection Policy Act.

See Attachment 9.

Floodplain Management

OMB No. 2506-0177
(exp. 7/31/2028)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Floodplain Management (CEST and EA)

General Requirements	Legislation	Regulation
Executive Order 11988, Floodplain Management, requires Federal activities to avoid impacts to floodplains and to avoid direct and indirect support of floodplain development to the extent practicable.	Executive Order 11988 Executive Order 13690 42 USC 4001-4128 42 USC 5154a	24 CFR 55
Reference		
HUD Exchange Floodplain Management Page		

1. **Does this project meet an exemption at 24 CFR 55.12 from compliance with HUD's floodplain management regulations in Part 55 or utilize the delayed compliance date for certain Office of Housing programs?**
   ☐ Yes
   Select the applicable citation at 24 CFR 55.12 and provide supporting documentation for the determination if applicable.

   a) ☐ HUD-assisted activities described in 24 CFR 58.34 and 58.35(b)
   b) ☐ HUD-assisted activities described in 24 CFR 50.19, except as otherwise indicated in § 50.19
   c) ☐ The approval of financial assistance for restoring and preserving the natural and beneficial functions and values of floodplains and wetlands, including through acquisition of such floodplain and wetland property, where a permanent covenant or comparable restriction is place on the property's continued use for flood control, wetland projection, open space, or park land, but only if:
      (1) The property is cleared of all existing buildings and walled structures; and
      (2) The property is cleared of related improvements except those which:
         (i) Are directly related to flood control, wetland protection, open space, or park land (including playgrounds and recreation areas);
         (ii) Do not modify existing wetland areas or involve fill, paving, or other ground disturbance beyond minimal trails or paths; and
         (iii) Are designed to be compatible with the beneficial floodplain or wetland function of the property.

d) ☐ An action involving a repossession, receivership, foreclosure, or similar acquisition of property to protect or enforce HUD's financial interests under previously approved loans, grants, mortgage insurance, or other HUD assistance

e) ☐ Policy-level actions described at 24 CFR 50.16 that do not involve site-based decisions

f) ☐ A minor amendment to a previously approved action with no additional adverse impact on or from a floodplain or wetland;

g) ☐ HUD's or the responsible entity's approval of a project site, an incidental portion of which is situated in the FFRMS floodplain (not including the floodway, LiMWA, or coastal high hazard area) but only if:

(1) The proposed project site does not include any existing or proposed buildings or improvements that modify or occupy the FFRMS floodplain except de minimis improvements such as recreation areas and trails; and

(2) the proposed project will not result in any new construction in or modifications of a wetland

h) ☐ Issuance or use of Housing Vouchers or other forms of rental subsidy where HUD, the awarding community, or the public housing agency that administers the contract awards rental subsidies that are not project-based (i.e., do not involve site-specific subsidies)

i) ☐ Special projects directed to the removal of material and architectural barriers that restrict the mobility of and accessibility to elderly and persons with disabilities.

Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below.

☐ Yes. Office of Housing programs utilizing the January 1, 2025 compliance date. These reviews must comply with the 2013 version of the Part 55 regulations. Continue to Worksheet Summary for 2013 version to upload supporting documentation.

☒ No. *Continue to Question 2.*

2. Does the project include a Critical Action?

☐ Yes. Describe the Critical Action. Examples of Critical Actions include projects involving hospitals, fire and police stations, nursing homes, hazardous chemical storage, storage of valuable records, and utility plants. Continue to Question 4.

☒ No. Continue to Question 3.

3. **Determine the extent of the FFRMS floodplain and provide mapping documentation in support of that determination.**
   The extent of the FFRMS floodplain can be determined using a Climate Informed Science Approach (CISA), 0.2 percent flood approach (0.2 PFA), or freeboard value approach (FVA). For projects in areas without available CISA data or without FEMA Flood Insurance Rate Maps (FIRMs), Flood Insurance Studies (FISs) or Advisory Base Flood Elevations (ABFEs), use the best available information to determine flood elevation. Include documentation and an explanation of why this is the best available information for the site. Note that newly constructed and substantially improved structures must be elevated to the FFRMS floodplain regardless of the approach chosen to determine the floodplain.

   Select one of the following three options:

   ☐ CISA for non-critical actions. If using a local tool, data, or resources, ensure that the FFRMS elevation is higher than would have been determined using the 0.2 PFA or the FVA.

   ☒ 0.2-PFA. Where FEMA has defined the 0.2-percent-annual-chance floodplain, the FFRMS floodplain is the area that FEMA has designated as within the 0.2-percent-annual-chance floodplain.

   ☐ FVA. If neither CISA nor 0.2-PFA is available, for non-critical actions, the FFRMS floodplain is the area that results from adding two feet to the base flood elevation as established by the effective FIRM or FIS or—if available —a FEMA-provided preliminary or pending FIRM or FIS or advisory base flood elevations, whether regulatory or informational in nature. However, an interim or preliminary FEMA map cannot be used if it is lower than the current FIRM or FIS.

a. **Does your project occur in the FFRMS floodplain?**
   ☒Yes, continue to part b.
   ☐ No. Review for floodplain management is complete.

b. **Is your project located in any of the floodplain categories below? Select all that apply. If none apply, continue to question 7.**

   ☐ Floodway: *Continue to Question 5. Floodways.*

   ☐ Coastal High Hazard Area (V Zone) or Limit of Moderate Wave Action (LiMWA): *Continue to Question 6. Coastal High Hazard Areas and LiMWAs.*

4. **Determine the extent of the FFRMS floodplain and provide mapping documentation in support of that determination.**
   The extent of the FFRMS floodplain can be determined using a Climate Informed Science Approach (CISA), or the higher of the 0.2 percent flood approach (0.2 PFA), or freeboard value approach (FVA). For projects in areas without available CISA data or without FEMA Flood Insurance Rate Maps (FIRMs), Flood Insurance Studies (FISs) or Advisory Base Flood Elevations (ABFEs), use the best available information to determine flood elevation. Note that newly constructed and substantially improved structures must be elevated to the FFRMS floodplain regardless of the approach chosen to determine the floodplain.

Utilize CISA to determine the FFRMS floodplain for critical actions

☐ CISA for Critical Actions. If using a local tool, ensure that the FFRMS elevation provided is higher than the 0.2 PFA or 3' above the base flood elevation.

OR;

Choose the higher of 0.2 PFA or FVA elevations

☐ 0.2-PFA. Where FEMA has defined the 0.2-percent-annual-chance floodplain, the FFRMS floodplain is the area that FEMA has designated as within the 0.2-percent-annual-chance floodplain.

☐ FVA. For critical actions, the FFRMS floodplain is the area that results from adding three feet to the base flood elevation as established by the effective FEMA FIRM or FIS or—if available —a FEMA-provided preliminary or pending FIRM or FIS or advisory base flood elevations, whether regulatory or informational in nature. However, an interim or preliminary FEMA map cannot be used if it is lower than the current FIRM or FIS.

a. Does your project occur in the FFRMS floodplain?

☐Yes, continue to part b.

☐No. Review for floodplain management is complete.

b. Is your project located in any of the floodplain categories below? Select all that apply. If none apply, continue to question 7.

☐ Floodway: *Continue to Question 5. Floodways.*

☐ Coastal High Hazard Area (V Zone) or LiMWA: *Continue to Question 6. Coastal High Hazard Areas and LiMWAs.*

5. Floodways

Do the floodway exemptions at 55.8 or 55.21 apply?

☐ Yes

The 8-Step Process is required. Document mitigation measures necessary to meet the requirements in 55.8 or 55.21. Provide a completed 8-Step Process, including the early public notice and the final notice.

Continue to Question 7. 8-Step Process.

☐ No

Federal assistance may not be used at this location. You must either choose an alternate site or cancel the project at this location.

6. Coastal High Hazard Area (V Zone) and LiMWAs

Do the exemptions at 55.8 or 55.21 apply?

☐ Yes

The 8-Step Process is required. Document mitigation measures necessary to mee the requirements in 55.8 or 55.21. Provide a completed 8-Step Process, including the early public notice and the final notice.

Continue to Question 7. 8-Step Process.

☐ No

Federal assistance may not be used at this location. You must either choose an alternate site or cancel the project at this location.

7. 8-Step Process.

Does the 8-Step Process apply? Select one of the following options:

☐ 8-Step Process is inapplicable per 55.13.

Select the applicable citation:

☐ (a) HUD's mortgage insurance actions and other financial assistance for the purchasing, mortgaging, or refinancing of existing one- to four-family properties in communities that are in the Regular Program of the NFIP and in good standing (i.e., not suspended from program eligibility or placed on probation under 44 CFR 59.24), where the action is not a critical action and the property is not located in a floodway, coastal high hazard area, or LiMWA;

☐ (b) Financial assistance for minor repairs or improvements on one- to four-family properties that do not meet the thresholds for "substantial improvement" under § 55.2(b)(12);

☐ (c) HUD or a recipient's actions involving the disposition of individual HUD or recipient held, one- to four-family properties;

☐ (d) HUD guarantees under the Loan Guarantee Recovery Fund Program (24 CFR part 573), where any new construction or rehabilitation financed by the existing loan or mortgage has been completed prior to the filing of an application under the program, and the refinancing will not allow further construction or rehabilitation, nor result in any physical impacts or changes except for routine maintenance;

☐ (e) The approval of financial assistance to lease units within an existing structure located within the floodplain, but only if;

(1) The structure is located outside the floodway or coastal high hazard area, and is in a community that is in the Regular Program of the NFIP and in good standing (i.e., not suspended from program eligibility or placed on probation under 44 CFR 59.24); and

(2) The project is not a critical action; and

(3) The entire structure is or will be fully insured or insured to the maximum extent available under the NFIP for at least the term of the lease.

☐ (f) Special projects for the purpose of improving efficiency of utilities or installing renewable energy that involve the repair, rehabilitation, modernization, weatherization, or improvement of existing structures or infrastructure, do not meet the thresholds for "substantial improvement" under § 55.2(b)(12), and do not include the installation of equipment below the FFRMS floodplain elevation.

Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below.

☐ 5-Step Process is applicable per 55.14.

Provide documentation of 5-Step Process.

Select the applicable citation:

☐ (a) HUD actions involving the disposition of HUD-acquired multifamily housing projects or "bulk sales" of HUD-acquired one- to four-family properties in communities that are in the Regular Program of the National Flood Insurance Program (NFIP) and in good standing (i.e., not suspended from program eligibility or placed on probation under 44 CFR 59.24).

☐ (b)HUD's actions under the National Housing Act (12 U.S.C. 1701) for the purchase or refinancing of existing multifamily housing projects, hospitals, nursing homes, assisted living facilities, board and care facilities, and intermediate care facilities, in communities that are in good standing under the NFIP.

☐ (c) HUD's or the recipient's actions under any HUD program involving the repair, rehabilitation, modernization, weatherization, or improvement of existing multifamily housing projects, hospitals, nursing homes, assisted living facilities, board and care facilities, intermediate care facilities, and one- to four-family properties, in communities that are in the Regular Program of the National Flood Insurance Program (NFIP) and are in good standing, provided that the number of units is not increased more than 20 percent, the action does not involve a conversion from nonresidential to residential land use, the action does not meet the thresholds for "substantial improvement" under § 55.2(b)(10), and the footprint of the structure and paved areas is not increased by more than 20 percent.

☐ (d) HUD's (or the recipient's) actions under any HUD program involving the repair, rehabilitation, modernization, weatherization, or improvement of existing nonresidential buildings and structures, in communities that are in the Regular Program of the NFIP and are in good standing, provided that the action does not meet the thresholds for "substantial improvement" under § 55.2(b)(10) and that the footprint of the structure and paved areas is not increased by more than 20 percent

☐ (e) HUD's or the recipient's actions under any HUD program involving the repair, rehabilitation, or replacement of existing nonstructural improvements including streets, curbs and gutters, where any increase of the total impervious surface area of the facility is de minimis. This provision does not include critical actions, levee systems, chemical storage facilities (including any tanks), wastewater facilities, or sewer lagoons.

Continue to Question 8. Mitigation.

☒ 8-Step Process applies.

Provide a completed 8-Step Process, including the early public notice and the final notice.

Continue to Question 8. Mitigation.

8. Mitigation

For the project to comply with this section, all adverse impacts must be mitigated. Explain in detail the measures that must be implemented to mitigate the impact or effect, including the timeline for implementation. Note: newly constructed and substantially improved structures within the FFRMS floodplain must be elevated to the FFRMS floodplain elevation or floodproofed, if applicable.

MM-FP-1 requires the project to be designed so that the lowest finished floor elevation is at or above 340.5 feet, corresponding to the FFRMS floodplain elevation associated with the Brea Canyon Channel:

MM-FP-1: Floodplain Elevation Compliance. Prior to issuance of building permits, the applicant shall demonstrate that all new construction associated with the project is designed and constructed such that the lowest finished floor, including all mechanical, electrical, and plumbing systems, is elevated to at least 340.5 feet, corresponding to the Federal Flood Risk Management Standard (500-year or 0.2%-annual-chance) floodplain elevation for the Brea Canyon Channel, as identified in the applicable Flood Insurance Study. Project design plans shall clearly document compliance with this elevation requirement.

Which of the following if any mitigation/minimization measures have been identified for this project in the 8-Step or 5-Step Process? Select all that apply.

- ☐ Buyout and demolition or other supported clearance of floodplain structures
- ☐ Insurance purchased in excess of statutory requirement under the Flood Disaster Protection Act of 1973
- ☐ Permeable surfaces
- ☐ Natural landscape enhancements that maintain or restore natural hydrology
- ☐ Planting or restoring native plant species
- ☐ Bioswales
- ☐ Stormwater capture and reuse
- ☐ Green or vegetative roofs with drainage provisions
- ☐ Natural Resources Conservation Service conservation easements or similar easements
- ☐ Floodproofing of structures as allowable (e.g. non-residential floors)
- ☒ Elevating structures (including freeboard above the required base flood elevations)
- ☐ Levee or structural protection from flooding
- ☐ Channelizing or redefining the floodway or floodplain through a Letter of Map Revision (LOMR)

Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below.

Worksheet Summary

Compliance Determination

Provide a clear description of your determination and a synopsis of the information that it was based on, such as:

- FIRM panel numbers
- CISA data or maps
- Information on other data or tools used or accessed
- Names of all consulted parties and relevant consultation dates
- Names of plans or reports and relevant page numbers

- Any additional requirements specific to your region

Include all documentation supporting your findings in your submission to HUD

Worksheet Summary for 2013 Version

The project site is located within the FFRMS floodplain, as defined by the 0.2-percent-annual-chance floodplain approach (0.2PFA). FEMA FIRMs 06059C0041J and 06059C0042J, effective December 3, 2009, identify the site as Zone X (shaded), which is within the 500-year floodplain for the Brea Canyon Channel; therefore, the 8-step floodplain decision-making process applies. In addition, the applicable Flood Insurance Study (FIS) flood profile for the Brea Canyon Channel indicates that the 500-year flood elevation at the project vicinity is 340.5 feet. Topographic information obtained from the USGS National Map indicates that existing site elevations range from approximately 338.3 feet to 343.1 feet, with an average ground elevation of approximately 341.2 feet, placing portions of the site at or near the 500-year flood elevation. Site topography slopes downward to the south at an estimated gradient of approximately 1-2% (SoCalGeo 2018).

An Early Notice and Public Review of a Proposed Activity in a FFRMS Floodplain was published by Orange County Housing and Community Development on April 7, 2026, and public comments were accepted through April 23, 2026. No public comments were received.

Practicable alternatives were evaluated, including the No Action Alternative, Alternative Sites, and Design or Density Alternatives. The No Action Alternative would not meet the project's purpose and need for affordable senior housing and permanent supportive housing. No practicable alternative sites outside the FFRMS floodplain were identified that could accommodate the project, and design alternatives would not avoid floodplain impacts because the entire site lies within the 500-year floodplain.

The project would affect approximately 1.01 acres of the 500-year floodplain and result in an increase in impervious surface area; however, the site is previously disturbed and highly urbanized, with limited natural or beneficial floodplain functions. The project would incorporate stormwater management, erosion control, and drainage measures consistent with state and local requirements to minimize flood risk and impacts. Development would occur on an infill parcel where floodplain processes are already managed by engineered infrastructure.

HUD requires that the lowest floor, including mechanical and utility systems, be elevated to or above the FFRMS floodplain elevation. Accordingly, **MM-FP-1** requires the project to be designed so that the lowest finished floor elevation is at or above 340.5 feet, corresponding to the FFRMS floodplain elevation associated with the Brea Canyon Channel.

Based on completion of the 8-step process, no practicable alternative exists to locating the project within the FFRMS floodplain, and all practicable measures to minimize harm have been incorporated. A Final Notice and Public Explanation for a Proposed Activity in a FFRMS Floodplain will be published concurrently with the Finding of No Significant Impact (FONSI). Therefore, the project is in compliance with floodplain management requirements

See Attachments 3 and 10.

Historic Preservation

OMB No. 2506-0177
(exp. 7/31/2028)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Historic Preservation (CEST and EA) – PARTNER

HUD Exchange Historic Preservation Page

Threshold

Is Section 106 review required for your project?

☐ No, because a Programmatic Agreement states that all activities included in this project are exempt. (See the PA Database to find applicable PAs.)
Either provide the PA itself or a link to it here. Mark the applicable exemptions or include the text here:
Click here to enter text.
→ *Continue to the Worksheet Summary.*

☐ No, because the project consists solely of activities included in a No Potential to Cause Effects memo or other determination [36 CFR 800.3(a)(1)].
Either provide the memo itself or a link to it here. Explain and justify the other determination here:
Click here to enter text.
→ *Continue to the Worksheet Summary.*

☒Yes, because the project includes activities with potential to cause effects (direct or indirect). → *Continue to Step 1.*

The Section 106 Process
After determining the need to do a Section 106 review, HUD or the RE will initiate consultation with regulatory and other interested parties, identify and evaluate historic properties, assess effects of the project on properties listed on or eligible for the National Register of Historic Places, and resolve any adverse effects through project design modifications or mitigation.
Step 1: Initiate consultation
Step 2: Identify and evaluate historic properties
Step 3: Assess effects of the project on historic properties
Step 4: Resolve any adverse effects

Only RE or HUD staff may initiate the Section 106 consultation process. Partner entities may gather information, including from SHPO records, identify and evaluate historic properties, and make initial assessments of effects of the project on properties listed in or eligible for the National Register of Historic Place. Partners should then provide their RE or HUD with all of their analysis and documentation so that they may initiate consultation.

Step 1 - Initiate Consultation

The following parties are entitled to participate in Section 106 reviews: Advisory Council on Historic Preservation; State Historic Preservation Officers (SHPOs); federally recognized Indian tribes/Tribal Historic Preservation Officers (THPOs); Native Hawaiian Organizations (NHOs); local governments; and project grantees. The general public and individuals and organizations with a demonstrated interest in a project may participate as consulting parties at the discretion of the RE or HUD official. Participation varies with the nature and scope of a project. Refer to HUD's website for guidance on consultation, including the required timeframes for response. Consultation should begin early to enable full consideration of preservation options.

Use the When To Consult With Tribes checklist within Notice CPD-12-006: Process for Tribal Consultation to determine if the RE or HUD should invite tribes to consult on a particular project. Use the Tribal Directory Assessment Tool (TDAT) to identify tribes that may have an interest in the area where the project is located. Note that only HUD or the RE may initiate consultation with Tribes. Partner entities may prepare a draft letter for the RE or HUD to use to initiate consultation with tribes, but may not send the letter themselves.

List all organizations and individuals that you believe may have an interest in the project here:
Cahuilla Band of Indians
Gabrieleno Band of Mission Indians – Kizh Nation
Gabrieleno/Tongva San Gabriel Band of Mission Indians
Gabrielino Tongva Indians of California Tribal Council
Gabrielino/Tongva Nation
Gabrielino-Tongva Tribe
Juaneno Band of Mission Indians Acjachemen Nation – Belardes
Juaneno Band of Mission Indians Acjachemen Nation 84A
Morongo Band of Mission Indians
Santa Rosa Band of Cahuilla Indians
Soboba Band of Luiseno Indians

→ *Continue to Step 2.*

Step 2 - Identify and Evaluate Historic Properties

Provide a preliminary definition of the Area of Potential Effect (APE), either by entering the address(es) or providing a map depicting the APE. Attach an additional page if necessary.
The APE for archaeological resources consists of the approximately 1.01-acre undeveloped project site. The APE for built environment resources includes the project site and five adjacent properties built prior to 1981 (located at 550 Mercury Lane and 111, 221, 233, and 114 South Berry Street), where indirect effects could occur.

Gather information about known historic properties in the APE. Historic buildings, districts and archeological sites may have been identified in local, state, and national surveys and registers, local historic districts, municipal plans, town and county histories, and local history websites. If not already listed on the National Register of Historic Places, identified properties are then evaluated to see if they are eligible for the National Register. Refer to HUD's website for guidance on identifying and evaluating historic properties.

In the space below, list historic properties identified and evaluated in the APE.
Every historic property that may be affected by the project should be listed. For each historic property or district, include the National Register status, whether the SHPO has concurred with the finding, and whether information on the site is sensitive. Attach an additional page if necessary.
No historic properties have been identified in the APE.

Provide the documentation (survey forms, Register nominations, concurrence(s) and/or objection(s), notes, and photos) that justify your National Register Status determination.

Was a survey of historic buildings and/or archeological sites done as part of the project?
If the APE contains previously unsurveyed buildings or structures over 50 years old, or there is a likely presence of previously unsurveyed archeological sites, a survey may be necessary. For Archeological surveys, refer to HP Fact Sheet #6, Guidance on Archeological Investigations in HUD Projects.

☒ Yes → *Provide survey(s) and report(s) and continue to Step 3.*
Additional notes:
A pedestrian survey of the direct APE was conducted on February 2, 2026, by a qualified archaeologist meeting the Secretary of the Interior's Professional Qualification Standards. No archaeological resources or cultural materials were identified during the survey. An intensive-level survey for historic-age properties within the indirect APE was conducted on February 11, 2026, by a qualified architectural historian meeting the Secretary of the Interior's Professional Qualification Standards. Five adjacent properties over 45 years of age were evaluated and determined not eligible for listing in the National Register of Historic Places (NRHP) under Criteria A-D.

☐ No → *Continue to Step 3.*

Step 3 - Assess Effects of the Project on Historic Properties

Only properties that are listed on or eligible for the National Register of Historic Places receive further consideration under Section 106. Assess the effect(s) of the project by applying the Criteria of Adverse Effect. (36 CFR 800.5) Consider direct and indirect effects as applicable as per HUD guidance.

Choose one of the findings below to recommend to the RE or HUD.
Please note: this is a recommendation only. It is **not** the official finding, which will be made by the RE or HUD, but only your suggestion as a Partner entity.

☒ No Historic Properties Affected
Document reason for finding:
☒ No historic properties present.
☐ Historic properties present, but project will have no effect upon them.

☐ No Adverse Effect
Document reason for finding and provide any comments below.
Comments may include recommendations for mitigation, monitoring, a plan for unanticipated discoveries, etc.
Click here to enter text.

☐ Adverse Effect

Document reason for finding:

Copy and paste applicable Criteria into text box with summary and justification.
Criteria of Adverse Effect: 36 CFR 800.5]

Click here to enter text.

Provide any comments below:

Dudek prepared a Cultural Resources Constraints Analysis and a Built Environment Inventory and Evaluation Report for the project to determine whether the project would affect historic properties pursuant to the NHPA.

The APE for archaeological resources consists of the approximately 1.01-acre undeveloped project site. The APE for built environment resources includes the project site and five adjacent properties built prior to 1981 (located at 550 Mercury Lane and 111, 221, 233, and 114 South Berry Street), where indirect effects could occur.

A records search of the California Historical Resources Information System was conducted for the APE and a 1-mile radius. The search identified 31 prior cultural resources studies within 1 mile of the site, including one study overlapping the APE. No previously recorded resources were identified within the APE. Previously recorded resources within 1 mile of the APE include one historic-era shell scatter determined ineligible for listing and two historic-era built environment resources. Historic aerial photographs (1927-2022) and historic topographic maps (1896-2022) indicate the site was used for agriculture and orchards until the mid-1960s and has remained undeveloped since that time.

A pedestrian survey of the direct APE was conducted on February 2, 2026, by a qualified archaeologist meeting the Secretary of the Interior's Professional Qualification Standards. No archaeological resources or cultural materials were identified during the survey. An intensive-level survey for historic-age properties within the indirect APE was conducted on February 11, 2026, by a qualified architectural historian meeting the Secretary of the Interior's Professional Qualification Standards. Five adjacent properties over 45 years of age were evaluated and determined not eligible for listing in the National Register of Historic Places (NRHP) under Criteria A-D.

A search of the California Native American Heritage Commission (NAHC) Sacred Lands File indicated that the APE is negative for Native American cultural resources. The NAHC provided a list of tribes traditionally and culturally affiliated with the project area. On January 28, 2026, the County sent Section 106 consultation letters to Native American contacts identified by the NAHC. Two Tribes responded requesting consultation. Despite good-faith efforts, one Tribe did not respond to scheduling requests and the other indicated it would not be able to meet in a timely manner, so the County proceeded with Section 106 review while keeping consultation open.

No historic properties have been identified in the APE. Implementation of MM-CUL-1 and MM-CUL-2 would avoid potential impacts related to the inadvertent discovery of archaeological resources or human remains during ground-disturbing construction activities. Therefore, the County made a finding of "No Historic Properties Affected" under 36 CFR §800.4(d)(1).

The County sent a letter to the SHPO on May 7, 2026, requesting concurrence with its finding of No Historic Properties Affected. SHPO responded on June 1, 2026, with no objection. Therefore, the project is in compliance with the NHPA

See Attachments 11, 12, and 13.

Remember to provide all documentation that justifies your National Register Status determination and recommendations along with this worksheet.

Noise

OMB No. 2506-0177
(exp. 7/31/2028)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Noise (EA Level Reviews) – PARTNER

HUD Exchange Noise Abatement and Control Page

1. **What activities does your project involve? Check all that apply:**

☒ New construction for residential use

NOTE: HUD assistance to new construction projects is generally prohibited if they are located in an Unacceptable zone, and HUD discourages assistance for new construction projects in Normally Unacceptable zones. See 24 CFR 51.101(a)(3) for further details.
→ *Continue to Question 2.*

☐ Rehabilitation of an existing residential property

NOTE: For major or substantial rehabilitation in Normally Unacceptable zones, HUD encourages mitigation to reduce levels to acceptable compliance standards. For major rehabilitation in Unacceptable zones, HUD strongly encourages mitigation to reduce levels to acceptable compliance standards. See 24 CFR 51 Subpart B for further details.
→ *Continue to Question 2.*

☐ None of the above

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

2. **Complete the Preliminary Screening to identify potential noise generators in the vicinity (1000' from a major road, 3000' from a railroad, or 15 miles from an airport).**
Indicate the findings of the Preliminary Screening below:

☐ There are no noise generators found within the threshold distances above.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide a map showing the location of the project relative to any noise generators.*

☒ Noise generators were found within the threshold distances.

→ *Continue to Question 3.*

3. **Complete the Noise Assessment Guidelines to quantify the noise exposure. Indicate the findings of the Noise Assessment below:**

☐ Acceptable (65 decibels or less; the ceiling may be shifted to 70 decibels in circumstances described in §24 CFR 51.105(a))

Indicate noise level here: Click here to enter text.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide noise analysis, including noise level and data used to complete the analysis.*

☒ Normally Unacceptable: (Above 65 decibels but not exceeding 75 decibels; the floor may be shifted to 70 decibels in circumstances described in 24 CFR 51.105(a))

Indicate noise level here: The exterior noise levels at NAL1 and NAL3 (the southwestern and northwestern façades of the proposed building) would be 69 dBA DNL and 68 dBA DNL, respectively.

If project is rehabilitation:

→ *Continue to Question 4. Provide noise analysis, including noise level and data used to complete the analysis.*

If project is new construction:

Is the project in a largely undeveloped area[1]?

☒ No

☐ Yes → ***The project requires completion of an Environmental Impact Statement (EIS) pursuant to 51.104(b)(1)(i).***

→ *Continue to Question 4. Provide noise analysis, including noise level and data used to complete the analysis.*

☐ Unacceptable: (Above 75 decibels)

Indicate noise level here: Click here to enter text.

If project is rehabilitation:

HUD strongly encourages conversion of noise-exposed sites to land uses compatible with high noise levels. Consider converting this property to a non-residential use compatible with high noise levels.

→ *Continue to Question 4. Provide noise analysis, including noise level and data used to complete the analysis, and any other relevant information.*

If project is new construction:

The project requires completion of an Environmental Impact Statement (EIS) pursuant to 51.104(b)(1)(i). *Work with HUD or the RE to either complete an EIS or obtain a waiver signed by the appropriate authority.*

→ *Continue to Question 4.*

4. **HUD strongly encourages mitigation be used to eliminate adverse noise impacts. Work with the RE/HUD on the development of the mitigation measures that must be implemented to mitigate for the impact or effect, including the timeline for implementation.**

☐ Mitigation as follows will be implemented:

Click here to enter text.

[1] A largely undeveloped area means the area within 2 miles of the project site is less than 50 percent developed with urban uses and does not have water and sewer capacity to serve the project.

→ *Provide drawings, specifications, and other materials as needed to describe the project's noise mitigation measures.*
Continue to the Worksheet Summary.

☒ No mitigation is necessary.

Explain why mitigation will not be made here:

All residential units would include HVAC systems to allow for a "windows closed" condition. Typical new construction with windows closed provides approximately 25 dB of exterior-to-interior noise reduction. With this attenuation, interior noise levels at all modeled locations would be between 35 and 36 dBA DNL, which is below HUD's 45 dBA DNL interior noise standard.

→ *Continue to the Worksheet Summary.*

Worksheet Summary

Dudek prepared a Noise Technical Memorandum in March 2026 to evaluate the project's consistency with HUD noise standards. The primary noise source in the Project vicinity is motor vehicle traffic. The façades and outdoor use areas of the proposed residential units would face Berry Street to the west and Imperial Highway to the south. The I-57 freeway is approximately 7,500 feet away and is therefore not considered in the traffic noise analysis. The nearest airport, Fullerton Municipal Airport, is located approximately 6 miles away. Based upon the Airport Environs Land Use Plan for Fullerton Municipal Airport (ALUC 2019), the Project site is located approximately 5 miles northeast of the airport's 60 dB CNEL noise contour. Thus, noise from the airport would have a negligible contribution to the on-site noise environment. While a Union Pacific Railroad Company railroad spur is located approximately 0.1 miles north of the site, this segment is no longer active and is therefore not considered in the noise analysis.

Noise levels were modeled at four noise assessment locations (NAL) near the project site. Results indicated that noise levels would exceed the HUD exterior noise standard of 65 dBA DNL at NAL1 and NAL3, which are closest to both Berry Street to the west and Imperial Highway to the south, the primary sources of traffic noise in the project area. NAL1 and NAL3 represent the exposure from traffic noise along the development's southwestern and northwestern facades and have an ambient noise level of 69 and 68 dBA DNL, respectively. Noise levels at NAL2, which is representative of the fifth-floor outdoor patio, initially exceeded HUD's exterior noise standard. However, ambient noise levels at the outdoor patio would be partially attenuated by it's distance from Berry Street (the patio would be approximately 50 feet higher than vehicle traffic) and the proposed development's western façade, which obstructs direct line-of-sight between the patio and Berry Street. HUD's Barrier Performance Module was used to estimate the impact of partial barrier attenuation on ambient noise levels at the outdoor patio. The noise attenuation provided by the partial barrier was estimated to be approximately 4.5 dBA. As a result, traffic noise exposure at NAL2 would be 64.5 dBA DNL, below HUD's exterior noise threshold. Ambient noise was lowest at NAL4, representative of the proposed building's northern façade along Mercury Lane, where noise levels would be 61 dBA DNL.

Typical new construction of multi-family homes with windows closed provides a minimum of 25 dB exterior to interior noise reduction. To derive the anticipated noise reduction at each representative receiver, the composite transmission loss per sound transmission class (STC) window rating was calculated using provided residential unit and window dimensions (feet), and assuming a standard, non-upgraded exterior wall STC rating of 35 and a standard, non-upgraded window STC rating of 25.

The exterior noise levels at NAL1 and NAL3 (the southwestern and northwestern façades of the proposed building) would be 69 dBA DNL and 68 dBA DNL, respectively, which are considered normally unacceptable. All residential units would include HVAC systems to allow for a "windows closed" condition. Typical new construction with windows closed provides approximately 25 dB of exterior-to-

interior noise reduction. With this attenuation, interior noise levels at all modeled locations would be between 35 and 36 dBA DNL, which is below HUD's 45 dBA DNL interior noise standard. Although the exterior noise levels at NAL1 and NAL3 exceed HUD's exterior noise standard, there are no exterior noise-sensitive uses at those locations, and the exterior-to-interior noise attenuation would be sufficient to meet HUD's interior noise standard for the affected units and no mitigation is required. Therefore, the project is in compliance with 24 CFR Part 51, Subpart B.

See Attachment 14.

Sole Source Aquifers

OMB No. 2506-0177
(exp. 7/31/2028)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Sole Source Aquifers (CEST and EA) - PARTNER

HUD Exchange Sole Source Aquifers Page

1. **Is the project located on a sole source aquifer (SSA)[1]?**
   ☒No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide documentation used to make your determination, such as a map of your project or jurisdiction in relation to the nearest SSA.*

   ☐Yes → *Continue to Question 2.*

2. **Does the project consist solely of acquisition, leasing, or rehabilitation of an existing building(s)?**
   ☐Yes → *The review is in compliance with this section. Continue to the Worksheet Summary below.*

   ☐No → *Continue to Question 3.*

3. **Does your region have a memorandum of understanding (MOU) or other working agreement with EPA for HUD projects impacting a sole source aquifer?**
   Contact your Field or Regional Environmental Officer or visit the HUD webpage at the link above to determine if an MOU or agreement exists in your area.
   ☐Yes → *Continue to Question 4.*

   ☐No → *Continue to Question 5.*

4. **Does your MOU or working agreement exclude your project from further review?**
   ☐Yes → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide documentation used to make your determination and document where your project fits within the MOU or agreement.*

   ☐No → *Continue to Question 5.*

5. **Will the proposed project contaminate the aquifer and create a significant hazard to public health?**
   Consult with your Regional EPA Office. Your consultation request should include detailed information about your proposed project and its relationship to the aquifer and associated streamflow source area. EPA will also want to know about water, storm water and waste water at the proposed project. Follow

[1] A sole source aquifer is defined as an aquifer that supplies at least 50 percent of the drinking water consumed in the area overlying the aquifer. This includes streamflow source areas, which are upstream areas of losing streams that flow into the recharge area.

your MOU or working agreement or contact your Regional EPA office for specific information you may need to provide. EPA may request additional information if impacts to the aquifer are questionable after this information is submitted for review.

☐No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide your correspondence with the EPA and all documents used to make your determination*.

☐Yes → *The RE/HUD will work with EPA to develop mitigation measures. If mitigation measures are approved, attach correspondence with EPA and include the mitigation measures in your environmental review documents and project contracts. If EPA determines that the project continues to pose a significant risk to the aquifer, federal financial assistance must be denied. Continue to Question 6.*

Worksheet Summary

The project site is not located on a sole source aquifer (SSA). The nearest SSA is the Campo/Cottonwood Creek Aquifer located approximately 105 miles to the south in San Diego County at the border of California and Mexico. Therefore, the project is in compliance with the Safe Drinking Water Act of 1974.

See Attachment 15.

Wetlands

OMB No. 2506-0177

☐ 8-Step Process is inapplicable per 55.12(c).

Provide the applicable citation at 24 CFR 55.12(c) here.

Click here to enter text.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to Worksheet Summary.*

Worksheet Summary

No wetlands are located on the project site. According to the USFWS's National Wetlands Inventory (NWI), the nearest mapped wetland is the Brea Canyon Channel, a riverine feature located approximately 0.2 miles east of the project site. The Brea Canyon Channel is a concrete flood control channel that begins its course near the intersection of S. Diamond Bar Blvd. and Pathfinder Rd. in Diamond Bar.

The project site does not contain any mapped wetlands, and no wetland resources would be directly or indirectly impacted by the proposed development. Therefore, the project is in compliance with Executive Order 11990.

See Attachment 16.

Wild and Scenic Rivers

OMB No. 2506-0177
(exp. 7/31/2028)

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those "Partners" (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Wild and Scenic Rivers (CEST and EA) – PARTNER

HUD Exchange Wild and Scenic Rivers Page

1. Is your project within proximity of a Wild and Scenic River, Study River, or Nationwide Rivers Inventory River?

☒ No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Provide documentation used to make your determination.*

☐ Yes → *Continue to Question 2.*

2. Could the project do *any* of the following?

- Have a direct and adverse effect within Wild and Scenic River Boundaries,
- Invade the area or unreasonably diminish the river outside Wild and Scenic River Boundaries, or
- Have an adverse effect on the natural, cultural, and/or recreational values of a NRI segment.

Consult with the appropriate federal/state/local/tribal Managing Agency(s), pursuant to Section 7 of the Act, to determine if the proposed project may have an adverse effect on a Wild & Scenic River or a Study River and, if so, to determine the appropriate avoidance or mitigation measures.

Select one:

☐ The Managing Agency has concurred that the proposed project will not alter, directly, or indirectly, any of the characteristics that qualifies or potentially qualifies the river for inclusion in the NWSRS.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Provide documentation of the consultation (including the Managing Agency's concurrence) and any other documentation used to make your determination.*

☐ The Managing Agency was consulted and the proposed project may alter, directly, or indirectly, any of the characteristics that qualifies or potentially qualifies the river for inclusion in the NWSRS.

→ *The RE/HUD must work with the Managing Agency to identify mitigation measures to mitigate the impact or effect of the project on the river.*

Worksheet Summary

The project site is not within proximity of a NWSRS river. The closest NWSRS river to the project site is Deep Creek, approximately 50 miles northeast of the project site. Therefore, the project is in compliance with the Wild and Scenic Rivers Act. See Attachment 17.
